HARING A DRINK—Ivor Richard, chairman of the conference on Rhodesia to be held in Geneva, talking with Bishop Abel Muzorewa, one of the Rhodesian black leaders.

Seeking to Unite Rhodesia Factions

Briton Meets Muzorewa, Sithole

By John F. Burns

GENEVA, Oct. 26 (NYT).—Efforts to unite Rhodesia's factionridden black nationalists were under way here today as British diplomat Ivor Richard continued his quest for flexibility in the opposed positions of the white and black delegations to the conference on a transition to black rule in Rhodesia. The conference opens here Thursday.

As African diplomats worked to bridge the differences between the nationalists, Mr. Richard, chairman of the conference, held his first meetings with Bishop Abel Muzorewa and the Rev. Ndabaningi Sithole, the nationalist leaders who have been excluded from the seemingly powerful alliance struck by Joshua Nkomo and Robert Mugabe.

The drive for unity among the nationalists, led by Sir Harold Wilson, chairman of the Organization of African Unity's council of ministers, is aimed at removing one of the major obstacles to success at the conference.

"I think I've been very much encouraged by what's going on," Bishop Muzorewa, a rival of Mr. Nkomo in the leadership of the African National Council, told reporters after his 30-minute meeting with Mr. Richard. "I believe we are going to get a settlement."

Mr. Sithole, who disputes Mr. Mugabe's claim to the leadership of the Zimbabwe African National Liberation, one of two nationalist groups that formed the ANC in 1963 to end the factional strife 10 years ago, said that his 30-minute talk with Mr. Richard had been conducted in a constructive spirit.

Mr. Richard, the British ambassador to the United Nations, emerged later and announced that the conference would continue as scheduled Thursday afternoon.

"We have had a very good day," he said. "I have had some very instructive talks both with Bishop Muzorewa and Mr. Sithole."

Patriotic Front

Mr. Richard's optimism came as representatives of Bishop Muzorewa and Mr. Sithole held informal discussions with delegates of the Nkomo and Mugabe group. Mr. Nkomo and Mr. Mugabe have formed a "patriotic front" for the conference.

Bishop Muzorewa, who is widely credited with having a strong personal following in Rhodesia but little or no influence with the guerrilla forces that are conducting a war against the white minority government of Prime Minister Ian Smith, spoke optimistically of the prospects for unity.

"We haven't come to reach an agreement yet, but we are reaching an understanding," he said. Diplomats feared that disunity among the nationalists could act as a barrier to compromise at the conference, since concessions by one group might lead to criticism by others. Since preparations for the conference began, the various leaders have vied with each other in staking out uncompromising positions, each of them rejecting the plan of U.S. Secretary of State Henry Kissinger out of hand.

This was still the case today, when Bishop Muzorewa answered "definitely not" when asked if he would accept the plan as a basis for negotiation.

The Kissinger plan, drawn up during the American's southern Africa shuttle last month, provides for a strong white role in the transitional government that would make way for majority rule within two years. Nationalist factions focus on the prominent white role that it engages.

Mr. Smith, who took the day off today to visit friends outside Geneva, claims he accepted the plan on Mr. Kissinger's assurance that it had the support of the "front-line" African Presidents, who back the nationalists. He has said he is prepared to negotiate minor details of the proposals, but not the leading role that the plan guarantees for whites.

At face value, the positions seem to presage an impasse. However, sources in the nationalist delegations noted today that none of the nationalist leaders looks forward to leaving Geneva empty-handed, an outcome that would be bound to disappoint Rhodesia's 6 million blacks. The nationalists, these sources said, recognize that the alternative to success here is an escalation of the guerrilla war, in which many more blacks are dying than whites.

In Bid to Save Kissinger Plan

U.S. Pressing Black Presidents To Curb Extremism at Geneva

By Bernard Gwertzman

WASHINGTON, Oct. 26 (NYT).—The United States has urged key black African presidents to use their influence to prevent black Rhodesian nationalists from making such extreme demands that the Geneva conference collapses and the Anglo-American plan for a Rhodesian solution is scuttled.

In interviews in recent days with well-placed officials and diplomats, it was learned that the Ford administration believes that the African presidents, such as Julius Nyerere of Tanzania and Kenneth Kaunda of Zambia, have at least some responsibility for insuring the success of the Geneva conference since they did not reject—and privately encouraged—the five-point plan.

The Kissinger plan, as it is commonly called, was made public last month by Ian Smith, the Prime Minister in the white-minority government of Rhodesia, after Secretary of State Henry Kissinger's mission to Africa.

Mr. Smith has contended—and he repeated this view yesterday—that the five-point plan was a "package" he accepted during his discussions in Pretoria with Mr. Kissinger and that he would refuse to accept any major alteration in it.

Several black nationalist leaders have rejected that view and insisted that everything was negotiable and that the Kissinger plan represents only a starting point.

One leader, Robert Mugabe, said he was not consulted about the five points and that the plan is "completely rejected" by his guerrillas outside Rhodesia.

Mr. Smith said yesterday that Mr. Kissinger might have to come to Geneva to settle the dispute. But Mr. Kissinger, while playing an active behind-the-scenes role in contacting various parties to the negotiations, has no intention of going to Geneva and upstaging Ivor Richard, the British chairman of the conference. If the meeting collapses, Mr. Kissinger may become more active, officials said, and may possibly make another trip to Africa.

Actually, despite the intense rhetoric, all the black nationalists seem to agree on four of the five points. They are: majority rule within two years, the idea of a conference to set up an interim government, enactment of special legislation in Britain and Rhodesia to make majority rule legal and the lifting of all sanctions against Rhodesia and a cessation of guerrilla war once

At Independence Ceremony

Transkei's Chief Matanzima Makes Bid for Recognition

By Jim Hoagland

UMTATA, Transkei, Oct. 26 (WP).—Acting in defiance of black African governments and much of world opinion, Chief Kaiser Matanzima declared the Xhosa tribal homeland independent from South Africa early today.

The South African government encouraged the tribal leader's proclamation and helped stage in the Transkei capital here a midnight ceremony modeled to resemble the ceremonies for the handing over of power held throughout the continent during the last two decades.

Speaking for the first time as Prime Minister, Mr. Matanzima appealed for recognition from abroad for the Transkei and pledged to oppose actively "the racial discrimination which has for centuries typified the so-called South African way of life."

The Organization of African Unity has already denounced the independence ceremony as a sham and called Mr. Matanzima a South African puppet helping Pretoria justify the denial of political rights to the country's black majority.

South Africa is the only country to recognize formally the Transkei's claim to independence. Embassies in Pretoria declined to send representatives to the ceremony, and the United States declared last week it would not recognize the Transkei.

The Transkei has had limited self-government since 1963 and this morning's lowering of the South African flag and the raising of an ocher, white and green-striped Transkei national banner is not likely to bring major political changes here immediately.

A crowd of 25,000 Africans and a handful of whites braved an early evening downpour to watch tribal dancing and marching bands on a muddy soccer field.

At midnight, a 101-gun salute shook this farming town of about 25,000 residents. Mr. Matanzima, in black tie, stood stiffly erect as the Transkei national anthem was played.

South Africa will retain effective control over defense, foreign affairs and internal security for the nation, which has about 1.8 million black and 10,000 white residents. The area is economically dependent on its links to South Africa.

But Mr. Matanzima, 51, now can abolish locally the strict South African segregation laws, and he indicated in his speech here that he would use his position as a platform from which to urge more substantial change in South Africa's race laws.

Moreover, the proclamation of independence, coinciding with increased black pressure on South Africa's borders and continuing racial strife in its cities, provides the first serious test of

Callaghan Berated in Commons

Over Remarks On Pound, NATO

LONDON, Oct. 26 (Reuters).—Prime Minister James Callaghan came under strong attack in Parliament today for implying that economic difficulties could oblige Britain to review its commitment to NATO.

"Were you really serious," demanded Conservative opposition leader Margaret Thatcher, "in threatening to pull our troops out of NATO if you did not get more of other people's money on your own terms?"

She was referring to a television interview given by the Prime Minister last night following yesterday's record one-day plunge of $0.05 in the value of the pound.

In today's dealings, the pound picked up at first but ended the session at $1.905—about a third of a cent down on the day.

Angry shouts were hurled across the House of Commons as Mr. Callaghan explained his television remarks, saying: "I was discussing how Britain's influence could be maintained in Central Europe, not removed."

Pound's Reserve Role

The Prime Minister reiterated his view that the pound's role as an international reserve currency has aggravated Britain's problems.

Mr. Callaghan had made it clear that he thought the reserve role should somehow be shared by countries like West Germany, the United States and France. In the same television interview he mentioned Britain's troops in West Germany and said it would be a serious matter if Britain had to choose between continuing its commitments or putting its own economic situation first.

He told the Commons: "If they [the West Germans] wish as they do to preserve the influence that Britain has politically, and which they value very much, and if they value the contribution Britain has to make, they should have regard to our problems in relation to our overhang sterling balances."

Mrs. Thatcher told the Prime Minister: "Not only have you debauched the currency, you have debased Britain. Our only hope so long as you are there is one

Ireland's Election Is Set for Nov. 24

DUBLIN, Oct. 26 (Reuters).—The Irish government today selected Nov. 24 as the date for the election of a successor to Cearbhall O Dalaigh, whose resignation as president created a political storm last week.

Neither the Fine Gael-Labor coalition government nor the opposition Fianna Fail party has yet chosen a candidate, but the names of their nominees are expected to be announced before the weekend. The Fianna Fail candidate is expected to be the favorite.

Mr. O Dalaigh quit Friday after the government had failed to dismiss Defense Minister Patrick Donegan, who had publicly denounced as a "thundering disgrace" Mr. O Dalaigh's opposition to tough laws against terrorism.

FORGOTTEN MAN—Four years ago 47 million Americans voted Richard Nixon into a second term in the White House. Monday he was photographed driving a golf cart on a public course, Shoreclffs, at San Clemente, Calif. He plays three or four times a week.

New Approach in Key States

Ford Using TV 'Small Talk' To Enthuse Vast Audiences

By R.W. Apple Jr.

SAN DIEGO, Oct. 26 (NYT).—The Ford high command thinks it has found the big megaphone that just might produce a victory in the final days of the campaign.

It is the answer of President Ford's strategists to a difficult question: How do you expose to millions of undecided voters a candidate who performs well before small groups but badly on the stump, without losing the sis, boom, bah! of the live campaign and without making it all look plastic and insincere?

It is a series of half-hour television programs—each a pseudo-documentary showing Mr. Ford's campaign day followed by a casual chat between the President and former baseball catcher Joe Garagiola, now a sports announcer—broadcast over statewide television networks. The first was in California Sunday night. Others will follow in Illinois and Pennsylvania where Mr. Ford was campaigning today, and Ohio, New York and probably Texas. In each case, the program will coincide with a Ford visit to a pivotal state.

To win, his managers believe, the President must capture at least four of the six states as well as New Jersey, most of whose population will be within reach of the New York and Pennsylvania programs. They are pinning much of their mounting hope on the traveling television extravaganza.

Restraint Is Used

Stuart Spencer, the Ford campaign manager, who told the President not long ago that Mr. Ford was an inadequate campaigner, said the half-hour programs provided "the most intelligent use of the man's abilities and a maximum restraint on his liabilities."

John Deardourff, Mr. Ford's television adviser, who developed the idea for the programs, said they "get us out of the almost impossible-to-control situation of the stump speech, which inevitably leads to the kind of strident anti-Carter stuff we don't want, and into a relaxed, informal, positive atmosphere that works well."

The time required to prepare

(Continued on Page 6, Col. 6)

Carter Says Ford Approved A 'Slanderous Attack' on Him

COLUMBIA, S.C., Oct. 26 (AP).—Jimmy Carter, opening his stretch drive for the White House, today accused President Ford of authorizing distribution of a "scandal sheet" that makes "a slanderous attack on me and my family." Mr. Carter called it sordid and said Mr. Ford should be ashamed.

The publication, a four-page paper called "Heartland," was put out by the political division of the Ford campaign in Washington, D.C. It has a cartoon on its cover showing Mr. Carter in a church pulpit holding up a Bible and a copy of Playboy magazine.

The caption says, "All things to all people."

The head of the Ford campaign in Iowa said some parts of the publication are objectionable to him and added, "I don't agree with it. It's not proper campaign tactics."

Mr. Carter talked with reporters in Albany, Ga., before flying to Columbia, S.C., for a rally at the South Carolina Statehouse. It was his first stop on a seven-day journey designed to stir up the party faithful and get out the vote.

The Democratic nominee was first asked about "Heartland" in an interview with the CBS "Morning News." He called it a "very personal attack against me and my family."

'Heartland' Defended

In Washington, Ford-campaign press spokesman Jack Horner disagreed with Mr. Carter's characterization of the publication and said Mr. Ford probably had nothing to do with authorizing its distribution.

"It comes as no surprise that Jimmy Carter is upset by this mailing, because it vividly highlights his inconsistencies on the issues," Mr. Horner said.

"We say Jimmy Carter has tried to be all things to all people, and we believe the American people have the right to know where he stands, and his direct-mail piece attempts to do just that. Nothing in this was taken out of context from published reports or misrepresented the facts in any way."

Another Ford campaign spokesman said about 2 million copies of "Heartland" were mailed out 10 days ago to voters in Pennsylvania, Ohio, Virginia, Kentucky, Tennessee, Indiana, Illinois, Iowa, Missouri, Oklahoma, Texas, Wisconsin, North Dakota, South Dakota, Florida, Oregon and Washington.

At the South Carolina rally, Mr. Carter declared, "We need to have a tough, competent, muscular fighting force, and we're going to have it when I become president, and you can count on that."

Mr. Carter, reminding the crowd that he is a former naval officer, said that, while providing such a defense, the United States also could save money.

He said that standardized weapons used by the forces of the North Atlantic Treaty Organization could save the United States $2 billion a year, but he did not say what this figure was based on.

Mr. Carter made a plea for supporters to get out the vote.

"There's a deep damage done to our country when the rest of the world sees that one half of our people don't care enough to vote," he said.

Mr. Carter was to spend the rest of the day in Illinois, a key state with 27 electoral votes. Independent polls there indicate Mr. Ford has a slight edge, although a Carter poll shows the Democrat is leading.

On his arrival in South Carolina, where his staff says he has a comfortable lead despite newspaper polls indicating the race is close, Mr. Carter said that if the Soviet Union invaded Yugoslavia, he, as president,

(Continued on Page 6, Col. 8)

British Bookie Favors Carter

LONDON, Oct. 26 (NYT).—Ladbroke's, one of Britain's biggest bookmakers, today made Democratic presidential candidate Jimmy Carter a 1-to-3 favorite to win the U.S. presidential election. The odds on President Ford were quoted at 2 to 1.

Ladbroke's has taken the equivalent of more than $1 million in bets on the presidential election.

Syria, PLO Reportedly End Feud

Christians Fear Loss of Support

By Henry Tanner

BEIRUT, Oct. 26 (NYT).—Syria and the Palestine Liberation Organization, which 10 days ago fought a bloody battle in the mountains above Beirut, today were reported to have resumed some of their previous military cooperation in south Lebanon, an area which Israel wants to keep free of Palestinian guerrillas.

Syria has agreed to reopen the so-called Arafat Trail, the traditional supply route from Syria to the Palestinian forces in southern Lebanon, according to Lebanese rightist sources.

The Arafat Trail also is the northern access road from Syrian-occupied eastern Lebanon to the Arqoub, the slope of Mount Hermon, which was the main staging area for guerrilla attacks on Israel before the Lebanese war.

Rightist Christian forces, using Israeli weapons, blocked the more direct access road to the Arqoub from the west when they captured Marjayoun, the key garrison town about seven miles north of the Israeli border, a week ago.

Summit in Cairo

Palestinian officials indirectly confirmed the reports of Syrian-Palestinian cooperation regarding the south. They said that Yassir Arafat raised the issue in Damascus on his way to the Cairo summit and received a promise of support from President Hafez al-Assad.

The accommodation between Syria and the Palestinians has taken hold also in other ways.

Palestinians leaving and entering Lebanon are now again traveling through Damascus, with permission from Syrian authorities. For the last six months, most Palestinians living in Lebanon did not dare to go to Syria for fear of being detained and questioned about their relations with the PLO.

Surprise to Rightists

The speed and extent of the Syrian-Palestinian accommodation has come as a surprise to the Lebanese rightist Christians.

Sources in Ashrafiyeh, the Christian center of East Beirut, said they feared that the alliance between Syrian and Christian leaders had now run its course and that the Christians could no longer hope to get Syrian support.

Men who a few weeks ago said that the "liberation of all of Lebanon" by rightist Christian militias had started, now are thinking again in terms of holding on to the territory they have. They expect a long de-facto partition during which Christian and Moslem communities will live apart as they do now.

They complained that Syria did not support the Christian militias when they attacked Aley,

(Continued on Page 2, Col. 4)

Arab Leaders Fail to Agree On Makeup of Peace Force

CAIRO, Oct. 26 (AP).—Arab leaders endorsed a peace plan for Lebanon in a summit conference which ended here today but failed to set up a peace-keeping force without which the plan has little chances of success.

Arab League Secretary General Mahmoud Riad told correspondents that the force, when it is set up, will be made up of troops from Syria, North Yemen, Southern Yemen, the United Arab Emirates, Saudi Arabia, Sudan, Libya and the Palestine Liberation Organization.

But the key question of the proportion of those troops was left unresolved, Mr. Riad indicated.

"It will be up to Lebanese President Sarkis to determine how many troops each country sends, Mr. Riad said. This meant that the summit was unable to iron out differences and allow the force to get under way speedily.

The leaders originally were to have wound up their two-day meeting this morning with a routine endorsement of details worked out by their foreign ministers.

But Iraq, Southern Yemen, Algeria and the PLO delegations refused to go along with provisions for the force included in a peace plan reached in Riyadh, last week.

Private Meetings

The foreign ministers met for more than six hours last night and today without reaching agreement, conference sources said. They transmitted the problems up to their leaders, who held a round of private meetings before today's plenary session.

As envisioned in Riyadh, the peace force was to include 30,000 men with heavy weapons to separate the various factions in the Lebanese civil war. It was understood that Syria, which has 21,000 intervention troops and 500 tanks in Lebanon, would provide most of the force.

Iraq, Syria's longtime rival, insisted that all Syrian troops must be pulled out. The PLO, sources said, demanded that Syria contribute no more than 10,000 troops.

Trying to break the deadlock, the sources said, guerrilla leader Yassir Arafat asked President Anwar Sadat to send Egyptian troops to counterbalance the Syrians. Mr. Sadat refused, the sources said.

Associated Press.

Premier Kaiser Matanzima at Transkei ceremony.

Confidence Vote Is Won by Rabin

JERUSALEM, Oct. 26 (AP).—Prime Minister Yitzhak Rabin's government today defeated a parliamentary motion of no-confidence prompted by charges of financial corruption.

The motion, presented by the Likud opposition group, was defeated by 57 votes to 38, with 4 abstentions.

Likud speakers urged Mr. Rabin to resign in view of financial scandals and accused him of being in constant dispute with his top Cabinet colleagues. Asher Yadlin, one of Israel's top financial figures, was arrested on suspicion of fraud Oct. 18. Mr. Yadlin was arrested soon after the government had picked him to head the Bank of Israel.

Soviet Party Panel Adjourns; Shifts Minor Despite Rumors

By Christopher S. Wren

MOSCOW, Oct. 26 (NYT).—The Central Committee of the Soviet Communist party today wound up a two-day closed-door policy session with only minor party cadre changes that left the ranks of the nation's senior leadership intact.

Despite a flurry of prior speculation here that some shifts might tip off the start of a Kremlin succession pattern, the only significant promotion was that of Yakov Ryabov, the party secretary of the industrial region of Sverdlovsk in the Urals. Mr. Ryabov, 48, a former engineer, was brought into the Kremlin Secretariat, becoming its youngest ranking member.

No explanation was given for the move. But in view of his experience with heavy industry in Sverdlovsk, it was thought that Mr. Ryabov was being prepared to take on the supervision of the Soviet military-industrial complex that Dmitri Ustinov had handled for many years before he was named the minister of defense last spring.

In a subtle way, Mr. Ryabov's appointment confirms the strong patronage position of party chief Leonid Brezhnev in Kremlin politics. Mr. Ryabov worked his way up through the Sverdlovsk party apparatus once headed by Andrei Kirilenko, now Mr. Brezhnev's deputy and a full Politburo member.

No other career shifts emerged from the meeting of the Central Committee, which almost invariably considers such matters. The dominant message remained one of stability at the Politburo, whose 15 full members now average just under 66 years of age. Among the six candidates, or nonvoting, members, the average age is 60.

Mr. Kirilenko expressed the philosophy prevailing at the top when he recently received a second award of Hero of Socialist Labor following his 70th brithday last month. "It is good that in our country this is considered only middle age," Mr. Kirilenko said.

The recent illness of Premier Alexei Kosygin, reportedly precipitated by an accident while swimming last summer, had led to rumors in Soviet circles that he might step down or replace President Nikolai Podgorny, whose post is less demanding.

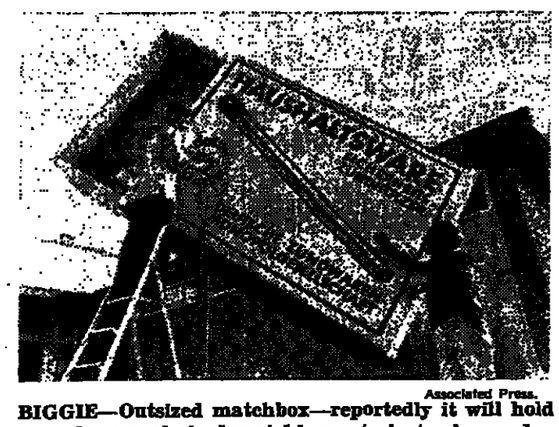
Mr. Kosygin's health has since improved, according to Soviet sources, and last week he greeted an arriving Mongolian party delegation. But he is said to be still working only a few hours a day, with the rest of his workload presumably assumed by First Deputy Premiers Kirill Mazurov and Nikolai Tikhonov.

Surprise to Some

In view of this, some diplomats were surprised that Mr. Tikhonov, who was promoted to his post last month, was not given a place on the Politburo at the current Central Committee session. Mr. Mazurov is already a full member.

Three nonvoting members of the Central Committee were also promoted to full membership today, apparently in keeping with the Kremlin's campaign to upgrade Soviet agriculture. The most prominent was Vladimir Karlov, who assumed the daily supervision of the party's Agricultural Department this year, releasing Fyodor Kulakov for broader Politburo responsibilities.

The others were Konstantin Belyak, who heads a ministry for producing machinery for cattle breeding and fodder production, and Fyodor Morgun, party secretary of the largely agricultural Poltava region of the Ukraine.



The Central Committee also approved the 1976-80 five-year plan that Mr. Brezhnev touched upon in a lengthy speech yesterday. The plan, which was announced in draft form late last year, will be given rubber-stamp endorsement at the Supreme Soviet tomorrow.

In his speech, Mr. Brezhnev indicated that most production targets had been fixed near the upper level of the margins set out in the draft plan, suggesting the Kremlin's confidence in continued economic growth.

Ex-SS Captain Tried For Killing 186 Poles

FRANKFURT, Oct. 26 (UPI).—Former Nazi SS Captain Friedrich Paulus went on trial today for participating in the murder of 186 Poles 26 years ago.

Mr. Paulus, 70, is charged with killing 159 Polish men and 27 women and children in German-occupied Poland in reprisal for the slaying of a German family and a German blacksmith. On trial in Hamburg on the same charges are former SS Captain Anton Binner, 70, and SS Master Sergeant Herman Moebius, 67.

Foes in Commons Denounce Callaghan Threat of Pullback

(Continued from Page 1)

of debt and decay. The best thing you can do is to go."

'A Very Long Time'

Amid boos, Mr. Callaghan replied: "I promise you I am going to be here with this government for a very long time."

Mr. Callaghan's television remarks were widely construed as a warning to the Western world not to impose overly harsh conditions for the $3.9-billion loan which Britain is seeking from the International Monetary Fund. He appeared to suggest that IMF insistence on deflationary policies inside Britain could force this country to think again about the money it spends on maintaining 55,000 troops in West Germany.

Members of his Labor party's left wing applauded his stand.

While foreign-exchange dealers were digesting Mr. Callaghan's television remarks during the day, they were confronted with a new report—published in The Washington Post—that Britain might be asked to increase the Bank of England minimum lending rate from 15 per cent to a new high of 18 per cent. The report said that this could be a condition of obtaining the IMF loan.

A Little Strength

In the confused and nervous state of the foreign-exchange market, the Washington report appeared to lend the pound a little strength.

At one point the pound crept up to $1.6048, more than a cent better than the overnight price.

Some dealers blamed the setback late today on remarks by Labor MP Bryan Gould, who urged an immediate devaluation of the pound to $1.50.

Dealers reported a brisk rush from the pound into West German deutsche marks after Mr. Gould's statement.

Bonn Is Optimistic

BONN, Oct. 26 (Reuters).—The West German government said today that it expects the pound to climb to a level which corresponds to Britain's economic importance in the Western world.

Armin Gruenewald, Chancellor Helmut Schmidt's principal spokesman on economic and financial affairs, issued a statement repeating the view expressed earlier this month, by both the Chancellor and Finance Minister Hans Apel, that the pound is undervalued.

Syria, PLO Ending Feud

(Continued from Page 1)

the Palestinian mountain stronghold, from the Christian-held town of Khale, three weeks ago, and that 10 days later, when the Syrian Army itself attacked Aley through Bhamd Un, it did not want the help of the Christian militias.

Israeli Arms Support

Some rightist Christians in Ashrafiyeh also showed concern over the fact that Israeli military support for the Christian militias along the southern border had become too open and well known. This may lead to an estrangement between the Christian Lebanese and the conservative Arab governments that up till now have shown understanding for their cause, they said. Saudi Arabia is among these governments.

Among the persons that expressed these misgivings now were some that three months ago had spoken openly and with some relish about the first Israeli arms shipments that reached the Christian port of Junieh, north of Beirut.

The rightist Christians also fear a request for the stationing of Arab peace-keeping forces in their territory. Up till now, they have forbidden the Saudi and Sudanese contingents of the small peace-keeping force to take up positions on their side of the dividing line.

Israel Denies Soldiers Used

TEL AVIV, Oct. 26 (NYT).—Defense Minister Shimon Peres told the parliamentary Foreign Affairs and Security Committee in Jerusalem today that Israeli soldiers were not fighting in the Lebanese civil war. He denied reports that Israelis had fought alongside rightists in the recent capture of Moslem villages in southern Lebanon.

Significantly, there was no denial of recent unofficial reports that the rightists had received Sherman tanks, armored personnel carriers, mortars, automatic weapons and other infantry equipment from the Israelis and that tank crews and infantrymen had been trained in Israeli military camps.

22 Arrests in Boston During Bus Protest

BOSTON, Oct. 26 (AP).—Twenty-two protesters were arrested during a one-day anti-busing school boycott that included two attempted fire-bombings of integrated schools, authorities said.

Public schools opened quietly today, the day after a boycott of classes at South Boston High School and the turmoil that ended in the arrests.

'The World' Expands Its Role

S. African Black Paper a New Link to Whites

By Robin Wright

JOHANNESBURG, Oct. 26 (WP).—Six months ago their names were unknown even to fellow South Africans: Arthur Molefe, Moffat Zungu, Godwin Mohlomi, Willie Bokolo, Duma Ndhlovu.

But they are rapidly becoming well known for their courage, both as journalists covering the recent riots in South Africa's black townships and as prisoners of South African security police.

Since racial violence erupted last June, the five blacks—nicknamed "the riot squad"—have provided the core of news coverage for the World, South Africa's only daily newspaper for blacks and one of the continent's most highly rated publications.

They have also helped provide a crucial link between blacks and whites in South Africa—and a link with the outside world.

When whites were prohibited from visiting the sites of the unrest, the World's reporters provided nine-tenths of the news on the turmoil, also providing coverage for local white papers whose one or two blacks could not cover the entire story.

No New Leaders

When no new black leaders emerged from the youths behind the first riots in Soweto, Johannesburg's sprawling black township, the World provided insight and background in expanded editorial columns.

When foreign media wanted fresh news and local commentary on the disorders, many turned to the World—including television and radio stations from the Netherlands, the United States, Britain, Canada, Japan and West Germany; newspapers from North America, black Africa, Asia and Europe, and the major international wire services.

"The BBC was calling five times a day," recalled World editor Percy Qoboza. "I finally had to tell them I was also trying to run a newspaper."

The world puts out five editions a day, stressing, until recently, local issues—black businesses exploiting blacks, the timidity of African township administration and the high crime rate in black suburbs.

Editorial Autonomy

The World is owned by the white-run Argus newspaper chain, but obviously enjoys a large degree of editorial autonomy.

But the World evidently has paid a heavy price for its persistence in getting the story: the five reporters on the "riot squad" have been detained by police under South Africa's tough new Internal Security Act. All were arrested while on duty, according to Mr. Qoboza.

A total of 15 African journalists have been arrested since July under various security laws. Several are the blacks on white newspapers' staffs.

"The authorities are trying to cripple the World and intimidate those who remain," Mr. Qoboza charged. "The cream of our [13 Johannesburg] reporters have been cut off.

Soaring Circulation

"I can personally vouch for every one of those guys. They were never involved in anything besides their jobs—they couldn't afford to be doing anything else." Many believe that the government wanted to cut off such coverage during the last few months, and the World's soaring circulation, from an average of 105,000 to 175,000 daily, with 220,000 on big news days, is seen as the reason for the move. "A large share of the new readership is white," Mr. Qoboza claimed. "They want to know how we feel firsthand."

The World's growing influence is reflected in the number of times it has been quoted recently, both in the local and foreign press.

Although Afrikaner officials have accused the tabloid World of sensationalism, Mr. Qoboza—who spent last year at Harvard on a Nieman fellowship—insisted: "We are not raving fanatics, as certain people in the South African press sometimes suggest. We do want to keep communication lines open. We know we are now talking to more whites than ever before, and I think we are accommodating them."

A white journalist on Johannesburg's liberal Rand Daily Mail agreed. "It is the only voice of credibility when it comes to black feelings," he said. "The white liberals can pour their hearts out on what needs to be done, but when it comes to what the Africans really think, the World is the only source to turn to."

New Awareness

The World has taken on a new, larger role in South Africa, reflecting the increasing political awareness of the country's 17.7 million Africans.

In recent months, the World has run a series of hard-hitting editorials against both blacks and whites on national topics. The newspaper:

- Condemned South African Prime Minister John Vorster for saying that there was no crisis in South Africa "despite the heavy evidence that polarization among the country's racial groups is reaching alarming proportions."
- Called for the resignation of the nine chiefs of South Africa's tribal reserves, or homelands. "We were angered by the actions of some homelands leaders who, instead of transforming the system from within, were, in fact, active and willing participants in the dangerous process of dismantling our fatherland into imaginary, indepen homelands," Mr. Qoboza said.
- Criticized Minister of Jus James Kruger for an "ox-wa mentality, which is delaying much-needed reforms in our ciety."

In Bid to Save Kissinger Plan

U.S. Pressing Black Presidents To Curb Extremism at Geneva

(Continued from Page 1)

the interim government is established.

What has caused the most debate about the Kissinger plan is point three. As read by Mr. Smith on Sept. 24, that point called for a two-tier interim government. The first would be a council of state, evenly divided between blacks and whites, with a white chairman. It would have general supervisory responsibilities.

The second is a council of ministers, with a majority of blacks and a black prime minister, but with the ministries of defense and law and order in white hands. The council of ministers would take action by a two-thirds vote and have day-to-day responsibility.

Privately, many black nationalists have said their main concern was the placing of the defense and law and order ministries in white hands and the assigning of the post of chairman of the council of state to a white.

Mr. Smith contends that Mr. Kissinger assured him that the black leaders had accepted the whole plan. The black leaders who have spoken about it have denied agreement to specific points.

Asked Sunday who was correct, Mr. Kissinger replied ambiguously: "I think everybody is telling the truth."

He said that Mr. Smith had "a few considerations" of his own, and that "the essence of the framework" of the plan had been checked with black leaders. He added, "Everybody has different constituencies to whom they must appeal in the process of reaching a settlement."

Chronology of Events

What happened, according to officials and diplomats, was this:

When Mr. Kissinger began his African diplomacy last spring, the British and Americans favored having the black African presidents put forward a plan similar to the eventual five-point document announced by Mr. Smith. But Mr. Nyerere, the unofficial spokesman for the so-called front-line presidents, refused to accept this idea, arguing that Mr. Smith would inevitably reject a plan proposed by black presidents.

Thus, when Mr. Kissinger left on his African trip last month, the intention was to get Mr. Smith to announce a plan which had the private approval of black leaders.

When Mr. Kissinger conferred with Mr. Smith in Pretoria on Sept. 19, the secretary discussed with him the five points, but the plan at that time did not include the white chairman of the council of state and the defense and law and order ministries remaining in white control.

Mr. Smith, during the eight hours of negotiations, insisted that without those concessions he would not be able to "sell" acceptance of majority rule in two years to his white supporters.

No Objections Heard

The next day, Mr. Kissinger read to Mr. Kaunda the five points, including the proposals sought by Mr. Smith, and on Sept. 21 he did the same with Mr. Nyerere. According to U.S. officials, they heard no objections from the black presidents and Mr. Smith was told to include the points, later to be controversial, in his speech.

But shortly afterward, the black presidents of Tanzania, Zambia, Mozambique, Botswana, and Angola refused to endorse the Smith speech and said that details would have to be worked out later.

Mr. Kissinger said Sunday that "there must be some room for negotiation" and that odds favored success "unless some radical elements take over the process and make demands that cannot be met."

Toll in Collision On Mississippi Is Raised to 100

LULING, La., Oct. 26 (AP).—The number of persons missing or dead in last week's ferry-tanker collision in the Mississippi River rose to 100 from 75 yesterday, and Gov. Edwin Edwards asked for a panel of marine law experts to look into the disaster.

Officials said the list included the names of 39 persons still missing and believed to have been aboard the ferry.

Divers have recovered 64 bodies—three of them unidentified and believed to be among the 44 listed as missing—and 33 vehicles. Eighteen persons survived.

The original list, compiled shortly after the fully loaded ferry George Prince was run down by the 664-foot Norwegian tanker Frosta on Wednesday, estimated that 96 persons were aboard the ferry.

The freighter's owners and the state, which operates the ferry, both went into federal court yesterday to ask that they be relieved of any liability for the collision. Two suits totaling $7.75 million have been filed against the state, the ship's owners and others.

Under maritime law, courts may limit damages to the total value of the ships involved in the collision.

4 North Koreans Leave Finland

HELSINKI, Oct. 26 (AP).—The North Korean Embassy here today issued a statement denying implied smuggling charges against its five-man staff as four of the diplomats left Finland in accordance with an expulsion order. The embassy said that the Finnish government "has to bear full responsibility for the possibly deplorable consequences" of ousting them.

Finland, in establishing the deadline for the four last Wednesday, followed the example of Denmark and Norway in deciding to expel North Korean diplomats. The four men and their families left by train for Moscow, en route to Pyongyang.

The regime here accused the men of "activities which were against Finnish law and the Vienna convention on diplomatic relations." The two other Nordic governments were more explicit, charging North Korean Embassy staffs with smuggling and black-marketeering in liquor, cigarettes and hashish.

Independenc Is Declared By Transkei

(Continued from Page 1)

the government's theory that governing homelands will sa African nationalism and demands for political rights.

The government has desig ed nine tribal groupings, "nations," that have a right a politically free homeland. 17.7 million blacks within S Africa's original borders will have political rights outside tribal areas, no matter w they live.

The Transkei is the homeland to have fully acce the government's offer of clared independence. It h separate Constitution, a Cal and a 150-member Parlia dominated by Mr. Matanzi Transkei National Independ party.

Corruption Charges Stir Controversy

Madrid Press Sees Scandal in Ex-Colony

By James M. Markham

MADRID, Oct. 26 (NYT).—The government has lifted a six-year-old news blackout on its obscure former colony of Equatorial Guinea, stirring a political controversy within Spain itself.

The Madrid press has suddenly begun to fill with charges of corruption in and out of the Franco establishment, of the plotting of a coup against Francisco Macias Nguema, the ruler of the West African state, and other unsavory tales.

"This is just the beginning," said a Spaniard with inside knowledge of the affairs of the tiny nation that became independent in 1968. "A lot more is going to come out—about a lot of people."

The news ban was imposed in 1971, ostensibly to protect the lives of Spaniards living in Equatorial Guinea, known as Spanish Guinea before independence.

Two years earlier, about 7,000 Spaniards fled the country after Mr. Macias, who is widely believed to have had large numbers of his foes murdered, accused big Spanish business interests of being behind an abortive coup d'état.

Cover-Up Asserted

Privately, some well-informed Spaniards believe the news ban was also imposed to cover up financial and political machinations of members of the Franco establishment.

Antonio Garcia Trevijano, a controversial Spanish opposition figure who served as an adviser to Mr. Macias, has been accused by Equatorial Guinean exiles of profiting handsomely from the relationship and helping to extinguish democratic liberties in the former colony.

Mr. Garcia Trevijano has denied the accusations and says that the Spanish government tried to unseat Mr. Macias and install a more pliant president. He also alleges that the family of Adm. Luis Carrero Blanco, the late premier and Franco's right-hand man, wanted to hide from the public its business dealings in Equatorial Guinea, which exports cocoa, coffee and wood and may have petroleum reserves. All the charges remain to be proved. But his association with Mr. Macias—whom a Spaniard glumly dubbed "our own Idi Amin"—seems to have fatally undercut the aspirations of Mr. Garcia Trevijano to emerge as a leader of the "democratic" opposition.

About 300 Spaniards—about 200 of them working on Madrid-funded technical assistance programs—remain in Equatorial Guinea. There is some fear that Mr. Macias might react to his bad press here by mistreating them.

Pope Approves New Hierarchy In East Germany

VATICAN CITY, Oct. 26 (UPI).—The Vatican announced today that it has allowed Roman Catholic bishops in East Germany, isolated from the West since the construction of the Berlin Wall, to set up a hierarchy of their own. It said this was done for practical reasons and did not amount to recognition of the partition of Germany.

The Rev. Romeo Panciroli, Vatican spokesman, told reporters that East German bishops have established a group called the "Berlin Bishop's Conference" with "the functions and competences which existing canon law attributes, for their respective territories, to autonomous episcopal conferences."

He said the East German hierarchy previously was a regional subdivision of the German Bishops' Conference, based in the West German town of Fulda, but had been unable to attend its meetings.

Father Panciroli said the Vatican's decision to establish the Berlin Bishops' Conference was made April 10. The East German bishops then worked out a statute for the conference, which was approved by the Vatican Congregation for Bishops Sept. 25.

The spokesman did not say why the announcement was delayed for more than a month.

France Detains Basques Before Juan Carlos Visit

PARIS, Oct. 26 (Reuters).—Police today detained 31 suspected Spanish Basque activists in Paris and southwest France on the eve of King Juan Carlos of Spain's official visit here and prepared to send them to the Ile de Ré, Ile d'Yeu and Belle Ile off the Atlantic coast.

Police said they would be held under house arrest during the visit.

About 60 other Basque refugees have been ordered to report twice a day at police stations near their homes near the Spanish border to insure they will not try to leave for the French capital during the King's stay.

Stringent security precautions are being taken for the visit, scheduled to start tomorrow. Officials said about 350 policemen would protect King Juan Carlos at Orly Airport along a 145-meter stretch from the aircraft to the airport buildings.

Argentina Indicts Mrs. Peron For 'Repeated Embezzlement'

By David Belnap

BUENOS AIRES, Oct. 26.—A federal court indicted former President Isabel Peron yesterday on charges of "illicit association and repeated embezzlement" of the funds of a charity she headed here before and after she was elected to national office.

The indictment, handed down by Judge Nino Garcia Moritan, ordered the "preventive detention" of the 45-year-old former chief of state and placed an embargo equal to $410,000 on her assets.

Four other persons were named in the indictment:

• Jose Lopez Rega, former minister of social welfare and former private secretary of the ex-president.

• Raul Lastiri and his wife, Norma, Mr. Lopez Rega's daughter. Mr. Lastiri was president of the Chamber of Deputies during the Peron regime and, as such, served as provisional president of the nation from July until October, 1973.

• Antonio Benitez, who served in Mrs. Peron's Cabinet, first as minister of justice and later as minister of the interior.

Officers of Charity

Like Mrs. Peron, Mr. Lopez Rega and the Lastiris were charged with "illicit association and repeated embezzlement" of the funds of the now-defunct Solidarity Crusade, a private charity that got much of its funding from the federal government. All were officers of the charity. Their preventive detention was ordered and the assets of each were embargoed for $410,000.

Mr. Benitez was indicted on charges of "instigating fraud." His preventive detention was ordered and his assets were embargoed for $6,250.

Mrs. Peron and the others indicted except Mr. Lopez Rega are under detention, held "at the disposition of the executive authority" under the state of siege in effect in Argentina. Mrs. Peron was placed under detention last March 24, when the military deposed her.

Mr. Lopez Rega, who left the country after being forced out of Mrs. Peron's Cabinet in July of last year, is a fugitive from a federal court warrant for his arrest and is believed to be somewhere in Europe.

Two other investigations of Mrs. Peron's handling of funds while she was President are being conducted by federal court judges and could result in indictments when the investigations are completed.

Yesterday's indictments are the first against top officials of the former Peronist government since the government fell.

63 Leftists Said Seized in Spain

MADRID, Oct. 26 (UPI).—Police have arrested 20 leftists in the northern town of Santander in the last 48 hours, opposition sources said today. The police announced yesterday the roundup of 43 suspected leftists in Barcelona, Madrid and Galicia.

The opposition sources said the persons arrested in Santander—labor leaders and students—were activists of two illegal extreme-left organizations, the Spanish Workers' party and the Young Red Guards. According to the sources, the arrests were part of a nationwide crackdown aimed at disbanding the two organizations.

Government sources said that for the first time since the civil war there will be no official ceremony commemorating the Oct. 29 anniversary of the founding of the rightist Falange movement. The late Generalissimo Francisco Franco used to preside.

Editor Asserts Mexico Tries to Bar His Weekly

MEXICO CITY, Oct. 26 (NYT).—Julio Scherer Garcia, who was ousted in July from the editorship of the Mexican daily newspaper Excelsior, accused the government yesterday of trying to block publication of a new independent political weekly by opening an investigation into allegations that he had embezzled $650,000 from the daily.

He told reporters before appearing at the district attorney general's office for a conference yesterday morning that the move was "undoubtedly of a political nature" and was aimed at "intimidating us and impeding the execution of our editorial project."

Mr. Scherer, who lost his post at Excelsior after a rebellion of rightist members of the staff, who were supported by the government, said he was not guilty of any crime.

The government has denied any responsibility for his overthrow, saying it was the result of an internal dispute within the newspaper, a cooperative.

Expanding into Germany? Start at Rheinland-Pfalz, the "Crossroads Bank"
There are advantages in starting at the right place. And with the right bank.
Our location is ideal.
First, Mainz is part of the expanding Rhein-Main commercial complex – at the Crossroads of the German economy. Not only is this a sizeable market in itself, it is an ideal base for further expansion.
Second, we are at the gateway to the state of Rheinland-Pfalz. In this high-potential state you will find everything you need for expansion: you'll have sufficient labour, adequate energy supplies and a strategic location with direct access to Germany's and Europe's main transportation arteries. All that, plus a state government whose close co-operation with foreign businesses is reflected in measures which are specifically designed to benefit you and make your start easier. (They'll even pay up to 20 per cent of your investment.)
And with us as your bank you will have a reliable, well informed partner. Not only are we a highly respected, all-purpose bank (assets DM 16,000 million), we are also specialists in large, long-term loans – a practical combination for you.
Contacts will be no problem for you either. We have connections all over Germany. But in Rheinland-Pfalz we can be especially helpful since we serve as a central clearing bank for the 45 savings banks in the state.
Remember, one of the most important aspects of expansion is choosing the right location.
If you want to start at the Crossroads, talk to Rheinland-Pfalz, the Crossroads Bank.
Drop us a line. Or send us a telex. Our number is 4 187 885.

Nationalization Emerges as a Key French Election Issue

By James Goldsborough

PARIS, Oct. 26 (IHT) —Seventeen months before the French legislative elections, a debate over the nationalization of French industry has erupted.

In the last few days, Socialists, Communists and members of the majority have made widely divergent statements indicating that nationalization policy may be the principal issue in the elections.

Over the weekend, Georges Séguy, the Communist leader of the CGT labor union, called for firms in two industries—automobiles and steel—to be added to the list of companies to be nationalized if the left wins the March, 1978, vote.

Mr. Séguy's view was opposed in a long article by Socialist leader François Mitterrand in this week's Paris-Match "The [left's] Common Program of Government designates by name the companies to be taken over," said Mr. Mitterrand. "It is to be that and nothing more."

Decision Revealed

Yesterday, Claude Estier, the Socialist party's deputy leader, softened Mr. Mitterrand's statement. He said that Mr. Séguy's remarks were "not crazy," and that the subject of nationalization would be reviewed when the Socialist and Communist parties revise their Common Program before the elections.

It was the first time that a decision to revise the Common Program, laboriously negotiated by the two parties between 1969 and 1972, had been mentioned. The Socialists long have urged it but, prior to Mr. Séguy's remarks, the Communists had always turned it down. "We will see if the nationalizations stay what they were in 1972," Mr. Estier said yesterday.

The Common Program now designates the following companies for immediate nationalization if the left comes to power: Dassault, Roussel-Uclaf, Rhône-Poulenc, ITT-France, Thomson-Brandt, Honeywell-Bull, Pechiney-Ugine-Kuhlmann, Saint-Gobain-Pont-à-Mousson, Compagnie Générale d'Electricité.

The companies the Communists now want added to the list are Usinor-Vallourec, Wendel-Sidélor, Schneider, Chrysler and Peugeot-Citroën. A minority interest, later to become a majority holding, would be taken in the principal French oil firms.

This debate is having a profound effect on the French economy. When Mr. Mitterrand talked of nationalization plans before a group of French businessmen two weeks ago, the franc slipped under 20 cents for the first time in several years. A poll showed that 73 per cent of France's business leaders think that the left will win in 1978, and that they are not investing. The lack of investment has slowed the economic recovery.

The debate has warmed up here because of several recent events. First there has been the British experience and the failures of a "mixed economy." In some respects the French case already resembles the British. There is a similar left-right split here, and similar arguments within the left on whether the object is to reform capitalism or abolish it.

Other Examples

But Britain is not the only country being watched. The Swedish, West German and Italian experiences are observed and rejected by the French left as not going far enough into nationalization. The French Socialist party is alone among its brethren today in holding nationalization to be an economic panacea. Even the Italian and Spanish Communist parties rule out wholesale nationalization.

The Dassault affair also has contributed to the debate. Dassault, the privately owned aircraft company, finds itself under attack today from both opposition and majority as an investigation into its tax payments and "special relationship" with the government goes on. Last week, owner Marcel Dassault said he would not oppose nationalization of his company.

Finally, the French government has decided to wage the already-opened election campaign along these lines. Ministers are urging Frenchmen to reject the "collectivization" of France, and President Valery Giscard d'Estaing devoted much of his new book, "Démocratie Française," to arguing against nationalizations.

The left believes that the Dassault affair has swung the weight of public opinion behind nationalization. L'Humanité, the Communist newspaper, said yesterday: "The idea of nationalization now has taken hold of French opinion." In reality, polls taken here on the subject show that public opinion is about evenly split on the wisdom of state take-overs.

The key element in the left's argument is that of profits. Not only do Communists and Socialists alike argue that profits in France are anti-social because they are inequitably distributed, but they argue that they are uneconomic because they are no longer distributed or invested at all, and instead find their way to Switzerland or the United States.

The Socialist party's principal economic thinkers, Michel Rocard, Jacques Attali and Jacques Delors, reject the more typical Social Democratic solution, which has involved high rates of taxation on individuals and businesses instead of nationalization. The argument here is that high tax rates, *particularly for direct* taxes, is a concept alien to France and Frenchmen.

The debate is certain to sharpen in coming months. France already has one of the highest rates of nationalized industry for a West European nation, and under the left's proposals, all major industry and banks would be state-controlled. The policy would cause considerable problems between France and the eight other nations in the generally free-enterprise-minded European Economic Community.

In his book, Mr. Giscard d'Estaing makes several further arguments against nationalization. He denounces it as being inefficient and noncompetitive, "adding the burden of indemnification to the taxpayer [except in the case of confiscation], and adding to the state budget the obligation of making up capital shortages."

But worse, says Mr. Giscard d'Estaing, "there is no country in the world today in which the essential means of production have been nationalized, where political liberty as we know it continues to exist . . . There is a contradiction between nationalization and the democratic principle of plurality of powers."

Rail Strike in Italy

ROME, Oct. 26 (Reuters).—Rail services throughout Italy were halted today by a 24-hour strike of 200,000 railwaymen, causing traffic jams in all major cities.

Rain Hits France, Corsica

MARSEILLES, Oct. 26 (AP).—Torrential rains swept southern France and Corsica today for the second day, isolating villages and cutting roads over a wide area. Three persons were missing in northern Corsica.

Arrests in Paris, South and Corsica

40 Held in French 'Sewer' Bank Theft

MARSEILLES, Oct. 26 (AP).—A vast police sweep ranging from Paris to Corsica today rounded up about 40 suspected members or accomplices of the "sewer gang" which committed the $10-million "theft of the century" in Nice in July.

An investigating magistrate said an early radio leak of the raids allowed other suspects to flee the police net.

There were unconfirmed reports that those who escaped included the reputed "brain" behind the raid on a Nice bank vault.

Police sources said the suspects held included members of the boxing world in Paris, figures in the Marseilles and Toulon underworld, at least 10 persons living in Corsica and more in other areas of southern France.

Tonight police were moving about 30 of the suspects to Marseilles and questioning 10 more in Paris. Senior officers refused to give any details of their arrests for the moment.

There was no indication if the police sweep had led to recovery of any of the loot from the safe deposit boxes of the Société Général branch bank in Nice July 17-18.

A gang using the same technique of tunneling from sewers into the bank vault entered another Société Générale branch on the Ile St. Louis in Pari month later, rifling 191 deposit boxes and taking estimated $5 million in cash valuables.

On Oct. 8, Paris police arr ed a 40-year-old auto mecha Raymond Brisacier, alleg trying to sell bonds stolen in Paris break-in. Police said although they were convi that Mr. Brisacier did participate in the theft, he k the gang members and was of their fencing operation.

Sources in Marseilles sai tip from a former convict police another lead into the g The police first identified number of persons who alle their names to be used to the heavy equipment used the gang in their tunneling least a ton of equipment bought, from wheelbarrows metal-cutting torches and oxy bottles.

Obituaries

Raymond Queneau, Novelis Poet and Pioneer Surrealis

PARIS, Oct. 26 (UPI).—Raymond Queneau, 73, one of the saddest, funniest, most original figures of contemporary French literature, died yesterday in a Paris clinic, his publishers announced.

A pioneer of the surrealist school, Mr. Queneau invented a form of written French which mocked spoken French. He broke the awesome traditions of such French literary giants as Chateaubriand and Balzac by breaking the barriers of language.

He said he drew his inspiration from the language he heard while serving in the army and from reading the "Pieds Nickelés," one of the first and the most popular comic strips ever to appear in France.

Mr. Queneau studied philosophy at the Sorbonne and worked on the publication Surrealist Revolution.

Fought in Rif

He fought with a French Zouave unit against the Rif rebels in Morocco. Back in Paris, he worked as a bank employee, taught French to Americans, ghosted books and worked as a journalist and as a translator.

In 1929, Mr. Queneau put surrealism behind him and became engrossed in chess, Greek and mental mathematics. Three years later he wrote his first novel, "Le Chiendent" (The Weed), during a trip to Greece.

From then on he published a book every year. In 1938 he became an editor of La Nouvelle Revue Française, a Paris literary magazine, and in 1941 its director.

Mr. Queneau started publishing poetry in 1943 with "Les Ziaux," "Bucoliques" and "Si Tu L'Imagines," which would later be put to music and become one of Juliette Greco's greatest hits.

In 1951 Mr. Queneau was elected to the Goncourt Academy.

His best-known novel is "Zazie dans le Métro," the story of a little Parisian girl who decides to visit Paris by subway on a day when it is on strike.

Claire Ruth

NEW YORK, Oct. 26 (UPI).—Claire Ruth, 76, widow of baseball home run slugger Babe Ruth, died yesterday of cancer here, her daughter, Mrs. Brent Sten said.

Mrs. Ruth, at the time a mo and chorus girl, was introduced the New York Yankees star actor James Barton. After long courtship, they were mar in 1929, according to Allan Sch der, a family friend. It was second marriage for both.

Mrs. Ruth's maiden name Claire Merrit. Her father Ty Cobb's attorney and a co was Johnny Mize, another b ball star.

Arrigo Benedetti

ROME, Oct. 26 (UPI).—Ar Benedetti, 66, director of newspaper Paese Sera and fou er of several Italian weekly m sines, died during the night kidney illness, doctors said day.

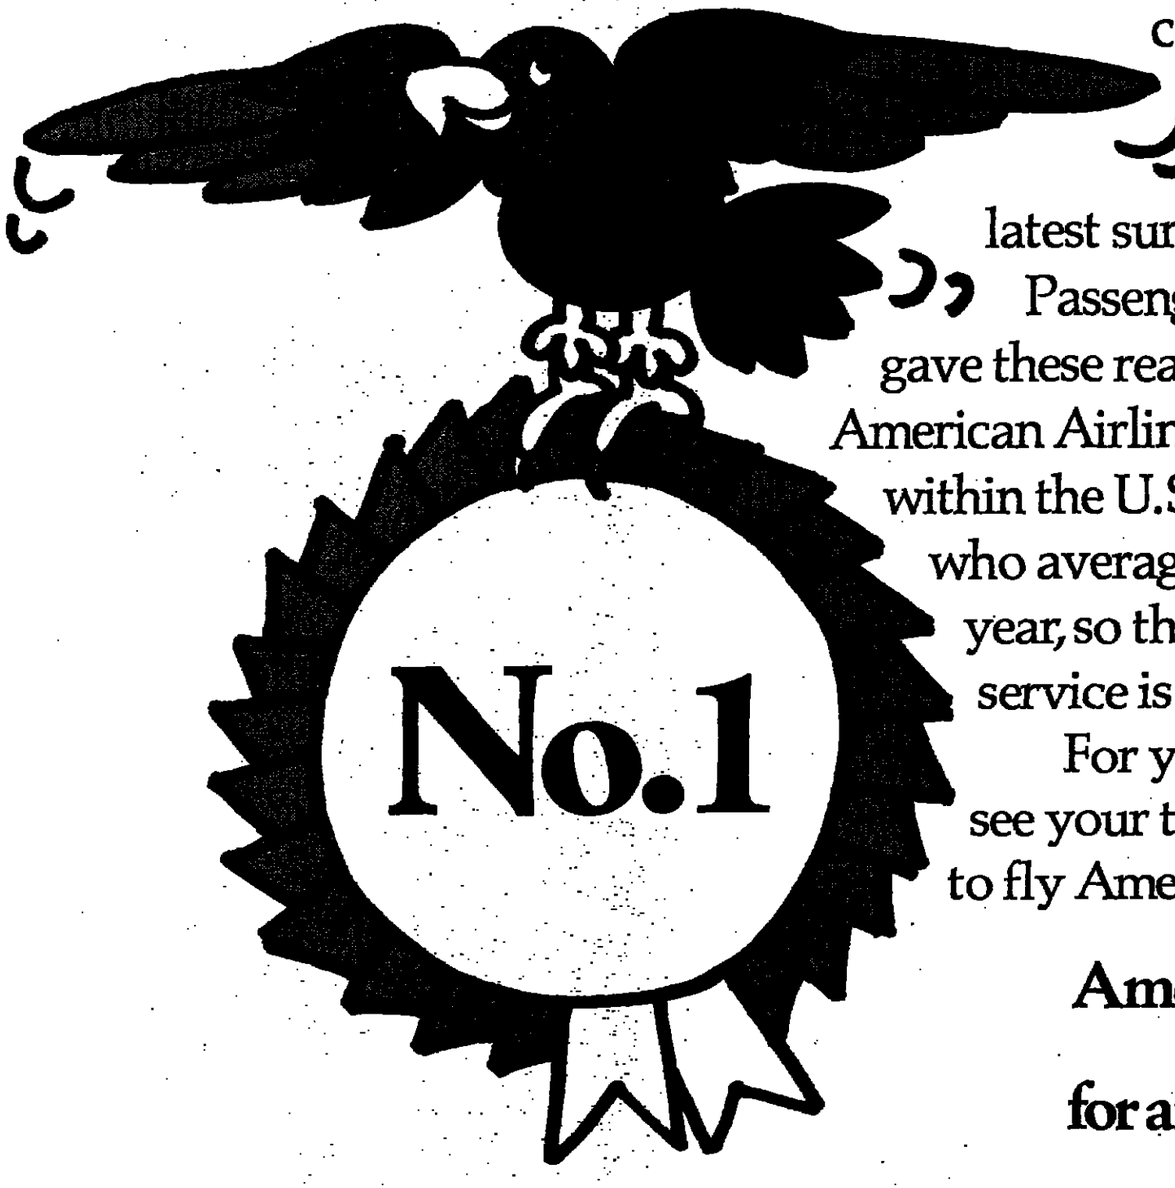
Mr. Benedetti took over director of Paese Sera last y after a career as a journa with such newspapers as Stampa, Corriere della Sera Il Mondo.

He also helped found the m agines Oggi and Espresso wrote several books.

Mr. Benedetti was a warti resistance fighter and was pr soned by the Fascists in 1

Joseph W. Lippincott

NEW YORK, Oct. 26 (NYT) Joseph Wharton Lippincott, an author and the third mem of his family to head the p lishing house of J. B. Lippinc Company, died Friday.



He had been with the compa since his graduation from University of Pennsylvania 1908, and retired as chairman the board in 1958.

Dr. Robert V. Moss

NEW YORK, Oct. 26 (AP) The Rev. Dr. Robert Vereile Mo 54, president of the United Chur of Christ and a leader in n tional and international ecume ical affairs, died yesterday cancer.

Dr. Moss, a Bible scholar w spoke out often and strongly applying religious principles controversial social issues, h headed his 1.8-million-mem denomination for seven years.

AMERICA'S MOST FREQUENT FLYERS PUT US IN OUR PLACE.

Schedules, reliability, courtesy, comfort—and most of all, service.

When conducting their latest survey, the Airline Passengers Association of America gave these reasons for again naming American Airlines No. 1 choice for air travel within the U.S.A. Members are people who average 35 flights or more every year, so they know what good airline service is all about.

For your next visit to the U.S.A., see your travel agent and plan to fly American.

Hua's Triumph, Left's Defeat Still Leave Unanswered Questions in China

Peter Butterfield

leaders to fill the many top party, government and army posts left vacant by the ouster of the leftists and the death of Mao Tse-tung, Premier Chou En-lai and several other leaders?

At the rally yesterday the surviving leaders appeared in their old party rank, suggesting that a new lineup had not yet been worked out and that it may still be some time before agreement can be reached on one.

● What were the actual crimes of the four leftists and what has happened to them?

Adding to the already lengthy list of charges against them, a major editorial Monday in Peking papers said that Mao's widow, Chiang Ching, had conspired since as early as 1974 to make herself chairman of the party and had ignored Mao's orders to stop.

The editorial also charged that the leftists had "maintained an illicit foreign relationship" and "betrayed important party and state secrets." That might have been a reference to a series of highly revealing interviews Miss Chiang gave to U.S. scholar, Roxane Witke, in 1972. Mao was reported angered by the interviews.

● How much support do the leftists still have on the Central Committee and in the provinces and will this be a continuing problem that may be holding up a full meeting of the Central Committee to decide on a new leadership lineup?

By some estimates, about one third of the Central Committee members may be sympathetic to the leftists, since they were named to it as a result of their activities during the Cultural Revolution.

● Will Mr. Hua and his associates among the veteran party bureaucrats and army commanders be able to restore discipline and revive confidence in the party's leadership among China's 850 million people?

Both have shown signs of breaking down this year, with an increase in worker absenteeism, reports of factional squabbling in factories and even several armed bank robberies.

● Will the latest abrupt turn of the political wheel, with an anti-leftist campaign replacing the earlier anti-rightist campaign, tend to disillusion further many young Chinese about politics and the party?

Semantic Triumph

Mr. Hua and his colleagues have scored a neat semantic triumph by using all the charges that the leftists employed, including the accusations of being the "bourgeoisie inside the party" and "the unrepentant capitalist roaders still on the capitalist road."

But how do you explain this sharp about-face to idealistic young people?

Similarly, although Peking's new leaders have in no way attacked Mao himself, they have left his leadership open to skepticism with the charge in yesterday's editorial that even the chairman was not able to make his wife stop plotting and scheming with the three other leftists, Wang Hung-Wen, Chang Chun-Chia and Yao Wen-Yuan, all of whom Mao had personally been instrumental in promoting.

According to the editorial, Mao told his wife as early as July 17, 1974, "You'd better take care. Don't form a small faction of four people." That was a time when the still shadowy campaign to criticize the ancient sage Confucius and the late defense Minister, Lin Piao, began to fade out. There were indications that it had originally been aimed against Premier Chou. Perhaps Mao himself intervened and ordered it stopped.

Wild Ambitions

But, the editorial added, Mao had to repeat his warnings in November and December of that year. "Chiang Ching has wild ambitions," Mao was quoted as having said. "She wants Wang Hung-wen to be chairman of the Standing Committee of the National People's Congress and herself to become chairman of the party Central Committee." The People's Congress post is equivalent to head of state.

Finally, on May 3, 1975, Mao is alleged to have told the leftists, in front of the whol Politburo, "Don't function as a gang of four, don't do it any more. Why do you keep doing it?" Then he added, 'If this is not settled in the first half of this year, it should be settled in the second half. If not this year, then next year, if not next year, then the year after."

It was an unflattering portrait of very personal and petty politics inside the Forbidden City, not much different perhaps from the intrigues of the Ming Dynasty.

Yesterday's editorial suggested that Peking is, at least temporarily, not planning to turn the current round of arrests into a wholesale purge.

It quoted Mao as advising: "Help more people by educating them and narrow the target of attack." The implication seemed to be that those party members who were once in sympathy with the leftists could still save themselves.

OVERKEEN — Paraders in Canton carrying a poster showing disgraced Chinese leaders arrested on a hayrack. Massive marches denouncing them and supporting the new party chairman, Hua Kuo-feng, are going on across China.

Buckling Down to Trade at Allied Checkpoint

Berlin GIs Swapping Girlie Magazines for Soviet Belts

BERLIN, Oct. 26 (AP).—Russian Army belts with shiny brass buckles have become a favorite of souvenir-hunting U.S. soldiers here.

Cigarettes, girlie magazines and money may be used to coax a belt and a buckle from the outwardly formal Russians who guard Allied crossing points in and out of West Berlin.

Officially, U.S. military chiefs frown on the practice. Unofficially, it is tolerated.

"Why not?" a senior officer said privately. "It's harmless enough. It's just a souvenir."

The belts and buckles go with blue jeans or are worn as decorations over blouses and sweaters for just about every kind of occasion — shopping, football games, cocktail parties.

The Red Army buckle has a large star and hammer-and-sickle emblem. The Russians wear the belts outside over their uniform jackets.

The belt itself is of good-quality leather. How much it costs a Russian soldier is not known. Nor is it apparent how Russian commanders are reacting to what would seem to be a run on Red Army belt supplies in East Germany.

Getting a souvenir belt can work like this:

On presenting travel credentials at a border crossing point, one waits in a room that features the Soviet Communist party newspaper, Pravda, and an East German television set. The psychology behind this is obscure. U.S., British and French soldiers usually are not well versed in either Russian or German.

As the GI waits, a Russian soldier outside the building, the same one who salutes him in and back out of the checkpoint, often appears at a window. He makes a sign asking the American if he has cigarettes. The basis for a possible transaction has been established.

Or inside the building, a U.S. soldier is kept waiting until a one-on-one situation is possible. Then a Russian comes out of a hidden control room with a belt and freshly polished buckle in his hand.

Saying not a word, he holds it up. It is up to the GI to respond. Sign language fixes a price.

A well-placed military source said it used to be that a girlie magazine shoved through a control room aperture along with credentials was enough to bring out a belt and buckle in return.

"The price of a belt in good condition first went up to a carton of cigarettes," the source said. "But lately the Russkies have been making it plain they want from 15 to 30 West German marks ($6 to $12). Beats me how they spend it."

"I get the impression," another source said, "that the Russians would sell us their whole uniform for cigarettes, lighters, ballpoint pens and those centerfold nudie magazines, not to mention money, if they could get away with it."

Baltic Tremor Said Perhaps of A-Origin

HELSINKI, Oct. 26 (Reuters).—An underwater shock in the Baltic Sea yesterday was almost certainly an earthquake, but the possibility of an atomic explosion could not be ruled out, a Finnish scientist said here today.

A spokesman at Helsinki University's Seismological Institute said that the tremor measured about 4.7 on the open-ended Richter scale. It caused the biggest shocks recorded in Finland for 15 years. Tests carried out in southern Finland in the last 24 hours show normal radiation levels.

Russian Court Denies 3 Americans' Appeal

MOSCOW, Oct. 26 (AP).—Three Americans sentenced to Soviet prison camp terms in August on drug smuggling charges have lost a court appeal and have begun serving their sentences, U.S. sources said today.

The sentences, handed down Aug. 27 in the Moscow People's Court, were eight years for Gerald Amster, 33, seven years for Dennis Robert Burn, 26, and five years for Paul Brawer, 31.

Alabama Rape Case of 1930s

Survivor of 'Scottsboro Boys' Is Pardoned

By Thomas A. Johnson

NEW YORK, Oct. 26 (NYT).—Clarence Norris, the sole surviving "Scottsboro boy," was pardoned yesterday by Gov. George Wallace of Alabama and asserted happily in New York City that "a man should never give up hope." The case attracted worldwide attention in the 1930s and was used as a symbol of Southern racial injustice.

In an emotional news conference, during which his voice broke and tears welled in his eyes, Mr. Norris said:

"The lesson to black people, to my children, to everybody, is that you should always fight for your rights—even if it costs you your life. Stand up for your rights, even if it kills you. That's all that life consists of."

Norris, now 64 and a warehouseman for the City of New York, spoke at the offices of the National Association for the Advancement of Colored People and during a subsequent interview. The pardon that Gov. Wallace signed had been recommended by the state pardon board.

It was 45 years and six months since Mr. Norris and eight other black youths were ordered off a freight train near Scottsboro, Ala., arrested and accused of raping two white women. After 15 years in prison, five on death row, Mr. Norris was released on parole. He left the state without authority in 1946.

Pardoned of all charges, Mr Norris said he had "no bitterness against the people who did me wrong. I'm just so glad to be free. They had said that I was a nobody, a dog, but I stood up and I said the truth."

Then his voice broke and he said quickly, "Somebody's got to do these things in life."

A huskily built man, Mr. Norris wore a bulky brown sweater. He chain-smoked, often relighting half-smoked cigarettes. His voice carried the regionalisms of his Warm Springs, Ga., birthplace. But his words reflected his long-time struggle and that of the series of tragically dramatic court trials that took 15 years out of his life and led to his 30 years as a fugitive for violating Alabama parole regulations.

'My Freedom'

"Sure, Alabama owes me a lot," Mr. Norris said in answer to a newsman's question, "my freedom, my rights. I was sentenced to the electric chair three times and then each time they brought me back. The governor commuted my sentence to life in prison—he could have said, 'Yeah, you go, and I'd be dead [he snapped his finger] that quick. Do you think Alabama owes me something? They owe me a whole lot."

He said he did not know if he would attempt to bring suit against that state.

Nathaniel Jones, legal counsel for the NAACP, said this had not been considered up to this time. "We've been so busy trying to get the pardon," Mr. Jones said.

Mr. Jones and the association's administrator, Gloster Current, said their understanding of yesterday's pardon for Mr. Norris was that "all the youths in the case had been falsely accused" and that the organization would seek to have Alabama's official records reflect this.

10 Nobel Winners Criticize Ford On Partisanship

CAMBRIDGE, Mass., Oct. 26 (AP).—Ten Nobel Prize-winners criticized President Ford today for political partisanship and inaccuracy in his statements about the U.S. sweep of Nobel Prizes this year.

The Nobel laureates, only one of them a winner this year, said in a joint statement issued at Harvard University that Mr. Ford's budget has not encouraged the growth of science in the United States.

Americans recently were named winners of the 1976 Nobel Prizes in literature, economics, medicine, physics and chemistry, the first time a single country has won all of these in one year. The Nobel Peace Prize was not awarded this year.

Last week, Mr. Ford used the Nobel awards to try to rebut a charge by Democratic presidential candidate Jimmy Carter that the United States has lost respect around the world because of Ford policy failures.

"These doubts," Mr. Ford said, "were surely put to rest" by the Nobel Prize announcements this year. Mr. Ford made the comments while awarding the National Medal of Science to 15 U.S. scientists. He also used the occasion to praise the Nobel laureates.

"Nobel Prizes usually reflect work done over long periods of time. This year's prizes do not therefore reflect this year's strengths," said Prof. George Kistiakowsky, who served as spokesman for the Nobel Prize-winners although he is not one himself.

Vietnam Assails Thai Regime, U.S. 'Neocolonialism'

BANGKOK, Oct. 26 (UPI).—Vietnam today unleashed a violent verbal attack on Thailand that was aimed at the United States as well.

The official Hanoi daily Nhan Dan said in a front-page editorial that the Thai government "reminds one of the dictatorship of Ngo Dinh Diem in South Vietnam decades ago."

The U.S.-backed Diem was overthrown in a coup Nov. 1, 1963.

"Like the Diem clique, the Thai militarists elevate anti-Communism to the rank of the chief national policy, and from this springboard they are betraying their country and people, civilization and progress," Nhan Dan commented.

"Theirs is a barbarous regime based on U.S. neocolonialism," it said.

The newspaper also said the U.S. "global strategy of aggression" was in crisis, and added: "There is nothing for the U.S. to do but to quit Southeast Asia for good."

Four Climbers Perish

NEW DELHI, Oct. 26 (AP).—Three mountain climbers from California and one from Mexico were killed nine days ago while trying to climb Mt. Dunagiri in the Himalayas, the Indian Mountaineering Foundation said.

U.S. Seeking Bank Records Of S. Koreans

To Trace Fund Used In Corruption Case

WASHINGTON, Oct. 26 (WP).—The Justice Department has issued an unprecedented subpoena for the banking records of the South Korean Embassy and every member of its diplomatic delegation here as part of the federal investigation of widespread corruption of U.S. congressmen by the South Korean government.

The subpoena to the Riggs Bank of Washington, where the South Korean Embassy does its banking, was issued in an attempt by investigators to trace how large amounts of cash were generated for gifts and campaign contributions to congressmen and other U.S. officials, according to sources.

[An aide to Rep. John Brademas, D-Ind., said today that the congressman had received $4,650 in campaign contributions from Tongsun Park, the Associated Press said. The aide verified that Rep. Brademas received $1,700 from Tongsun Park in 1972 and $2,950 from him in 1974 after Thomas Thorson, Rep. Brademas' Republican opponent in the election next Tuesday disclosed the contribution.

[A statement issued by Rep. Brademas's office failed to indicate why the donations were made. But it said: "I have been and continue to be one of the most outspoken critics in Congress of the military dictatorship in South Korea." It said he was one of the supporters of the law that now prohibits campaign contributions by foreign nationals.]

The activities and records of foreign diplomats here are generally protected from legal scrutiny by diplomatic immunity. But Justice Department lawyers believe the subpoena of banking records is possible under a U.S. Supreme Court ruling in April that bank records belong to the banks holding them and not their customers. If the Riggs banking records for the South Koreans belong to Riggs and not the South Koreans, the federal lawyers reasoned, diplomatic immunity cannot be claimed.

Talks Reported

Negotiations between Riggs officials and lawyers for the U.S. and South Korean governments are now under way, sources said. The talks could end in either compliance with the subpoena or a legal test of the federal lawyers' reasoning.

"This should show them we mean business," a Justice Department source said. "We're going to get to the bottom of this."

It also was learned that the State Department is considering making a request that the South Korean government remove from its embassy here several agents of the South Korean Central Intelligence Agency.

Federal investigators reportedly have information that a ring of South Korean agents, directed personally by South Korean President Chung Hee Park, dispensed $500,000 to $1 million yearly in cash, gifts and campaign contributions to U.S. congressmen and officials during the 1970s to "create a favorable legislative climate" here for South Korea.

The ring's principal Washington-based operative is South Korean businessman Tongsun Park. He has admitted to investigators and associates that he made substantial money payments to a number of congressmen and gave many others jewelry, silver trinkets, Oriental antiques, and vacation trips, as well as hundreds of dollars in cash casually doled out of his own pocket whenever a congressional friend needed it.

Yesterday, Louisiana Gov. Edwin Edwards admitted that his wife, Elaine, received $10,000 in cash from Tongsun Park in 1971 when Gov. Edwards, then a Democratic congressman from Louisiana, was first running for governor.

Denial in Seoul

SEOUL, Oct. 26 (NYT).—The government of President Park has nothing to do with Tongsun Park, a presidential spokesman said today.

In a one-paragraph statement, he denied reports that Tongsun Park was employed by the Korean government to lobby for President Park.

"These reports are completely groundless," the spokesman said. "Tongsun Park has nothing whatsoever to do with the government."

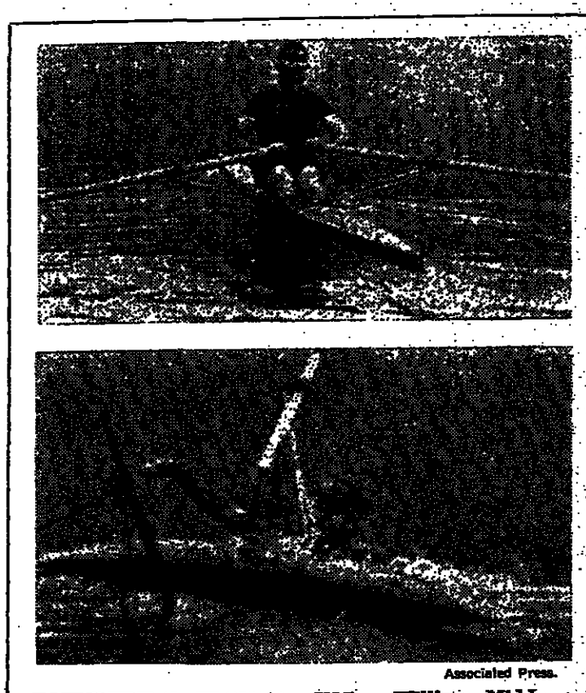
Court Clears Watergate Tape Broadcasts

WASHINGTON, Oct. 26 (AP).—The U.S. Court of Appeals cleared the way today for broadcasting of the Nixon White House tapes played at the Watergate cover-up trial.

"The tapes played at the trial are no longer confidential," the court ruled in a 2-1 decision, which also permits the sale of the tapes as phonograph records.



Included is the so-called "smoking gun" tape of June 23, 1972, when former President Richard Nixon ordered that the FBI's investigation of the Watergate break-in, six days earlier, be halted.

Also among the tapes played at the trial is the March 21, 1973, warning, by former Nixon counsel John Dean, that there was a cancer on the presidency.

The three commercial television networks, the Public Broadcasting System, a news directors' organization and Warner Communications Inc., a manufacturer of phonograph records, have asked to reproduce the tapes.

U.S. District Judge John Sirica denied the applications, saying any such action had to wait until appeals were exhausted by the four men convicted in the case, John Mitchell, H. R. Haldeman, John Ehrlichman and Robert Mardian.

The Appeals Court recently upheld the convictions of all except Mr. Mardian. The three others have said they will appeal to the Supreme Court.

Associated Press.

FOUNDERING, FLOUNDERING — William Middendorf, the secretary of the Navy, rowed into the first obstacle on his course on the Potomac River Monday and thereby lost a race with Gen. Samuel Jaskilka, the assistant commandant of the Marine Corps. The idea was for the secretary to row three miles while the general ran the same distance along the river bank. The general won. No times were given.

Ford Uses TV 'Small Talk' To Enthuse Vast Audience

(Continued from Page 1)

the broadcasts, which are taped just before they go on the air, inevitably reduces the number of speeches that the President will be able to make in the last days of the campaign, which suits the strategists just fine.

"The more stump speeches you book into a day," Mr. Deardourff said, "the greater the potential for trouble. He just gets wound tighter and tighter, and then he's not at his best."

Fewer public appearances also mean fewer fluffs of the kind to which Mr. Ford is prone—such as his declaration in Iowa the other day that he was delighted to be in Ohio. There were more of them Sunday—Mr. Ford referred to S. I. Hayakawa, the Republican senatorial candidate here, as "Hayakama" and "Hiawatha," and completely mangled the name of the Serendipity Singers, who appeared with him—but none of this was audible to the TV watchers.

The 30-minute programs are the key element in a Ford media blitz that will cost even more than Richard Nixon spent in the final days in 1972, and probably $2 million to $3 million more than Jimmy Carter—who spent heavily in the early part of the campaign—has available for his windup. The saturation campaign also includes eight five-minute national radio addresses on key issues, thousands of television commercials and an election-eve telecast on all three networks.

Sunday night's program cost, as will the others, about $75,000—$30,000 for the time, $30,000 for production and about $15,000 for promotion and other expenses. It appeared simultaneously on 10 stations covering the entire state, and perhaps as many as 2 million persons saw it—at least 40 times as many as caught a glimpse of Mr. Ford barnstorming in Los Angeles, through Orange County and in San Diego.

Mr. Garagiola, a Ford supporter who volunteered his services, was drilled all day Saturday and Sunday morning by Mr. Deardourff. He served as narrator for the taped campaign highlights that opened the show.

There were "production values" aplenty—martial music over Mr. Ford's arrival in Los Angeles; lyric melodies over his visit to the San Gabriel Mission; Steve Ford, one of the President's sons, in a white Stetson, talking to a rancher; a woman in a crowd commenting, "I wanted to see Betty, doggonit."

And there was ample hyperbole. Mr. Garagiola reported that 42,000 persons had turned out to hear Mr. Ford at Fountain Valley; the local police had estimated the crowd at 32,000 and reporters thought it looked more like 15,000. It was an appreciative but not wildly enthusiastic throng. On television, however, it roared mightily, with the assistance of studio dubbing.

"They must have used the sound track from the Notre Dame-Southern Cal game," a Ford aide commented after the show.

Not a single word from any of Mr. Ford's speeches during the day appeared on the program.

Not surprisingly, all of Mr. Garagiola's pitches were slow balls right across the plate. A sample exchange:

"How many leaders have you dealt with, Mr. President?"

"One hundred and twenty-four leaders of countries around the world, Joe."

Pitch by Dole

SCRANTON, Pa., Oct. 26 (AP).—The Republican vice-presidential nominee, Sen. Robert Dole of Kansas, is making a pitch for the undecided voters, claiming the election could be decided by those who do not know who to vote for even as they enter polling places.

Sen. Dole campaigned today in Pennsylvania and Ohio, both viewed as "swing states" by Republican strategists—states that could go either way and where there are a large number of undecided voters.

Carter Lays 'Slanderous' Paper to Fo

(Continued from Page 1)

would not send U.S. troops counter the Russians. "Bu would let the Soviets kno would sever a friendship we h with them," Mr. Carter said. " time for threatening other tions is past."

Mondale Assails Dole

In Wilkes-Barre, Pa., me while, Democratic vice-pr dential candidate Sen. Wa Mondale, using some of harshest language yet in campaign, said his oppone renewed suggestion that Democrats were responsible World War II is "totally responsible and despicable."

Sen. Mondale termed Rep lican vice-presidential candid Bob Dole's remarks "a c pletely outrageous and defensible charge."

On a hectic trip through hi ly populated industrial st where the presidential elect is expected to be close, S Mondale noted Sen. Dole's st ment yesterday that Sen. D "had some reservations ab how it [World War II] h pened."

Absentee Ballots May Not Reach New York Voter

NEW YORK, Oct. 26 (AP) Absentee ballots for thousands New Yorkers living overseas m not reach them in time for t presidential election next Tu day. The state Board of Electi has blamed the delay on challenge to the listing of in pendent candidate Eugene J Carthy.

"The problem is they did certify them until Oct. 8," Thom Monahan, elections commissio in Rensselaer County, said of t state unit. "We're all in the sa boat."

The counties mail the ball to their residents abroad or the state board certifies t names of the candidates. El tion officials in New York C and Albany and Erie Count also reported delays.

The ballots "hopefully" will returned in time for absen votes to be counted if postmark by Election Day, Bean Dol executive director of the N York City board, commented.

In Israel alone, the rough 25,000 New Yorkers living th had not received their ballots Saturday.

"Some of them are pret frantic," Forrest Broman, vi chairman of Democrats Abro in Israel, said during the weeke "People from every state exce New York have their ballots, a they really should be in the m by Monday or Tuesday to on time."

BUSINESS OPPORTUNITIES

MAJOR INVESTMENT OPPORTUNITY

NO-CUT®
Eliminates Digging Damage To Underground Cable or Pipe

The NO-CUT Protective System will instantaneously stop a backhoe arm upon contact with buried utility lines. It is a proven system that represents the first positive step in preventing costly damage and serious accidents. The system will also protect construction equipment against theft or unauthorized operation.

The NO-CUT System is now in use by utility companies, construction equipment dealers, and large contractors throughout the United States. Many utilities have made its use mandatory.

Manufacturing rights are now available in Europe.

NO-CUT equipment is currently manufactured and marketed in the U.S. by AA Manufacturing Co., a subsidiary of CAMSCO, Dallas, Texas. A CAMSCO representative will be in Switzerland, October 24-November 4, 1976, to discuss manufacturing and sales arrangements with responsible and financially secure parties. A minimum investment of $25,000 is required.

ACT IMMEDIATELY
Write: Gen Self. CAMSCO, INC.,

Bahnhofstr. 41, 8001 Zurich Tel.: (01) 23 66 35.

EXCLUSIVE BUSINESS OPPORTUNITY

We are a private Association of top business executives actively engaged in transactions in the Middle East and Africa, and we now have a very limited number of openings on our small and very exclusive membership list. Applications will be screened on the basis of the applicant's background, business experience, and connections.

The purpose of our Association is to bring together customers and suppliers in Africa and the Middle East and the Western World, and to promote investment projects. Profits resulting from these activities are shared among our members on an equable and pre-arranged basis.

Write in confidence to Box D-5,529, International Herald Tribune, Paris. *If the application is considered to be of mutual interest a meeting will be arranged with the Association's President.*

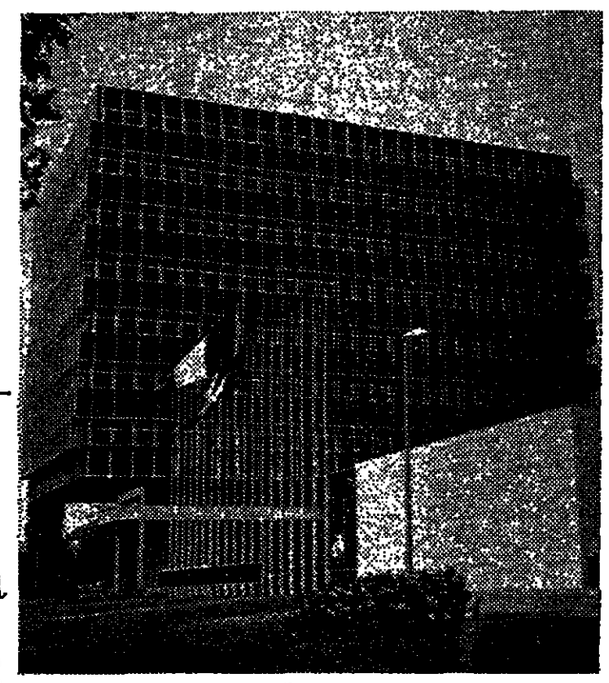
Shareholders of London & Continental Bankers Ltd. Provide Broad Domestic Strength



Frankfurt, July 1976 (CBGMBH). — The shareholders of London & Continental Bankers Ltd., with the exception of founder member, S.G. Warburg & Co. Ltd., are in the main the Central Banks of Europe's major cooperative groups. Each and every shareholder has demonstrated the success of cooperative banking in his own country and in recent years, major emphasis has been put on international developments.

In addition to the formation of London & Continental Bankers Ltd. in 1973, the shareholders, again under the leadership of DG BANK, founded in 1975 a merchant bank in Zurich, Switzerland, together with the Swiss Volksbank. This new bank trades under the name of Bank Europäischer Genossenschaftsbanken.

It is an additional link in the rapidly expanding international network of LCB's shareholders and other cooperative partners.

Fur auction in Copenhagen, one of the biggest in the world visited by more than 1,000 buyers

Head office of Banque Fédérative du Crédit Mutuel in Strasbourg

50 Years of Successful Banking

Andelsbanken, Denmark's Fourth Largest Commercial Bank

Copenhagen, July 1976 (CBGMBH). — Andelsbanken A/S Danebank, maintains a full-service branch network spanning the whole of Denmark. There are 287 service centres in all. With around 90,000 shareholders and over 800,000 clients, Andelsbanken A/S Danebank has over the years continuously strengthened its position as one of Denmark's foremost international financial institutes. Many of the country's major exporters are cooperative enterprises which are closely linked to the bank. Among its many activities Andelsbanken A/S Danebank finances the production and export of furs. Due to the fact that the demand from abroad has grown substantially since the end of World War II, the exporting of mink skins plays an ever more important role. Danish fur breeders through their cooperatives have organized one of the world's biggest fur auctions in Copenhagen, which is visited by more than one thousand buyers from all over the world every year. In 1974/75, 6.9 million skins were sold at a total price of about 700 million DKr.

In 1975, Andelsbanken A/S Danebank launched a nationwide campaign for savings to mark the bank's 50th anniversary. The results were excellent and boosted the deposits 33 %. New legislation forced Andelsbanken A/S Danebank to stop its old tradition of selling new shares at par over the counter to any subscriber. Thus future increases in capital are offered to existing shareholders only in the form of rights issues. The problem of adequate pricing was solved by introducing the shares to the Copenhagen stock exchange. The reception was good and the shares have since then performed very well. A 12 % dividend was paid for 1975 which included a 2 % anniversary bonus. To contribute to the development of Danish trade and industry Andelsbanken A/S Danebank created a foundation of 3 million DKr. on the occasion of its 50th anniversary. The amount is mainly intended to support young business people in their endeavours to acquire additional knowledge and experience abroad.

At the end of April 1976, Mr. Kristian Moeller, Chief General Manager, retired after having served 19 years as Managing Director. He was succeeded by Dr. P. Nyboe Andersen, former Minister of Commerce and Economic Affairs.

The bank is raising 75 million DKr. by way of one-for-three rights issue at 105 DKr. for 100 DKr. share in September. Thus the share capital will be 300 million DKr. At present the shares are quoted 185 DKr. at the Copenhagen stock exchange.

Commercial Private Banking from the North of Italy to the Mezzogiorno

Banca Nazionale dell'Agricoltura

Rome, July 1976 (CBGMBH). — Banca Nazionale dell'Agricoltura, BNA for short, traces its origin to the Italian cooperative movement which still retains an interest in the bank. Although originally set up to assist the Italian agriculture, the bank has expanded its servicing to industry and trade from the small and medium-sized firms to the major national and international corporations. In 1975, the bank pursued a policy of support especially of small and medium-sized businesses. The above emerged from the annual general meeting in Rome. Commercial enterprises received 91.4 % of the bank's ordinary loans. Small and medium-sized businesses were granted 65 % of the bank's financing.

The largest share of funds available (73 %) originated from this section of the community.

These policies and the positive results obtained were reviewed by the Chairman, Mr. G. Ennio Barillà, who also stated that the operation of the bank had grown in importance. Total deposits amounted to 3,635,000 million Liras (+ 28.6 %) and ordinary loans to customers rose to 2,001,000 million Liras (+ 25.8 %). The net profit for the year was 6,510,598,013 Liras (+ 47.3 %).

The bank has just completed the last increase of the share capital from 8,000 to 16,000 million Liras. Total capital funds now amount to 47,680,432,000 Liras. The shareholders also approved the resolution for a new increase in the share capital from 16,000 to 24,000 million Liras through the issue of new shares of 500 Liras, 50 % free and 50 % at nominal price.

These increases in the share capital, in short succession, were received with great interest by the shareholders, also because of the high percentage of free issues. The board's intention was for these capital increases to improve the total capital funds/ deposits ratio. As a result of the customers' trust in the bank, ordinary deposits increased by 57.7 % in the last two years. The bank responded to the public's trust by raising its capital by 300 % through two capital increases in 1974 and the one proposed at the general meeting.

The board of directors confirmed the following members of the executive committee: G. Ennio Barillà, Chairman; Leonida Mizzi and Giovanni Auletta Armenise, Deputy Chairmen; Adino Bruno Buchetti, Director and Secretary; Giuseppe Mormile, Carlo Piola Caselli, Giovanni Vender, Directors.

The General Managers of the bank are Goffredo Gambarara and Ulpiano Quaranta. The Deputy General Managers are Amilcare Cristallini and Plinio Venturini.

Leader of the French Crédit Mutuel Organization

Banque Fédérative du Crédit Mutuel with 1,100 Banks in the Alsace, Lorraine and Franche-Comté Regions

Strasbourg, July 1976 (CBGMBH). — As a result of new legislation, the dominant position of BFCM has been strengthened even further. The bank is now entitled to accept savings deposits on the same basis as the country's Savings Banks. In addition, as far as its loan portfolio is concerned, its traditional role in financing major public projects has been put within a broadly based legal framework. This opens up new and vast opportunities for the bank and enhances its local and national leadership. The bank's historical involvement in the industrial development of its region makes it an ideal partner for international clients seeking to expand their foreign activities.

The Crédit Mutuel of France in general, and the Crédit Mutuel of Alsace, Lorraine and Franche-Comté in particular, have developed quickly in the last few years. With FF 26.3 billion deposits, Crédit Mutuel is now number 6 on a national level and the Crédit Mutuel of Alsace, Lorraine and Franche-Comté number 9 with about FF 10.3 billion deposits collected in the 10 "départements" of Eastern France.

On the local level, this organization, which is 90 years old, groups more than 1,100 savings banks, called "Caisses Mutuelles de Dépôts et de Prêts" (C.M.D.P.), affiliated with the Fédération du Crédit Mutuel d'Alsace, de Lorraine et de Franche-Comté and its central bank, the Banque Fédérative du Crédit Mutuel, which both have their head offices in Strasbourg. Crédit Mutuel has the densest banking network in Eastern France.

The central financial institute of the group, BFCM, a limited company whose shareholders are the C.M.D.P., with branches in Belfort, Besançon, Mulhouse, Colmar, Sélestat, Strasbourg City Centre, Haguenau, Sarreguemines, and Sarrebourg, is a registered and fully authorized bank with a capital of FF 40 million and balance sheet total in excess of FF 5.5 billion.

BFCM's prime function is to manage liquidity of the C.M.D.P. and to service any clients of its region. Being represented everywhere in Eastern France, the bank has greatly contributed to the growth of the regional economy. In addition, its business contacts with other European cooperative central banks have developed very substantially. Whereas C.M.D.P. act locally, BFCM's activity covers the whole region in the interest of overall coordination and maximum efficiency.

On the one hand, BFCM links the C.M.D.P. with the different financial networks and enables them to provide their clients with the complete range of services of a fully authorized bank. Thus, BFCM functions as a clearing bank. It is necessary for the bank to have large resources permanently available through an efficient management of liquidity because one of BFCM's functions is to manage the liquidity of the C.M.D.P.

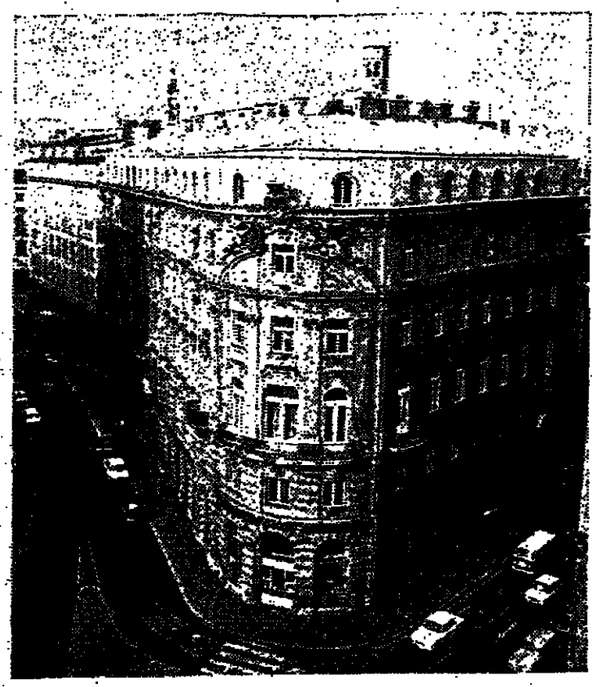
On the other hand, the bank's principal aim is to support the C.M.D.P.'s operations by offering them refinancing thus increasing the global credit potential. It also offers additional services, especially in the field of administration.

The evolution of saving depends largely on the standard of living and available employment. It is the bank's constant aim to improve the quality of life through various investments and regional involvement.

In this context, most financial actions are initiated by the long-term institution of BFCM called "Expansion Rurale et Urbaine" as well as through public or semi-public financial institutions. Thus, BFCM is often an important underwriter in public and private bond issues; indeed, BFCM has now one of the most important securities portfolios among French banks.

The activities of the different organisms of Crédit Mutuel are complementary: development of industries and infrastructure, financing of public authorities and housing, and services to the private clientele — hire-purchase — portfolio advice — travelling and insurance. The insurance companies — life and casualty — are called "Assurances du Crédit Mutuel" with head office in Strasbourg. The name of the travel agency is "Crédit Mutuel Voyages".

GZB – Austria's Second Largest Lender to the Country's Important Tourist Industry



Vienna, July 1976 (CBGMBH). — GZB acts as the central institution of the Austrian cooperative finance organization which includes some 1,400 credit cooperatives with 500 branches with approximately 1.2 million members and 20 % of all bank deposits in Austria.

This organization, with a total credit volume of Sch. 61 billion, is the largest provider of finance to agriculture and forestry and is the second largest lender to the country's vital tourist industry. In financing the industrial sector the organization ranks in third place in Austria. In 1975, its home loan association became leader in this field.

GZB itself provides full banking services. Its other interests include a building society, a life insurance company, a major holding in one of Austria's foremost investment companies and, to complement its extensive export/import financing activities, an important participation in a foreign trade organization with 61 offices round the world.

The bank is also a partner in numerous foreign and international credit institutions, among them the Vienna International Bank for Foreign Trade (IBA) active in East-West Trade and BHF-BANK-DG International S.A. in Luxembourg.

The bank is one of the "Big Four" among Austrian joint stock banks.

The U.S. Economic Issue

Numbers do not speak for themselves.

Jimmy Carter says the latest Commerce Department figures on gross national product show a "lackluster" recovery that could come to a halt while inflation and unemployment remained unacceptably high. Spokesmen for President Ford, conceding that the third-quarter growth rate of 3.95 per cent is "disappointing," are pleased with the reduced rate of inflation (to 4.4 per cent) and the 17.6-per-cent increase in housing starts.

Although the centripetal forces of election-year politics have been drawing the candidates' positions closer together, we believe that the economy is more likely to benefit from the general direction of Mr. Carter's policies than of Mr. Ford's.

How are voters to decide which candidate offers the better economic policies? Is there any way to determine which candidate is more likely to restore the nation to full employment, price stability and steady growth?

* * *

Since both candidates have been promising the same glowing results—but without being able to articulate convincingly how those results would be attained—one is driven to make a judgment about the kind of policies likely to emerge from an elected Mr. Ford or Mr. Carter (and the kind of advisers each would recruit), and what would be their actual impact on the national and international economy.

Mr. Ford seems unlikely to make any significant changes in the hands-off, slow-growth policies he has taken during the past two years. And the odds are that such policies, while holding inflation to a rate of somewhere between 4 and 6 per cent, would probably mean a very gradual reduction in unemployment, creating particular hardships for young people and the minorities—and for the cities where the jobless are concentrated. Slow U.S. growth will also retard world economic recovery, and increase the risks of balance-of-payments and monetary crises in both developed and developing countries—a threat that would be intensified by another steep oil-price increase by OPEC.

Mr. Carter's economic policies are likely to be more stimulative in the aggregate; his spending programs would indeed be more expansive than Mr. Ford's (except in the defense area) and he doubtless would lean more on the Federal Reserve to ease monetary policy and push interest rates down, and this would, in itself, marginally increase the risk of more inflation.

At the same time, however, a Carter administration would seek to mount "targeted" attacks on the job problems of particular groups and areas, and simultaneously on rising prices, costs and wages that are due chiefly to market power rather than to excess demand. The aim of such jobs and incomes policies would be to produce a lower rate of unemployment consistent with a lower rate of inflation.

A more rapidly growing economy would throw off more tax revenues, and might even close the budgetary gap more quickly than would the extremely cautious policies advocated by Mr. Ford and his advisers. The enormous deficits which aggregated $109.2 billion in the last two fiscal years resulted primarily from the slump and not from a rapid burst of spending in relation to gross national product. And another $50-billion deficit looms for fiscal 1977, no matter whether Mr. Ford or Mr. Carter is elected.

* * *

Obviously, no one can be sure how the two competing sets of policies will work out. Much depends on their execution—particularly in the case of the more complex "activist" combination of general and specific policies required if the Carter approach is to succeed in curing the stagflation that has hampered both the national and international economy for the past three years.

In economics, as in battle, there are times when the greatest risks are not in daring but in immobility. Today the threat to the world economy of an inert, timorous U.S. economic policy is great. Even here in the United States, too sluggish a response to the unemployment, inflation and anxiety that are setting into the economy could bring on a relapse into the severe recession from which the country has just been recovering.

THE NEW YORK TIMES.

Hollow 'Independence'

With many of the trappings that usually accompany this kind of event, the Transkei has celebrated the achievement of "independence" from South Africa—the first of nine tribal "homelands" to take the step. But the celebration in Umtata was a hollow one; for the government of Chief Kaiser Matanzima faces an almost total diplomatic boycott. Not even neighboring Lesotho, smaller in population and area and no less dependent economically on South Africa, will grant recognition to the Transkei.

The reason for shunning the Transkei is moral and political, rather than legal and juridical. To recognize the Umtata regime would be to condone South Africa's "separate development" blueprint, perhaps the most drastic racial segregation policy ever devised, one that would ultimately deprive 18 million blacks—71 per cent of South Africa's population—of legal rights in the country that most of them have always regarded as their native land.

Blacks could be citizens only in one of the tribal "homelands," which together make up but 13 per cent of the national territory. Millions residing in segregated urban townships, adjacent to South Africa's major industries and mines where their labor is required, have never seen the distant "homelands" to which they are arbitrarily assigned, and have no interest in exercising political rights there. Of the 3 million blacks who received Transkeian citizenship yesterday, whether they wish it or not, at least 1.3 million live and work outside that territory.

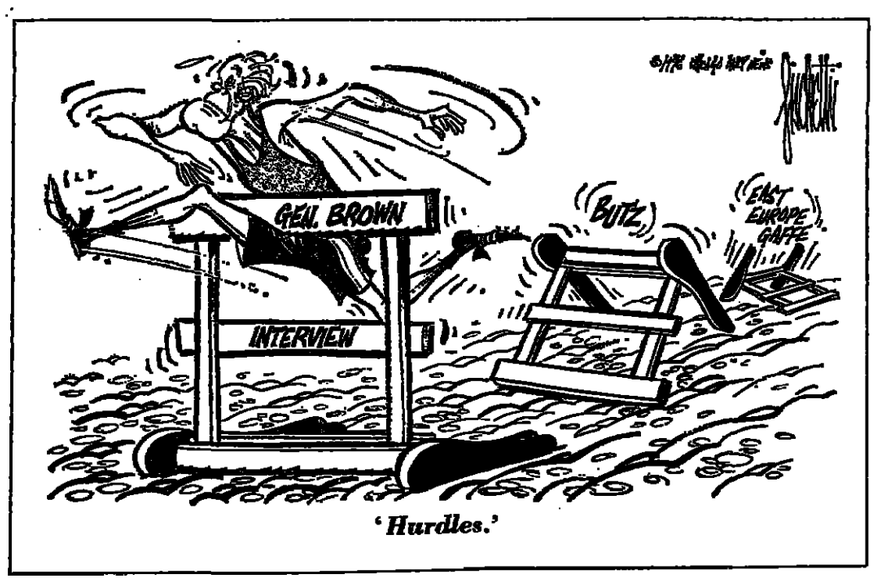
"Separate development" is a deceptively simple blueprint that goes against the grain of history and cannot provide a way out either for South Africa's privileged whites or for black leaders gullible enough to embrace it. Though he is an arbitrary ruler who has jailed his major opposition, Chief Matanzima is not Pretoria's puppet. He is tragically mistaken, however, in seeing "separate development," the offspring of apartheid, as a vehicle for bringing justice for South Africa's black majority.

The United States cannot afford to condone apartheid, a system that Mr. Kissinger described to the UN General Assembly a fortnight ago as "a denial of our common humanity and a challenge to the conscience of mankind."

THE NEW YORK TIMES.

In the International Edition

Seventy-Five Years Ago



October 27, 1901

NEW YORK—An editorial in the Memphis Commercial-Appeal says: "Sometime in the future, should the United States ever come in conflict with any nation controlling a section of the cable route leading to the East, it would be practically shut out from correspondence with its outlying possessions. This is a bad state of affairs, and should not long exist. The Pacific Ocean should be brought under U.S. control."

Fifty Years Ago

October 27, 1926

DETROIT—Mr. Harry Houdini, magician, is in a serious condition here tonight following an operation for appendicitis which he underwent this morning. Peritonitis developed when his appendix burst, but despite the infection physicians declared that the condition of the popular conjurer was stable. He had collapsed on stage following one of his escape stunts.

'Hurdles.'

'Nope, Not Voting—I Insist on Having More of a Choice.'

Carter: Hunger for Power...

By David S. Broder

WASHINGTON—When examining the reason for the indecision expressed by many voters about next Tuesday's presidential election, one thing becomes very clear. They may have doubts about Gerald Ford based on his performance in office, but their doubts about Jimmy Carter center almost exclusively on his character.

That is a strange situation for a candidate who has emphasized his individual qualities as much as Carter has. From the earliest primaries, he has talked at length, and in intimate terms, about himself and his family, and his appeal obviously depends as much on who he is as what he says.

Carter has displayed many of the qualities voters seek in a president: exceptional energy, high intelligence, and a serious, purposeful approach to government. More than most recent candidates, he is a natural executive, with an instinct for command and—as he showed in his choice of a running mate—a disciplined approach to decision-making.

Trusted by Blacks

Although some voters are put off by his personal style, more seem to welcome a man so unashamedly attached to the values of his church, his community and his region. He can appeal to Southern pride, but outside the South, too, there are many who welcome him as a symbol of Dixie's liberation from the burden of racism—and who rejoice doubly when they see Carter embraced and trusted by blacks.

To all these voters—and to those who believe this outsider can end the governmental impasse that has deadlocked Washington for eight years—Carter represents the hope of a fresh start for a jaded country and government. And yet it is obvious that many of these same voters hesitate to entrust the presidency to him.

One reason, plainly, is that they sense his hunger for victory and power. I don't know how many voters have read Carter's autobiography, "Why Not the Best?," but those who have usually remember his account of his reaction to his only political defeat. It came in his first race for governor in 1966, and he writes: "I waited about one month and then began campaigning again for governor. I remembered the admonition, 'You show me a good loser, and I will show you a loser.' I did not intend to lose again."

From that day to this, Carter has never stopped running. There was a four-year campaign for governor, and then, almost immediately, a plunge into national politics. By September, 1972, Carter had made the decision that committed him and every single member of his family to an exhaustive, all-consuming pursuit of the presidency.

Wondering

Americans have learned from recent experience that, for some men, there is such a thing as wanting the White House too much. Even when there, they never seem secure in its possession. Voters don't know if Carter is such a man, but they cannot be blamed for wondering.

For the presidency is an office that guarantees its occupant a high level of frustration. A lucky or skillful president may win half the battles he fights. Most do not fare that well, and Carter, with his ambitious designs for overhauling the bureaucracy and domestic programs, would be walking into some of the toughest fights a president can face.

How Carter reacts to frustration is something the voters have only lately begun to assess. His course through the primaries was unimpeded by serious setbacks; even when he lost, the opportunity to recoup was only the next Tuesday away.

But they have observed that as the fall campaign grew tighter, the open, accessible candidate, who once sought "an intimate, personal relationship" with everyone he met, has withdrawn more and more within his close circle of aides, as if seeking psychic security in an environment he could control. Control is plainly important to Carter; even a minor hitch in the schedule he finds upsetting.

Well, the world does not conform to any president's timetable, and the harshness Carter has displayed toward those who were obstacles in his campaign has rung a warning signal to many voters that he might react in a similar fashion to the frustrations of the presidency.

Most recently, it is Republicans who have complained of Carter's comments that Jerry Ford had been "brainwashed," was "stonewalling," and ought to "tell the truth." But earlier, as Mary McGrory has pointed out, a great many Democrats were disturbed that their candidate had found it necessary to apologize for his remarks to such diverse people as Hubert Humphrey, George Wallace and Lady Bird Johnson.

Longtime Carter watchers have seen a pattern of his ascribing secret, unworthy motives to anyone who criticized him or stood in his way. Julian Bond, Carter said last January, would not support a fellow-Georgian for president because Bond wanted to be vice-president himself. Morris Udall was not really running for president, Carter said in February: he was simply gathering publicity at Carter's expense for an Arizona Senate race.

When asked in April why he was opposing Sen. Scoop Jackson, the man he had nominated for president in 1972, Carter could not bring himself to say his own ambition had intervened. Instead, he maintained that Jackson had changed spots and shown himself unworthy of his continued support.

An Activist

Most voters will not pause to speculate what it is in Carter that compels him to such behavior. No more can they explain why he finds it necessary to assert compulsively that he, unlike other politicians, will never lie, mislead or evade—all the while indulging the perfectly human tendency to exaggerate, to minimize and to shade the truth.

But Carter's actions do give rise to doubts. He would plainly be an activist president, and most of the voters appreciate the value of a take-charge executive, even knowing that such a president inevitably engenders tensions with Congress, the bureaucracy, the press and the private sector. Such tensions are healthy in a democracy—as long as the president recognizes that they are the natural response to his activism.

But a president who is unwilling to accept defeat, who assumes the purity of his own motives but is quick to ascribe improper motives to others, is something else again. That kind of president, when frustrated, can easily be persuaded—or persuade himself—that the outside world is engaged in a hostile conspiracy to deny him the fruits of his victory. That kind of president can start compiling an enemies' list, and the country does not need to go through that experience again.

That is the dilemma some voters see in choosing Carter. His presidency, they perceive, is full of promises, yes, but also full of risk.

View From the Top

Hair Factor in Politic

By C. L. Sulzberger

PARIS—During the decidedly mediocre political campaign that is now winding up in the United States, practically every aspect of the candidates—their views, habits and personalities—has been discussed except the length of their hair. We know something about Jimmy Carter's suppressed libido and also something about the kind of moral outlook tolerated in Jerry Ford's family.

We have been told in profusion and also in some confusion about twice-born and thrice-born religious conceptions, about Democratic batting averages and about battered Republican knees. We have heard more than the usually anticipated share of noodlehead-ed gaffes. But the matter of tonsure has been artfully dodged by experts of each party.

Is this silence occasioned by a bald fear of sudden exposure—the embarrassed realization that a ticket is either too hirsute or not enough? Those who have read their history books are clearly aware of the political implications that can on occasion be read into unfashionable tonsorial style.

Goths and Romans

The Goths, in ancient Europe, wore long hair while the Romans, who ran the show, clipped theirs. Consequently a haircut meant disqualification from the higher offices of state because the obvious inference was that a Goth who went to the barbershop was trying to pass himself off as something he wasn't or that he was a collaborator.

During the latter part of the 19th century the Yi dynasty in Korea prohibited men from wearing long hair knotted in the hitherto chic fashion. The present chief of the Seoul government, President Park Chung Hee, has banned relatively similar hair-dos (sometimes locally referred to as "hippie-style").

He warns offending males that if they violate this ban by allowing their locks to cover their ears or reach their collars, they will go to jail. Kim Seong Jin, Park's minister of culture, lucidly explains: "We don't want youngsters to grow long hair. It's bad for mental and physical hygiene."

The military junta which ruled Greece from 1967 to 1974 was very much down on hair, among other things. Greeks—and even young visitors from abroad—faced a choice between prison, deportation or a quick haircut.

Throughout the early years of this century it was a tradition to think of revolutionaries, above all those advocating violence, exceedingly hirsute: with lo locks, beards and mustach Perhaps this habit derived fr vague recollections of Marx a Engels.

While the hairy immunde Communism-anarchism was defi itely abandoned a few ye later—perhaps because there w so many wars in which soldi were closely shorn to keep th free of lice—hair has revived a political issue during the p decade or so.

For the most part, the lo haired young men (and e longer-haired young women)— pecially in the Western wo —have come to be associated w the general idea of prote Protest against practically a thing, just so that things d remain as stodgy as they ar to be.

Thinly Covered

A cursory glance at some of leading contenders in next wes election would seem to hint t the Democrats are subtly seek to emulate the role of the w tressed Goths who didn't su to collaboration with the Rom or to be shaggy protesters o more recent era who just di like the way things are going

Nobody could shout at Jim Carter with any justification t he should go off and buy hi self a violin case but he is d initely a shaggier contestant t President Ford, whose dome is thinly covered and, at that, a neatly trimmed vestigial r The only really distinguished R publicans with adequate foli on top whose names come rea to mind are John Connally a young Steven Ford, neither whose names appear on t ticket.

Face-to-face confrontations, ranged between the vice-pr dential aspirants, Mondale Dole, would seem to be an proximate stand-off, with M dale having longer locks fall down his forehead and Dole bit thicker behind the ears. didn't say between them.)

Probably the outstanding De ocrat, when viewed through optic of the hair factor in polit is former Ambassador Pat Moy han. This genial mugwump, has hitherto displayed the agil of a dervish whirling between two major parties, is now seek to oust the well-clipped Jar Buckley from his senatorial s There isn't the slightest do that Moynihan has the head the job—at least, judging by outside.

...and Foreign Policy 'Blunder'

By Joseph Kraft

WASHINGTON — You would have thought it was World War III, judging by the fuss the press and television kicked up over President Ford's misstatement about the Soviet Union not dominating Eastern Europe. But a far more damaging blunder by Jimmy Carter on Yugoslavia has gone virtually unnoticed.

The silence remains deafening even though Secretary of State Kissinger has raised the issue publicly and even though it goes to general questions regarding Carter's competence in foreign policy and his relations with senior advisers. So, at the risk of seeming to take seriously a serious issue, let me raise the matter of Carter and foreign policy.

His inexperience in this domain has been evident almost from the first. Months ago, when Henry Brandon of the London Sunday Times asked him if he was confident he could arrange negotiations between Israeli and Arab leaders, Carter had to admit he had never met an Arab leader.

He told Playboy that "We don't know what caused the fall of the Allende government" in Chile. But in the second debate he said flatly that "this administration overthrew" that regime.

During the same debate he said that he simultaneously supported both a "free and independent Taiwan" and progress toward "normalization of relations" with Communist China. But anybody with the dimmest knowledge of that matter knows that Peking will not accept diplomatic relations with Washington (and a lot of other things) as long as the United States supports Taiwan.

During the same debate Carter expressed total support for Israel but also hit out at Washington's relations with two countries—Iran and Saudi Arabia—whose good relations with the United States are critical to Israeli survival. Reporters traveling with Carter have told me privately that he is constantly mixing up the Helsinki conference (where President Ford and Secretary-General Leonid Brezhnev and 30 other leaders signed an agreement on European security) with the Vladivostok conference (where Messrs. Ford and Brezhnev reached general agreement on the second accord limiting strategic weapons).

No doubt these matters may all be written off as details interesting only to the tiny segment of the country which pays close attention to foreign policy. But not the statement on Yugoslavia.

Unlike Poland or Czechoslovakia, Yugoslavia is a truly independent Communist country. Unlike them, it has received more than mere moral support from the United States and other Western nations.

It is one of the very few places in the world where Soviet intervention might indeed precipitate U.S. retaliation and war. The danger of Soviet intervention has recently increased with the age and illness of President Tito. So it is all the more urgent to maintain the policy—followed by every U.S. president since Truman, including Ford—of not disclosing U.S. intentions regarding Yugoslavia to the Russians in advance.

But Carter said flatly in a press conference in Kansas City on Oct. 16 that he would not go to war in Yugoslavia "even if Soviet troops intervened after President Tito left power." That break with U.S. policy went virtually unreported.

When the matter was raised in the third debate last Friday, Carter repeated his position, this dressing it up with a reference two prestigious advisers—form Ambassador Averell Harrim and former Defense Secret James Schlesinger. A follow question disclosed that Harrim and Schlesinger had not approv Carter's original stateme Neither did any of the ot distinguished men on Carte list of foreign policy advisers. E though there was involved serious policy matter—not a c rectable error of fact such President Ford made—the co mentators of television and pr have remained mute, ingloriu Miltons.

It was in these circumstanc that Mr. Kissinger raised t Yugoslav question in a televisi show last Sunday. His remar have been subject to snide cri cism as "political." But in n view Mr. Kissinger performed useful service in reviving t issue.

For one thing it is intrinsical important and it would be w for Carter to correct any mi impression he may have le More important, since Carter m well be president, is the lesson the whole episode. It is that important matters of foreign a domestic policy, he needs to lo past his tight little in-group well-nigh juvenile aides to ex perienced advisers whom he h so far been using chiefly for sho purposes.

Blocked on Vote

After fighting for years to obtain a vote for overseas Americans we finally succeed and what happens, we still cannot register as such, but have to do so through our last home state.

As thousands of other Brussels Americans we registered our signatures at the American Embassy, sent our absentee ballot to our last home state and received no reply, so we cannot vote.

This and in view of the latest gesture of the present administration in overtaxing us, prompts me to suggest that there are only two ways for us to fight for our rights: go back home and join the ranks of unemployed or that all of us refuse to pay federal taxes (they cannot put us all in jail) until we are allowed to vote and obtain our rights.

PARIS FASHIONS

Saint Laurent for Now—Kenzo Takada for Later

By Hebe Dorsey

PARIS, Oct. 26 (IHT).—Yves Saint Laurent and Kenzo Jap) are the heavyweights of rench ready-to-wear. But in ifferent ways. Saint Laurent's othes are for right now and is impact is so instant, so rong that retailers all over the orld report that they barely ave time to unpack the clothes efore they are grabbed up by stomers.

Kenzo Takada, who appeared the Paris scene only six years go, is equally important. But latively few people understand nd accept his fashions first and. However, his technical nowledge and his unbridled nagination—that takes in all ngles, from fabrics to construcon—has made him the most opied designer in Paris. People oday are wearing his styles ithout knowing where they ame from.

That is why watching the two ollections, one right after the ther, is fascinating. Saint Laurent, who showed this morning, elivered a Spanish look that hould be another gold mine.

His Russian collection last pring was all over the showroom his morning with dozens of omen wearing his flowered kirts, braided vests, shawls and oots. Others, like Baronne David de Rothschild, who is also a Jap fan, were in a less obvious niform—the Saint Laurent kilt with soft shirt and jacket.

This time, Saint Laurent had ne of his largest collections ever—close to 300 models and it lasted almost three hours. But nobody moved, even if Saint Laurent may have made a mistake by not stopping after his strong Spanish theme. What came afterwards were stale repeats of last year's chiffon gowns with a finale that was him, but a cross between circus and cabaret.

It did not really matter because Saint Laurent, who looked completely exhausted at the opening, has again delivered superbly. A brilliant designer he knows better than to burn his bridges. Instead of starting all over again each season, he keeps working on his look, adding here, cutting there but always making sure that his customer will never be left out in the cold.

His master stroke this morning was to lift the laced-up corselet he launched in his last couture collection, and put it into ready-to-wear. Everybody has his peasant skirts by now. Everybody is also doing vests. The Saint Laurent corselet will make all the difference.

Also, by using such simple, plain fabrics as poplin or cotton voile, Saint Laurent got away from the spectacular but overly-grand opera look of his made-to-order collection and gave ordinary women new, yet normal clothes.

Other details that helped Saint Laurent update his look: rick-rack decoration in the brightest colors in Paris; new wide belts that sometimes span out into 10-inch-wide cummerbunds; the paisley cotton, braid trimmed vests; all the vivid, Spanish shawls solid with pink roses; new crocheted shawls, trimmed with wool pompons; multicolored espadrilles.

Saint Laurent moved cleverly from white to bright colors then reverted suddenly to a subdued, citified khaki and brown combinations.

His skirts are some of the longest in town but he also did the short Spanish dress, as well as cuffed, city shorts reviving in one coup both legs and bosom.

Other Spanish notes—gold-coin jewelry, fans, and red or black roses tucked into hairdos.

The white terry opening number was also a winner. Saint Laurent showed immense white terry sweaters, heavily decorated with multi-colored rickrack. Those were worn with short or long skirts but mostly over full Turkish bloomers. One of the prettiest combinations was the strapless bra with slim, short skirt.

For those who would like a slightly toned down version of the same, Saint Laurent offered the same basic elements, but carried out in knits.

The finale, a bridesmaid doing the cancan, brought down the house and people walked out, numb but happy.

At Jap, the main thing is the short skirt that Kenzo is endorsing. He has grown up and he has also sobered up. He no longer shows to 3,000 people in some mad circus tent. Now, his shows are held in his new, organized set-up—and only 300 people at a time.

The kookiness has gone—but Kenzo still designs for the young. His line of short dresses, all well above the knee, is bound to go first to the junior and sportswear departments.

The opening was unusually quiet, with models wearing hardly any make-up and no crazy accessories. But the shapes were well worth watching. The most revolutionary was a huge, balloony cotton tent caught right under the waist. The most sober was a big fulltop over a clean, short wrap-around skirt that looked like a tennis skirt.

Where most designers only show one shape, he can design 10—and his new way of draping a rounded yoke is bound to be heavily copied.

When it comes to fabrics, Kenzo is also meticulously watched. His contribution to cotton this time is his use of the Boussac ombre, plaids and stripes, woven instead of printed.

Valentino had a smashing show last night too with a whole ballet springing out of the floor like a Broadway musical. But all the dresses, made in white cotton poplin and dolled up with lace inlays, had a Brazilian charm.

The rest of the collection was built around tried and true themes, notably the long slit tunic over pants. It was done with a light and happy hand, marvelous Italian silks. It is sure to be a commercial hit.

Yves Saint Laurent

Birgitte Muus-Sipa Press.

Kenzo Takada for Jap.

OPERA IN VIENNA

'Trojans': Playing for High Stakes

By David Stevens

VIENNA (IHT).—A handful of opera houses have shown in the last few years that "The Trojans" can be given stage realizations worthy of Berlioz's grandiose and visionary conception.

All the same, it is a daunting enterprise, and Egon Seefehlner—the new director of the Vienna State Opera—played for high stakes in making the Austrian premiere of "The Trojans" the first new production of his regime, and hiring to stage it an American production team headed by Tom O'Horgan, the architect of the Broadway success of "Hair" and "Jesus Christ Superstar."

O'Horgan and his colleagues—Robin Wagner sets, Randy Barcelo costumes and Wesley Pata choreography—collected the boos while the musicians got the cheers at last week's premiere. There was no sign of such dissatisfaction at the third performance. Not every idea worked, but there was plenty of evidence that O'Horgan and Co. approached their task with seriousness and respect for the work and executed it with precision and lively theatrical imagination.

The Horse

The Trojan horse contained not only Greeks, but the scenic solution to most of the remaining scenes of the "Prise de Troie" section. A stage-filling horse was wheeled into Troy from the full depth of the stage, its exterior looking like armor plate. The "skin" of the horse then disintegrated, the sections of armor plate becoming shields for the Greek soldiers who poured out. Their rush into the wings from stage front revealed Aeneas asleep on a cot and Hector's ghost behind a scrim drape that also represented Aeneas's tent. When that was swept away the horse's entrails were revealed as a flight of stairs on which the Trojan women committed their mass suicide in the final scene.

The Royal Hunt and Storm scene, instead of the mimed tableau laid out explicitly in the libretto, was converted into an allegorical ballet—watched from her elevated throne by a Dido lost in dreamy contemplation—that suggested the past and future of her affair with Aeneas.

An array of richly colored, curved panels suggested the tents of the Trojan encampment when stationary, and the sails of the departing Trojan ships when they moved into the wings. A huge, crater-marked moon rose behind Dido and Aeneas in the love scene—causing some giggles in the audience, but strangely evocative of the scene's lost-to-the-world sensuousness—and Mercury arrived to strike the moon like a gong (not Aeneas's shield, as Berlioz has it) to summon the hero to his forgotten task.

Barcelo's costumes bore most of the visual burden of distinguishing between the atmosphere of besieged Troy and fertile Carthage—white with simple trimmings for the former, an Arabian Nights riot of fantasy and color for the latter.

There were some miscalculations. Huge scarecrow-like figures were not convincing as the specters of dead Trojans telling Aeneas to get on with the job of founding Rome; Aeneas was virtually dragged aboard his boat by his men, whereas the comic scene of the two Trojan soldiers discussing their soft life in Carthage was cut—completely reversing the various attitudes toward leaving; Dido's death scene was rather flat, with a huge SPQR sign dropped from the flies giving the end a somewhat Brechtian premonition of history in the making.

As long as cuts were made—and enough were made to bring the vast enterprise home in less than four hours, intermissions included—there was very little call for the corny "Nubian slave" ballet that was installed as an entertainment for the about-to-depart Trojans. Why cuts should be made at all is a mystery, especially in a theater whose audiences regularly swallow "Die Götterdämmerung" or "Parsifal" substantially whole.

The Vienna cast was a strong one, headed by Christa Ludwig as the regal and womanly Dido. Guy Chauvet was in ringing, bright-toned vocal form and acted diligently, if not imaginatively, as Aeneas. Helga Dernesch delivered Cassandra's warnings with radiant tone, but not the possessed air of the ignored prophetess. Sona Ghazarian as Ascanius, Margarita Lilowa as Anna, Peter Wimberger as Pantheus, Horst Laubenthal as the poet Iopas, and Nicola Ghiuselev as Narbal were the other main members of the large cast.

Gerd Albrecht conducted with feeling for the work's sweep and grandeur, aided by an orchestra in top form and a chorus that, despite some errant moments, fulfilled its important duties.

Helmut Koller.

Christa Ludwig

. . . *Dido*

Entertainment In New York

NEW YORK, Oct. 26 (IHT).—This is how critics for The New York Times rate new plays:

"Jo Anne!" by Ed Bullins, "is a volatile yet fair-minded play that judiciously avoids the pitfalls of a political diatribe or a courtroom melodrama," Mel Gussow says. Joan Little was a young black prisoner in North Carolina who was accused and acquitted of killing her white jailer last year. "The author has let his mind move imaginatively, even playfully, through the case. But his allegiances are never in doubt, his Jo Anne has been wrongfully accused and rightfully acquitted." I. M. Hobson, as the guard, and Robbie McCauley as Jo Anne, "are sensitive and convincing, they humanize their characters." The director, Carl Weber, has not brought all the aspects of the production together yet, but Karl Eigsti's set and Carman Moore's musical score, "are definite assets."

LONDON:

When the Voices Are Too Beautiful for 'Macbeth'

By Henry Pleasants

LONDON, Oct. 26 (IHT).—The revival of Verdi's "Macbeth" by the Royal Opera at Covent Garden has two of America's finest opera singers, Sherrill Milnes and Grace Bumbry, as Macbeth and his lady.

Both are old hands in this early Verdi near-masterpiece, but are appearing in it here for the first time. Their work at the premiere last week won high critical praise, modified by some reservations which, on the basis of the second performance last night, seemed reasonable. With both singers it is a question of the matching of voice and role, more so, probably, with Milnes than with Bumbry. Their voices are simply too beautiful.

Bumbry, thanks as much to nature as to art, manages at the top and bottom of an extensive range to achieve some of the ugliness of sound that Verdi explicitly required of Lady Macbeth. Stridency above the B flat—except on a skillfully negotiated high D flat at the close of the sleepwalking scene—betrays the former mezzo soprano, and less than booming chest tones at the bottom suggest a price paid for the move to higher vocal latitudes. Elsewhere all is lovely—too lovely.

Milnes is a Verdian high baritone to the manner born, but it is the lyric baritone of Rigoletto, Renato, Posa and Boccanegra rather than the coarser, rougher, tougher, grainier and more incisive voice appropriate to Iago and Macbeth. It is too smooth, too velvety, too mellifluous. Which is why he made his greatest effect, last night, with the reflective "Pieta, rispietto, amore" monologue of the last act, topping it off with a high A flat of questionable propriety but of unquestionable glory.

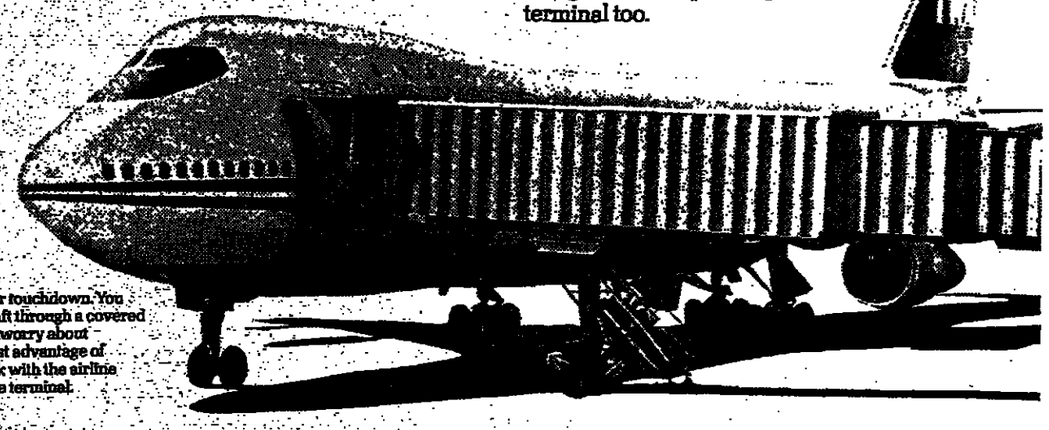
But all this is peripheral in the appreciation of two thoughtful and otherwise utterly admirable characterizations set against Georges Wakhevitch's wonderfully evocative Scottish scenery and Ande Anderson's restaging of Michael Benthall's original production, now 16 years old, but not looking it.

Why you're much better off when you arrive in New York with TWA.

Because you arrive at TWA's own terminal.

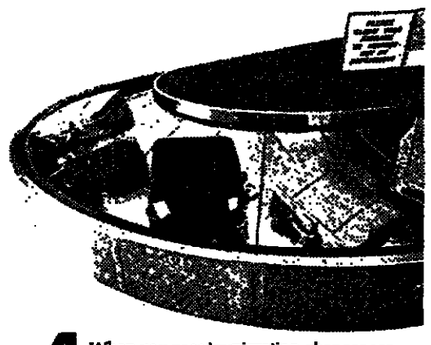
A very advanced building, designed by world-famous architect Eero Saarinen, offering its own International Arrivals facilities for the exclusive use of TWA passengers.

No other international airline offers you such privacy or, indeed, such a terminal.



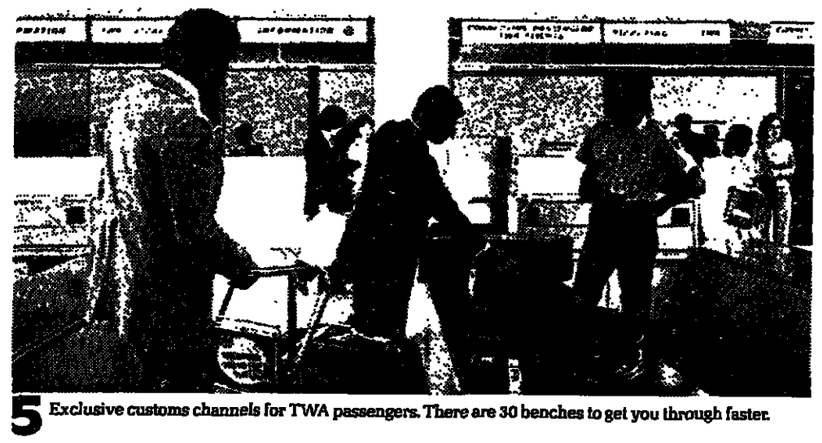
Naturally it has everything you expect a good terminal to have. Places to eat, places to meet, as well as shops and a bank.

More important, its unique layout allows the combination of maximum efficiency for traffic with the maximum comfort for passengers.



In fact, by the time you leave the plane and reach the front door of the building, having passed through immigration and customs on the way, you will have walked less than 100 yards.

Remember, the next time you cross the Atlantic, you're much better off to fly with the No.1 scheduled airline.

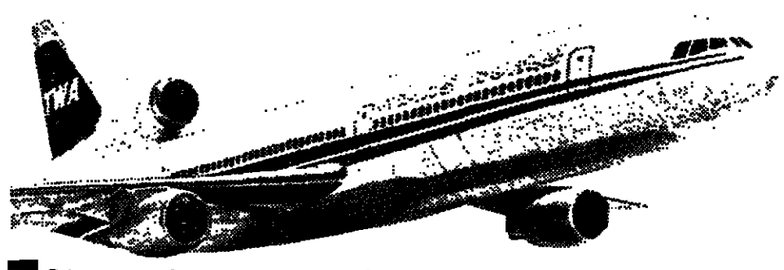


You not only get a nice trip through the air. You get a nice trip through the terminal too.

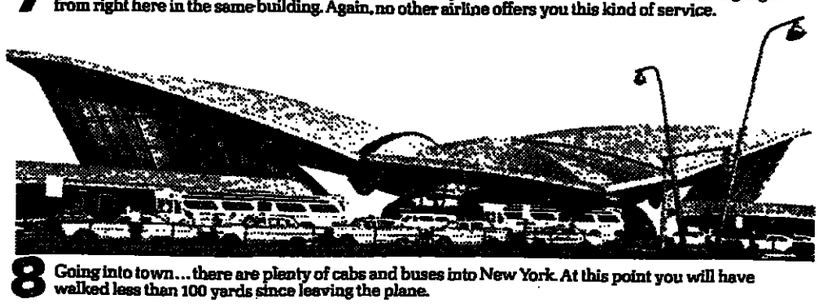
No waiting after touchdown. You leave the aircraft through a covered ridge so there's no worry about weather—the first advantage of living in New York with the airline having an exclusive terminal.

4 When you pass immigration, chances are you'll find your luggage waiting for you for a change. Another advantage of TWA's own terminal is that TWA controls unloading.

5 Exclusive customs channels for TWA passengers. There are 30 benches to get you through faster.



2 Inside the terminal you get straight onto the escalator down to the International Arrivals area which is exclusive to TWA passengers. No other airline offers you this big advantage.



3 You pass through immigration faster because no other airline uses the terminal.

6 Through to the main hall on the moving pavement. Your luggage rides on the conveyor belt alongside and, once again, will be waiting for you.

7 Going on somewhere... a few paces beyond customs you can check in for a TWA connecting flight from right here in the same building. Again, no other airline offers you this kind of service.

8 Going into town... there are plenty of cabs and buses into New York. At this point you will have walked less than 100 yards since leaving the plane.

No1 across the Atlantic

'Smash Its Head and Tail Off'

German Urges End of the Snake

BONN, Oct. 26 (AP-DJ).—dwig Poullain, management ard chairman of Westdeutsche ndesbank Girozentrale, said day the European joint curren- float, or snake, should be olished and the snake curren- s should be allowed to float sely against each other.

The banker, speaking in his pacity as chairman of the board of the German Society for the Protection of Savers, said the Oct. 17 realignment of parities within the currency union was a "mini-operation" that was insufficient to preserve the snake. He said new steps might have to be taken "around the beginning of December."

Asked what a correct adjustment would have entailed, he replied: "I would say kill the snake, smash its head and tail off and let the currencies in these countries float freely."

He said that so long as member countries are unable to agree on joint economic and fiscal policy "a union with fixed parities is just not possible." He qualified this by saying that a monetary union under these circumstances could be acceptable only if parities were changed significantly more frequently and consistently.

'Almost Impossible'

He said he realized that, in calling for abolition of the snake, "I demand something that is politically almost impossible because the mini-snake is being held onto as the last fiction of a European community in currency and finance policy."

Mr. Poulain in particular castigated the snake for causing money inflows into Germany that he said will cause the Bundesbank to fail in its objective of holding central bank money supply growth this year to 8 per cent.

The banker questioned whether the Bundesbank had used its influence in Bonn sufficiently to "draw the poison fangs out of the snake or better still to smash its head." He said that Germany is entitled to invoke a so-called "break-up clause" that would dissolve the snake automatically in the event that countries are unable to coordinate their policies.

He said, "No one in Frankfurt or Bonn speaks of this breakup clause" that was pushed through by the Germans in Brussels some time ago.

Although the German Society for the Protection of Savers has as its members the major banking associations, Mr. Poullain's comments apparently to do not represent a joint view. Deutsche Bank supervisory board chairman Franz Heinrich Ulrich and management board co-speaker Wilfried Guth earlier this week in Luxembourg both declared themselves in favor of the snake and said it was an important source of monetary stability in Europe.

French-Japan Trade Talks Fail to End Deficit Problem

PARIS, Oct. 26 (AP-DJ).—alks between French and Jap- ese business leaders failed to roduce any concrete results, with th sides maintaining their rious stands on major ques- ons, French sources reported day.

"The fact that the talks were ld is a positive sign, but the sults were disappointing," one rench businessman said.

The talks began last Friday etween heads of the French mployers' association and a Jap- ese trade mission led by Kei- anren chairman, Toshiwo Doko.

A joint communiqué, issued af- er the talks ended in Paris last ight, said that both sides agreed n the need to progressively educe the current trade imbal- nce between the two countries.

However, this should be achiev- d by substantially increasing rench exports to Japan rather han by diminishing the two-way rade, it said.

This sentence in the joint com- unniqué means that the French ailed to persuade the Japanese o voluntarily reduce certain ex- orts, observers noted.

Roger Bidegain, head of the oreign division of the French mployers' association, pointed out hat between 1965 and 1975 rench exports to Japan increas- d sevenfold, while Japanese ex- orts to France increased by 1,500 er cent. The French deficit in rade with Japan during the first ight months of this year amount- d to 2.2 billion francs, compar- d with a deficit of 2.6 billion or all of 1975, Mr. Bidegain dded.

The Japanese delegation, ac- ording to the communiqué, main- ained that the problem of the rade balance should be examin- d within "the larger context" f the payments balance between he two countries, which takes into account the substantial Jap- nese deficit in invisibles—tourism nd services.

Japanese officials reportedly ointed out that some 220,000 Japanese tourists visit France every year, compared with an insignificant number of French visitors to Japan.

The Japanese delegation, the communiqué continues, noted that Japan lives from its trade, that the Japanese market was open to foreign products "in line with the principle of free exchanges," and that Japan was among the countries which had the fewest non-tariff barriers.

Sunday Times Sticks by Story On the Pound

LONDON, Oct. 26 (NYT).—"You get a tip-off," said Malcolm Crawford, a Canadian who for nine years has been the economics editor of London's prestigious Sunday Times, "then you talk to people who are in the best position to know, and then you go through official channels."

One day last week, Mr. Crawford said, he received a tip-off that the International Monetary Fund and the U.S. Treasury thought the pound should fall to $1.50 before they granted Britain a $3.9-billion loan.

Mr. Crawford reported his story on the front page of the Sunday Times. The next day the pound suffered its greatest one-day loss in history, plunging from $1.6485 on Friday to $1.59.

Mr. Crawford is standing by his article, and so is his editor, Harold Evans. But in many other quarters it was severely condemned. The IMF and the U.S. Treasury, the British Treasury, the Bank of England all called it irresponsible.

Italy's Money Reserves Fall to $1.5 Billion

ROME, Oct. 26 (Reuters).—Italy's official currency reserves fell to $1.53 billion in September from $2.73 billion in August, the Bank of Italy said today.

The bank also said Italy had an overall payments deficit in September of 530 billion lire ($616 million) after a revised August surplus of 254.5 billion.

IMF May Have Trouble Providing Loans

By Paul Lewis

NEW YORK, Oct. 26 (NYT).—The International Monetary Fund is running low on money, and if the world economic slowdown goes on longer than expected it could have trouble meeting demand for its loans next year, according to IMF and other estimates.

The exceptionally heavy borrowing over the last two years that resulted from the downturn has reduced the IMF's stock of lendable funds—currencies from strong-economy countries that others want to borrow—from the equivalent of about $11.5 billion in April, 1975 to some $6.3 billion today.

By the end of this year, recent estimates by the IMF staff suggest, the figure could fall further to around $4.6 billion—or well under the $7.4 billion it lent in the year ending last April or the $5.8 billion lent in the previous year.

Officially, the IMF staff and the member governments maintained that the IMF should be able to squeeze through the next year or so, since the anticipated recovery in the world economy would reduce demands for credit and new sources of lendable funds are likely to become available.

But they concede that a prolonged recession or a big jump in oil prices could alter the picture. As a recent staff review of the IMF's liquidity said, rising loan demand and declining resources have brought into "sharp focus the fund's ability to meet further substantial demands for international credit, the depleted its resources."

But whatever the future demand for international credit, the depleted condition of the IMF's coffers already has four significant consequences for the international monetary system, in the view of monetary officials:

- Britain and Italy are being encouraged to turn to the general arrangements to borrow for the big loans they may seek later this year or in 1977. Under this arrangement, the United States and nine other industrialized countries are ready to supplement the IMF's resources to meet borrowings by any of their number.

But with Britain alone seeking $3.9 billion, much of the $5.3 billion available under the arrangement—after the British and Italian contributions are excluded—would be used up and little left for other borrowers.

- With the IMF unable to meet big loan demands from the industrial world easily, its activities may appear to be concentrated increasingly on the developing nations—enhancing a recent trend.

- As the American dollar now accounts for some 58 per cent of its current holdings of "lendable" currencies, the IMF's ability to continue lending on any scale is heavily dependent on the strength of the dollar and the success of the American economy.

- A debate is developing over the future size of the IMF, which many officials predict will develop into a major topic of discussion in international monetary circles next year.

The IMF's latest annual report published in August described the fall in its holdings of lendable currency as "marked." By July these had reached the equivalent of about $7.2 billion and on the basis of expected borrowings the staff concluded they could fall to under $5 billion by the year's end.

This compared with total borrowing rights of about $3.5 billion by all the oil-importing developing countries with the exception of India. Improving world economic conditions should make it unlikely these funds would ever be needed.

But the IMF concluded that Britain and Italy—the industrial world's two main potential borrowers—ought to turn to the general arrangements to borrow for help in raising the loans they are expected to seek in the coming months.

While reduced demand for credit as the world economy recovers should help the IMF avoid a liquidity crisis next year, officials also believe that it will be able to add to its holdings of lendable currency in various ways during the months ahead.

Past loans will be repaid and the IMF hopes to persuade the oil-exporting countries to let it make greater use of their valuable currencies in its lending operations.

Oil Demand Rise Seen Requiring 50% Output Gain

KUWAIT, Oct. 26 (Reuters).—The major oil-exporting countries will have to increase their output by 50 per cent to meet expected world demand by 1990, according to the Organization of Arab Petroleum Exporting Countries.

In a report on alternative sources of energy, the Kuwait-based organization said the share of oil in energy production was expected to decline from 55 per cent in 1974 to 50 per cent in 1990.

But with consumption expected to rise at an annual average of 4 per cent, world oil production will have to increase to some 78 million barrels a day in 1990 compared with the present 50 million barrels a day, it added.

Member countries of the Organization of Petroleum Exporting Countries will have to provide 45 to 50 million barrels of this total.

Stocks Score Big Gains On Moderate Turnover

NEW YORK, Oct. 26 (IHT).—Rallying from an oversold technical condition, New York Stock Exchange prices scored their best gains in more than a week today, but volume was only moderate.

"The market was sold out and it simply brought in investors searching for bargains ahead of the presidential election next week," said one analyst.

There was some suggestion that a comment by Saudi Arabia on oil prices also may have helped confidence. A Saudi official said his country is concerned about inflationary pressures in Western industrialized nations and will think carefully before backing any proposals to raise oil prices next year.

The Dow Jones industrial average closed up 10.14 at 948.14. Volume amounted to 15.49 million shares, compared with 13.3 million yesterday, when federal offices were closed down in observance of the Veterans' Day holiday.

Advancing issues outpaced declines by about 1,000 to about 410.

Right from the opening bell prices were firm, and by midday the Dow Jones average was sporting an 8-point gain.

Royal Industries, a volume leader, climbed 2 1/4 to 10. It said it will urge shareholders to reject the recent tender bid by Monogram Industries for 55 per cent of Royal shares at $11 each. Monogram's stock dipped 3/8 to 13.

Hoerner Waldorf gained 3/4 to 19. Hoerner and Champion International announced an agreement to merge recently. The latter eased 5/8 to 22 3/4.

Texas Instruments picked up 2 7/8 to 106 1/8, while Digital Equipment gained 3 3/4 to 148. Both reported higher earnings earlier in the week.

U.S. Steel rose 5/8 to 47 5/8 despite lower earnings. The firm called third-quarter results "disappointing."

Sheller-Globe climbed 1 3/8 to 12 3/8. It forecast higher earnings.

Atlantic Richfield, which also came in with increased profits, gained 7/8 to 54 3/4.

Texas Instruments moved ahead 2 7/8 to 106 1/8. But Chemetron fell 2 1/2 to 27 3/4. It reported sharply lower profits for the third quarter and nine months.

Prices on the American Stock Exchange advanced in light trading. The Amex index rose 0.28 to 98.17.

Soybean and grain futures prices closed mixed in Chicago. Wheat futures were down about 4 cents a bushel and corn lost 3 while oats were down 2 1/4. Soybean and soybean meal prices were irregular at the final bell but soy oil held a gain of nearly one-third cent a pound.

Plessey Earnings Increase 14.2%

LONDON, Oct. 26 (AP-DJ).—Plessey Co. post-tax profit rose 14.2 per cent in the first half ended Sept. 30 to £10.29 million from £9.01 million a year earlier. Nearly all the profit improvement occurred in the second fiscal quarter, when earnings rose to £4.74 million from £3.63 million.

First-half sales increased to £266.9 million from £219.6 million a year earlier. However, after allowing for inflation and depreciation of the pound, the rise in sales reflected only a marginal increase in volume, company officials said in their report today.

John Clark, chairman and chief executive officer, said he expects second-half performance to be "reasonable," with continued improvement in profits.

TOKYO, Oct. 26 (Reuters).—Daiichi Kangyo Bank Ltd. has established a wholly-owned banking firm, Daiichi Kangyo Bank AG, in Zurich.

U.S. Upturn Seen in 1977

ZURICH, Oct. 26 (AP-DJ).—"Next year is one of opportunity," in the United States, Albert Sommers, senior vice-president and chief economist of the Conference Board, told a one-day international financial and business outlook conference today.

Mr. Sommers, noting the pause in the U.S. recovery, said that the "next move in U.S. business will be up, not down."

The economist described U.S. fiscal and monetary policy as neutral rather than stimulative. This meant that it could be made more stimulative, he pointed out.

Mr. Sommers forecast the following trend for the U.S. economy through 1977: A real gross national product growth of 6.3 per cent in 1976 and 5.2 per cent in 1977; inflation running at 5 per cent in 1976 and 5.4 per cent in 1977; unemployment at a rate of 7.6 per cent in 1976 and at 7 per cent next year, and corporate profit growth not less than 27 per cent in 1976 and 15 per cent in 1977.

On interest rates, Mr. Sommers felt there was no reason for a rise this year or early next year, but there would be a moderate uptrend later in 1977.

Danish Trade Deficit

COPENHAGEN, Oct. 26 (AP-DJ).—Denmark listed a 1.825-billion-kroner ($309 million) deficit in its balance of trade in September, the government's bureau of statistics said in a provisional report. This compared with a deficit of 1.753 billion kroner in August and a deficit of 840 million kroner in September, 1975.

EMPRESA NACIONAL DE ELECTRICIDAD - COCHABAMBA, BOLIVIA
SYSTEMS INTERCONNECTION PROJECT
PUBLIC INVITATION FOR BIDS

Empresa Nacional de Electricidad (ENDE) is executing the systems interconnection project consisting of the construction and expansion of the following transmission lines and substations:

1. Line Cochabamba-Vinto (Quirquí), 115 KV, 125 kms.
2. Construction or expansion of the substations of Arocagua (Bacaba), Cochabamba (Valle Hermoso) Cuzco and Santa Isabel where transformers, breakers and capacitors will be installed.

This is an invitation to submit proposals for the above project for the design, fabrication, tests, guarantees and supply CIF Antofagasta, Chile, of the following equipment:

Specification 42P-E1948:
1. One autotransformer 120/72 KV, 15.75/25 MVA, Onan/Onaf three phase, 50 HZ.
2. One transformer 115/10 KV, 12/15 MVA, Onaf/Onaf three phase 50 HZ.
3. Three transformers 115/10.5 KV, 12/15 MVA, Onan/Onaf, single phase, 50 HZ.

Specification 42P-E1950:
Steel structures for approximately 152 kms. of transmission lines of 115 KV and associated substations

Specification 42P-E1952:
488 kms. aluminum conductor with steel core "Finch"

The purchase of the above described equipment will be financed with a loan from the International Bank of Reconstruction and Development (IBRD). therefore, this invitation for bids will be subjected to the requirements of eligibility of the IBRD in agreement with the respective financing contract.

In this bidding, proponents will be able to participate who are established in countries which are members of the International Monetary Fund and Switzerland.

The documents of the invitation for bids 42P-E1948, 42P-E1950 and 42P-E1952, can be obtained from Empresa Nacional de Electricidad S.A., Avenida de Las Heroinas No. 4574, Casilla No. 565 Cochabamba, Bolivia, upon payment of 1.500 Bolivian Pesos each.

Interested persons who obtain the documents for the invitation for bids, will be able to consult, request any additional information or inspect any plan which is not included in the bidding documentation in the offices of Ende in Cochabamba.

The due dates for the presentation of proposals are:
Specification 42P-E1948: November 30, 1976, 5 p.m., in the offices of Ende in Cochabamba.
Specification 42P-E1950: December 15, 1976, 5 p.m., in the offices of Ende in Cochabamba.
Specification 42P-E1952: November 30, 1976, 5 p.m., in the offices of Ende in Cochabamba.

Purchase orders will be awarded to the offers which are evaluated most advantageous to the interests of Ende.

Ende reserves the right to reject any of the received proposals.

MARITIME FRUIT WARRANTS

Notice to holders of Share Subscription Warrants of Maritime Fruit Carriers Company Limited ("MFC") Governed by Warrant Agency Agreement, dated as of August 31, 1972, among MFC, Maritimecor, S.A. ("Maritimecor") and Bankers Trust International Limited, as Warrant Agent ("Warrant Agent").

Manufacturers and Traders Trust Company ("Trustee"), as Trustee under the Trust Agreement, dated as of August 31, 1972, among MFC, Maritimecor and the Trustee hereby gives notice to each of the aforesaid warrant holders that the Secured Obligations (as defined in said Trust Agreement) were declared on June 3, 1976, to be immediately due and payable in accordance with the provisions of said Trust Agreement. The holder of each such warrant therefore has the right to surrender such warrant to the Warrant Agent for the purpose of requiring Maritimecor to purchase such warrant in accordance with the terms and provisions of the Warrant Purchase Agreement endorsed on such warrant. The obligation of Maritimecor to purchase such warrant is guaranteed by MFC. The Trustee has been advised that holders of warrants to purchase in excess of 75% of the aggregate total of MFC's Class A Shares which may be purchased pursuant to all of the warrants have to date surrendered or indicated their intention to surrender their warrants to the Warrant Agent. Each warrant may be surrendered by signing the Exercise of Rights Under Warrant Purchase Agreement form on the back of the warrant and mailing or delivering it to the Warrant Agent at its address at 56-60 New Broad Street, London EC2M 1JU, England, accompanied by (1) a declaration by the holder thereof that such holder is surrendering such warrant for the purpose of requiring its purchase by Maritimecor in accordance with provisions of the Warrant Purchase Agreement endorsed on such warrant and (2) a specification of the name and address of the person to whom payments are to be made. Payments in respect of a warrant purchase obligation from funds held by the Trustee cannot be effected until the warrant has been properly surrendered to the Warrant Agent.

World Export Growth

NEW YORK, Oct. 25 (AP-DJ). —The growth in world export volume will be 9.7 per cent this year, Citibank says. This compares with a 10-per-cent or higher forecast by the General Agreement on Tariffs and Trade.

BOOKS

TO JERUSALEM AND BACK
A Personal Account

By Saul Bellow. Viking. 132 pp. $8.95.

Reviewed by Christopher Lehmann-Haupt

WHAT one naturally keeps looking for in Saul Bellow's "To Jerusalem and Back: A Personal Account" is a unifying vision, a final irony, the last analysis, if you will—at least one telling epiphany to illuminate the collision between this urban intellectual from Chicago and the globe's most precarious frontier. For Mr. Bellow is, above all, a literary artist, and it cannot be that he was merely gathering impressions and historical theories when he spent several months in Israel last year. Surely, the artist in him wants to make some transcendent point. Yet it is difficult to see that point in the welter of scenic impressions, personal portraits, political theories and talk, talk, talk that makes up the first nonfiction work that Mr. Bellow has ever published.

Needless to say, this welter is often entertaining and endlessly intelligent. The region's palpable historicity is evoked. ("Jerusalem is the only ancient city I've ever seen whose antiquities are not on display as relics but are in daily use.") We see up close the dominant personalities—Mayor Teddy Kollek of Jerusalem, Abba Eban, Knesset member and former United Nations representative, and even the controversial peacekeeper of the Middle East, Secretary of State Henry Kissinger. ("Ah, if only the Bible had been written in Uganda. Everyone would have been much better off," says Mr. Kissinger. To which Mr. Bellow responds, though not to Mr. Kissinger's face, "What a pity it is that the great Metternich wasn't born in Uganda.")

As for theory and analysis: Mr. Bellow puts to rout every simple-minded solution to the Middle East's geopolitical dilemmas, and a good many of the complex ones as well, and he coaxes forth every subtlety concerning the region—from the historical status of the Palestinians (who may very well have displaced themselves, according to at least one student of the problem Mr. Bellow cites) to Israel's so-called role as a tool of Western imperialism (whose greatest curse on the Middle East, speculates Mr. Bellow, citing the historian Edie Kadouri, may have been to export there the very ideas that have cast the West in the role of villain).

Still, one keeps searching for some unifying perspective on all the talk and theory, and one keeps running up against dead ends. For instance, early in his essay Mr. Bellow observes ironically that "intelligent discussion [of great contemporary issues] hasn't *always* been wrong. . . . What is still being perpetuated in all civilized discussion is the ritual of civilized discussion itself. Does Mr. Bellow's irony extend to the "civilized discussion" of his own book ultimately constitute? Perhaps; but one doubts it. The discussion goes on too long, and he seems to take it far too seriously.

Then perhaps the key lies in the longing for artistic dimension that Mr. Bellow keeps expressing—his affinity for what he calls "the transforming additive: the gift of poetry" that makes him prefer writers to politicians, "admirable, intelligent men of strong character" though those politicians may be; and his despair over the loss of the ability to contemplate . . . aesthetic surfaces" he fears will be perpetrated by political pressures. Certainly Mr. Bellow's own aesthetic sense seems to be a victim of political preoccupations as he digs deeper and deeper into conflicting theories on the Mid-East's past and future. But it is aware of this loss in the way he form his discussion takes, never bothers to acknowledge it.

So finally one must assume that there is no ultimate key perspective to Mr. Bellow's understanding of Israel. Overwhelmed by the pressure of the existence there, finally stumped by the complexity of the issues, he cannot "come to clarity," as one of his professors used to urge. Instead he makes of himself a tabula rasa on which to record his conflicting impressions. And early in "To Jerusalem and Back," in what is perhaps the most eloquent passage in the book, he confesses his bewilderment.

"As an American, I can decide on any given day whether or not I wish to think of [the world's abominations. I need not consider them. I can simply refuse to open the morning paper. Israel, one has no such choice. There the violent total is added up every day. And nothing can be omitted . . . Israelis must, in fact, bear in mind 4,000 years of Jewish history. The world has been thrown into their arms and they are required to perform an incredible balancing act. Another way of putting it: No people has to work so hard on so many levels as this one. In less than 30 years the Israelis have produced a modern country—doorknobs and hinges, plumbing fixtures, electrical supplies, chamber music, airplanes, teacups. It is both a garrison state and a cultivated society, both Spartan and Athenian. It tries to do everything, understand everything, to make provision for everything. Its resources, all faculties are strained. Unremitting thought about the world situation parallels the defense effort. These people are actively, individually involved in universal history. I don't know how they can bear it."

That is as close as Mr. Bellow comes to expressing a unifying vision of Israel. Moving though it may be, it appears too early in the book to sustain one's interest in the endless discussion that follows.

Christopher Lehmann-Haupt is a book reviewer for The New York Times.

BRIDGE — By Alan Truscott

The reader who wishes to test himself should cover the East-West hands shown on the diagram and consider how to play seven spades. West leads a club, which is ruffed, and the play of the ace and king of spades reveals the bad news that West began with a singleton and East with J x x x. What should the declarer do now?

The first thing he does is to regret the bidding. Seven diamonds would have been easy. The problem of the spade jack was one that could have been foreseen when South made his impetuous jump to seven spades. The next thing is to look for a way to neutralize East's trumps.

In practice, South cashed the ace-king of diamonds, led to the heart ace and threw his remaining diamond on the club ace. He could then continue diamonds, but eventually he had to ruff and lose a trump trick. The winning play was to cash the diamond ace and lead to the queen, assuming a three-two break in the suit.

The club ace then provides a discard for the diamond king, and diamonds are continued to reach this position:

West led the club jack.

East has been trying hard to rid himself of all hearts, and now has one left. The right moment has come to ruff the remaining club and reduce South's trumps to the same length as East. Then dummy is re-entered with a heart lead to the ace, and the play of the last diamond leaves East helpless.

A little thought will show that South fails if he ruffs dummy's last club before he reaches the diagramed position, or if he waits to throw his last heart.

Recover 8 Fumbles

Redskins Accept 'Gifts' Of Cards and Triumph

By Leonard Shapiro

WASHINGTON, Oct. 26 (WP).—Raindrops and big breaks kept falling on the heads of the Washington Redskins last night. They made the most of their good fortune by taking a 20-10 victory over the St. Louis Cardinals in the mud at RFK Stadium.

In a dramatic 86-second span early in the fourth quarter, the Redskins rallied from a 10-6 deficit, primarily on Dennis Johnson's fumble recovery, Mike Thomas's seven-yard touchdown run and a brilliant 71-yard punt return for a touchdown by big-play man Eddie Brown.

The victory was the Redskins fifth in seven National Football League games and allowed them to tie the Cardinals for second place in the National Football Conference east, both teams a game behind the 6-1 Cowboys.

For much of this miserable, rain-soaked night, the Redskins seemed like losers, particularly after Jim Bakken's field goal on the first play of the fourth quarter provided the Cardinals a 10-6 lead.

But the Redskins' defense, and their special teams, saved the night, and perhaps the season.

The Cardinals, and particularly Terry Metcalf, helped a lot with 10 turnovers. And Billy Kilmer, a third-quarter replacement for injured Joe Theismann, helped a little too. He handed the ball off on Thomas's touchdown and on this sloppy night, that was a semi-accomplishment.

Metcalf fumbled four times last night and the Cardinals fumbled it away a league-record eight times. Metcalf made the big fumble that turned the game around early in the fourth quarter, and dropped the ball again at the Washington one-yard line with 1:19 left.

Metcalf's biggest blunder came on a third-and-six play less than four minutes into the final period. He was trying to sweep the right end from his 10-yard line when the entire left side of the Washington defense came up to stop him.

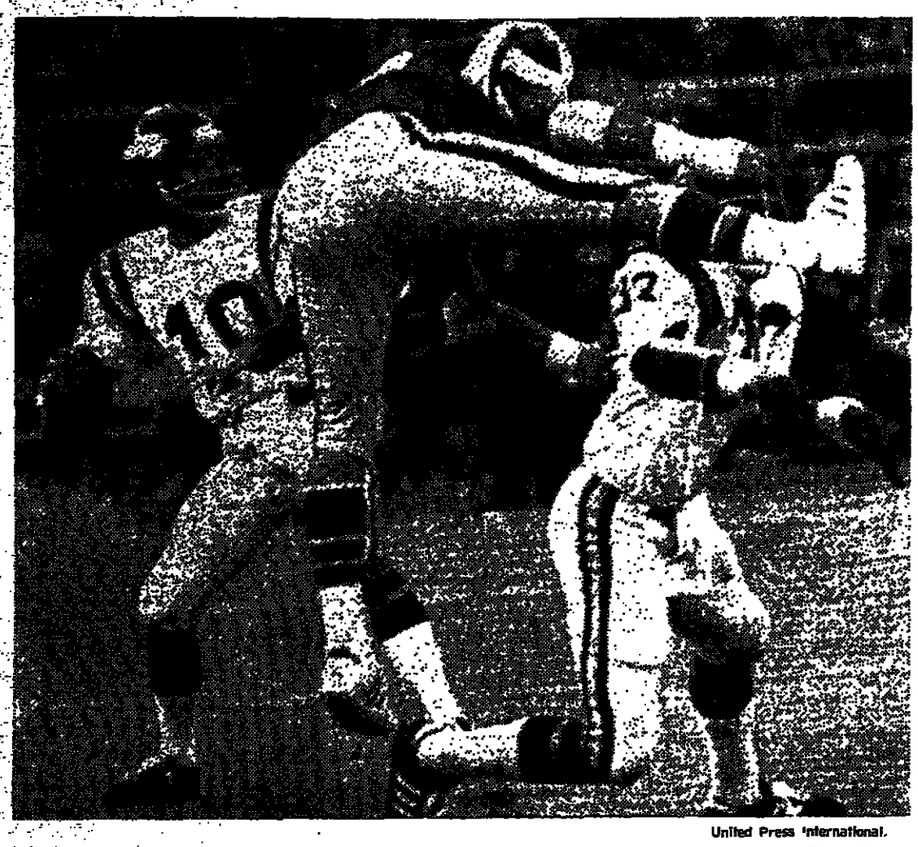
The ball squirted away and Dennis Johnson, a man who made a tackle to kill a promising Cardinal drive in the first half, jumped on the football at the St. Louis seven.

From there, Kilmer simply called Thomas's number on first down. The little tailback slashed through the slime as he turned left end and squeezed into the left corner of the endzone.

Mark Moseley, who earlier connected on field goals of 33 and 24 yards, hit the extra point and the Redskins went ahead, 13-10, with 10:32 left in the game.

From there, the defense went to work again. Cardinals' quarterback Jim Hart went to the air and came up to a third-and-three situation at his 36. But he could not complete a short pass to his fullback, Steve Jones, and the Cardinals gave up the ball.

Their punter, Terry Joyce, got off a 35-yard kick that Eddie Brown took cleanly in the middle of the field at his 29. He headed straight up the middle as Cardinals grabbed at him frantically. At least three St. Louis players had Brown by the shoe tops, but each time the little safety from Tennessee got away and scored.



The 48,325 brave and thoroughly soaked souls in attendance were in ecstasy and the stadium rocked when Moseley added the extra point for a 20-10 Redskin lead with 0:06 left to play.

There was more reason to shout a few minutes later when the defense got another turnover. This time Harold McLinton intercepted a pass intended for Wayne Morris and returned it eight yards to the Cardinals' 39 with 8:42 to play.

Major Penalty Helps

Canadiens Break Down Protection of Islanders

By Parton Keese

MONTREAL, Oct. 26 (NYT).—Jim Roberts underestimated the Montreal Canadiens last night.

"Don't let the Islanders score first," said the Canadiens' wing before the big game between Montreal, first in the Norris Division, and New York, first in the Patrick Division. "They're the best club in the league at sitting on a one-goal lead."

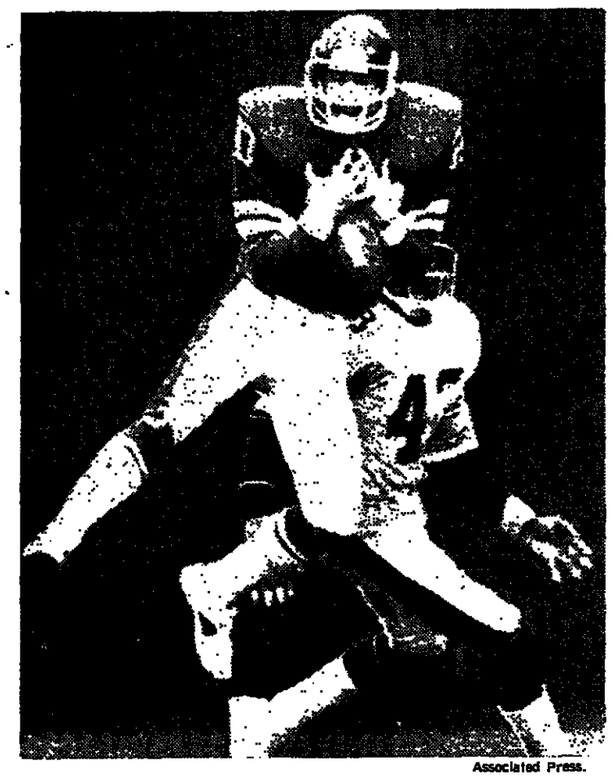
Though the Islanders did manage to score the first goal—by Denis Potvin on his team's first shot—they nevertheless were overwhelmed by a 36-shot Montreal attack, which brought the Stanley Cup champions a convincing 4-1 victory.

Calling this past week their biggest rest of the National Hockey League season, Montreal was hepped up and sent 29 shots at Billy Smith in the first 40 minutes, but the turning point to coach Al Arbour and the Islanders was not the torrid Montreal shooting, but a five-minute major penalty called on Gerry Hart of New York, which accompanied a two-minute penalty to Bob Bourne in the second period.

Two power-play goals by the Canadiens' Larry Robinson and Jacques Lemaire during this seven-minute stretch broke a 1-1 tie and turned a tight contest into one resembling a rout.

"Referee Wally Harris cheated the fans out of a hockey game," said Hart. "He acted like a coward in the face of adversity."

What Hart and Arbour were incensed about started as a typical two-man fight for the puck between Hart and Peter Mahovlich of Montreal. Suddenly Mahovlich grabbed for his face and headed for the bench, while Hart, obviously disturbed over the accidental slash, tried to aid his opponent.



According to Arbour, it wasn't until Mahovlich had left the ice and Hart was waiting for a face-off that Harris indicated a two-minute penalty on the Islanders' defenseman for slashing. When the cuts on Mahovlich's nose and eyebrow were brought to his attention, he added three minutes for drawing blood, as the rule allows.

"It shouldn't have been a penalty in the first place," Hart said and Arbour concurred. "His arm raised my stick and just barely touched his forehead. It happens 50 times or so a game. If you called a penalty on something like that every time it happens, you'd have no hockey game."

Giants' Coach Fails to Win And Is Fired

By Michael Katz

PLEASANTVILLE, N.Y., Oct. 26 (NYT).—In a move designed to "shake up" players who have lost seven straight games, the New York Giants dismissed Bill Arnsparger as head coach yesterday and replaced him with one of his assistants, John McVay.

"I feel we've reached the point where it's imperative to see if the people we have can respond to a personality other than Bill," said Wellington Mara, president of the team, after Andy Robustelli the director of operations, made the announcement at the Giants' training headquarters at Pace University.

The point was reached Sunday when the Giants were beaten, 27-0, by the Pittsburgh Steelers and booed lustily at their new home in east Rutherford, N.J. Mara and Robustelli met yesterday morning and decided to let Arnsparger go with half a season remaining on his three-year contract.

McVay, 45, who played on the same 1950 team at Miami of Ohio with Arnsparger and 19 other players who went on to coaching, will direct the team at least for the final seven games of this National Football League season.

"He is not an interim coach in the strict sense of the word," said Robustelli, indicating that McVay could be retained next year.

McVay, who coached Larry Csonka and several other Giants at Memphis in the now-disbanded World Football League last year, joined the team in March as an assistant coach in charge of "research and development."

McVay went to work almost immediately with the assistant coaches, all of whom were retained, reviewing game films. In his first decision, he said he would stick with Craig Morton, the Giants' player most booed, as his No. 1 quarterback.

Staubach's Understudy Prepares for Role

DALLAS, Oct. 26 (UPI).—The appointed time for the Dallas Cowboys workout yesterday was fast approaching and the chair in front of Roger Staubach's locker was still empty.

A few feet away sat Staubach's understudy, Danny White, who dashed in to save last Sunday's 31-21 victory over the Chicago Bears after Staubach went out with a broken bone in the little finger of his right hand.

"It would seem," said a visitor chatting with White, "that you may win the quarterback job by default."

"Oh, I don't think so," said White. "Roger will be around."

Roger was not around yesterday. He was at home, in a dismal frame of mind, having to keep his right hand elevated to reduce the swelling.

And now the question is whether Staubach will be around next Sunday when the Dallas Cowboys meet the Washington Redskins at RFK Stadium.

"We won't know anything more than we do now until Thursday or Friday," said Dallas coach Tom Landry. "The swelling probably won't begin to go down until then.

"We excused him from the workout because he has to keep his hand in the air."

White, with the makings of a good beard started, said he was more than ready to take on the Redskins if he was needed.

"It will be good that I have a full week to prepare," White said. "Against Chicago I was on the sidelines one minute and in the game the next. I didn't have time to think about anything. I don't even remember the first play we ran."

White threw two touchdown passes to Preston Pearson in the second half to help Dallas down the Bears, but he also threw two interceptions. One of the pickoffs was run back for a touchdown.

Other than his one half against the Bears, White has seen limited action in his first NFL season. Originally drafted by the Cowboys, White spent two years with the World Football League before its demise.

Thus far this season, he has hit 12 of 17 passes for 170 yards.

Malone Kept on Move as Center of Trades

By Sam Goldaper

NEW YORK, Oct. 26 (NYT).—Moses Malone, once college basketball's recruiting prize, has become pro basketballs' trading pawn. Malone, 6 feet 11 inches, was sold yesterday for the second time in a week. The Buffalo Braves sent him to the Houston Rockets, the third National Basketball Association team for Malone since he began the season in the Portland Trail Blazers' training camp.

It will be his fifth pro team since he was graduated from Petersburg (Va.) High School and signed for the 1974-75 season with the Utah Stars of the now-defunct American Basketball Association. When the Stars folded last December, Malone joined the Spirits of St. Louis. He carried a $350,000 price tag into the dispersal draft of ABA players, where he was selected by the Trail Blazers.

Buffalo gave up a first-round draft choice and cash to get Malone. To get rid of him the Braves received $100,000 and the Rockets' first-round draft picks for the next two years. Houston will also pay the remaining $232,000 of the dispersal draft price over the next two years. In the Braves' two victories, Malone had played a total of six minutes and scored two points.

"It's unfortunate that Portland drafted him," said Lee Fentress, his lawyer. "They never really intended to keep him. I'm really not sure why Buffalo took him in the first place, although they probably felt there was a lot of interest from other teams in the league. They thought they had a very marketable player in Moses, and, in fact, did pick up an extra draft choice and a little cash."

Houston and Portland were close to a Malone deal before the Trail Blazers sold him to Buffalo. The sale reunites Malone with Tom Nissalke, the Rockets' new coach. Nissalke was Malone's coach for 28 games during his rookie season at Utah. Malone averaged 18.8 points as a rookie. Plagued by injuries in the dying days of the ABA, his average dropped to 14.8 points last season.

Tates Locke, the Braves' coach, said Malone was traded because "he wanted a clause in his contract stating he would play 24 minutes a game. We didn't feel that was fair to our players." Fentress denied Locke's charge. The Rockets put Ron Riley, a forward, on waivers to make room for Malone.

Moscow Expects 300,000

MOSCOW, Oct. 26 (AP).—The organizing committee for the Moscow Olympics outlined plans yesterday for handling foreign visitors to the 1980 Games and also revealed an Olympic-style warmup competition to be held in 1979 in Moscow.

Vitaly Smirnov, deputy director of the committee, said that 300,000 foreign visitors are expected to attend the Games, scheduled for July 19-Aug. 3.

"We imagine that as a rule tourists are interested in the sports they prefer and rarely come for a whole Olympics," Smirnov said. He said the organizers expect most people to come to Moscow for only five or six days of the Olympics, traveling before or afterward to other Soviet cities where Olympic events will be held.

Sailing competitions will be in Tallinn, Estonia, and preliminary soccer matches in Leningrad, Kiev and Minsk.

Olympic committee publicity director Vladislav Shevchenko said foreign tourists who want to stay for the entire Olympics will be able to. But he indicated the 300,000 total figure is a maximum amount in view of Moscow's limited housing and tourists will get permission to come on a strict first-come, first-served basis.

He said hotel spaces for 50,000 foreign tourists still have to be built. Two hotels are now under construction and many Soviet visitors to the Games are expected to wind up in rooming houses and other communal facilities.

Smirnov said the USSR People's Spartakiad, a sporting competition held every four years that draws several thousand Soviet athletes, will be expanded in 1979 to include foreign teams as a preparation to the Olympics.

Japanese Lifts Mark

SAGA, Japan, Oct. 26 (AP).—Japanese bantamweight lifter Koji Miki established a world snatch record by lifting 120.5 kilograms (265.10 pounds) at a national sports meet yesterday. He broke his own record of 120 kilograms.

Auto Title Leaves Hunt Drunk With Victory

LONDON, Oct. 26 (AP).—James Hunt, new world auto racing champion, came home today with a king-sized hangover and a plea for more safety in racing.

The Briton, who clinched the title by finishing third on a rain-swamped track at Fuji, Japan, last weekend, said at a Heathrow Airport conference:

"The conditions were diabolical, but that didn't frighten me. I was petrified of coming lower than fourth.

"These kind of races have got to be stopped. Next season it is hoped that race track rules will be given a serious going over. If the drivers in the race say they consider they shouldn't drive, then this must be respected."

Hunt's rival for the title, Austrian Niki Lauda, retired from the race after one lap because he was blinded by spray thrown up by the cars in front of him.

Hunt didn't apologize for his hangover.

"I don't think I have stopped drinking since the race finished on Sunday," he said as his family and his girl friend greeted him with hugs and handshakes.

"I don't know how it feels to be champion, because ever since the race I have been partying and it hasn't had time to sink in."

Hunt said he would drive for McLaren again next year and defend his title.

Teddy Mayer, managing director of McLaren, said Hunt had signed a new contract for increased money. But neither he nor Hunt would say how much is involved.

Hunt, who has a house at Marbella, Spain, said he still would not be able to afford to live in Britain because of high taxes. He then left the conference in a chauffeur-driven car.

Lauda Defended

MODENA, Italy, Oct. 26 (Reuters).—Enzo Ferari, head of the Ferrari motor racing team, today defended Austrian driver Niki Lauda's decision to pull out of the vital Japanese Grand Prix at Fuji on Sunday.

Lauda, who narrowly escaped death in a crash in the West German Grand Prix on Aug. 1, withdrew from the Japanese race after two laps because of heavy rain and poor visibility. He lost his world title to Britain's James Hunt, whose third place in the race enabled him to beat Lauda by one point for the championship.

Ferrari, 78, said: "He did well not to race if he was worried about the atmospheric conditions, recalling what happened to him on Aug 1 and his present condition."

The Ferrari boss, a former racing driver, added: "I know what it means to make that sort of decision. At the French Grand Prix in Lyons in 1924 I myself suffered a nervous crisis and sent a telegram to the organizers pulling out of the race."

Ferrari said he would discuss Lauda's future with him when the Austrian returns to Italy within the next few days.

"His future depends solely on what he decides," Ferrari said. "When I have talked to him I will be able to tell you whether Lauda has any personal reasons which he cannot reconcile with the willingness to take risks."

Ferrari praised Hunt as a "fearlessly audacious driver" and disclosed that at one stage the Briton had approached Ferrari to offer his services. He said that he did not respond because of undertakings given to Lauda and No. 2 driver Clay Regazzoni of Switzerland.

Polish Star Returns

WARSAW, Oct. 26 (UPI).—Wlodzimierz Lubanski, formerly one of Europe's leading strikers, returns to international soccer Sunday after three years absence for Poland's Group One World Cup qualifying match against Cyprus. Lubanski, who broke his leg in 1973 and missed the 1974 World Cup final series in which Poland finished third, is currently playing for Belgian First Division club Lokeren.

Connors Agrees To WCT Tour For First Time

DALLAS, Oct. 26 (UPI).—Jimmy Connors, who refused to join other top pros in the World Championship Tennis tour because it was "too binding," has signed with the WCT for next year.

WCT officials made the announcement yesterday, although there were indications Connors might have signed last month. Sources said WCT wanted to keep the signing secret until other tennis pros who disliked Connors had committed themselves to the circuit.

For four years Connors had spurned all overtures from the Dallas-based promotional group because of the tour's fixed format. WCT's four-month spring tour is considered the most difficult and rigid in the sport, but the prize money is also the largest.

Apparently the money—plus a guarantee—finally lured Connors to the court. WCT has not offered guarantees to pros since the pro tennis "war" of 1971.

"We have individual negotiations with each player as to his commitments and the tournaments he will play," WCT executive director Mike Davies said. "It's confidential what the agreements are."

Another top pro, Arthur Ashe, reported last month that WCT was having difficulties signing name players for 1977, allegedly because of rumors that Connors would soon enter the circuit.

Davies said that was inaccurate. "We got the cream," he said. "You can't get all the players in the world but our field looks real good."

Connors has appeared in three WCT events and won all three.

At First, Not So Fast

By Neil Amdur

NEW YORK, Oct. 26 (NYT).—Anyone inspired by the New York City Marathon Sunday who thinks running 26 miles isn't really all that ridiculous, listen to some advice.

"Anyone who wants to start running," Dr. David Costill said yesterday, "should begin easily and not except instant results, at least not for six weeks. You should establish a pace where you can carry on a conversation with a person. If you can't talk because you're putting all your effort into running, you're going too fast."

Costill, director of the Human Performance Laboratory at Ball State University at Muncl, Ind., is one of 70 speakers attending a four-day conference on the marathon here. More than 500 persons have registered for what is considered the most intensive look ever at long-distance running.

Papers will be presented on subjects ranging from physiological profiles of joggers to metabolic adjustments to marathon running by former coronary patients.

"People think the only way you begin exercise is the way you did when you were 15 years old," Costill said. "That shouldn't be the case. What you really want from exercise is to improve the quality of your life rather than to make you live longer."

Dr. Paul Milvy, the conference chairman, said novice runners could start jogging, "sometimes just faster than a walk," and then gradually increase their work loads to levels that could be "easily tolerated."

"Most Americans start out too difficult and then give up," said Milvy, a runner, who works in the Environmental Sciences Laboratory at the Mount Sinai School of Medicine. "In the beginning it's better to run a couple of days, rest a day and then run again."

Reds Dominate NL All Stars

NEW YORK, Oct. 26 (UPI).—Second baseman Joe Morgan was a unanimous choice and five other members of the world champion Cincinnati Reds were selected yesterday on the UPI National League all-star team.

Other Reds voted to the team were shortstop Dave Concepcion, third baseman Pete Rose, outfielders George Foster and Ken Griffey and relief pitcher Rawly Eastwick.

Rounding out the team were catcher Bob Boone of the Philadelphia Phillies, first baseman Steve Garvey of the Los Angeles Dodgers, outfielder Garry Maddox of the Phillies and pitchers Randy Jones of the San Diego Padres and Jerry Koosman of the New York Mets.

The closest elections involved Rose, Boone and Eastwick. Rose beat out two-time NL batting champion Bill Madlock of the Chicago Cubs, 11-9. Boone edged Johnny Bench of the Reds, 11-8, and Eastwick won over Butch Metzger of the San Diego Padres, 13-9.

Garvey was a big winner at first base with 16 votes and Maddox had 15 while Jones received 22 votes and Koosman 21.

The Lout's Progress

By Russell Baker

NEW YORK.—In Massachusetts not long ago, two men cruising in their cars got into an argument on their citizen-band radios. After an exchange of insults, one man challenged the other to "come over here and say that." The other man drove to his challenger's location, produced a gun and shot the challenger's radio.

Baker

A few days ago in Houston, two motoring broadcasters began a radio quarrel and agreed to settle it at a curbside rendezvous. The police tried to intercept them but were foiled by motoring fight fans who used their radios to broadcast wrong directions to the scene of the showdown. The battling broadcasters met, and one produced a gun and shot the other.

The two events illustrate technology's contributions to the inhuman science of being disagreeable.

The Dark Ages of individual disputation are behind us. New wealth and technology have created a golden age for the dyspeptic personality. Armaments are now as available at the roadside stand as peaches and cider. Television provides instruction in their use and conditions the psyche to look upon the consequent damage as light entertainment.

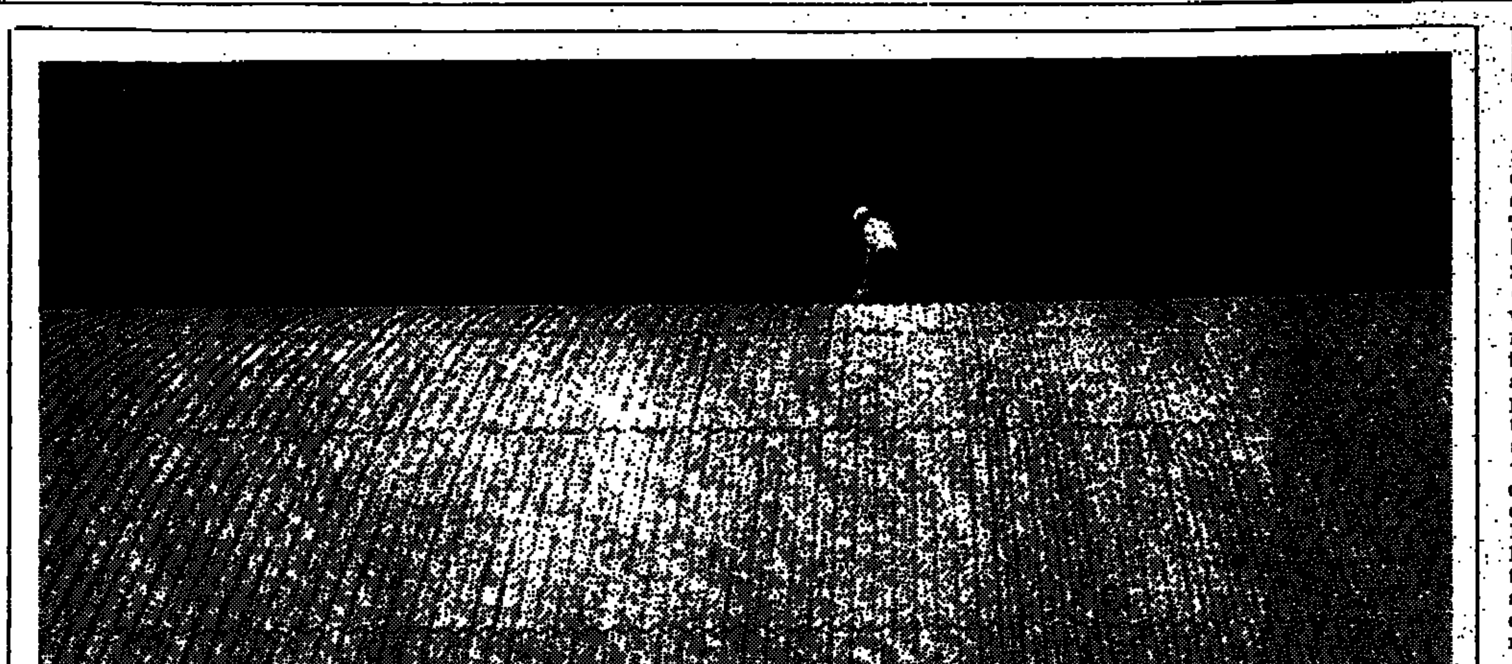
* * *

As the Texas and Massachusetts incidents illustrate, the citizen-band radio enables the quarrelsome to frolic far beyond the neighborhood saloon, cruising the city with loaded guns and broadcasting challenges all over town. The Massachusetts man who shot the radio instead of its owner showed a shrewd understanding of how to crush a kindred sour spirit. Squelch his radio and you reduce him to just another seething mass of rage sitting in traffic hurling unheard curses at the car ahead of him.

Citizen-band broadcasting, however, is not the only technological godsend for the disagreeable. There is the telephone, enabling them to assault strangers with obscenities and threats. However, it is still not possible to shoot anybody on the telephone. Until this inadequacy is remedied, the telephone will continue to be stigmatized as too sissified an instrument to be worthy of real he-men.

The big excitement in disagreeable circles is television. Oddly, its potential had been largely overlooked until quite recently. Through most of its existence television was regarded as an instrument for lowering the pulse rate between bouts of living disagreeably and otherwise.

* * *



In the 1960s, however, farseeing pioneers noted that the content of television consisted largely of people being disagreeable, and often downright beastly. These pioneers had political views for which there had hitherto been very little audience.

They reasoned that by behaving disagreeably, they could become conventional subject matter for television and, thereby, get their politics across to a bigger audience.

This reasoning proved correct. The late 1960s produced endless spectacles of politically oriented individuals and mobs engaged in inhuman behavior in public. Even then, however, the implications of television did not immediately become clear to the average nonpolitical lout-in-the-street. Despite the glaring opportunity for a vast audience, he went right on confining his swinishness to small groups.

In the last year, we seem to have had a breakthrough in disagreeable consciousness. Multitudes of Americans have finally grasped the fact that television can take their most brutish performances out of the obscurity of small rooms and alleys and project them to audiences of millions.

The easiest access to nationwide audiences is provided by sporting events, and this is where the cannier louts head nowadays when they feel the urge for self-fulfillment. Occasionally they produce riots, as in Yankee Stadium recently. Last Monday night at a nationally televised football game in Massachusetts, they produced a stadium full of intoxicated fistfighters and considerable hospitalization. One of them displayed his style by seizing a policeman's gun, but did not use it to shoot anybody, which was quite unusual on television.

A CLEAN SWEEP—Inside this plant in the Washington, D.C., area the U.S. Navy is doing computer-age research. But outside, it still takes a broom to get the roof ready for a resurfacing job. Washington Post.

'Sensational Discovery' of an Ancient Kingdom

By Alvin Shuster

ROME, Oct. 26 (NYT).—Italian archaeologists, who have been working at a site in northern Syria for more than 10 years, are now convinced that they have made a "sensational discovery" of an ancient kingdom that flourished as an important cultural and commercial center more than 4,300 years ago.

Their work was carried out at Ebla, just south of the modern city of Aleppo. Their breakthrough came last fall when they found 15,000 tablets in the archives chamber of the royal palace of the old kingdom and then began to decipher the cuneiform script that they said had not previously been seen.

"There were many skeptics at first," said Paolo Matthiae, the 36-year-old leader of the team and professor of Near East archaeology of the University of Rome. "Now I think the discoveries are being generally accepted for what they are—evidence of the existence of a new world, one that rivaled the ancient kingdoms of Egypt and Mesopotamia."

Starting U.S. Tour

Prof. Matthiae and a colleague, Giovanni Pettinato, a 42-year-old professor of Assyriology and a language expert, are preparing documents and packing pictures for a trip to the United States this week to lecture on their discoveries.

Interviewed in their office here, the professors said that the tablets revealed the most ancient Semitic language yet found and added a wealth of knowledge about the third millennium. The tablets, which showed that the city of Ebla alone had a population of 260,000, covered the years from 2500 to 2400 BC.

They said the findings were also of biblical significance. For example, the tablets contain accounts of the Creation and the Flood which the Italian experts said were similar to those found in the Old Testament and Babylonian literature.

"The tablets bring to light a civilization that preceded the arrival of the Hebrews in Palestine," Prof. Matthiae said. "We have found the civilization that was the background of the people of the Old Testament, to verify what is written in the Bible. But the tablets reflect the kind of life the Hebrews found when they arrived later in Palestine."

The cuneiform, which Prof. Pettinato is deciphering from photographs of the tablets, refers to a place called Urusalima. He said that this could well be Ebla's name for Jerusalem, thus predating other ancient references to the holy city by perhaps hundreds of years.

A King

One of the dynasties of Ebla was that of King Ibrium. And, Prof. Pettinato explained, this could be the root of the word "Hebrew," but he added that there was no firm evidence.

In reading the script, Prof. Pettinato has been helped substantially by the discovery of vocabularies in the palace's archives. He said that the Semitic people of Ebla had decided to invent a new language, different from that of the non-Semitic Sumerians of Mesopotamia.

"The children of Ebla learned both languages at school, Sumerian and the new language, which we are calling Eblaite," Prof. Pettinato said. "We found vocabularies, one word in Sumerian and the equivalent in Eblaite. For example, the Sumerian word for king, *nam-en*, had beside it the word, *na malik*."

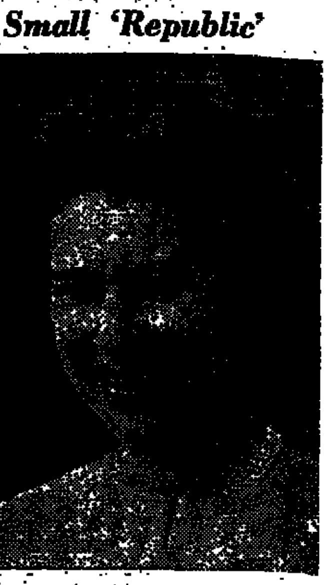
The Sumerians lived in southern Mesopotamia about 3000 BC and were credited with developing the cuneiform style of script. The "new" language of Eblaite was believed by the Italian professors to be similar to the biblical Hebrew spoken hundreds of years later.

Because of the work already completed by scholars on Sumerian, some of Prof. Pettinato's translations came relatively quickly. "Many of the tablets are still easier to read than to understand," he added.

Dismissed

"In our minds, the tablets represent a sensational discovery," said Prof. Matthiae. "Before, this area was dismissed as merely peripheral between the big centers of Mesopotamia and Egypt.

"People wrote that it was a land of nomads, without culture and commerce. Now we know differently. It was a large center of urban life, not dependent on Mesopotamia. Ebla had been mentioned in previous ancient tablets, but only as having been conquered by Akkad kings."



According to the newly discovered tablets, however, the kings of Akkad, which was the great Mesopotamia state, and the kings of Ebla were in constant struggle. King Naram-Sin of Akkad led the destruction of the palace in which the tablets were found.

"All this is new in terms of what we knew before about the whole area," Prof. Matthiae continued. "It is nothing less than a new and important chapter in the history of the world."

PEOPLE: *Munich Judge Wipes Out a Small 'Republic'*

The Republic of Luconia is no more. A Munich judge wiped it out with a blunt, "Nonsense, you can't call a beer keller a state!" The "republic" was founded in a bar two years ago by four businessmen. They designed a flag (golden sun, rising over a red, white and blue background) and named themselves president, interior minister, postal minister and justice minister of the "republic." This riled authorities—there is an ordinance banning unauthorized use of titles. This week the "justice minister" defended himself and his cohorts in court, saying, "I have gone into international law on this and there is nothing to block anyone from setting up a state." He was fined 1,800 deutsche marks—but the judge relented and suspended the fine.

Queen Elizabeth . . . it's official

To his surprise singer **Bobby Vinton** has inherited $8,650 from **Martha Visser**, who died at 72 earlier this month in Alameda, Calif. She had seen him perform in San Francisco and was impressed by his pride in his Polish descent. Vinton is going to use the money to set up a scholarship for Polish-Americans at Duquesne University, where he went to school.

* * *

Queen Elizabeth made it official Monday night: Britain's new National Theatre is open. The Queen said that the $27.2-million three-theater complex "stands as a tribute to all those who dreamed of it." Then she and her husband, **Prince Philip**, headed for the Olivier Theatre to see Goldoni's "Il Campiello." Her sister **Princess Margaret**, saw Tom Stoppard's "Jumpers" in the Lyttelton.

* * *

In honor of his son, killed last March, at the age of 21, **Charlie Byrd**, the jazz guitarist, and his trio played a concert last week at Sidwell Friends School in Washington. The concert, planned as an annual event, will benefit a scholarship fund at the school to honor Jeffrey Charles Byrd, who died in an automobile accident while an exchange student at the University of Madrid. He was a 1973 graduate of Sidwell Friends. His father lives in Annapolis, Md.

Nero would have loved it. Tuesday British Airways came out with its Christmas-shopping package tour for Americans. For £1,190 Americans can have a round-trip Concorde flight to London, stay at one of the top hotels (Dorchester, Savoy). British Airways is throwing in for good measure an empty suitcase—for all the gifts, of course. **David Schneider**, U.S. marketing manager for the government airline, described the Christmas-shopping package as something for the "top shopper." So far no hint on how to handle the U.S. Customs people.

* * *

Former Israeli Prime Minister **Golda Meir**, 78, was discharged from a Jerusalem hospital Monday night after a week of treatment for an intestinal disorder.

* * *

Under the Freedom of Information Act, **Alger Hiss** has filed a suit to compel the U.S. Department of Justice, the FBI, CIA and other government agencies to turn over additional records and documents relating to his conviction for perjury. Material previously released by the FBI produced a difference of opinion as to whether the agency originally had covered up evidence helpful to Hiss, including the manufacture date of the Woodstock typewriter considered central to the case.

* * *

Dame **Sybil Thorndike**, the famous British actress who died June 9 aged 93, left £10,345 ($17,580) in her will published last week in London. She gave most of her money away during her lifetime.

—SAMUEL JUSTICE.

Juan Carlos with Valéry Giscard d'Estaing in Paris.

Juan Carlos in Paris: A Step Toward Europe

By James Goldsborough

PARIS, Oct. 27 (IHT).—King Juan Carlos of Spain arrived here today for his first official trip to a European country and the first Franco-Spanish state visit since Premier Raymond Poincaré went to Spain in 1913.

The King and Queen Sofia were met at Orly Airport by President Valéry Giscard d'Estaing to begin the stay that was opposed by much of the Spanish government, was almost canceled and was finally cut to three days. The French have detained most known Basque separatists in France for the three-day stay, and have assigned 3,000 policemen to protect the royal couple. Several small bombings of Spanish property were reported here last night.

The principal theme during the official talks is the relationship between Spain and the other nations of Western Europe with democratization under way following the death of Generalissimo Francisco Franco 11 months ago, and Spanish democratic elections in the offing by next summer, the King has begun a process of rapprochement with Europe. The Spanish interest in NATO and in the European Economic Community has been well advertised.

In a brief airport statement, Juan Carlos said that it was "logical and natural" for his first European visit to be to France. It is an attempt to reverse decades, if not centuries, of bad relations that, even today, are slow in healing.

French sources indicated that the visit was almost sabotaged by elements in the Movimiento, the Franco-authorized political party, that accused France of indirect collaboration in the assassination of Juan María de Aranze, a member of Spain's Council of the Realm, in San Sebastian earlier this month. The Movimiento reports said that the as-

U.K. Ends Pre-Parley Talks on Rhodesia

By Bernard Weinraub

GENEVA, Oct. 27 (NYT).—Britain concluded talks tonight with Rhodesian nationalist leaders in advance of tomorrow's first session of the Geneva conference to work out a transition to black majority rule in Rhodesia.

Ivor Richard, Britain's ambassador to the United Nations, who will preside at the conference, met two key nationalist leaders together for more than an hour to discuss details of the conference, which seeks to set up a temporary biracial government that would pave the way to black majority rule within two years.

The nationalists, Joshua Nkomo, the widely known leader of Rhodesia's African National Council, and Robert Mugabe, a militant allied to the guerrilla forces fighting Rhodesian troops, declined to comment, but sources close to Mr. Nkomo emphasized that the nationalist side remained hopeful of working out a settlement at the conference despite major differences between Rhodesian Prime Minister Ian Smith and four African delegations.

'Gigantic Fraud'

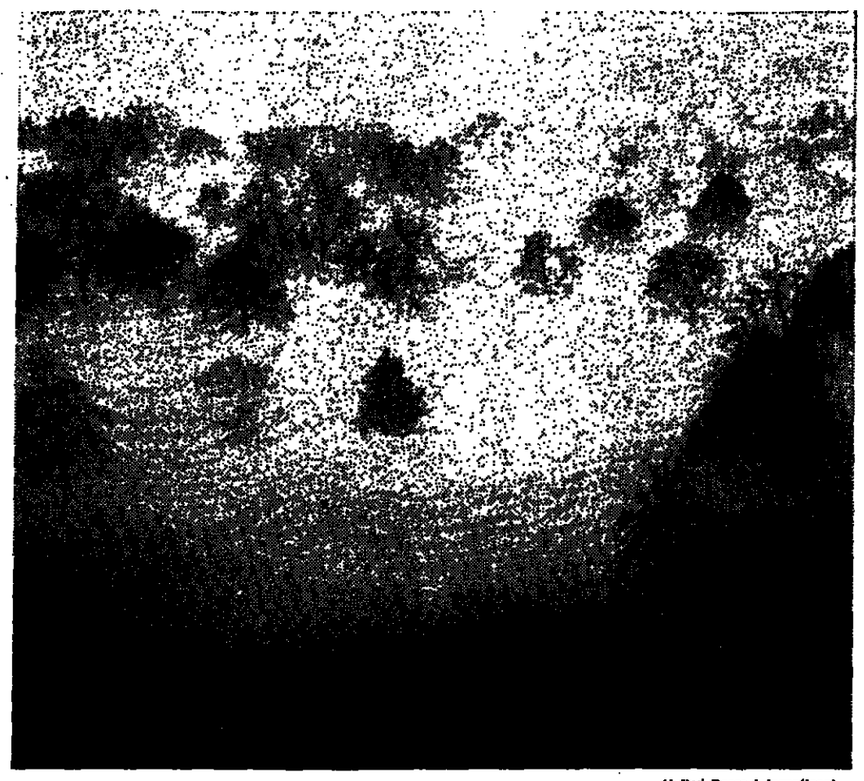
The proceedings were thrown into some confusion tonight when a spokesman for the African nationalist leader, Bishop Abel Muzorewa, accused Mr. Smith of "carrying out a gigantic fraud" and indicated that Mr. Smith was seeking to distort to his own advantage the plan advanced by U.S. Secretary of State Henry Kissinger.

The spokesman, the Rev. Max Chigwida, gave newsmen a 10-point document which he said was a summary of Mr. Smith's negotiating plan for tomorrow's conference. It alleged that Mr. Smith was seeking to perpetuate white rule in the government.

The document said that Mr. Smith's promise of majority rule within two years "does not mean black majority rule. It is a majority rule of the voters' roll, as it is now."

The document said that Mr. Smith's government would appoint a ruling council of state, as promised, then go "on ice" so that, if no constitution was agreed upon after two years, it would take over again immediately.

Mr. Chigwida declined to say who had summarized Mr. Smith's plan, or whether Bishop Muzorewa's delegation was presenting it as an authentic document drawn up by the Smith government.



A spokesman for Mr. Smith described the contents of the document as "a figment of Mr. Muzorewa's imagination."

Britain, the former colonial power in Rhodesia, called the conference after Mr. Smith accepted Mr. Kissinger's proposal for an immediate biracial temporary government and for black majority rule within two years. Mr. Smith, who broke Rhodesia's ties to Britain nearly 11 years ago rather than accept majority rule, accepted the Kissinger proposals under heavy pressure from South Africa.

The British now face major hurdles in seeking a settlement among the four nationalist delegations and Mr. Smith. The Rhodesian leader insists that he accepted the Kissinger package on the basis that it was nonnegotiable and on the assumption that the black African side had agreed to it.

But the nationalist side has

Callaghan Pressured on Inflation Plan

Pound Plummets to Another Low

LONDON, Oct. 27 (AP).—The pound today slumped to another record low in late trading here as the Labor government came under increased left-wing party pressure to scrap its anti-inflation economic policies.

Prime Minister James Callaghan was said to have walked out of a meeting of the Labor party's National Executive Committee in a huff early this afternoon during a debate on the government's economic policy. The committee then went on to vote against key points of the administration's economic strategy.

The pound had held through the day at about $1.5975, slightly higher than yesterday's closing level.

Shortly before foreign exchanges closed, however, sterling plunged, closing at $1.5720, almost 2 cents below the record low closing price, set yesterday.

The pound also dropped in relation to other major currencies. It fell 4 pfennigs in Frankfurt and 2 Swiss centimes in Zurich.

The devaluation of the pound in relation to a group of 10 major currencies from its December, 1971, level of $2.53 widened from yesterday's 47.1 per cent to 48.1 per cent at the close today. It meant the British currency has lost nearly half its value against those 10 currencies in less than five years.

The 26-member National Executive Committee of the Labor party voted, 13 to 5, in favor of a

To Carry Out Mandate in Lebanon

Syrians Regroup as Peace Force

By Henry Tanner

BEIRUT, Oct. 27 (NYT).—Syrian troops, in the absence of an effective Arab peacekeeping force in Lebanon, got ready today to carry out the decisions made by Arab leaders in Cairo last night.

These leaders failed to agree on the composition of the 30,000-man Arab peace force that they decided is needed in Lebanon.

This means that Syria has been left with the mandate to enforce the cease-fire, bring about the withdrawal of rival Lebanese and Palestinian fighting forces and establish a degree of public safety under the official direction of President Elias Sarkis.

Syria has at least 30,000 men in Lebanon—the figure given by President Hafez al-Assad to the other Arab heads of state at the limited summit of Riyadh 10 days ago, according to authoritative sources. Earlier, the best estimate had been that the Syrians numbered about 20,000.

To Form 'Backbone'

Syria has decided to transfer 9,000 of its men to the peacekeeping force immediately, according to informed officials.

Ahmed Iskander Ahmed, the Syrian information minister, said today on the government radio of Damascus that "the Syrian forces in Lebanon will form the backbone of the Arab peacekeeping force."

Syrian forces that were scattered in the mountain area north of the Damascus highway for the last four weeks started to pull out of the villages there yesterday and were being regrouped near the highway, about 15 miles east of Beirut, just behind the forward Syrian lines.

- **An analysis of Arab accomplishments at the summit conference. Page 2.**

The first task of these troops will be to take control of the Beirut-Damascus highway from the Syrian positions in Bhamdoun all the way to Beirut, according to the plan worked out at the limited summit in Riyadh.

That is a major task. It will be the first test of the willingness of conservative Christian forces and Lebanese Moslem militants to cooperate with Syrian forces serving as members of the Arab peace force.

Palestinian commandos who control a short stretch of the highway where it goes through the Palestinian stronghold of Aley, just this side of the Syrian line, have indicated that they will not contest control of the road.

But the rightist Christians occupy Kahale, the next town down the steep slope from Aley toward Beirut. They also control Baabda, the town where Mr. Sarkis's presidential palace is, as well as other communities between Kahale and Beirut.

In Beirut, the highway skirts the Christian suburb of Ain el-Rummaneh and the Moslem suburb of Chiyah, two enemy neighborhoods that have been locked in uninterrupted fighting since the start of the war a year and half ago.

Decision on Advance

The rightist Christian leaders must decide what to do about the expected advance of the Syrians into Kahale and Baabda.

Bachir Gemayel, the military commander of the Phalange—the largest Christian militia—and Camille Chamoun, the head of another rightist Christian force, have said that they will not tolerate foreign troops on their side of the dividing line.

Mr. Gemayel repeated the assertion in an interview published today in the weekly As Sayad. Abou Arz, head of the extremist

U.S. Will Increase Fighter Strength In Europe in '77

By George C. Wilson

WASHINGTON, Oct 27 (WP).—The United States will significantly, increase its fighter strength in Western Europe next year, the Pentagon announced today.

The deployments will represent a net gain of 84 fighters for NATO, the biggest boost since the cut of 1968, when 96 F-4s were sent back to the United States.

U.S. bases in West Germany will get their first F-15 Eagle fighters in the spring of 1977, the Pentagon said, while those in Britain will receive more F-111 fighter-bombers.

The F-15 is a hot U.S. Air Force fighter now coming off the assembly line at the McDonnell-Douglas plant in St. Louis. The Pentagon said 72 F-15s would be sent to bases in West Germany to help insure aerial superiority on the NATO front.

"The F-15 wil provide the North Atlantic Treaty Organization with an air-defense capability superior to that of the most modern Warsaw Pact aircraft," the Pentagon said in its announcement.

The F-4 fighter-bombers that the F-15 will replace at the Bitburg Air Base in West Germany will be reassigned to three other bases in that country rather than sent back to the United States. This will mean more F-4s for the bases at Hahn, Ramstein and Spangdahlem.

The Pentagon will double the number of F-111s in Britain by sending a second wing of 84 swing-wing fighter-bombers there. They will be based at the Royal Air Force Base at Lakenheath. The RAF base at Upper Heyford has had a wing of F-111s since 1970.

"The F-111 will increase allied adverse-weather and low-level penetration capabilities to include interdiction and close air support," the Pentagon said.

The additional F-111s will replace 72 F-4 aircraft that will be returned to Nellis Air Force Base in Las Vegas.

The additions will bring U.S. Air Force fighter-plane strength in Europe to about 550 planes.

The F-15 is considered more than a match for the Soviet MiG-23 and 21 fighters that are on the other side of the NATO line. But the Warsaw Pact is credited by the Pentagon with having more planes, if less potent ones, than the NATO countries.

Although the F-15 has been stressed by the U.S. Air Force as an air-superiority fighter, it also can be used for close support of ground troops.

3,000 More Men

"These deployments," said the Pentagon, "are in keeping with the congressional mandate to increase U.S. combat capability in Europe and are particularly important in light of recent improvements in Warsaw Pact forces facing NATO."

The F-15s and F-111s will be phased into the NATO fighter forces in stages in 1977. All the planes will be in place by the end of the year, the Pentagon said.

The shifts will increase U.S. military manpower in Europe by about 3,000 men, raising the total to about 305,000.

Defense Secretary Donald Rumsfeld said in his posture statement this year that the character of the Warsaw Pact tactical air forces had changed in the mid-1960s from primarily defense to primarily offense.

But the Soviet Union is trying to cover both the NATO and Chinese fronts with its total force of about 4,000 fighters, light bombers and 1,000 reconnaissance and electronic-jamming aircraft. The most modern Soviet aircraft are going to the NATO front and the older ones to the Chinese border areas.

Ford Assails Carter View of Policy Abroad

Says He Advocates 'Dangerous' Theories

By Lou Cannon

PITTSBURGH, Oct. 27 (WP).—President Ford, in a systematic attack on the foreign-policy proposals of Democratic presidential nominee Jimmy Carter, yesterday accused his opponent of advocating "untested, untried and potentially dangerous" doctrines that would substantially increase the risk of war.

Mr. Ford said that Mr. Carter had revealed his inexperience in foreign affairs by telling the Soviet Union in advance that he would not send U.S. troops to intervene if the Russians invaded Yugoslavia.

In Columbia, S.C., Mr. Carter responded quickly. He asserted that Mr. Ford himself "on at least six occasions . . . has made flat statements that he would not use troops in certain areas of the world." Aides to the Democratic nominee produced examples of such comments from Mr. Ford about the Middle East, Rhodesia and Angola—all of which, Mr Carter said, were "appropriate for exclusion from the U.S. defense perimeter.

The dispute between the presidential candidates centered on a comment Mr. Carter made in the third and final presidential debate. In it, he ruled out the use of U.S. troops in Yugoslavia if the Soviet Union attempted to intervene there after Marshal Tito's death.

From the Beginning

"I have maintained from the very beginning of my campaign... that I would never go to war, become militarily involved in the internal affairs of another country unless our own security were directly threatened," Mr. Carter said. "I don't believe that our security would be directly threatened if the Soviet Union went into Yugoslavia."

Mr. Ford yesterday termed this comment "a singular mistake" that reflected Mr. Carter's inexperience. "Presidents always have known better than to say what they would do in advance of an international crisis," Mr. Ford said.

"When a potential adversary knows what you will and won't do in advance, your flexibility is limited and his is increased," he added to applause from his audience. "He can probe with impunity or redirect his efforts at more tempting targets."

At an airport press conference in Columbia, Mr. Carter replied that "I think the time for bluffing other nations by claiming we're going to send in troops is past... There's been too much bluff and bluster."

Stiffer Attitude

On the other hand, Mr. Carter took a considerably stiffer attitude toward possible Soviet intervention in Yugoslavia than he had during last Friday's debate.

Asked about Mr. Ford's criticism, he said, "I don't see any likelihood we would send troops into Yugoslavia, but I would let the Russians know that this would sever any sort of friendly relations that we have with them, that it would be a very serious breach of the peace, and that it would make it almost impossible for us to carry on our normal relations with them under the broad terms of détente.

"But as far as threatening to send troops, I would not do that at this time," he said.

In his speech, to the Pittsburgh Economic Club, the President coupled his attack on Mr. Carter's Yugoslavia statement with a broad criticism of the Democratic nominee for advocating reductions in the U.S. defense budget.

Not the Time

"This is not the time to weaken our defense, to refuse to equip our troops with essential new weapons, to undermine democratic leaders by hinting at new relationships with Communist leaders in Western Europe, to

(Continued on Page 4, Col. 8)

ark Denies Charges

, Korean President's Orders or U.S. Bribes Said Taped

By Maxine Cheshire and Scott Armstrong

WASHINGTON, Oct. 27 (WP).—"Highly sensitive" intelligence sources—apparently including recordings of meetings in the Blue House presidential mansion in Seoul—form the basis allegations that South Korean sident Chung Hee Park personally ordered that U.S. congressmen be bribed, according to rmed U.S. sources.

Justice and State Department sources said that the intelligence reports known to those estigating widespread corrupn of U.S. congressmen and er officials by South Korean nts are based on electronic eavesdropping, intercepts of communications and double agents.

well-informed source said some intelligence reports eared to be based on tape ings of discussions that Park had in the Blue House Washington-based South ean businessman Tongsun k and South Korean Central lligence Agency agents.

those discussions, according ources familiar with the re-, Mr. Park directed Tongsun k to use money generated his commissions on U.S. of rice to South Korea to cash, jewelry, furniture, itions and campaign contions to U.S. congressmen.

eeks, Russians End st Phase of Talks

HENS, Oct. 27 (AP).—The phase of Greek-Soviet talks olitical and economic issues d here today, a joint communiqué said, with agreement on drawing up of several bi-al accords and continued eration "within the spirit of kind."

e communiqué, issued after days of talks between Greek gn Minister Dimitrios Bitsios Soviet Ambassador Ivan tchov, said efforts would me on both sides for the lusion of a long-term trade a cultural agreement, a lar agreement and an agree- for technical and scientific eration.

But a State Department source with close knowledge of the U.S. reports from inside the South Korean government has said, "There is no question—absolutely none—that Chung Hee Park was personally involved. He directed the damn thing."

The means used by U.S. operatives to obtain the information from inside the South Korean presidential mansion and other offices here and abroad are so sensitive that the U.S. Central Intelligence Agency and National Security Agency have not fully cooperated in turning all of their information over to Justice Department investigators, according to informed sources.

Various Sources

Sources familiar with the data said it has come from such a variety of sources, each of which seems to confirm the other on major points of the influence-peddling effort, that investigators no longer doubt that a conspiracy exists. The investigation is now directed at determining which U.S. congressmen illegally participated in it, according to the sources.

The Washington Post has reported that at least 22 congressmen are under investigation for allegedly having received money or gifts from South Korean agents in exchange for legislative actions favoring South Korea.

A Washington Post report that the Justice Department had issued an unprecedented subpoena for all Riggs Bank records for the South Korean Embassy and all members of the South Korean delegation here prompted several questions at a State Department briefing yesterday.

Diplomatic Implications

A State Department spokesman declined to discuss the diplomatic implications of the subpoena, which is intended to discover movements of cash believed to have been given to U.S. congressmen.

Spokesman Robert Funseth said that the Justice Department has "exclusive responsibility for carrying out this investigation."

State Department officials were clearly anxious to avoid being drawn into any statement that would spread alarm among other nations about the sanctity of their banking records in the United States. The precedent, however, inevitably raises broad questions about diplomatic immunity in several areas.

2 Plans Are Announced

Russia Sees Economic Gap With U.S. Narrowed by 1980

By Christopher S. Wren

MOSCOW, Oct. 27 (NYT).—The Soviet leadership, buoyed by prospects of a bumper grain harvest, today announced increased production targets for next year which it hoped would help significantly narrow the Soviet Union's economic gap with the United States by the end of the current decade.

- **The Soviet Union charges that Secretary of State Henry Kissinger is trying to obstruct its attempts to improve relations with China. Page 2.**

Deputy Premier Nikolai Baibakov cited statistics to show that if the 1976-80 plan were fulfilled, the Soviet Union by 1980 could exceed U.S. industrial production for 1975 while matching U.S. agricultural output for last year.

Next year's economic plan emphasizes a greater exploitation of natural resources as well as increased industrial production. But it also includes one of the most modest increases in national income. The projected rise of only 4.1 per cent appeared to reflect not only the lingering impact of last year's harvest failure but also the current campaign to wind up numerous economic projects throughout the country before embarking on new ones.

A token reduction, equivalent to nearly $267 million, was also announced in next year's military budget—a gesture apparently linked to the Kremlin's latest calls for disarmament. Finance Minister Vasily Garbuzov reported that next year's military budget

TO A MAN—Voting at the Supreme Soviet yesterday were, from left, front row, Nikolai Podgorny, Alexei Kosygin, Leonid Brezhnev; second row, Kirill Mazurov, Fedor Kulakov, Andrei Gromyko; third row, Dmitri Ustinov, Yuri Andropov, Grigory Romanov.

Says He Tries to Obstruct Normalization

Moscow Assails Kissinger on China Ties

HONG KONG, Oct. 27 (UPI). —The Soviet Union, in a radio broadcast beamed to China yesterday, accused Secretary of State Henry Kissinger of trying to "obstruct normalization of Soviet-Chinese relations."

The broadcast commentary said Mr. Kissinger had made remarks of a "provocative nature" designed to aggravate differences between the two countries.

This was a reference to Mr. Kissinger's assertion that the United States would take a grave view of any Soviet military moves against China.

"Sowing discord in relations between the U.S.S.R. and China is not a new tactic of imperialist propaganda," the broadcast said.

But it said the "tactic" had been "escalated to such a state that various arguments and hypotheses regarding how the United States should handle the Soviet threat to China have recently appeared in the U.S. press.

"The intention of such sordid arguments and hypotheses is obvious. Some circles in the United States basically cannot accept the prospect of normalization of Soviet-Chinese relations.

"They are frightened of the prospect. Hence, such a high-ranking activist as Kissinger . . . has joined the work to obstruct normalization of Soviet-Chinese relations."

The Chinese-language broadcast said, "Kissinger tried his utmost to create the impression that China is being threatened by a foreign country."

The Soviet threat to China is merely a concoction" which "can only damage their reputation," the broadcast said in relation to Mr. Kissinger and other U.S. leaders.

The broadcast said the Soviet Union was following a "constructive" policy toward China and called for efforts to normalize relations.

"The basic interests of the Soviet and Chinese people, far from clashing, coincide" the broadcast said.

Today, China accused the Soviet Union of "naked interference" in Japan's domestic affairs in a Peking broadcast heard in Tokyo.

The bitter criticism of Moscow's Japan policy apparently signaled a continuing hard line against the Soviet Union by the new Chinese regime headed by Communist party chairman Hua Kuo-feng.

The radio broadcast portions of an article appearing in People's Daily, the official organ of the Chinese Communist party.

It accused the Soviet Union of bullying the Japanese over the case of the MIG-25 fighter plane flown to Japan by a defecting Soviet pilot.

It also criticized the Russians for opposing Japan's plan to extend its territorial boundaries to 12 miles out to sea. The present limit is three miles.

Acheson Wins Kissinger's Praise

WASHINGTON, Oct. 27 (NYT). — Secretary of State Henry Kissinger, not generally known for according excess praise, characterized the late Dean Acheson yesterday as "the greatest secretary of state of the 20th century."

Acheson, a Democrat, held the office from 1949 to 1953 in the administration of President Harry Truman. He died in 1971. Mr. Kissinger spoke at the dedication of the State Department's west auditorium as the Dean Acheson Auditorium.

"(Acheson) and the president he so loyally served set the course we have all followed since," Mr. Kissinger said. "In so doing, (they) ushered in the most creative period in the history of American foreign policy."

Acheson, he said, was largely responsible for "the shape and design of American foreign policy for the better part of the past three decades."

China Resets 5-Year Plan For January

Political Infighting Said to Cause Delay

By Fox Butterfield

HONG KONG, Oct. 27 (NYT). —China's new authorities now intend to begin the country's fifth five-year plan, which was originally scheduled to start last January, in early 1977, diplomatic sources in Peking report.

The delay in the plan has reportedly been caused largely by the anti-rightist campaign earlier this year.

The information on the new starting date for the plan was disclosed by Minister of Foreign Trade Li Chiang and several of his deputies during meetings over the last two weeks with Western diplomats and businessmen in Peking, the sources say.

Mr. Li is said to have also told visitors that China would resume large-scale foreign trade, particularly major purchases of whole plants, in 1978. China's foreign trade is expected to show only a small increase this year over last year's total of $14 billion, as it too has been adversely affected by the anti-rightist campaign, which broke out last winter but now appears to be over.

Earlier this week, China's new authorities said in an important editorial that they would now return to the ambitious economic development and modernization program first enunciated by the late Premier Chou En-lai in early 1975, at the fourth National People's Congress. Chou called for a two-stage plan that would achieve the relative modernization of industry and agriculture by 1980 and then make China a "powerful, modern socialist country by the end of the century."

Criticism of Teng

The editorial attributed the program to Chairman Mao Tse-tung, but after Chou's death last January, his apparent successor, Teng Hsiao-Ping, was heavily criticized and then purged for overstressing economic growth at the expense of Mao's call for class struggle. Mr. Teng also was attacked for his "slavish comprador mentality" in advocating increased purchases of foreign technology to speed up China's development.

The fifth five-year plan, which would presumably have embodied many of Chou's ideas, appeared to be another casualty of these attacks. The plan's targets evidently became a matter of debate, particularly those involving foreign trade.

But with the sudden downfall of China's senior leftists this month, the situation has been dramatically reversed.

The leftists, who included Mao's widow, Chiang Ching, and the senior deputy premier, Chang Chun-chiao, had argued for a greater emphasis on revolutionary purity instead of straight economic growth and a more literal interpretation of Mao's call for self-reliance.

According to the sources in Peking, Chinese officials have indicated that although the five-year plan has been delayed they hope to achieve all its objectives by the end of the original period, or 1980.

Targets Unclear

It is unclear what the targets of the plan are. There have been indications that some individual provinces and factories had set a goal of raising industrial output by 15 per cent a year from 1976 to 1980, or doubling production within five years.

Chinese industry has achieved a remarkable record of nearly 10-per-cent growth a year over the last 15 years. But this year there have been indications that the pace may have slowed down to roughly 7 per cent under the impact of the anti-rightist campaign, rising worker dissatisfaction over wages, and factional squabbling.

The plan, as originally conceived, may also have included a comprehensive program to mechanize agriculture by 1980. Hua Kuo-feng, now the chairman of the Chinese Communist party, outlined such a goal at a national conference on agriculture in the fall of 1975, but it too had seemed to come under attack earlier this year.

Despite the disclosure that large-scale foreign trade will resume in 1978, U.S. businessmen and specialists here do not expect a major jump in U.S. trade with Peking unless there are some changes in Washington's China policy.

Christopher Phillips, the president of the National Council for U.S.-China Trade, said here, today that he feels the increase in U.S.-China trade will be "modest" until several issues are resolved, foremost among them the question of full diplomatic relations with Peking.

Associated Press.

OPEN DOOR—Israeli soldier armed with U.S.-made M-16 rifle opened a gate on the Israel-Lebanon border Tuesday to admit rightist Phalange militiamen from Lebanon who were bringing a wounded man for treatment at Israeli hospital.

News Analysis

Arab Unity Gains at Cairo Summit

By James F. Clarity

CAIRO, Oct. 27 (NYT).—As the kings, emirs, presidents, foreign ministers and other officials of the 20 Arab nations and the Palestine Liberation Organization left Cairo today, after the most ambitious and serious Arab attempt to settle the Lebanese civil war, they had achieved some of their goals but left others far from realization.

The summit meeting, which approved the establishment of a 30,000-man multinational Arab peace-keeping force in Lebanon, has possibly set the stage for a new peace in Lebanon and the re-establishment of a functioning Lebanese government. It also has done much to restore intra-Arab unity.

There is no question, Western and Arab analysts here say, that Arab solidarity—a particularly elusive goal in recent years—has been strengthened as a result of the Cairo summit and the smaller six-party meeting a week earlier in Riyadh, the capital of Saudi Arabia, where the basic agreement on Lebanon was achieved.

The most important rapprochement was between Syria and Egypt, which had been hurling invective at each other since Egypt signed the Sinai disengagement pact with Israel 13 months ago. Presidents Anwar Sadat of Egypt and Hafez al-Assad of Syria, according to officials close to them, agreed in private meetings here that their differences over Sinai, as well as Lebanon, had hurt both their countries. Many analysts here noted that only a few weeks ago Syria was upbraiding Egypt as the traitor to the Arab cause for signing a defeatist accord with Israel, and Egypt was attacking Syria for having launched a bloody intervention against Lebanon. Now the two Presidents are talking and joking with each other again.

Hopeful Sign

Another hopeful sign at the summit gathering was the continuing of feelers Libya is sending to Egypt seeking to end their dispute over whether Libya is trying to overthrow Mr. Sadat. Libya, which was not expected to send a delegation to the summit, finally did. And the Libyans have floated reports that in return for a restoration of friendly relations with Egypt, their country would forgive Egypt's considerable economic debt. Even King Khaled, the conservative ruler of Saudi Arabia, met here privately twice with President Salem Rubaya of Southern Yemen, the Marxist state that has been considered the Saudis' worst neighbor in recent years.

At the summit, only Iraq refused to go along with the other Arab nations in their acceptance of the Syrian intervention in Lebanon and Syria's expected domination of the enlarged peacekeeping force. The Iraqis fought in private sessions to have the Syrian role discussed and condemned, but were brushed aside.

While Iraq remains in apparent isolation in the Arab world, its stance at Cairo found unspoken support among many delegations, according to Arab officials, particularly in the PLO.

Pax Syriana

Arab and Western analysts agree that if there was a winner at this summit, it was Syria, which in effect had the other Arab nations approve what amounts to a Pax Syriana in Lebanon. While most analysts acknowledge that the catalyst in the Riyadh and Cairo meetings was King Khaled, much of whose influence is in oil riches, it is also widely felt that Syria agreed to the summit because it had achieved all that it could safely hope for at this point in Lebanon.

The Palestinians were the losers. But, analysts here assert, the Palestinians did not lose everything. They still retain considerable stocks of heavy military equipment and they proved to Syria that they could fight skillfully and bravely. Palestinian performance in the field is considered a strong factor in the Syrian decision not to send troops into major cities, such as Beirut and Sidon, where the guerrillas would almost certainly have inflicted heavy casualties on Syrian troops ignorant of street-to-street and house-to-house fighting.

But the Palestinians were unable to persuade the Arab nations that a Syrian-dominated peacekeeping force would further weaken the PLO.

Summit Failures

But one of the failures of the Cairo summit, or one of its deliberate oversights, was that it did not stipulate precise conditions for implementation of the 1969 Cairo agreement regulating the Palestinian presence in Lebanon. Some Arab analysts feel that this gives the Palestinians, in effect, the room to renegotiate the entire question of where they are allowed to live and maintain arms for raids on Israel. As the Palestinians are still firmly positioned in several cities in Lebanon, these analysts say, they have something to bargain with.

Also left open was what, specifically, to do about the Israeli involvement in the recent fighting in southern Lebanon, and the apparent complicity of Israel with the Lebanese rightist Christian forces, who until the recent cease-fire had been allied with Syria against the leftist Moslem-Palestinian coalition.

There was predictable castigation of Israeli involvement in Lebanon in Cairo, but no military ultimatums were even hinted. So, if the 1976 Arab summit moved a step closer toward Arab solidarity and peace in Lebanon, it made no noticeable move toward a military or diplomatic solution of the problem that Arabs used to consider of foremost importance: the Israeli occupation of Arab lands taken in the 1967 war.

Syrians Regroup in Lebanon As Arab Peacekeeping Unit

(Continued from Page 1)

Christian Guardians of the Cedars, made the same assertion.

Suleiman Franjieh, another extremist Christian leader who was the country's president until a month ago, declared today that the Cairo decisions had their good points but that, as long as there was a Palestinian presence in Lebanon, the root cause of the war remained intact.

The rightist leaders will meet tomorrow with President Sarkis, who is a moderate and, as such, is being increasingly criticized privately by fellow Christian leaders like Mr. Franjieh and Mr. Chamoun.

Change of Color

The Syrian troops that are being moved to the Arab peacekeeping force have begun to give their green-brown vehicles a coat of white paint, the color used by the Arab force.

The brown helmets of the Syrian soldiers also are being painted white, or at least are being given a white stripe to match the helmets of the Saudi, Sudanese and Lybian contingents of the peace force, which at present number about 2,500 men.

This is the third metamorphosis for the Syrian forces in Lebanon. When the first units arrived in January, their trucks are armored cars bore inscriptions identifying them as belonging to Saiqa, the Syrian-controlled Palestinian guerrilla organization. Later it was conceded that most of the vehicles belonged to the elite Syrian Special Forces.

In June, when the Arab peace force was first created, the Syrians stationed in Khalde, the strategic road function south of the Beirut airport, withdrew into nearby woods and re-emerged a day later with their vehicles and helmets painted white. They thus became Syria's first contingent in the Arab peace force.

Pound Drops To New Low

(Continued from Page 1)

resolution calling on the Callaghan administration "to pursue Socialist policies" and rejected the government's plan to cut back state spending. Seven members were absent when the vote was taken.

Leftists Challenged

The Prime Minister spoke during the meeting and challenged leftist members to say where Britain could find the needed savings of £10 billion ($16 billion) to cover projected budget deficits during the next three years. There was no answer, sources said.

It was at that point that Mr. Callaghan stalked out, the informants said.

The dollar, meanwhile, had mixed fortunes on European exchanges, declining in Frankfurt and Amsterdam but improving in Zurich and Milan as well as London and closing unchanged in Paris.

Gold bullion prices were steady in Zurich and went up in London before today's sale of gold by the International Monetary Fund.

Gold prices in London rose to their highest level in a month, closing at $117-$118.50 an ounce, bid and asked, up 50 cents from $117.25-$118 yesterday. The price was the highest since Sept 27, when gold closed at $118.25-$119 an ounce.

Mrs. Marcos Sent On Peace Mission

MANILA, Oct. 27 (UPI).—President Ferdinand Marcos announced today that he will send his wife, Imelda, to Libya to try to negotiate a settlement to the Filipino Moslem insurgency, amid fresh reports of fighting in the southern Philippines.

In the lastest report of violence in the Mindanao-Sulu region, 500 miles south of Manila, authorities said that five more government men had been killed in Moslem terrorist activities, bringing to 18 the number of fatalities since last week in the south.

Mr. Marcos announced the first lady's peace initiative to Libya, a strong supporter of the secessionist Moro National Liberation Front, during a Cabinet meeting.

Pre-Parley Talks Ended

(Continued from Page 1)

rejected key portions of the plan, except for its key principle of majority rule within two years. The British insist that the plan is negotiable, and are hopeful that the rhetoric voiced by both sides in the last week consists of public stances that will be modified when the conference starts.

Mr. Smith, asked for his views on the conference, said in an interview with Rhodesian television: "I am not sure how far we will come and, when one does consider the tremendous divergencies between the participating parties, I would not like to guarantee that we are going to get off the ground."

Placement of Participants

British sources said that the delegations would sit at six tables surrounding a hollow square, with Mr. Richard and Mr. Smith sitting across from each other at the same table. On the other side of the square will be Mr. Mugabe and Mr. Nkomo, who recently formed a "patriotic front."

They will be faced by two other nationalist leaders, Bishop Muzorewa and the Rev. Ndabaningi Sithole.

Observers will include the representatives of four African nations neighboring Rhodesia—Zambia, Tanzania, Mozambique and Botswana—as well as the Organization of African Unity and the Commonwealth Secretariat in London.

Dutch, Russians Halt Flights in Fund Clash

THE HAGUE, Oct. 27 (IHT).—Flights between Amsterdam and Moscow will be suspended next Monday because of a dispute between the Netherlands and the Soviet Union over pool arrangements for their respective airlines.

KLM, the Dutch national airline, has refused to approve the Aeroflot winter schedule if no agreement is reached on sharing the Amsterdam-Moscow revenue on a 50-50 basis, as laid down in their joint operation agreement. In Moscow, Aeroflot has taken reciprocal action. The mutual ban also applies to freight traffic.

Moscow Hotel Fire

MOSCOW, Oct. 27 (UPI).—Fire swept a floor of the National Hotel today, seriously injuring an American businessman identified as Raymond de Jongh and forcing hundreds of guests into snow-covered streets in their pajamas.

Russia Sees Narrowing of Economic Gap

Aide Says U.S. Lead May Dwindle by '80

(Continued from Page 1)

would be 17.2 billion rubles, slightly less than $23 billion.

This figure does not reflect total Soviet military spending, since some costly programs are tucked away under civilian ministry items. Consequently, Western analysts regard the published budget more as a barometer of the Kremlin's mood for détente with the West.

The economic plan and budget for next year were presented the day along with the current five-year plan to a session of the Supreme Soviet, the nominal parliament, for formal endorsement. The five-year plan originally appeared in draft form last December and was explained in detail by Premier Alexei Kosygin at the 25th party congress in March.

The plan has since been fine-tuned by economists within the margins set in the draft. While some indices, such as labor productivity, have been pared, other targets have been fixed at or near the draft's upper limits, with no apparent radical changes.

Kosygin Attends

Both economic plans were presented by Mr. Baibakov, the chief of the State Planning Committee and not by Mr. Kosygin, although the Premier had delivered the report on the five-year plan. Mr. Kosygin attended today's session, but his failure to give the address suggested that he was still not fully recovered from a recent illness.

In the plan for next year, Mr. Baibakov called for overall industrial output to grow by 6 per cent, which is well above this year's target but below the 7.5 per cent reached last year.

This year's target of 4.8 per cent, the lowest since World War II, took into account this year's harvest problems. Figures released for the first nine months showed industrial growth at 5 per cent so far, suggesting some improvement.

The stress has continued on heavy industry following the Kremlin's failure in the last five-year plan to reorient the economy in favor of the consumer. In an unexplained departure from custom, no percentage was given for heavy industrial growth this year.

Light Industry

A 4.9-per-cent growth in light industry has been envisioned for next year. This is considered higher than the minimal target for this year of 2.7 per cent. In a speech to the party's Central Committee earlier this week, Soviet party leader Leonid Brezhnev said only that the light industry target was being exceeded but gave no figure.

The rise of 4.1 per cent in national income called for this year is even lower than the 5-per-cent goal set for this year. The rise in individual income is to be only 3.8 per cent.

In discussing the five-year plan put into effect this year, Baibakov said that its fulfillment "will enable us to achieve further successes in the economic competition with the developed capitalist countries, first of all the United States."

He predicted that Soviet national income in 1980 would be about 85 per cent of last year's U.S. income figure, compared with 67 per cent at the beginning of this year. The Soviet reckoning does not include all the components of the gross national product in the United States.

Soviet industrial output, now at 80 per cent of U.S. industrial output for last year, would exceed last year's U.S. output by 5 per cent in 1980, Mr. Baibakov said. He said that Soviet agricultural output in 1980 would equal last year's U.S. agricultural output.

Joergensen in Warsaw

WARSAW, Oct. 27 (AP). Danish Premier Anker Joergensen flew into Warsaw yesterday for a four-day visit to Poland to discuss political and commercial issues. Poland is Denmark's largest trading partner in Eastern Europe.

If you're looking for Jack Daniel's, here are some very nice places to find it.

Recent additions to our Distillery enable us to ship more Jack Daniel's overseas. Sadly, the quantity is still limited. But the quality is worth a visit to any of the restaurants, bars and hotels listed below.

There, you'll discover that Jack Daniel's is neither bourbon nor scotch. It's in a special category which the U.S. government calls by a special name: *Tennessee Whiskey*. Each drop is seeped through twelve feet of hard maple charcoal to smooth its taste before aging. And because other whiskeys *aren't* made this way, other whiskeys aren't as smooth.

Jack Daniel's Tennessee Whiskey. Once you find it, we believe you'll like it. No matter what you've been drinking.

Court Overrules Ban on Madrid

Spain Paper, Shut by Franco, Seeks $7 Million in Damages

MADRID, Oct. 27 (UPI).—The publisher of the newspaper Madrid, closed five years ago by the Franco regime, said today that he will ask the government for compensation in excess of 40 million pesetas (about $74 million).

Publisher Rafael Calvo Serrer made the statement a day after the Supreme Court overruled the government's ban and ordered it to compensate the newspaper for the moral and material damage it caused. The court also asked the newspaper to draw up a detailed list of damages.

Madrid, Spain's most liberal newspaper when the government closed it on Nov. 25, 1971, had angered the late Generalissimo Francisco Franco by persistently criticizing his regime and suggesting that he retire.

It was closed by the Information Ministry, which alleged it had violated the press law through irregularities in registering shareholders.

Tentative Figure

Mr. Calvo Serrer said the 500-million-pesetas-plus figure was tentative, and that the final claim presented to the government might be considerably higher.

Following Madrid's closure, the company auctioned off its presses and other equipment to be able to pay severance to its 96 employees, and had the newspaper building wrecked to get a good price for the ground on which it stood.

Mr. Calvo Serrer said the board of his company will make the final decision soon on whether the newspaper will reappear. But he hinted that the decision will be positive by saying he was already looking for a printer and had tentatively targeted the reappearance for January.

"If we decide to publish again, Madrid will reappear as what it was—an independent daily whose main mission is to inform," he said. The evening newspaper had a circulation of 70,000 before it was closed.

A Triumph

The Supreme Court verdict is "a triumph for Spanish journalists who have fought for years for freedom of expression in this country," he said.

Madrid was suspended and fined several times before the closure. Even before Madrid was closed, Mr. Calvo Serrer went into exile in Paris and published books and newspaper articles attacking the Franco regime.

The Public Order Court—the political arm of the judiciary—brought charges against him and issued a warrant for his arrest. The publisher returned to Spain last summer after the charge had been quashed under a political amnesty decreed by King Juan Carlos.

United Press International.

Courtyard of Moroccan Embassy in Madrid after bombing.

Rabat Mission Is Attacked in Spain, 6 Hurt

Assailants Escape; Damage Extensive

MADRID, Oct. 27 (UPI).—Several assailants, among them a woman, today carried out an attack on the Moroccan Embassy, causing extensive damage and injuring six persons.

A spokesman said the embassy had received no prior threat or warning. He refused to speculate on the motives or the identity of the attackers, who escaped in the heavy midmorning traffic.

The attackers, one of them firing several bursts from a submachine gun, placed two or more bombs in front or inside the embassy building and fled. The blasts wrecked most of the ground-floor offices of the three-story building.

Police also refused to speculate on the identity of the assailants. They said embassy bookkeeper Buchaib Lerbi, who ran from his office when he heard the shots, was shot and critically wounded.

Another embassy staff member, security employee Buchaib Hilal, was also shot. The four others wounded—none of them in critical condition—were a policeman on guard duty outside the embassy, a taxi driver and his passenger and a child passing the embassy at the time of the bombing.

Nearby buildings and parked cars were damaged.

Embassy spokesman Mohammed Buceta, the top aide of Ambassador Abdellatif Filali, said that Mr. Filali was not in the building at the time of the attack.

"Somebody walked through the door and fired his tommy gun," he said. "Then he apparently placed or threw the bombs. There were two or three blasts, I cannot say exactly."

Witnesses said there were two to four attackers, one of them a woman.

Spanish government sources were puzzled by the attack.

Relations between Spain and Morocco are friendly following a threat of war between the two countries last year over the Spanish Sahara. Spain, pressured by Morocco, handed over the territory to Morocco and Mauritania.

The settlement has not been accepted by the Polisario, a Saharan independence movement backed by Algeria that is waging a guerrilla war against Moroccan troops in what is now called the Western Sahara.

2 Flee to West Berlin

BERLIN, Oct. 27 (UPI).—Two East German brothers fled over the wall to West Berlin last night, West Berlin police said yesterday.

Ford Backs CAB Recommendation

Airline Fares Not to Rise on Atlantic Route

By Carole Shifrin

WASHINGTON, Oct. 27 (WP).—President Ford yesterday approved a Civil Aeronautics Board recommendation that the airlines not be allowed to increase their normal economy and first-class fares across the North Atlantic next week.

The President's approval of board decisions in international route and rate matters is required by law.

There are three seasons of travel over the North Atlantic for fare purposes: Peak (June, July, August), "shoulder" season on either side (April-May and September-October), and winter (November through March). Normally, winter fares are the cheapest, but the airlines had generally proposed extending the shoulder fares for the winter season this year—a proposal which the CAB said meant increases in the New York-London fares ranging from 3.4 to 20.2 per cent compared to fares of last winter.

Under the board's decision of last Friday, approved by the President yesterday:

- The carriers were told they must charge passengers flying normal economy class the same fares charged during last winter's season. Pan American World Airways had proposed a 4.5-per-cent increase, Trans World Airlines a 3.4-per-cent rise, and British Airways a 7.2-per-cent rise on the New York-London route over last winter's $584 round-trip fare. In denying the increases, the CAB reiterated its view that the normal economy fares are "excessive" in relation to cost.
- The carriers' proposed first-class-fare increases, ranging from 11.9 to 18.9 per cent, were not allowed to go into effect, but will be investigated. First-class fares ordinarily do not change with the seasons, and the CAB pointed out that an 8-per-cent increase—to a round-trip fare of $1,250—had been allowed in May. The carriers must continue charging first-class customers at current fares, the board said.
- The carriers were told they could not extend the shoulder-season fares on their 22-to-45-day excursions—the most heavily used of the promotional fares—into the winter. The airlines' proposal would have meant an increase of 19 per cent over last winter's $363 22-to-45-day fare. They were told the board would accept a proposal for an increase of about 10 per cent over last winter's fare.
- The airlines were allowed to continue current shoulder-season fares on most other promotional fares, a move which means increases of 8 to 20 per cent over last winter's fares. The board declined to approve alterations requested by certain carriers on routes to Italy, Israel and Portugal.

To Modify Navy F-18

U.S. Weighs Iran Aid Deal for Northrop

WASHINGTON, Oct. 27 (WP).—The Pentagon is giving top-level consideration to letting the Northrop Corp. use Iranian money to modify a U.S. Navy plane for the Shah's air force.

The unusual deal worked out between Northrop and Shah Mohammed Reza Pahlevi received official standing—although not approval—in the Pentagon when it was reviewed by the Defense Systems Acquisition Review Council.

Under the proposition, Iran would give Northrop $8 million to start developing a land-based version of the carrier-based F-18 fighter being built for the Navy.

The Navy, at the review council session, told Malcolm Currie, director of defense research and engineering who chaired the meeting, how Navy and Iranian F-18 needs could both be met. Managing the Iranian program, however, would require a staff of 60 people, the Navy briefer said.

The Navy plans to buy 800 F-18s being built by the aerospace team of McDonnell-Douglas and Northrop at the McDonnell-Douglas plant in St. Louis. Iran plans to buy 250 land-based versions of the F-18 to be produced at Northrop's plant in Hawthorne, Calif.

But Northrop executives are hopeful of selling hundreds more of the Iranian version, called F-18L, to other countries as well. Aerospace executives complained in interviews yesterday that the Pentagon is helping Northrop's F-18 sales drive by giving official standing to the Iranian deal. They said review council meetings are supposed to be reviews of government weapons programs, not of a company's sales program.

Meeting Confirmed

Alan Woods, assistant secretary of defense for public affairs, confirmed yesterday that a meeting had been held on the F-18L plan on Oct. 19. He said the Pentagon review was important to make certain the two F-18 programs "do not interrupt or interfere with one another."

Another reason for checking the Iranian deal, he said, is that it will be subject to Pentagon review as a foreign military sale if consummated.

It will cost about $250 million to tailor the Navy's F-18 to the Shah's needs, according to Pentagon sources. The F-18 is being built for the Navy for about $6 million each. Its job will be to knock down enemy airplanes and bomb shore targets.

The F-18L for the Shah would be lighter than the Navy's version, since it would not have to be built to withstand the impact of landing on carriers. The Iranian plane would serve as a light bomber, replacing the Shah's squadrons of F-4s and F-5s in the early 1980s.

With the U.S. Navy's Phoenix air-to-air missile to hit airplanes more than 100 miles away and the F-16 to fight other planes close in, the Shah, by buying the F-18L would be filling in what he sees as the need to support ground troops with a light and relatively inexpensive fighter-bomber.

Giscard Resets Visit To Belgrade in Dec.

BELGRADE, Oct. 27 (AP).—French President Valéry Giscard d'Estaing will make an official visit to Yugoslavia in the first half of December, it was announced here today.

The visit had been originally scheduled for last month but had to be postponed because of President Tito's liver ailment.

Heavy Protection Provided

Juan Carlos Arrives for 3-Day Paris Visit

(Continued from Page 1)

assassination had been organized by Basque separatists in France, and that they had called a press conference to announce it. The French denied the charges.

Reliable reports indicated that the King's Cabinet and Premier Adolfo Suarez opposed this trip, but that the King insisted on it. What is not known is whether the Cabinet's opposition was based on concern for the King's safety or for political reasons. French concern for the royal couple's safety caused a last-minute change in schedule: He will address the Ecole Militaire instead of the less-disciplined Ecole Polytechnique.

There is some feeling here that the Spanish government has lost its enthusiasm for the European Community, especially with the community presently foundering. Spain at present has an EEC association agreement, which means preferential trade treatment, and for some years there has been talk of moving toward full membership in the post-Franco period. But there has been no noticeable warming of interest in full membership in recent months.

Most of the King's foreign attention during his short reign has been across the Atlantic. During a visit to Washington in June, he addressed Congress and was told that Washington would help in Madrid's bid to join NATO. Recently, he toured Latin America, renewing dormant Spanish ties.

Sources here think that Spain may be looking beyond Europe, happy to keep its association with the EEC, but unwilling or unready to undertake the political and economic steps necessary to join the community. The feeling is that, in a choice between the EEC and NATO, Spain would choose NATO. But opposition in that organization has been strong, with the liberal governments of Denmark, the Netherlands and Britain opposing Spanish membership.

The Spanish government has not won any favor with the European left by continuing to outlaw the Spanish Communist party, and for recently prohibiting the congress of the Spanish Socialist Workers party (PSOE), to which leading Socialists from across Europe had accepted invitations.

The French government, however, has become a strong official supporter of Juan Carlos and Mr. Giscard d'Estaing has long urged this visit. The two have met several times, including during a hunting party in central France before Franco's death and at the King's installation.

S. Africa Phone Link Is Struck by Italians

ROME, Oct. 27 (UPI).—Communications workers of the Italian Post Office and the private cable company Italcable announced they were holding a one-day boycott yesterday of telephone and cable traffic between Italy and South Africa.

The announcement said the move was being made "to underline the real interests of the workers who march together with the black people of South Africa, to call the Italian government to its responsibility, and to show the struggling workers in South Africa active and militant solidarity."

Norwegian Effort For Ulster Pair Passes $91,000

OSLO, Oct. 27 (AP).—The fund-raising campaign for the Norwegian People's Peace Prize, to be awarded to the leaders of the Ulster women's peace movement—Betty Williams and Mairead Corrigan—has passed a half-million krones ($91,000), the Oslo newspaper Aftenposten reported today.

The newspaper Faedrelandsvennen of Kristiansand which launched the campaign last month, reported yesterday that the recipients would come to Oslo to get their prize after a peace rally in London Nov. 27.

The organizers originally sought to raise $160,000, the value of the Nobel Peace Prize award, but they now feel it could well exceed that before the campaign closes next month.

AMSTERDAM

They'll not only give you a new idea about Fiats, they'll give you a new idea about cars.

By simply looking at the Fiat 131 and 132 you can see they're different from other Fiats. They're larger. They're more comfortable. They're more luxurious.

But the most dramatic differences are those you can't see.

To begin with, the 131 and 132 are built to last longer than not only small cars, but other cars in general. (This is no small feat when you consider that, according to a Swedish government study, the average Fiat will last 11.9 years.)

The engines in the 131 and 132 were tested for over a million miles. The valves last twice as long as ordinary valves. The rings last far longer than ordinary rings. The entire underbody is sealed against the elements. The wheels are protected by what we believe is the most advanced rustproofing system in the world today.

The 131 and 132 aren't only stronger than other cars. In many ways they're safer. (Although this may seem hard to believe, the 131 is 30% stronger in torsional rigidity than the old Fiat 124.) The entire passenger compartments of both the 131 and 132 are protected by a steel cage that's indeformable from both the front and sides. The steering column collapses upon impact. The fuel tank on the 131 is safely tucked away behind the backseat.

The 131 and 132 have an improved soundproofing system to make them quieter. And their engines were built to reach maximum torque at low revolutions for longer engine life and better fuel consumption.

For all their luxury, their long life, their sophisticated engineering, the 131 and 132 offer enormous value. To find cars of comparable quality and comparable features, you'd have to spend hundreds, perhaps thousands, more.

But what makes these Fiats most different from other cars is something that's virtually impossible to define.

Simply, the 131 and 132 drive like Fiats. Which means they perform like no other cars in the world.

As you may have heard, Fiat is the European Rally Champion. The winner of one of the most gruelling tests of durability and performance in the racing world. It was a title won not over one race, but over 30 separate races. Won not over one competitor, but over virtually every car maker in Europe.

It's a quality you'll have to see to believe in our bigger cars.

FIAT

On Ballot in 32 States

Libertarians Lead 3d-Party Pack in U.S.

By Richard Halloran

WASHINGTON, Oct. 27 (NYT). —Robert Meier was not exultant, but he was very pleased. "It's been a quiet victory," he said, "but we've moved to the front of the third-party pack."

Mr Meier is chairman of the MacBride for President Committee, whose candidate, Roger MacBride of the Libertarian party, is on the ballot in 32 states, more than any other candidate except President Ford and his Democratic challenger, Jimmy Carter.

According to the authoritative Congressional Quarterly, Mr. MacBride is on more ballots than former Sen. Eugene McCarthy, who is running as an independent in 29 states and Peter Camejo, the Socialist Workers' party candidate, running in 28 states.

Even so, Mr. Meier is looking ahead to continuing building the party. "This is only a way-station," he said. "After the election, we don't want to fall into the third-party syndrome—going back in the corner to drink coffee and complain about how bad things were."

Million Votes

The Libertarian party was founded in 1971 with the aim of appealing to voters at opposite ends of the political spectrum—the left and the right—and some members of the party expect their candidate to get a million votes on Nov. 2. But Mr. Meier said that the number may be half of that because many voters, he believes, who are leaning to MacBride might decide at the last minute that a vote for a third-party candidate would be wasted and vote instead for the majority candidate they dislike least.

Even that, however, would be a mammoth gain over the 3,671 votes won by the first Libertarian candidate, John Hospers, when he ran in two states in 1972. But Mr. Hospers got one electoral vote—from Mr. MacBride, then a Republican elector, who bolted from supporting former President Richard Nixon.

UPI

Roger MacBride

Mr. Meier, 31, said that the Libertarian party, which has about 250 candidates running for federal, state and local offices this fall, would put up 250 to 300 congressional candidates in 1978 and by 1980 hoped to gather 10 per cent of the popular presidential vote.

Mr. MacBride, a 47-year-old lawyer and television producer, went to Princeton and Harvard Law School and was once in the Vermont state legislature. He now lives on a farm in Virginia. His running mate is David Bergland, a 41-year-old California lawyer.

Rugged Individualism

Since he was nominated last year Mr. MacBride has been campaigning steadily, concentrating on the West, where the Libertarian party was founded and where he feels voters are more inclined to his political philosophy of rugged individualism.

Last week, Mr. MacBride was campaigning through Nevada, California and Washington when his red, white and blue DC-3—vintage 1943—had an engine failure. The plane made a safe emergency landing and Mr. MacBride continued on to Alaska on a commercial jet. He was scheduled to visit Idaho, Hawaii and Utah before ending the campaign in Los Angeles, where he plans to watch the election returns with about 1,000 supporters.

Although the DC-3 propeller-driven plane is the butt of many jokes among Libertarians, Mr. Meier said that it was "an effective campaign tool." Mr. MacBride can go into a city of 100,000 people, where many of his backers live, hold an airport news conference and rally and be off again in an hour and a half, Mr. Meier said. Most of the rallies draw 50 to 100 people, according to Mr. Meier, most of them assembled by local campaign committees.

Isolationist Policy

The Libertarians hope to draw conservative votes with a platform urging a strong defense, isolationist foreign policy, cuts in taxes and government spending and no gun-control laws.

On the other side, the party looks for liberal votes by backing amnesty for draft evaders, repeal of restraints on drugs and abolition of the Federal Bureau of Investigation and the Central Intelligence Agency.

The party's campaign literature says that it holds "that each individual has the absolute right to exercise sole dominion over his or her own life, liberty and property so long as he or she also respects the equal right of all others to live their lives by the same principle."

Georges Cabanier Dies; France's Navy Chief 1968

PARIS, Oct. 27 (AP).—The death was announced yesterday of Adm. Georges Cabanier, 69, the first French naval commander to join the Free French forces of Gen. Charles de Gaulle in 1940, when he sailed his submarine Rubis into British waters.

Gen. de Gaulle rewarded him, after returning to power in 1958, by naming him chief of staff of the French Navy—a post he held until his retirement in 1968.

From 1969 until early last year he was grand chancellor of the Legion of Honor, a top-ranking ceremonial post.

Candace Mossler

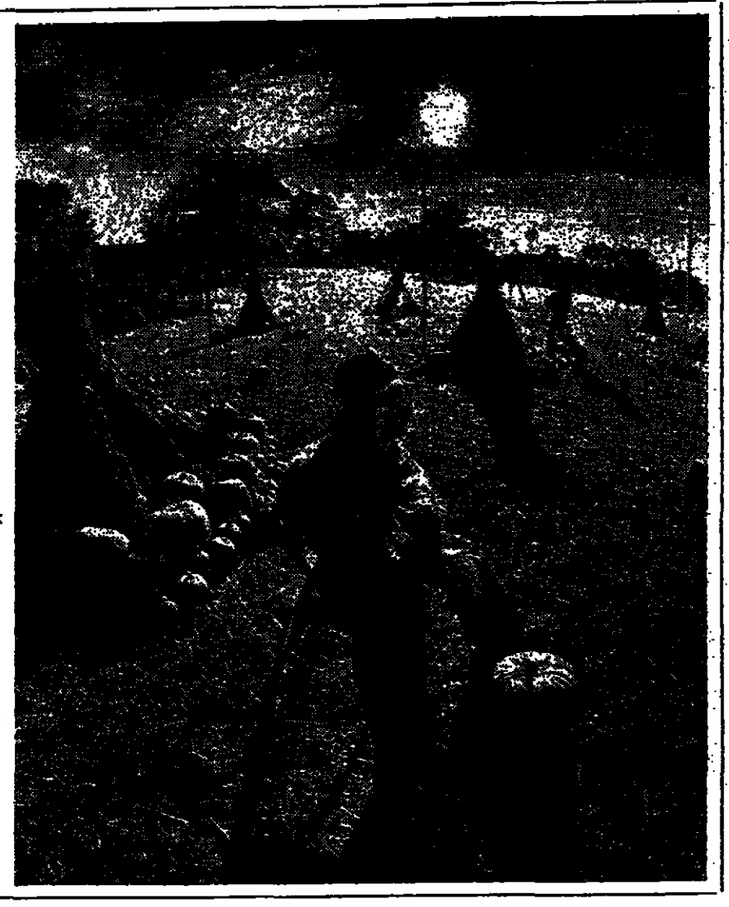
MIAMI BEACH, Fla., Oct. 27 (AP).—Candace Mossler, 62, acquitted in 1966 of murdering her wealthy husband in an alleged love triangle, died in her sleep yesterday, police said.

Officials of the Fontainebleau Hotel said a secretary found Mrs. Mossler dead in her room. No cause of death was immediately established. Police said there was no indication of foul play.

Exiliano di Cavalcanti

RIO DE JANEIRO, Oct. 27 (Reuters).—Exiliano di Cavalcanti, 79, considered by many to be Brazil's greatest contemporary painter, died here last night after a long illness.

"Di," as he was best known, was famous for his paintings of mulatto girls and women. He said he was "enchanted by the sensuality inherent in the black race and those sad eyes."



Mr. di Cavalcanti was born in Rio de Janeiro but spent much of his youth in Paris, where he studied painting.

Rockefeller Seen In Kissinger Job

MILWAUKEE, Oct. 27 (AP).—Former Nixon administration Defense Secretary Melvin Laird has predicted that Vice-President Rockefeller will succeed Henry Kissinger as secretary of state if President Ford is re-elected.

"Henry won't stay because Henry wants to get out for a while," Mr. Laird, a confidant of Mr. Ford, said in an interview with Milwaukee Journal editors.

"I think the guy who will be secretary of state is Rockefeller and he wants to be," Mr. Laird said. "I don't think it will be [former Treasury Secretary John] Connally."

ON GUARD—A masked scarecrow keeping a blank eye on a field all decked out for Halloween at the community market in McClean, Va., a Washington suburb. Maybe the scarecrow and Linus should get together.

Some Trickling In

Americans in Europe Plan Lawsuit on Late N.Y. Ballots

From Wire Dispatches

LONDON, Oct. 27.—Americans abroad who waged a 12-year campaign to receive voting rights in the United States are preparing for yet another voting battle.

A group of them is filing suit against the State of New York on the ground that ballots were not mailed in time to be returned and counted on Election Day, next Tuesday.

The suit, to be filed today or tomorrow in Federal District Court in New York, asks that the deadline be extended to Nov. 4 for the overseas voters who did not receive their ballots in sufficient time, said Steven Cohen, Democratic National Committee liaison director of the Democratic campaign in Europe.

A legal delay held up printing of the ballots in New York. "We are not blaming the officials of the state," he said.

Big Percentage

The percentage of New Yorkers in relation to all Americans in Europe is large, primarily because that is where their corporation headquarters are located. In Britain, 21 per cent of the eligible U.S. voters are New Yorkers; in Belgium, 18 per cent; in Israel, 40 per cent. It is estimated that 25,000 New Yorkers live in Israel, but not all are eligible to vote.

The suit's main plaintiff is Anthony Hyde, chairman of the Democrats Abroad and a chief backer of the overseas voting law passed during the last congressional session.

"I call that a poetic injustice," Mr. Cohen said. "He worked 12 years to get this bill passed."

A Democrats Abroad spokesman in Paris said that the suit could be useful in getting "late" ballots counted. He noted that there is still time for ballots mailed from Europe to reach election boards in the United States by Tuesday. "Tomorrow will be crucial," he said. "If voters get their ballots by tomorrow they can get them to the States in time by normal mail."

He said that most of the difficulty in New York seemed to be centered in New York County (Manhattan) but that several ballots from that county were received in Paris today and that he expected more.

He pointed out that while many states do require that ballots be notarized, New York does not. New York asks that the signature be witnessed.

U.S. Puts MIAs First on Agenda In Vietnam Talks

WASHINGTON, Oct. 27 (UPI). —The State Department said yesterday that the U.S. demand for a full accounting of Americans listed as missing in action in Southeast Asia will be the first item on the agenda when the United States and Vietnam meet, but that the United States has no assurance that it will get a satisfactory response.

Department spokesman Robert Funseth said the date has not been fixed for the talks, but, he said, "It will probably be in the first couple of weeks of November, and after Nov. 2, in any case," the date of the U.S. presidential election. U.S. officials expect that the talks will take place in Paris and the preliminary discussions probably will be handled at the embassy level.

Mr. Funset also said, "The Vietnamese have responded affirmatively to meet to discuss relations between our two countries. We have made clear that the first item on the agenda will be to seek a full accounting of our MIAS. There can be no progress until there is such a full accounting."

The Vietnamese have handed over information or the actual remains in the cases of about 40 missing Americans, Mr. Funseth said.

Investigation by the House Select Committee on MIAS indicates that the Vietnamese could have information on some of the approximately 800 Americans who are believed to have died in Communist-controlled territory in Vietnam, but there is no firm indication of how many cases there are.

Dole Drops 'Democrat' War Remark

By Douglas E. Kneeland

TROY, Ohio, Oct. 27 (NYT). —Sen. Robert Dole, the Republican vice-presidential candidate, yesterday withdrew his contention that World War II and the Vietnam conflict were "Democrat wars," but he contended that U.S. weakness contributed to one and U.S. indecision led to the other.

In his nationally televised debate on Oct. 15 with his Democratic counterpart, Sen. Walter Mondale, Sen. Dole described the four wars in which the United States has been involved in this century as "Democrat wars."

The remark not only drew anger from his opponents, but also brought widespread criticism from supporters of President Ford.

Sen. Dole continued until yesterday to justify his use of the phrase on the ground that, if the Democrats kept bringing up the Watergate affair, it was fair to raise questions about wars that had occurred under their administrations.

Not 'Partisan Wars'

But, after mentioning World War II and the Vietnam war in a speech before several hundred supporters at an outdoor rally at the courthouse here, he said: "These were not partisan wars in the sense that a clear division of political philosophies separated the party in power from the other party when the fighting broke out. They were fought for what was perceived to be in the national interest."

Later, although he contended that "weakness" and "inadequate defenses" caused these wars, Sen. Dole conceded: "No, I don't believe World War II was a Democrat war. And I don't believe that Vietnam was. But I do know that no country is likely to attack us if we are strong, and through strength, Gerald Ford has given us a world peace, a world in which no Americans are fighting or dying or coming home wounded or maimed."

He went on to say that he believed "American weakness contributed to World War II and American indecision gave us the nightmare that was Vietnam."

The Democratic ticket of Jimmy Carter and Sen. Mondale, he suggested later, represent "weakness and indecision."

7 Die in Hamburg Fire

HAMBURG, Oct. 27 (Reuters). —Five Turkish workers were burned to death in their beds and two died when they leapt from upper floor windows after fire broke out in a lodging house here during the night, police said. They said 23 Turks were injured, two seriously.

50,000 Cheer Him

Carter Tells New Yorkers City Will Not 'Drop Dead'

NEW YORK, Oct. 27 (AP).—Jimmy Carter and his wife, Rosalynn, rode in an open limousine past jubilant lunchtime crowds in a 15-block parade down Fifth Avenue today and told a jammed garment-district rally that New York is "not about to drop dead."

As confetti swirled, the Carters smiled and waved at the 10,000 persons who the Secret Service estimated lined the route.

With cheering crowds running beside their limousine, the Carter entourage took as long a time to cover the 15 blocks as they had to drive the 10 miles from La Guardia Airport to Manhattan with the side roads blocked off.

From a flag-draped platform at 7th Avenue and 36th Street, with his wife and Democratic Mayor Abraham Beame at his side, the Democratic presidential candidate addressed a crowd estimated at 50,000 which filled the intersection and surrounding streets.

"This is an absolutely unbelievable outpouring of confidence in New York City, confidence in New York State, confidence in the country and confidence in one another," Mr. Carter said.

"The strength of our country lies in us. If we are unified, we can do anything in our country."

Dropping Dead

One man who ran alongside Mr. Carter's car shouted as he ran, "Let's hear a cheer. Vote for Jimmy. He never told New York to drop dead."

The man, and Mr. Carter later, were referring to a New York Daily News headline last autumn when President Ford initially turned down a plan to help New York City out of its financial problems. The headline said, "Ford to City: 'Drop Dead'."

Mr. Ford eventually signed a bill to provide the city with three-year short-term loans.

Mr. Carter spoke for only a few minutes.

"In spite of what the President said, you're not about to drop dead," he said. "We have a nation built on strength. Our economic system is strong. Our people are strong.

"We should have a work state, a work nation, not a welfare nation. If I'm elected, I'll put our people to work."

Yesterday in Illinois, Mr. Carter said he was not overconfident but indicated he is already planning his first weeks as president-elect, announcing that he will meet with bipartisan congressional leaders to plan a future foreign policy.

Carter Not Waiting

He said at an airport rally yesterday in Moline, Ill., before flying to Chicago, that "certain things need to be done immediately after the election" and that he would not wait until after he is inaugurated to go to work "to restore a sense of cooperation between the president and the members of Congress."

Mr. Carter spent most of yesterday in Illinois, a key state with 26 electoral votes that is being hotly contested by the Democratic candidate and President Ford in the face of polls showing the race is very close.

Mr. Carter was to campaign today in Pittsburgh as well as New York City.

Large Crowds

Throughout yesterday Mr. Carter faced large and noisy crowds at the South Carolina Statehouse in Columbia, at the Carbondale campus of South Illinois University, at the quad-cities airport in Moline and, in the evening, at a Jewish center in Skokie, a Chicago suburb.

Wearing a black yarmulka with gold braid that sparkled in the television lights, he called Israel "an island of freedom and democracy in the Middle East."

He said the Arab boycott of companies doing business with Israel or of those with Jews in executive positions is "a travesty and disgrace and it must be stopped."

Mr. Carter also criticized Mr. Ford for failing to bring into government "new, aggressive, dynamic people to change things that were wrong" in former President Richard Nixon's administration.

A 'Sacrificial Effort'

Everywhere he went, he pleaded with crowds, as he has repeatedly in recent days, to make a "sacrificial effort" to help him next Tuesday.

At the Carbondale campus thousands of students flocked to the rally. They were on a hill, in a tree, crowding a pedestrian bridge spanning a roadway and 100 yards from the speaker's platform. They even jogged to the side Mr. Carter's car for several hundred yards when he left.

"You've come to this rally because you believe in our cause and I hope you will join me Nov. 2," he told them. "If you help me then . . . then in January, Jan. 20 to be exact, we'll change this country, make it great again, unified again."

With the crowd cheering, he said, "We've got to do it together . . . Okay, we'll make our country great once again."

Ford Assails Carter View of Policy Abroad

(Continued from Page 1)

withdraw our troops from South Korea, to upset the balance in the Middle East, or to consign such nations as Yugoslavia to the Soviet sphere," he said.

The speech was the first since last Friday's debate. Mr. Ford had directly criticized his opponent. Campaigning in the South and on the West Coast during the last three days, President had refrained from attacking his opponent, saying he preferred to talk positively about his own policies instead.

But yesterday's speech apparently has been in the works. Mr. Carter's debate statement on Yugoslavia, which Mr. Ford's strategists regard as a serious mistake.

Lt. Gen. Brent Scowcroft, of the National Security Council, who accompanied Mr. Ford on the West Coast trip to work on the speech, White House Press Secretary Ron Nessen said that Secretary of State Henry Kissinger also "had an input."

Policies Defended

Yesterday, after defending the administration's policies throughout the world and expressing optimism about the prospects for nuclear arms limitation talks with the Soviet Union, Mr. Ford gave these descriptions of Mr. Carter's foreign policy proposals:

• "Instead of holding firm in Asia, we are told that we should pull our troops and major weapons systems out of Korea—an invitation to disaster not only there but in Japan as well."

• "In Europe we are told that we should not 'close the door' to consultations and 'friendship' with the Communist leaders in Italy, France and Portugal. I am deeply concerned over the impact that such an approach would have upon the democratic parties that have, for decades, waged the struggle to preserve freedom against Communist tyranny.

• "In the Middle East, the alternative appears distinctly to tilt to our friendships with the modern Arab nations." Mr. Ford said that Mr. Carter's announced opposition to selling arms to Saudi Arabia and Iran and his willingness to respond to a potential oil boycott with economic warfare would threaten the stability of the Middle East, might harm Israel and would drive the Arab nations "into the arms of the Soviets."

"As citizens and voters," Mr. Ford said, "you are being asked to decide whether you wish to build on the great traditions of American foreign policy . . . or whether you wish to break from these traditions, venturing into the unknown with a doctrine that is untested, untried, and in my view, potentially dangerous."

The President's speech seemed to be an effort to shift the emphasis of the campaign from economic to foreign policy, an issue, Mr. Ford's polls show, on which he has a higher rating than his opponent.

6 States to Vote Nov. 2 on Future Of Nuclear Power

WASHINGTON, Oct. 27 (AP). —Although overshadowed by presidential and congressional elections, the Nov. 2 balloting will also determine the future of nuclear power in six states.

The nuclear power industry beat back an anti-nuclear initiative in a California referendum last June, only to see six more turn up on the ballots in Arizona, Colorado, Washington, Oregon, Montana and Ohio.

The passage of any one on Nov. 2 would be a grave setback to the nuclear industry, already beset by construction delays and rising costs.

All six ballot proposals are similar, requiring guarantees of safety and full accident-compensation affirmed by both houses of a state's legislature before that state can permit a nuclear power plant or related facility.

Environment groups and other supporters say such demands are justified by the alleged hazards of nuclear power. The nuclear and electric utility industries say the proposed guarantees are so tough they would actually halt further nuclear power in any state adopting them, leading to electricity shortages.

N.Y. Seizes 3 in Bid To Steal $80 Million

NEW YORK, Oct. 27 (AP). Police say they arrested three men early today as they were about to pull what authorities said might have been the most profitable crime in U.S. history: the theft of $80 million.

Police said the men, unarmed and carrying sophisticated electronic and alarm-bypass equipment, were about to crack a safe containing money, gold, diamonds and other precious stones, destined for deposit in Swiss banks. The safe was at the Swissair hangar at Kennedy Airport.

Many people can buy a Volvo at a very special price!

If you are travelling or temporarily living abroad you might be able to buy a Volvo at a very special price.
Buying a car through Volvo Tourist & Diplomat Sales actually saves you quite a bit more than just money. It also makes it easier to buy a new car abroad.

Special U.S. offer

For U.S. citizens, living or travelling in Europe, we have a special offer! A Volvo -76 with U.S. specifications, which can be yours at a very favourable cut-rate price (time-limited). So it would be wise to send us the coupon today!

To Volvo Tourist & Diplomat Sales, S-405 08 Gothenburg, Sweden.
☐ Please send more information on Volvo Tourist & Diplomat Sales
☐ I am interested in your special U.S. offer

Mrs. Gandhi Confirms Deaths In Rioting Over Sterilization

By William Borders

NEW DELHI, Oct. 27 (NYT).—Prime Minister Indira Gandhi disclosed today that some people had been killed in clashes with the police growing out of India's current campaign of mass sterilization to cure population growth.

In a speech in Parliament, the prime Minister confirmed recurring rumors of rioting by Indians resisting the sterilization program, but she gave no details.

"Some deaths have taken place due to firing," the Prime Minister said in the course of a speech defending a set of far-reaching constitutional amendments that the government has proposed. On the other hand several policemen and other citizens are killed by violent groups, even though they were not connected with the family planning campaign."

The Prime Minister called the lot deaths "tragic" and emphasized, as she has before, that we do not approve of compulsory sterilization."

"But we do believe," she continued, "that the program of sterilization and the adoption of all other known effective measures for the control of population are important and most urgent."

Brief Statement

Prime Minister Gandhi's discussion of the family planning program, which occupied only a few minutes in a 25-minute speech, was apparently prompted by opposition statements earlier in the debate that 40 persons had been killed in clashes with the police in a heavily Moslem area of Uttar Pradesh, north of New Delhi.

Ebrahim Sulaiman Sait, a Moslem League member, had declared: "People have been butchered and are being murdered in this country" by zealots of the family planning program.

"I am very happy that the Prime Minister has said that there would be no compulsion of sterilization," Mr. Sait said. "But the officers are going against it, and they are not abiding by the directions of the Prime Minister."

Today Mr. Sait and six other opposition members of Parliament drove to Muzaffarnagar, 50 miles north of here, and came back with an estimate that several dozen people had been killed and 150 wounded in incidents earlier this month.

Stopped by Police

The group of lawmakers reported that after talking to local residents they had been turned away by police with the official warning that further investigation "would not be conducive to law and order under the present circumstances."

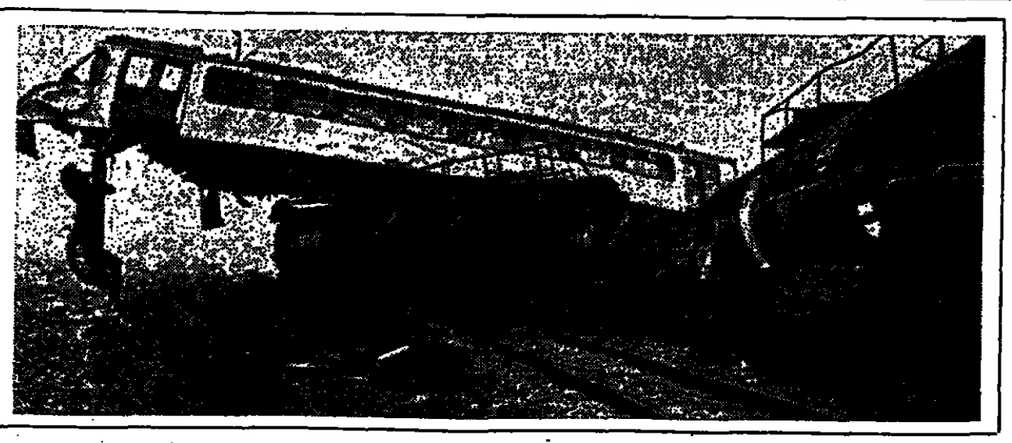
Because some members of India's Moslem minority consider birth control inimical to their religion, the New Delhi government has been at great pains, in its proselytizing for family planning, to avoid arousing communal hostility.

"But certain parties have sought to create an atmosphere of misunderstanding and fear," Mrs. Gandhi said. "As we know, fear leads to irrational action. Therefore, when a situation of confrontation is deliberately created, there are tragic consequences."

As the Prime Minister spoke, now and then removing her glasses and shaking them in the air to make a point, the rows of Congress party benches behind her were packed, and the benches across the chamber nearly empty.

Members of the parliamentary opposition, which is so small as to be almost impotent anyway, have been staging a boycott to protest censorship and the continued imprisonment of two dozen of their colleagues.

Russia, at the UN, Urges Outlawing The Use of Force



UNITED NATIONS, N.Y., Oct. 27 (UPI).—The Soviet Union armed Monday for a special treaty making the renunciation of the use of any kind of force "an iron law in international life."

But Soviet Deputy Foreign Minister Vasily Kuznetsov, speaking in the General Assembly's 145-nation Main Political Committee, said the treaty should accept force in defense against aggression or its use by national liberation movements.

The proposal was advanced by Soviet Foreign Minister Andrei Gromyko in a policy speech to the assembly last month. Western diplomats in corridor talks generally dismissed it as "nothing new" and being in line with Moscow's custom of introducing a major item at each assembly session, at least for its propaganda value.

"The principle of the renunciation of the use of force should become an iron law in international life and a permanent factor in the practical policies of states," Mr. Kuznetsov said.

"It must be emphasized that the solution of the problem of the nonuse of force should be organically linked with the question concerning the prohibition of the use of nuclear weapons or any other types of weapons," he said.

In Dispute on Control

USIA Chief Backs Envoy in Israel Over VOA

By Richard M. Weintraub

WASHINGTON, Oct. 27 (WP).—The director of the U.S. Information Agency has ruled that Voice of America correspondents "must conform to U.S. government policies" and that he does not see this as "in any way contravening the law referred to as VOA's charter, nor as any form of censorship."

USIA director James Keogh's action was in response to questions about the status of the VOA under recent legislation passed by Congress mandating that VOA news be "accurate, objective and comprehensive" and "consistently reliable and authoritative."

VOA correspondents and officials have frequently complained that control by the State Department and USIA, and particularly by individual ambassadors abroad, has undercut the voice's credibility as an independent source of news.

Mr. Keogh's ruling was outlined in a cable classified "confidential" to U.S. Ambassador to Israel Malcolm Toon and was cleared by top State Department officials.

Contact With PLO

The cable, a copy of which was obtained from congressional sources, was sent in response to a dispute between the embassy in Israel and VOA news officials over an order prohibiting the VOA correspondent there from having contacts with officials of the Palestine Liberation Organization.

Radio news officials have made it clear that the Middle East case is a major test of the VOA's status under the new legislation.

The Oct. 13 cable was sent a day after Rep. Bella Abzug, D-N.Y.—Sponsor of the VOA legislation in the House—had asked what USIA had done to implement the law.

In a letter to Mr. Keogh, Rep. Abzug said she was "particularly disturbed" by the orders to the VOA correspondent in Israel. "I am sure you can appreciate the serious impediment such a blanket prohibition presents in terms of checking routine stories filed from the Middle East. It effectively undercuts the ability of the Voice to independently develop sources," her letter said. "I trust you will take strong action to correct this situation."

Government Policy

Mr. Keogh's cable to Ambassador Toon said that USIA considers VOA correspondents to be U.S. government officials "subject to your authority when operating in Israel and when actions they may take or contemplate are deemed by you to be counter to stated U.S. government policy."

It is U.S. government policy not to have contacts with the PLO.

The cable specifically said that VOA News Division chief Bernard Kamenske "was not representing authorized views of VOA or USIA" when he was quoted in a Washington Post story as saying that the embassy's action undercut the credibility and independence of VOA. "I don't see how we can operate under the demands made by the embassy," Mr. Kamenske had said.

VOA has been part of USIA for decades. But a spokesman for Sen. Charles Percy, R-Ill.—sponsor of the VOA charter legislation in the Senate—said after hearing of Mr. Keogh's cable approving the prohibition on the correspondent in Israel that Sen. Percy plans to introduce legislation to create an independent VOA.

Verifying a Report

The ruling in Israel arose after the VOA correspondent there, Charles Weiss, telephoned a PLO official on Cyprus in an attempt to verify a report that an Israeli vessel had attacked a boat carrying Lebanese leftist leader Kamal Jumblat.

When the embassy learned of the telephone call, Mr. Weiss was ordered to have no further contacts with the PLO, raising what VOA officials in Washington referred to as questions of control over their news operations.

Mr. Keogh's cable, sent four days after stories about the incident appeared, was cleared by Assistant Secretary of State Alfred Atherton and Deputy Assistant Secretary of State Arthur Day, the top State Department officials for the Middle East; by VOA deputy director Hans Tuch and the USIA associate director for policy and plans, Serban Vallimarescu.

Hoxha Hails Hua In a Belated Note

VIENNA, Oct. 27 (Reuters).—Albanian Communist leader Enver Hoxha yesterday sent belated congratulations to new Chinese party Chairman Hua Kuo-feng and said their two countries should strengthen their "common struggle against American imperialism, Soviet social imperialism, modern revisionism and reaction."

A brief telegram from Mr. Hoxha was published by the official news agency ATA, several hours after similar protocol messages reached Peking from the leaders of China's other allies in the Communist world.

Observers said the delay almost certainly reflected unease in Albania over China's course following the eclipse of the radical leftist faction in the Peking leadership. Mr. Hoxha has guided Albania onto an uncompromising leftist course.

Israel Approves Unesco Study of Occupied Region

NAIROBI, Oct. 27 (Reuters).—Israel has agreed to allow a mission from Unesco to visit occupied Arab territories early next year, the organization's director general announced here today.

The mission will study the educational and cultural situation and recommend how Unesco can help. The director general, Amadou Mahtar M'Bow of Senegal, praised Israel for what he called "this positive new attitude."

Unesco, the UN Educational, Scientific and Cultural Organization, has been embroiled in controversy for two years over hostility by Communist, Arab and Third World countries toward Israel.

The United States has withheld $38 million in dues, a fourth of the organization's budget, because of action against Israel barring it from most Unesco activities.

At Unesco's last general conference in Paris two years ago, it voted to eliminate aid to Israel in protest against archaeological digging in the Arab part of Jerusalem and barred it from the organization's regional activities.

Bad Weather Foils Bid to Raise F-14

WASHINGTON, Oct. 27 (UPI).—The U.S. Navy announced today that it succeeded in catching a cable on its lost F-14 Tomcat fighter on the bottom of the North Atlantic, but that the cable snapped when an attempt was made in bad weather to raise the plane to the surface and it again settled to the ocean floor.

Another attempt to raise the plane will be made as soon as weather permits, the Navy said. The fighter rolled off the flight deck of the carrier John F. Kennedy on Sept. 14.

Governor of La. Defends Bribing Foreign Officials

BATON ROUGE, La., Oct. 27 (AP).—Gov. Edwin Edwards said yesterday that if U.S. businessmen have to pay bribes to sell their products abroad, they should be allowed to do so if foreign governments do not object.

"Unlike the press and IRS [Internal revenue service] and other government agencies, I'm all for it," Gov. Edwards said. Asked if he meant paying bribes to foreign officials, the governor replied: "Absolutely, pay bribes."

He said, "I think one of the most reprehensible things that the press and the national government have done has been to inhibit American business from doing business with foreign governments in accordance with the mode of operations in those foreign countries."

A day earlier, Gov. Edwards acknowledged that his wife, Elaine, accepted for herself and her children $10,000 in cash from South Korean businessman Tongsun Park in 1971. Yesterday, he showed reporters a table that he said he received from Tongsun Park valued at $900.

U.S. businessmen and workers have been cheated of the right to market products abroad, Gov. Edwards said, because somebody came up with the supermoralistic attitude that you shouldn't be making payments to people in foreign countries.

7 Suspects Named In Nice Robbery

MARSEILLES, Oct. 27 (AP).—Police today identified seven suspects, including a woman, in the $8-million to $10-million bank "robbery of the century," and said an unspecified part of the loot in the sewer-tunneling exploit had been recovered.

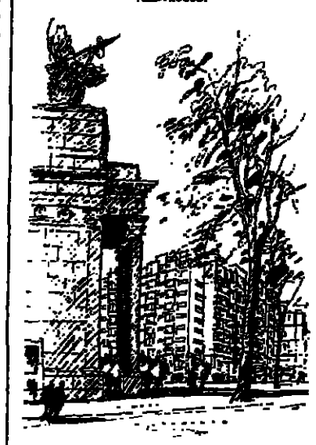
They said the suspects would be moved to Nice and charged formally within 24 hours.

The seven were among 40 suspects seized in coordinated police raids early yesterday from Paris to Ajaccio, Corsica. The "brain" behind the robbery, however, eluded the dragnet after a French radio station announced the raids were under way, police said.

Turks, Greeks to Meet

ANKARA, Oct. 27 (AP).—Turkish and Greek negotiators will meet in Bern Tuesday to begin talks on their dispute over the Aegean continental shelf and oil exploration rights, the Foreign Ministry announced.

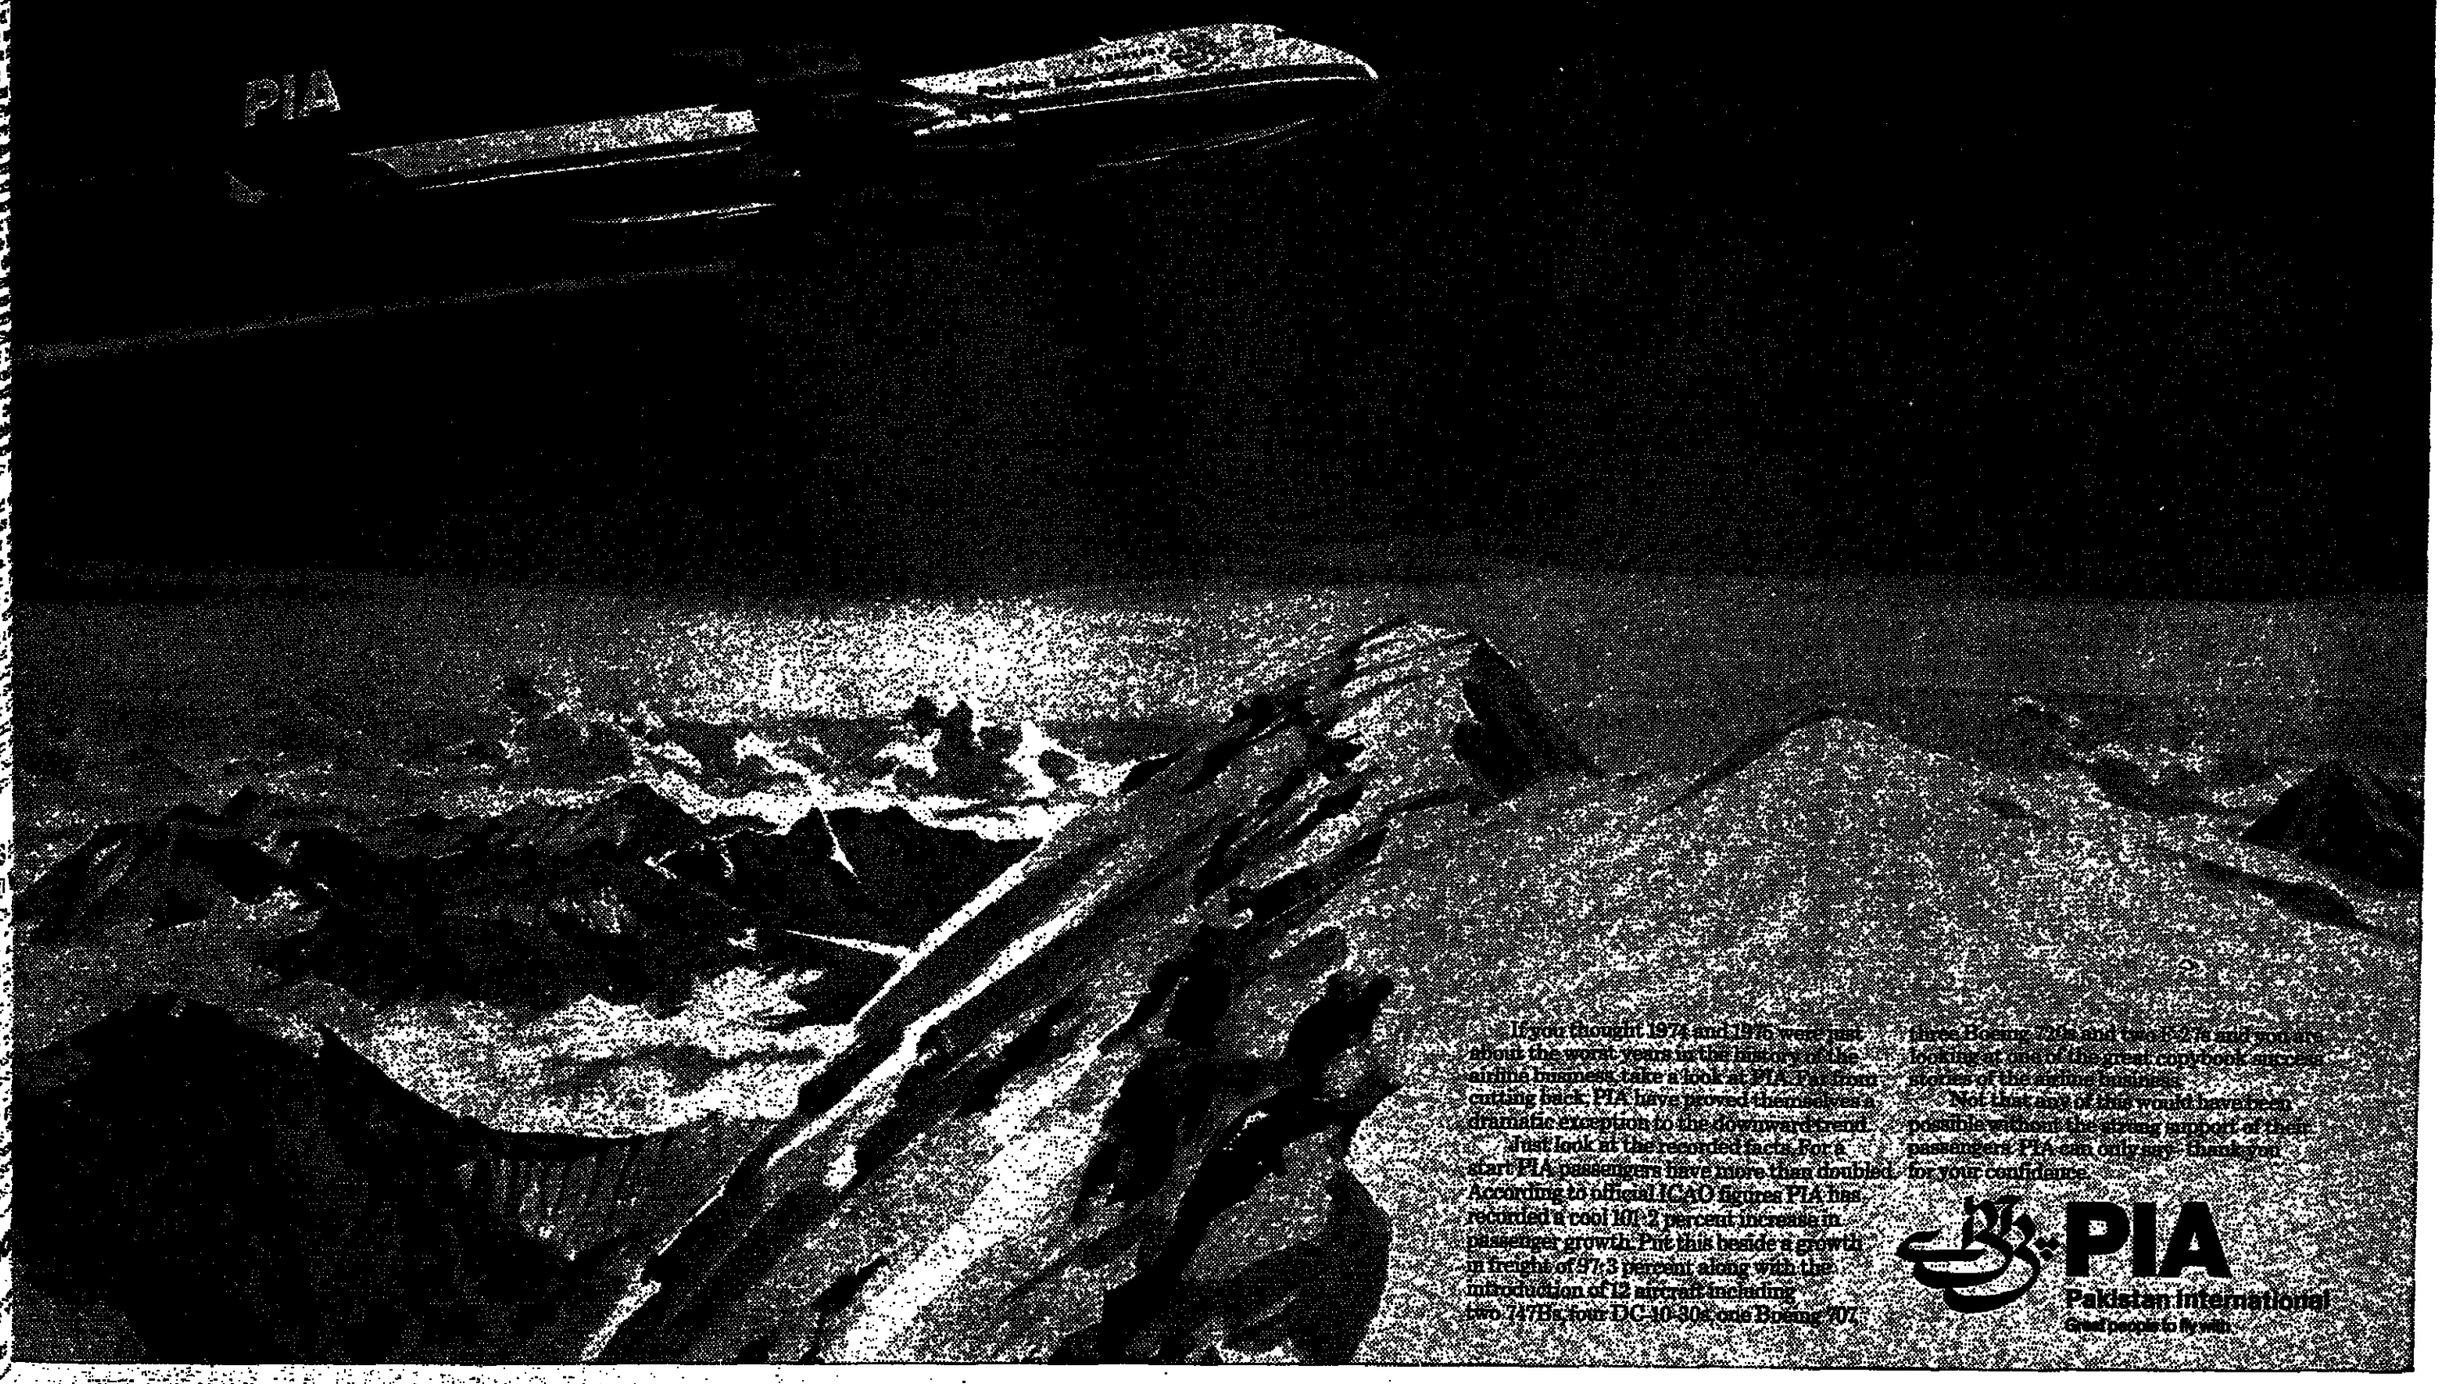
London's last great hotel?



To the very few people capable of appreciating the difference, the Inter-Continental is quite simply the only hotel in London.

Rather than attempt to verbalise the elusive qualities which set the Inter-Continental apart from London's many admirable hotels, we would suggest that you come and visit us.

Some things cannot be explained; they can only be experienced. Take the first step—call your travel agent—or your local Inter-Continental office.



HOTEL INTER•CONTINENTAL LONDON

ONE HAMILTON PLACE, HYDE PARK CORNER, LONDON TELEX 25853.

Others cut back, we double our passengers.

(nothing succeeds like success).

If you thought 1974 and 1975 were just about the worst years in the history of the airline business, take a look at PIA. Far from cutting back, PIA have proved themselves a dramatic exception to the downward trend.

Just look at the recorded facts. For a start PIA passengers have more than doubled. According to official ICAO figures PIA has recorded a cool 101.2 percent increase in passenger growth. Put this beside a growth in freight of 97.3 percent along with the introduction of 12 aircraft including two 747Bs, four DC-10-30s, one Boeing 707, three Boeing 720s and two B 57s and you are looking at one of the great copybook success stories of the airline business.

Not that any of this would have been possible without the strong support of their passengers. PIA can only say "thank you" for your confidence.

PIA Pakistan International Good people to fly with.

U.S. 'Prestige'

"We have not maintained our position and our prestige."

—John Kennedy, 1960.

"Communist prestige in the world is at an all-time low, and American prestige is at an all-time high."

—Richard Nixon, 1969.

To hear Jimmy Carter charging that the United States is "not strong anymore . . . not respected anymore" and Gerald Ford responding that "America has regained faith in herself and has resumed her role as leader of the free world," is to hear some of the hardiest echoes in U.S. politics. Since the first days of the republic, Americans have sought out the judgment of foreigners in order to validate the U.S. self-image of being a special people. And at least since World War II, U.S. perceived standing in world opinion has been regarded not just as balm for its self-image but as a resource of its diplomacy and power. This is the guise in which it has entered various presidential campaigns.

In the 1960 campaign, you will recall, John Kennedy zestfully exploited leaked United States Information Agency polls that showed a slippage in U.S. prestige overseas during the Eisenhower-Nixon years. (Said Mr. Nixon of his challenger, he's "running America down.") In the current campaign, yet another USIA poll has been leaked and—surprise!—it shows, according to a preliminary agency analysis, a slippage in U.S. prestige in Western Europe. Mr. Carter has been making much of the theme. (Says Mr. Ford of his challenger, he's "slandering the good name of the United States.") The more things change, the more they stay the same.

Well, it is not exactly clear how to interpret a poll that undertakes to measure the "good opinion" toward the "U.S. in general" held by about 1,000 people in each of four European countries. Taking the results as rough but indicative, you can accept either the preliminary USIA analysis, which holds that the United States has slipped or a second agency analysis, which suggests that, all things considered, the United States is hanging in right in there. For ourselves, we are perfectly prepared to believe that the U.S. standing has gone down. Given the tumultuous domestic and foreign changes of the 1960s and 1970s, how could it be otherwise? If Jimmy Carter thinks there is political profit in suggesting that this is somehow the result of Gerald Ford's stewardship—or something to be remedied by his leadership—then so be it. This is no wider of the mark than Mr. Ford's contention that, thanks to his own leadership, all is well again.

In fact, Americans are right to prize the respect of friends, in Europe and elsewhere. It is not everything, but it is a lot. Less ego massage than hard-headed national interest is involved. For just this reason, Americans might wish that circumstances and national policy had allowed U.S. prestige to soar. Alas, circumstances—Soviet missiles and Arab oil, for instance—have not so allowed. And over the years neither domestic performance nor foreign policy has made up the shortfall. Current official relations between governments are something else. By virtually all European accounts, the Ford administration has done a creditable job. But prestige? *No doubt the United States can do better, but great gains—and, one trusts, great losses* —are not in the cards.

THE WASHINGTON POST.

At Stake in Geneva

The only visible basis for hope for the conference on Rhodesia that opens today is the fact that all the white and black leaders invited by Britain have come to Geneva to participate. If their private negotiating positions were as rigid as their public postures they would hardly have bothered to make the long trip north.

Ian Smith, prime minister of the white minority government that declared Rhodesia's independence from Britain 11 years ago, continues to insist that he will accept no changes in the proposals for a transition to majority rule that he accepted from Secretary of State Kissinger last month. But he has been told by both Britain and the United States that what he represents as an immutable "package" is really only a basis for negotiations.

Joshua Nkomo and Robert Mugabe, the two most important of the four black Rhodesian leaders participating, say for the record that they have "completely rejected" the Kissinger plan, "about which we were not consulted." But in coming to Geneva they have in fact accepted the first two of the five points in that plan: the principle of majority rule within two years and a conference to set up an interim multiracial administration to serve until a majority government can be established under a new constitution.

It is difficult to envision the blacks accepting two propositions which Smith insisted on adding to Kissinger's plan before he would approve it. These specify a white chairman for a council of state, which would be charged with writing the constitution, and call for whites to hold the Ministries of Defense and Law and Order in the interim cabinet. Compromises on these issues are not inconceivable if, behind the public cannonading, there is a genuine will on both sides to negotiate a peaceful evolution.

Britain and the United States obviously count heavily on Prime Minister Vorster of South Africa to keep Smith in line and on Presidents Kaunda of Zambia and Nyerere of Tanzania to help prevent the rival black leaders from getting into sterile competition to see who can make the most extreme demands on Rhodesia's white regime. Britain has endorsed one black demand for immediate release of hundreds of black political prisoners held without trial by Smith's government.

Despite the preconference skirmishing, both London and Washington are keenly aware that the Geneva gathering represents the most serious attempt in many years—and perhaps the last opportunity—to arrest the drift toward major racial conflict and possibly great-power intervention in southern Africa.

For such enormous stakes, both governments presumably are ready to make extra exertions and take political risks to bring off a breakthrough at Geneva.

THE NEW YORK TIMES.

South Korea's Bribery

It now appears, according to leaks from several continuing investigations, that South Korea has been spending up to $1 million a year for a number of years to buy favor from U.S. congressmen and unspecified executive-branch officials. The influence-peddling program reportedly originated at a meeting attended by the President of South Korea himself. It has evidently been financed by "commissions" extracted from U.S. rice dealers selling "Food for Peace." Some South Korean intelligence agents working out of their country's embassy in Washington are reported to face ouster; other South Koreans, without diplomatic immunity, face indictment. The diplomatic and political shockwaves have only begun to reverberate.

It is no doubt true that South Korea, watching the United States begin to disengage from its Asia-mainland outpost in Vietnam in the late 1960s, could not help wondering whether the United States might go on to disengage from its other Asian mainland outpost on the Korean peninsula. This is presumably the prospect which prompted Koreans to start taking out insurance in Washington with under-the-table payments and other favors. Yet the tactic is utterly unacceptable. The practice of it bespeaks a corruption inconsistent with the ideals and self-interest which the two countries commonly profess as the real basis of their relationship. The revelation of it now in bits and pieces—a fuller version apparently awaits conclusion of the several investigations—is bound to be extremely damaging. Why, Americans will ask, should the United States support a country which not only represses its own citizens but tries to suborn U.S. officials? Why, indeed? A worse atmosphere in which to consider Seoul's case on its strategic and political merits is hard to imagine.

Meanwhile, Americans ought to reflect, somberly, on the fact that what the Koreans evidently have been doing in the United States bears a sharp and painful resemblance to what the United States has done in Chile and various other countries: to contaminate, with secret money, the internal political processes of another state. Whether American national policy towards Korea was actually altered as a result is not there the question. That the effort was made is appalling enough. Perhaps now, as Americans come to learn how some of their own politicians and bureaucrats could be seduced, they will better understand the revulsion that foreign countries feel toward American bribes. This sort of pollution of the international political environment cannot be allowed to go on.

THE WASHINGTON POST.

In the International Edition

Seventy-Five Years Ago

October 28, 1901

LISBON.—This city has recently been subjected to an unprecedented invasion of rats. Cats and poisons and traps were powerless to check the invaders. At length the municipal doctors were commissioned to inoculate some rats with an infectious disease. A suitable virus harmless to man was found, a few rats were inoculated and turned loose. The result today . . . no rats to be seen.

Fifty Years Ago

October 28, 1926

PARIS—To the Editor of The New York Herald: "Will you kindly inform me at your earliest convenience if Madame Loie Fuller is now in the city, and if so, her present address." ISADORA DUNCAN . . . (To the best of our knowledge Madame Loie Fuller is at present somewhere in the United States of America accompanying the Queen of Romania on her royal tour.—The Editor.)

Mao's Letter to His Wife

By Victor Zorza

WASHINGTON. — What may turn out to be Mao's last message to his wife gives the lie to *Peking's official claims* of an estrangement between the two. "You have been wronged," he tells her. "Today we are separating into two worlds. May each keep his peace. These few words may be my last message to you."

Mao's letter, in the form of a poem, was circulated by Chiang Ching among her supporters in the summer, while Mao was still alive. The struggle between Chiang Ching's radicals and the moderates led by Hua Kuo-feng, now the party chairman, was then at its height. Hua now claims that Mao had repeatedly denounced Chiang Ching and her "wild ambitions." But Mao's letter shows him as encouraging Chiang Ching to carry on his cause.

"Human life is limited," he says, "but revolution knows no bounds. In the struggle of the past 10 years, I have tried to reach the peak of revolution, but I was not successful. But you could reach the top." Mao also foresaw her present predicament. "If you fail," he says, "you will plunge into a fathomless abyss. Your body will *shatter. Your bones* will break."

Warns on Army

The letter shows Mao as siding with the radicals in condemning "compromise" in politics. It warns them, correctly as it turned out, that the army might go against them. If that should happen, he says, "it will be necessary to wage partisan warfare once again," even if that means retreating to the caves of Yenan—from which Mao launched in the 1930s his own partisan war to conquer the country. In 1959, when he was at odds with the other leaders, particularly the military, Mao also threatened that "I will go to the countryside to lead the peasants to overthrow the government"—a threat which he almost fulfilled when he launched the Cultural Revolution.

Mao's discussion of foreign policy is couched in terms of distrust of both the Russian bear and the American eagle. Why, he asks, was Chiang Kai-shek's Kuomintang defeated? "Because it believed the foreigners"—that is, the United States. Both "the bird and the northern bear" are brutal, Mao tells his successors, thus appearing to lend his support to the campaign waged by the radicals against further entanglements with the United States.

It may seem strange that Mao, who is responsible for China's opening to the United States, should have been warning his successors in the last months of his life against "believing" foreigners. But by that time the moderates in the leadership had shown their true colors, and were threatening to dismantle Mao's radical domestic policies. Foreign policy had also become a matter of dispute, with the moderates urging a much broader relationship with the United States than Mao had evidently contemplated, and the radicals opposing it.

The foreign policy debate, which was concerned with the whole question of China's future attitude to the outside world, could be deduced from Peking press articles on the purchase of modern technology from the United States. The moderates argued that China's economic progress and military security depended on the acquisition of such technology. The radicals countered by saying that this would lead to China's enslavement by the United States.

Vague Hints

None of this was stated openly, and the hints in the Chinese press were sufficiently vague to give rise to a parallel debate in Washington. U.S. China experts debated whether there was indeed a debate in Peking, and how it might affect U.S. policy. U.S. government analysts agreed, with few exceptions, that there was no foreign policy debate in Peking, and policy-makers concluded that the United States should do nothing to facilitate advanced technology purchases by China.

The minority view was expressed in the Washington quarterly Foreign Policy by Michael Pillsbury, and the publication of his article was deplored by administration officials who believed that his advocacy of sales of advanced technology to China was wrongheaded. But they now say that he was right after all, and are even prepared to make an apology of sorts for maligning him in the first place.

What is more, official policy is now shifting cautiously in the direction advocated by Pillsbury. Administration officials who now favor the sale to China of a cyber computer—which can be used for both civilian and defense purposes—use the same arguments to justify it as were used in the Foreign Policy article. But there is some concern in official quarters that the recent "leaking" of the decision to sell the computer to China might yet damage the whole operation.

There are factions in Washington as there are in Peking, and some administration officials believe that the news was deliberately "leaked" by the faction opposing the sale. It is indeed possible that when the conditions of the sale become generally known in Peking, the new Hua administration could be forced to cancel the deal. One condition is that the U.S. experts would be given broad powers to check the use of the computer in China. This is something that the radicals have always opposed, regarding it as the first step to "enslavement" by the United States. The tone adopted by the Hua administration in its public pronouncements suggests that, for the time being at least, it wants to give the impression that it is following radical policies—even as it puts Chiang Ching and the other radical leaders in prison.

Secure Its Flanks

Having got rid of the top radicals, it is trying to secure its flanks against their followers throughout the country. That is why it is denouncing the radical left for following "ultra-right" policies—a device which has been repeatedly used by the victors in previous Peking power struggles, regardless of the policies at issue. The victors, whatever their own political inclinations may be, have to show that they are in the mainstream of party tradition, which is leftist, and they therefore denounce the left as being rightist. Black is white.

The suspicion of the United States evinced in Mao's letter to Chiang Ching continues to be a major factor in Peking even after the death of Mao and the defeat of the radical leaders. The arrest of Chiang Ching and her three allies cannot remove from the political stage the ideas which they and their followers have espoused for a long time in the party's internal debates. Foreign policy, as the official statements of the Hua administration now admit for the first time, has been one of the issues in the internal struggle, and there is every reason to believe that it will remain at the forefront of the Peking debate.

Campaign Hucksters

The Television Blitz

By James Reston

NEW YORK—A great change has come over the candidates in the last week of the campaign. The magical theatrical arts of Times Square and the cunning techniques of Madison Avenue, with just the right camera angles, voice levels and patriotic crowd shots, have suddenly transformed President Ford and Jimmy Carter into flawless statesmen.

The television blitz is on, and it is exactly like the commercial advertising campaign for the 1977 automobiles. "Now that's better," say the General Motors and Carter ads. "When America needs a better idea, Ford puts it on wheels," says the Ford Motor Co., and the Republicans say the same, even though Jerry usually puts every better idea on the shelf.

It is only when you watch the parties and the candidates selling their products over TV—Joe Garagiola peddling Ford precisely as he peddled Dodges—that you begin to appreciate the good side of all those tiresome primary elections, repetitive speeches, blundering press conferences and controversial debates.

Punishing

They were excessively punishing on Ford and Carter and their families, but at least they gave the voters a more accurate impression of the two men than their contrived acceptance speeches at the nominating conventions, or these heroic TV pictures of Jimmy on the fence or the President mouthing patriotic lines to a circle of adoring black and white children.

Almost everybody is sneering at the long campaign as a tiresome bore, knocking the debates as a scoreless tie, and dismissing the two candidates as a couple of unsatisfactory dubs, but herewith a dissent before the final expensive political pictures on the television screens.

• The campaign has been a long marathon, and thank God it's almost over, but along the way, it eliminated in the primaries Gov. Wallace and Gov. Reagan, the two men who might have carried the nation away from its moderate course in both national and foreign policy.

• It gave the rejected South a chance in 1976, as it gave the rejected Roman Catholics a chance with John Kennedy in 1960, to get to the pinnacle of political responsibility. In short, the system made room for the political outsiders this year, as it did with Willkie in 1940, and Eisenhower in 1952.

• Also, it dramatized at least some of the lessons of Watergate, and under the new campaign finance laws, was probably more honest financially than any other presidential election of modern times.

• Finally, it compelled Ford and Carter to make decisions about the vice-presidency, which has succeeded, by accident, to the presidency under Theodore R[oosevelt], Calvin Coolidge, Harry Truman, Lyndon Johnson, and Gerald Ford in this century, and has given us such nominees as Spiro Agnew, and Bob Dole and Walter Mondale to think up as potential presidents. You take your choice.

Not All Bad

So maybe the '76 campaign hasn't been all that bad. It showed us that the Republican party, which had doubts about nominating Gerald Ford for senator, governor of Michigan, let alone for the presidency, even took him down to the last ballot in Kansas City for the presidential nomination.

It showed us that the governing elders of the Democratic party, including their labor leaders, didn't want Carter, but accepted him when he won the primaries.

It also showed us that, in the pressure, both candidates made mistakes and that press, radio and television magnify these mistakes, and confront them with dilemmas of the democratic process almost beyond endurance. But in that process, or so it seems here, they staggered along, and deserve better marks than they have been given by a critical press that falls on fumbles, and by a critical electorate that condemns Ford statements it does not understand and Carter Playboy interviews it never reads.

Okay, so the campaign was an educational exercise on issues, and the speeches were repetitive dozers, but if Carter staggers into "ethnic purity" Playboy mistakes, and thinks he is in Ohio when he is in Iowa, and liberates Eastern Europe by accident, or stumbles down an airplane stairway, and that's the way they are—a little imprecise, a little clumsy and inexperienced, and maybe after months and months of campaigning, probably a little exhausted, confused and even punchy.

After It's Over

After it's all over, I think happen to think it's a handicap Carter's intelligence, openness, flexibility, his understanding of the young and his capacity for personal growth are so much greater than Ford's that the decision for Carter seems clear on this corner and cannot be blurred on the campaign.

Voters can choose as they like between the possibility and uncertainty of change under Carter or the certainty of more years of much the same under Ford, but they cannot have guidance from the fraudulent blitz at the end. The campaign has been fairly accurate in revealing the qualities and weaknesses of both candidates, and is a much better guide than all the blustering ads from now until next Tuesday.

The Dilemma of Italy's Communists

By J.W. Anderson

ROME—Italy's Communists confront the United States with an interesting dilemma.

The Ford administration wants the Italian government to do two things—to push through its economic austerity plan and to keep Communists out of the Cabinet. Those two things will probably turn out, sooner or later, to be incompatible.

Putting the Italian economy back into balance is going to be a long and painful process that will very likely require increasingly active support from the Communists.

But there's a dilemma here for the Communists as well.

The party leaders' present policy of supporting the Christian Democratic government and its economic policy is bitterly controversial within their own membership. They are risking serious rebellions among some of their own traditional following, particularly in the labor unions.

Question for the Communists: Why does the party want a larger and more public share of power (and responsibility) at a moment when the government is deliberately cutting the Italian standard of living? The party is now riding on a great wave of its followers' expectations. Wouldn't it be dangerous to the party if its rise to power coincided with a drop in everybody's prosperity?

One answer, in the continuous debate within the party's councils, is that cooperation between the government and the Communists is the only way to avoid economic collapse. Another answer is that the party has to do what it can to influence the distribution of the burden, and to see that the poor suffer least from the coming sacrifices.

"If we don't take any responsibility in these discussions, no policy of any kind can be pursued," says Giorgio Napolitano, member of the party's secretariat and its leading economist. No policy would mean more devaluation, higher inflation and greater unemployment.

In Agreement

"If we were a Communist party of 5 per cent of the votes, we could wait and see, and make brilliant talk about the future and what to do in the next century," Napolitano puts it. But the Communists got 34 per cent of the vote in the election last June, the ruling Christian Democrats got 39 per cent, and no other party got as much as 10 per cent—which means that the Communists have to give "immediate, positive answers."

Neither of the big parties sees much hope for a stable coalition with the frustrated and quarrelsome minor parties and have decided that they are going to have to work with each other.

That is possible because, remarkably, the Christian Democratic government and the Communist opposition basically agree about what went wrong with the economy. (No such agreement exists in Britain, for example—which is why the government in Rome, for all its outward appearance of fragility, is a reasonably good bet to outlive the one in London.)

The Communists agree that Italians got into trouble by adopting the living standards of northern Europe (on borrowed money) when their economy was not yet rich enough to support it.

It's not surprising when businessmen argue that investment has to rise and government deficits have to be cut. In Italy the Communists make the same argument—forcefully.

Private consumption is going to have to be reduced, they emphasize, to make resources available for investment. They add (as businessmen are less likely to do) that tax collections are also going to have to rise.

Issues that are bitterly divisive in Britain—nationalisation of industry, for one—do not exist in Italy. The Italian government already owns well over half of the country's industry, as well as most of the big banks. In the Communists' view the great need is not to take over more companies, but to get better and more responsive performance out of those that it already controls.

Need for Austerity

Above all, the Communists agree absolutely on the urgent need for national austerity, and they are saying so publicly. But, they argue, it is impossible to carry out this kind of policy without a wide national consensus.

Does that mean that they demand a formal part in the government and seats in the Cabinet?

"Surely this policy is not easy to realize without the direct participation of the Communist party," Napolitano answers. "Millions of workers say, 'We don't feel these sacrifices will be guaranteed with an all-Christian Democratic government.'"

After all, he observes, if the whole country trusted the Christian Democrats, the Communists never would have got that 34 per cent of the vote last June. "We must find a table at which the interests and the different social forces can sit."

But no deadlines have been set, it seems. One gets a distinct impression that it is the direction of movement that's crucial to the Communists, not the precise timetable. They are a party that has been out of power continuously ever since it was formed 55 years ago.

Now that things are moving the party's way, the leadership is determined not to blow its opportunity in a fit of overeagerness.

Communists themselves speculate here that Italy might well be the first Western European country with Communists in government—for, as they observe, the French legislative elections will be held in early 1978, and the strength of the left there is rising.

A formal coalition bringing Communists into the Italian Cabinet does not seem probable in the near future. The Christian Democrats fear that it would split their own party. The Christian Democratic leadership has apparently arrived at a firm decision not to consider a coalition with the Communists at least until after another election, however it might be held.

Neither the government nor the Communists are eager to have another election soon. The Christian Democrats want time to show that their austerity plan will work. The Communists have evidently decided that they can pick up substantial numbers of new votes only by reaching into the middle classes, and they need time to demonstrate that they don't intend to eat up the bourgeoisie. It's quite possible that both strategies will succeed, and that both of the big parties will gain support simultaneously—at the expense of the little ones.

Money Talks

You mentioned in your Oct. 2-3 issue that the new Swiss currency will be printed in four languages, the most languages appearing on any currency ever printed. If you will examine a Russian ruble you will find the term One Ruble is printed in 14 languages.

GEORGE R. TURPIN.
Frankfurt.

To Mr. Turpin, the return of his ruble.

Concussion Bombs

To produce, store, and be ready to use the "concussion bombs" described in the IHT Oct. 14 is morally criminal. To supply them to another country, Israel, in the hope of getting votes, Gerald Ford now agrees to do. This is the same "decent" and "honest" Ford whom Nixon put into office, and who thereupon straightaway pardoned his benefactor.

BALLET

Frankfurt Launches A New 'Swan Lake'

By David Stevens

FRANKFURT (IHT).—By increasing the size of its company and stretching its resources to the utmost, the Frankfurt ballet has launched this season with a new production of "Swan Lake"—the first home-grown staging here of this romantic classic and the largest production ever mounted by this still young company.

The troupe was increased to 85 from 32, for this season, and the production required 140 costumes, statistics that give an idea of the effort demanded from the troupe. Francia Russell and Kent Stowell, directors of the company in this final season of outgoing management, adroitly mediated between the Petipa-Ivanov point of departure and the exigencies of widespread touring and tiring in roles.

Maria Guerrero and Burton Taylor in a scene from Frankfurt Ballet's new "Swan Lake."

C. Tandy.

Necessary Minimum

It meant, for instance, a squadron of only 16 swans, and when it came time for the celebrated pas de quatre for the four little swans in the second act, three of them were danced by corps members who stayed behind as the other 13 flew into the wings.

The enterprise could easily have turned out to be a case of excessive artistic chutzpah. In the circumstances, however, Frankfurt has an attractive and serviceable "Swan Lake." Russell and Stowell have trimmed the story-telling to a necessary minimum and kept the emphasis on dancing, skillfully mortising the necessary adaptations of Petipa and Ivanov to suit the reduced proportions of the company. The Frankfurt Opera has scheduled 20 performances this season, and the full house at the fifth performance on Sunday suggests that it will justify itself at the box office.

Filippo Sanjust's sets and costumes are stylish and colorful. His Act I castle seems to put this production in the neighborhood of Florence, Act III is set in a high Gothic hall with red the dominating color, and the lake of the title is in a cool blue-white landscape.

Maria Guerrero, the company's principal ballerina, is dancing the double role for the first time, and her technique and lively personality make her Odile a more convincing performance than her Odette at this stage. At the first performances her prince was Burton Taylor, of the Pennsylvania Ballet, but on Sunday Jonas Kage, a young Swedish dancer now in Geneva, was her handsome and secure partner.

The national dances of Act III were tossed off by this young, ebullient company with the requisite dash and feeling—in particular the Neapolitan dance of Ronald Darden and Rejane Perroud. Stowell himself was Rothbart, an imperious figure in ghostly white whose ultimate victory was never in doubt. No apotheosis for an ending here—only the shattered prince left to contemplate the consequences of his own foolishness.

PARIS FASHIONS

Parisian Finale: Jacobson, Rykiel

By Hebe Dorsey

PARIS, Oct. 27 (IHT).—The finale of the Paris ready-to-wear collections for summer today belonged to Sonia Rykiel and Jacqueline Jacobson (Dorothée Bis), both queens of the knit world.

But this time Miss Rykiel is on an ego trip, while Miss Jacobson has made her mark with an up-to-the-minute, colorful and witty collection.

Miss Rykiel is in love with knits and her own ideas—and does not mind saying so. Her handouts this morning were not the usual program with fashion notes and pictures, but a folder with her picture on both sides—and thoughtful, obscure poems in the middle. She reads the poems herself all through the show, opening with "It's like a film. A film you've already seen. Those women are the same. The same you already saw."

And that's the trouble. Once designer with great personal style, Miss Rykiel has honed her skinny, layered silhouette to the point of making it repetitious.

Her palette is so muted, so toned-down that it becomes dull with eggplant, eggshell, gray and browns that look more like winter than summer colors.

Miss Rykiel decided two years ago to have her own cultural revolution. She rebelled against perfect sewing. Hence her unhemmed clothes and coats worn inside out, with all the seams showing. She is still in the same mood but has added a new gimmick: a giant loop at the back of coats which are then slung over the shoulder, sometimes two of them, with a couple of bags, and a few odds and ends of purses. One is not too sure whether she means it as real fashion or if she is using the mode's as coat racks.

AP.

The Dorothée Bis look.

In a season where silhouettes are full and generous and colors light and gay, Miss Rykiel sticks to a long, skinny tunic over baggy pants or shorts.

Dorothée Bis

After that, Dorothée Bis's peppy collection was like sunshine. Miss Jacobson is off with the short skirt—and running.

Her collection is built around the flapper, with long, V-necked, multicolored sweaters over tiny, finely ribbed skirts. The longest ones cover the kneecap and are slit on the sides, with still more leg showing.

Her jacquard knits—thick stripes mixed with flat flowers—are Art Déco and so are the colors, with lots of bright orange, green, yellow and purple.

Of all the short skirts in Paris, hers will be the most acceptable, to the average woman. The same goes for her well-cut, longish city shorts.

Flapper's bandeaux were worn around the head and also cleverly used on straight T-shirt dresses to make the waistline movable. Other accessories include the soft, hand-knitted pouchy bags, with double straps and carried knapsack style.

The gold-finale was again young and kicky as were all Miss Jacobson's hula dresses, of multicolored shiny straw.

* * *

Tan Giudicelli, who showed yesterday, had a good sportswear collection, which was, if anything, too short. A designer who made his mark at MicMac, he offered slick, transparent plastic ponchos over poplin suits and a charming white group, mixing light cotton voile and terry. Nice striped T-shirt dresses were his third theme, one that could have been elaborated.

As for Renata, she did so well with her lingerie line last year that she has now turned all her little nighties into streetwear.

PARIS MOVIES

Joseph Losey's Intelligent, Persuasive 'Mr. Klein'

By Thomas Quinn Curtiss

PARIS, Oct. 27 (IHT).—In "Mr. Klein" (at the Biarritz, Publicis Matignon and Paramount Montparnasse), Joseph Losey has come up with a gripping drama played against the grim setting of Nazi-occupied Paris.

At the Cannes festival last May it failed to draw even honorable mention from a jury that crowned the blind-alley violence of "Taxi Driver" as the acme of the entries. Yet this arresting Losey film is worth a dozen "Taxi Drivers," having something vital to say and saying it with artistry and intelligence.

Alain Delon contributes a performance of surprising depth, sincerity and maturity, as a dandified, sybaritic antiques dealer, smugly indifferent to the changes that the Occupation has wrought, continuing his trade and augmenting it by buying at bargain rates the art treasures of fleeing Jews. Suddenly his racial origins are questioned and he is hurled into the maelstrom.

Delon succeeds in both ranges of the difficult role, at first establishing firmly the spoiled, corrupted café society butterfly and, then, the second man who, through the agony of anxiety, learns compassion. Losey, eschewing any sermonizing, tells the story as a sinister thriller. Fiction it may be, but it has the intense urgency of reality.

* * *

This week offers an opportunity to compare Walt Disney's 1940 "Fantasia" (at the Rex, Panthéon and Gaumont Madeleine) and the latest French effort to oust the king of the animated cartoon from his throne: "Les 12 Travaux d'Astérix" (at the Cluny Palace, Gaumont Richelieu and in another auditorium at the Gaumont Madeleine). There is nothing to be compared. The first, its popularisation of Bach, Stravinsky, Dvorak, Mussorgsky and Schubert notwithstanding, is a work of fertile, if vulgar, imagination. The Gallic imitation is but a comic strip photographed with little notion of humorous fancy.

* * *

"Bronco Bullfrog" (at the Seine Positif in English) is a study of juvenile delinquency by Barney Platt-Mills, done in black and white, which, despite an overall amateurism, has a verve. It is simplistic, but it scores its points. Its drawing of the selfish parents is so telling that one understands completely how their son turned thief. The unclouded honesty of approach is refreshing.

* * *

Clint Eastwood, who emerged from the spaghetti Westerns of Italy to become a latter-day Tom Mix in Hollywood, now operates as star-director. He has directed several of his own films and again undertakes the double function in "Josey Wales, Outlaw" (at the Paramount-Elysées and the Boul'-Mich in English).

Eastwood is a sound and solid actor for the roles he portrays and he has staged his new Western—a tale of backwoods Missouri in post-Civil War times and of a lone avenger of Yankee wrongs—to please the large public that relishes such fare. But he is no more John Ford than he is John Barrymore. A resourceful cutter might have edited his footage to better effect.

"The Duchess and the Dirtwater Fox" (at the Ermitage and Cluny-Ecoles in bad English) is one of the worst films in Paris. How, why and for whom was it made? It, too, is a sort of a Western as it is set in the Californian wilds and on San Francisco's Barbary Coast. The language, a sewer explosion, is not for youngsters who constitute the largest segment of horse-opera customers—nor is it for anyone else. Had a merciful pencil struck the filthy gabble from the script, it might have served the team of Mae West and W. C. Fields 40 years ago. Goldie Hawn is its honky-tonky siren and George Segal is the double-crossing crook. It is resolutely unfunny.

N.Y. Entertainment:

'7 Per Cent Solution'

NEW YORK, Oct. 27 (IHT).—This is how critics for The New York Times rate new films and stage productions:

Films

"The Seven-Per-Cent Solution," adapted by Nicholas Meyer from his novel and directed and produced by Herbert Ross, "is nothing less than the most exhilarating entertainment of the year to date," according to Vincent Canby. Sherlock Holmes has summoned his old friend Dr. Watson to tell him about the evil of fiends, Prof. Moriarty. Watson notices that Holmes has come to the "outer limits of his fine madness" and to save his friend decides to get him to Vienna and the new young doctor, Sigmund Freud. The two brilliant minds join forces to solve the evil mystery. "It is popular movie-making at its most stylish. And a collector's item in terms of performances." Nicol Williamson "creates an entirely new Holmes;" while Alan Arkin, as Watson, "is shy, immensely kind and a little self-conscious." Laurence Olivier "is marvelous as Moriarty," and Vanessa Redgrave "is the lady who drives Holmes wild with her beauty." As Watson, Robert Duvall "is the particular revelation of this film."

Plays

"Cyrano Murderer," by the Czech playwright Pavel Kohout, "is a strange, dazzling and intellectual work that is going to be one of the highlights of the season," Clive Barnes says. An actor has been playing Hamlet and imagines he has killed Polonius. He is sent to a mental hospital where a psychodrama of the actor's impressions and motives is played out. Kohout "represents European writing at its best and most imaginative." The play "has been tautly directed by Herbert Berghof." The central character of the actor/Hamlet is "brilliantly played in all dimensions" by Laurence Luckinbill, who, together with Berghof, was responsible for the play's adaptation into English. Maria Schell and Kevin McCarthy "are also desperately eloquent" as the Queen and Polonius. For Canby, "what is important about this play is the way it uses the metaphor of acting as a symbol for madness."

Can you name the 12TH largest bank in the U.S.?

We're a worldwide banking system with $9.2 billion in deposits, which includes $2 billion in personal savings.

We have $541 million in capital, $80 million in reserves, and $10.5 billion in assets.

We have 316 branches throughout New York State and 29 offices throughout the world. Have you guessed our name yet?

We have our international operations based in New York City's financial district, with key people in the world's major money centers. We have extensive experience in foreign exchange and in foreign currency management. Do you need another clue?

We do business with half of the leading U.S. national and multinational companies on the "Fortune 500" list. And over 750 banks in more than 130 countries.

Now do you know who we are?

We're the Marine Midland Bank.

Ranking based on deposits as of June 30, 1976

Japan Plans to Boost Its Flagging Economy

TOKYO, Oct. 27 (Reuters).—The Japanese government today announced a six-point program to stimulate business amid growing signs of a slowdown in the nation's economic recovery.

The slowdown, which is expected to bring about a further flagging of imports and a continued balance of payments surplus, is particularly embarrassing to industries whose exports are being strongly criticized overseas.

But industrial spokesmen said they had no intention of responding to a call from Toshio Doko, president of Keidanren, the federation of economic organizations who is visiting Western Europe, for self-restraint on export shipments to save some European countries from growing unemployment.

The six-point package was announced as official statistics showed that industrial production in September declined by 1 per cent after a fall of 1.7 per cent in August.

The Minister of International Trade and Industry, Toshio Komoto, said there would be a further decline in October and possibly in November.

The package proposed expansion of year-end finance to smaller businesses, a boost in low-interest loans to private housing construction, increased capital spending by the electric power industry, achievement of a $12-billion goal for industrial plant exports, unfreezing of oil refinery expansion plans and study of a plan to lower long-term interest rates.

The Keidanren said it would hold a joint conference with another Japanese economic federation after Mr. Doko's return to discuss what measures they should ask the government and the Bank of Japan to take to speed up economic recovery.

A survey made by the Keidanren showed that many Japanese industries are pessimistic about their prospects unless monetary and economic measures are taken to stimulate business.

Industry sources said the Keidanren would probably ask the government to use reserve funds in the national budget to increase investments in public works, expand the fiscal loan and investment program, introduce a supplementary budget, and lower long-term interest rates.

The sources also said some industrialists were calling for a cut in the official discount rate from the present 6.5 per cent.

Steel Charge Denied

Meanwhile, officials of the trade ministry denied charges by eight U.S. welded stainless steel pipe producers that Japan is selling the products at below-cost prices in an effort to monopolize the American market.

The officials said they found it difficult to believe the charges because prices of stainless steel sheet have risen sharply in Japan and have been even higher than those in the United States.

The ministry officials said, however, they are awaiting official reports through diplomatic channels on the issue.

The U.S. firms filed a complaint with the U.S. International Trade Commission calling for import curbs on the products from Japan.

New Charges For Sindona

NEW YORK, Oct. 27 (NYT).—The Italian government filed detailed new charges yesterday in its long battle to extradite Michele Sindona, the Italian banker, to stand trial on accusations that he looted two Italian banks of $225 million.

The allegations, filed in Manhattan Federal Court, contended that Mr. Sindona used Banca Privata Finanziaria, later merged with another Sindona bank, Banca Privata Italiana, to funnel large amounts of Finanziaria deposits outside the country.

Mr. Sindona had previously told the Italian government, according to the charges, that the funds were on deposit in other Italian banks.

The Italian government charged that Mr. Sindona arranged for funds to be sent abroad, typically to Amincor Bank of Zurich or Banque de Financement of Geneva, and then transferred to a company he was financing or to so-called bridge companies or companies of convenience that he is alleged to have controlled.

The insolvency of Banca Privata Italiana, the Italian government charged, "was due primarily to a large number of (deposits in foreign banks) which funneled money to Sindona companies and which were not repaid, causing losses of approximately 180 billion lire," or the equivalent of $225 million.

Many Forced to Do Without

Insurance Costs Hit U.S. Firms

NEW YORK, Oct. 27 (AP-DJ).—The growing number of lawsuits resulting from allegedly defective products and the mounting cost of product liability insurance is taking its toll among small U.S. businesses, the Conference Board reports.

Increasingly, the nonprofit business research group says, smaller companies are going without insurance protection, or "going bare." The board says the cost of liability coverage for non-auto-related accidents jumped to $3 billion in 1974 from $2 billion in 1970. By 1980, it says, estimates are that costs could reach $30 billion.

This year an estimated one million product liability claims will be filed. Rising product liability costs, the Conference Board says, are "clearly being fueled by the rising expectation of consumers, regarding both the products they buy and the responsibility of manufacturers to assure the products are safe."

A switch in the judicial climate, the research group says, has made manufacturers liable simply by producing what turns out to be a dangerous or defective product. Formerly, individuals seeking damages had to prove the manufacturer was negligent or violated a warranty. "Even consumers who've improperly used products have received sizable awards," the board says. In the past 15 years, more than 50 liability awards have each topped $1 million.

One company, Rigby Manufacturing Co., which has been making equipment to strip insulation from wire and electric power cables for nearly 20 years, is operating without product liability protection, and according to Manning Emery, president, one more big lawsuit and "we're a goner."

Rigby, along with what government officials estimate may be "hundreds, perhaps thousands" of small companies, is going bare. Rigby has been hit with three product liability claims in the past four years, although before 1972 there were no injuries reported from use of its products. So far, the largest settlement has been a $175,000 jury award to a worker injured when a 900-pound Rigby machine toppled over. Two other cases were settled out of court for $7,500 and $3,000, respectively.

Faced with high insurance costs, Mr. Emery refuses to pay the price. "I'll be damned if I'll see the lawyers and the insurance companies take more out of the company than the owners have," he says. The company, which has traditionally earned 4 per cent of gross sales, has been asked to pay 8 per cent of gross sales for insurance. The last quote Mr. Emery received was $20,000, for a $100,000 deductible policy, plus 8 per cent of any sales above the $250,000 expected gross sales this year.

According to one observer in Washington, the growing number of companies and individuals who cannot find or afford insurance may attract the federal government into the insurance business. "For the past few years," one industry critic suggests, "insurance, has been teetering on the brink of becoming a public utility."

With more folks going bare, some regulators say, "the issue just on the horizon is federal insurance." But small manufacturers, such as Rigby Manufacturing, are simply hoping that some solution to their coverage problem arrives soon. "It seems a shame," says Mr. Emery, "that a few people, or a large number, have to go down the drain before an equitable solution to the problem is discovered."

Bargain Hunting Aids N.Y. Stocks

NEW YORK, Oct. 27 (IHT).—Strong gains in some of the blue chips and glamours enabled New York Stock Exchange prices to add to yesterday's brisk rise.

But apart from bargain hunting, analysts saw no special reason for the better tone.

They said the market was continuing its rally from a sold-out condition, although the relatively light volume indicated many investors were marking time pending the outcome of the presidential election next week.

The Dow Jones industrial average closed up 7.98 to 956.12. A slim 15.79 million shares changed hands, close to yesterday's 15.5 million shares.

At the close about 850 issues had declined and about 530 had advanced.

Chrysler Corp., a volume leader, eased 3/8 to 19 1/2. The United Auto Workers union said it set a Nov. 5 deadline for settlement of a new contract covering 109,000 workers in North America.

American Motors, which predicted a "heavy loss" in the fourth quarter, dipped 1/8 to 4 1/8.

On the upside, meantime, were Atlantic Richfield, ahead 1 3/8 to 56 1/8, Eastman Kodak 2 3/4 to 85 3/8, Xerox 1 1/8 to 61, and IBM 2 1/2 to 266.

Gold-mining shares also firmed, with Homestake Mining ahead 1 5/8 to 34 1/2, Campbell Red Lake mines 1 3/8 to 21 7/8, Dome Mines 1 1/4 to 39 3/8, and Rosario Resources 7/8 to 21.

On the most active list much of the day, British Petroleum was up 1/8 to 10 1/2, AT&T closed at 59 7/8, up 5/8, and Kennecott ended at 26 7/8, off 5/8.

Universal Leaf Tobacco closed at 29 7/8, up 1 3/4; Fuqua Industries was up 7/8 to 10 3/8, Masco Corp. ended the day off 1 1/2 at 19 3/4, and Gardner-Denver was off 1 1/8 to 17 3/8.

Royal Industries, which said it filed suit to block a tender offer for its shares by Monogram Industries, was down 1/2 to 9 1/2. Monogram closed at 13 1/2, up 1/2.

Prices on the American Stock Exchange pushed higher in light trading. The Amex index rose 0.33 to 98.50.

A rally in the closing minutes sent soybean futures 20 cents a bushel higher on the Chicago Board of Trade and losses in the major grains were reduced.

Wheat futures closed with a loss of 4 1/2 cents while corn was down 3 1/4. Oats prices were mixed. Soybean meal gained $3 a ton and oil futures were up 90 points, just under the 100-point limit for one session.

Japan Car Firm Said Studying Europe Output With Chrysler

TOKYO, Oct. 27 (Reuters).—Japan's Mitsubishi motor corporation today insisted that it is studying a plan to produce cars in Europe with Chrysler Corp., which denied Mitsubishi's original statement on the plan yesterday.

A Mitsubishi spokesman said his company saw no reason to change its statement. The plan was stated to involve production of the cars at Chrysler's factories in Britain, France and Spain, and that joint production of trucks was also contemplated.

"Any suggestion that there is an agreement to build a Mitsubishi car or any other Japanese car at any of our plants in Europe is entirely untrue," Chrysler Corp.'s European vice-president, Don Lander, said after Mitsubishi's first statement.

Denial in Detroit

Chrysler had not seen a plan or agreement to build a Mitsubishi car at its European plants, a Chrysler spokesman added in Detroit.

But according to Mitsubishi, the joint production plan had been broached by Chrysler, with the new models to be distributed as Chrysler cars throughout the Chrysler network.

The new small car would use the basic design of the model Mitsubishi is developing for distribution through its own West European network, the Mitsubishi spokesman said.

Under the proposed plan, Mitsubishi would supply up to 49 per cent of the parts required to make the cars, he added.

This would help Chrysler save the cost of developing a new model, while enjoying the benefits of mass production through the supply of Mitsubishi parts, he said.

Mitsubishi estimates its exports of cars to Western Europe this year will rise to nearly 26,000 vehicles from 12,000 vehicles last year.

U.S. Productivity Up 3.8 Per Cent

WASHINGTON, Oct. 28 (Reuters).—Productivity in the private business sector of the U.S. economy rose at an annual rate of 3.8 per cent in the third quarter, matching the downward revised gain of the previous period, the Labor Department reported today.

Unit labor costs rose at a rate of 3.4 per cent compared with an upward revised 3.6-per-cent gain in the previous period.

The increase in productivity resulted from a 4-per-cent rise in output and a 0.2-per-cent increase in hours worked. This compared with increases of 6.8 and 1.6 per cent respectively in the second quarter.

In the manufacturing sector productivity increased by 5.7 per cent compared with 8.7 per cent in the second quarter.

Foreign Cars in France

PARIS, Oct. 27 (AP-DJ).—Foreign penetration of the French private car market increased to 21.8 per cent during the first eight months of this year from 20.2 per cent in the like 1975 period, the Auto Importers' Association announced.

Peso Drops Sharply After Being Floated

MEXICO CITY, Oct. 27 (Reuters).—Mexico today faced its second economic crisis in less than two months as its formerly stable peso currency fell sharply after being allowed to float.

Banks quoted the peso at 26.37 to the dollar this morning—an effective overnight devaluation of 24.6 per cent after the central bank had announced it would reflect the currency in an attempt to halt a heavy outflow of capital.

The new rate represented a devaluation of 52.6 per cent from the old fixed parity, which Mexico had maintained for 22 years until it was abandoned under the pressure of mounting balance of payments problems on Aug. 31.

Consultant Reports to OPEC

Global Problems Seen in Oil Price Rise

CAMBRIDGE, Mass., Oct. 27 (AP-DJ).—Consultants who advise member states in the oil cartel on developing their economies are telling them that a large increase in petroleum prices this winter could cause global problems.

Renewed inflation, strains on world trade and finance and a cut in U.S. capital-goods spending are all likely results of another oil price increase, according to Arthur D. Little Inc., an international business consulting concern.

Depending on the size of the increase, its side effects could well include rising interest rates, renewed gold speculation and debt moratoriums by small countries hurt by crushing fuel bills the report speculates.

Among clients receiving this advice in a letter from Little's president, John Magee, are "most" of the 13 member nations of the Organization of Petroleum Exporting Countries, a Little spokesman said. The cartel, which has been unilaterally setting world crude oil prices for the past three years, meets in December in Qatar to consider another rise.

Most OPEC nations retain Little for studies of their economic development as well as technical subjects. Included in the economic studies is usually advice on how oil prices affect both the world economy and the domestic prospects of member states. The studies are often cited and discussed at OPEC meetings.

The Little advisory cites "speculation" that an OPEC price increase in December "will be $1.15 to $2.30 a barrel—a boost of 10 per cent to 20 per cent." Noting that "some suggest even higher figures," the letter went on to assess the impact of three different cases—increases of 10, 20 or 25 per cent or higher.

The report says "a 10-per-cent hike would probably have a relatively mild impact." It would slow economic growth slightly but mildly stimulate some energy-producing industries and their suppliers. It would add an estimated 0.6 to 0.8 percentage points to the U.S. inflation rate.

"A 20-per-cent increase would likely have a more serious slowing effect," the report continues. It could boost unemployment and slow the world economy. But an increase of 25 per cent or more "would cause a serious setback in the world economy" that would impose a decline in economic activity in some countries for a quarter or longer.

Using a 25-per-cent increase as an outside limit, the U.S. price index would rise 1.5 percentage points and European prices would go up 2.5 percentage points within a year, the advisory forecasts.

The added inflationary pressure probably would require central banks to exercise monetary restraint. That could hurt financing of capital expenditures, which are needed "for the recovery cycle to mature fully," the report says.

The balance-of-payments impact on oil-importing nations that already run severe deficits "will put renewed strain on world trade and the international financial system," and that could lead to competitive currency revaluations and nervous foreign-exchange markets.

Less developed countries will bear the brunt of a new increase, and some could be forced to suspend payment on their debts, causing strains on international money markets and probably bidding up of the gold price, the letter warns.

Belgian Prices Rise

BRUSSELS, Oct. 27 (AP-DJ).—The Belgian consumer price index for October rose 0.22 per cent in a month and 8.3 per cent in a year, according to figures released by the Economics Ministry.

CGM :
LA NOUVELLE COMPAGNIE MARITIME FRANÇAISE QUI A PLUS D'UN SIÈCLE D'EXPÉRIENCE.

La France : les productions de ses industries de pointe,
les fameux produits de son terroir, et un grand armement français pour les transporter.

La Cie Générale Transatlantique et la Cie des Messageries Maritimes joignant leur longue expérience du transport par mer, se sont regroupées, pour devenir la Compagnie Générale Maritime.

La CGM, nouvel armement français de taille mondiale, met au service des Importateurs et des Exportateurs d'Europe plus de cent navires, sans compter ceux des consortiums internationaux dont elle est membre.

La CGM est un grand armement conteneurisé, et aussi un des leaders du roll-on roll-off au long cours. Aucune compagnie au monde ne transporte autant de flacons de parfums, autant de bouteilles de bons vins, ni autant de fromages que la Compagnie Générale Maritime.

Mais ses navires transportent aussi des trains, des machines de tous modèles et de toutes dimensions, des produits de toutes les industries, quels que soient leur stade d'élaboration et leur forme.

Dans tous les grands ports d'Europe, on voit chaque jour des navires CGM au service du commerce mondial.

CGM, la Nouvelle Compagnie qui a plus d'un siècle d'expérience.

EMPRESA NACIONAL DE ELECTRICIDAD - COCHABAMBA, BOLIVIA
SYSTEMS INTERCONNECTION PROJECT
PUBLIC INVITATION FOR BIDS

Empresa Nacional de Electricidad (ENDE) is executing the systems interconnection project consisting of the construction and expansion of the following transmission lines and substations:

1. Line Cochabamba-Vinto (Oruro), 115 kV, 152 kms.
2. Construction or expansion of the substations of Arocagua (Sacaba), Cochabamba (Valle Hermoso) Oruro and Santa Isabel where transformers, breakers and capacitors will be installed.

This is an invitation to submit proposals for the above project for the design, fabrication, tests, guarantees and supply CIF Antofagasta, Chile, of the following equipment:

Specification 48P-E1948:
1. One autotransformer 120/72 kV, 18.75/25 MVA Onan/Onaf three phase, 50 HZ.
2. One transformer 115/10 kV, 12/15 MVA Onan/Onaf three phase, 50 HZ.
3. Three transformers 115/10.5 kV, 12/15 MVA, Onan/Onaf, single phase, 50 HZ.

Specification 48P-E1950:
Steel structures for approximately 152 kms. of transmission lines of 115 kV and associated substations

Specification 48P-E1952:
496 kms aluminum conductor with steel core "Ibis".

The purchase of the above described equipment will be financed with a loan from the International Bank of Reconstruction and Development (IBRD); therefore, this invitation for bids will be subjected to the requirements of eligibility of the IBRD in agreement with the respective financing contract.

In this bidding, proponents will be able to participate who are established in countries which are members of the International Monetary Fund and Switzerland.

The documents of the invitation for bids 48P-E1948, 48P-E1950 and 48P-E1952 can be obtained from Empresa Nacional de Electricidad S.A., Avenida de Las Heroinas No 4574, Casilla No. 565 Cochabamba, Bolivia, upon payment of 1,500 Bolivian Pesos each.

Interested persons who obtain the documents for the invitation for bids, will be able to consult, request any additional information or inspect any plan which is not included in the bidding documentation in the offices of Ende in Cochabamba.

The due dates for the presentation of proposals are:

Specification 48P-E1948: November 30 1976, 5 p.m. in the offices of Ende in Cochabamba.

Specification 48P-E1950. December 15, 1976, 5 p.m. in the offices of Ende in Cochabamba.

Specification 48P-E1952: November 30, 1976, 5 p.m., in the offices of Ende in Cochabamba.

Purchase orders will be awarded to the offers which are evaluated most advantageous to the interests of Ende.

Ende reserves the right to reject any of the received proposals.

BE A NEW SUBSCRIBER and save up to 47% of the newsstand price

(Depending on your country of residence.)

After the specific introductory period chosen, regular renewal rates will be applied.

Sales figures are unofficial

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual raet plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or pid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in sock in preceding 12 months, esimaed cash value on ex-dividend or ex-disribution date.

x—Ex-dividend or ex-rights y—Ex-dividend and sales in full. z—Sales in full.

cld—Called wd—When distributed. wi—When issued ww—With warrants. xw—Without warrants xdis—Ex-distribution

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend areshown for the new stock only.

Greece Raising $120-Million Loan From U.S. Banks

FRANKFURT, Oct. 27 (Reuters).—The Greek central bank is negotiating to raise a medium term loan of about $120 million from a group of three or four U.S. banks, the governor of the National Bank of Greece, Angelos Angelopoulos, said today.

The National Bank is Greece's largest credit institution, and is over 50 per cent owned by the state through public agencies, but is separate from the central bank, the Bank of Greece.

The loan, expected to carry a margin of around 1 1/2 per cent over Eurodollar rates, will probably be completed soon and will help cover the country's expected current account payments deficit of around $800 million this year.

The loan will be Greece's largest since it arranged a $220-million credit from a group of banks led by Crédit Lyonnais last year, Mr. Angelopoulos said.

Selected Over-the-Counter Stocks

Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or pid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

INTERNATIONAL EXECUTIVE OPPORTUNITIES

CONTI COMMODITY SERVICES IS LOOKING FOR EXPERIENCED AEs

ZURICH - LUGANO - GENEVA

If you're convinced your future is in futures, then consider this opportunity to join a dynamic brokerage firm dealing exclusively in commodities. All commodities.

We're ContiCommodity Services, a rapidly growing subsidiary of Continental Grain Company, whose experience dates back to 1813.

Today's world of commodities trading demands international involvement. Which is why ContiCommodity Services is expanding internationally into important European commodity centers.

We are looking for qualified, experienced people to join us in our offices in Zurich, Lugano and Geneva.

Your opportunity to advance at Conti is enhanced by our remarkable growth. Our compensation plan is excellent and working accommodations are top.

Call us or write in complete confidence to:

Karl Gysin, Manager, ContiCommodity Services AG,
Dufourstrasse 35, 8008 Zürich. Tel.: 01 32 03 33.

ContiCommodity
Subsidiary of Continental Grain Company

Qualified Electrical Engineer

Capable of supervising large field construction projects. Required by important installation, construction and engineering French Group, Paris area.

Candidates must have at least 10 years experience in refinery and pipeline installations.

Must be fluent in English and willing to travel to Middle East countries.

Qualified Instrument Engineer

Capable of supervising large field construction projects. Required by important installation, construction and engineering French Group, Paris area.

Candidates must have at least 10 years experience in electronic and pneumatic instrumentation as well as telemetering systems, for refinery and pipeline installation.

Must be fluent in English and willing to travel to Middle East countries.

Please write to: Box D-5,532, Herald Tribune, Paris.

EXECUTIVES AVAILABLE

SENIOR PORTFOLIO MANAGER
presently working with a Swiss bank would consider offer with a bank or financial institution in Monte Carlo, Paris or London.
Reply: Box 24-470,808, PUBLICITAS, CH 1211 GENEVA 3.

EXECUTIVE OF MAJOR U.S. BANK
non-U.S. citizenship, 28, unmarried, deep knowledge of all operations dept. and of American, Italian, German banking organization, fluent in English, French, German, Italian, superficial knowledge of Spanish, at present head of remittance, money-fx dept. in a German branch, looks for an interesting position in Europe.
Box 838, I.H.T., Gr. Eschenheimer Str. 43, Frankfurt, Germany.

INTERNATIONAL EXECUTIVE OPPORTUNITIES

WESERHÜTTE
EIN UNTERNEHMEN DER OTTO WOLFF GRUPPE

We are a company active throughout the world in the field of conveying and materials handling equipment. Our mining, handling, processing and conveying installations enjoy international reputation.

BOOKS

CATCH A FALLING SPY
By Len Deighton. Harcourt Brace Jovanovich. 268 pp. $7.

THE SUN CHEMIST
By Lionel Davidson. Alfred A. Knopf. 275 pp. $7.95.

THE GLORY BOYS
By Gerald Seymour. Random House. 314 pp. $7.95.

Reviewed by Richard Locke

THERE'S so much talk about broken traditions and shattered styles up there in the cultural stratosphere, that it's fun to tumble off Parnassus, slide across the donkey's bridge and wallow about in entertainment. Like Westerns and gangster films, today's spy novels and thrillers about international terrorism make breezy hack work of political reality. Such entertainments bog down only when they aspire to Art or grapple with Significance and beg for comparisons to Graham Greene or John Le Carré.

In the 14 years since his first and best spy novel, "The Ipcress File," Len Deighton has turned out 10 novels and story collections that have often hit the best-seller list. There was a Kennedy-cool amorality to "The Ipcress File," a cross of Hammett and cold war technocrat's lingo, but Mr. Deighton's recent books have been pale imitations. It's nice to report that his new one—"Catch a Falling Spy"—is a short-ripping success.

It's all plot, built for high-speed consumption. There are no real characters, just cartoons, the scenes are bright snapshots and the dialogue seldom more than tough-guy wisecracks twixt the two central heroes—a CIA honcho and a colorless, unnecessary British narrator. The story involves a defecting Russian radio astronomer, a super-sexy redheaded lady spy, a corrupt electronics millionaire, a doughty English expert on Sahara driving, an evil senator and his slimy chief assistant, and lots of on-location shots of North Africa, Miami, New York, rural Ireland, Paris and Berlin in 1955. The book is chockablock with facts on cars, military hardware, astrophysics, the Moroccan phosphate industry, German syndicates buying Irish farms, and some neat tips on skidding round hairpin turns in the Atlas mountains and shooting it out on the runway at Dulles Airport. If you can swallow the clichés (they're as thick as gristle in a cheap meat pattie) the book goes by like a shot.

"The Sun Chemist" by Lionel Davidson is quite another dish of tea. Mr. Davidson is a real writer, witty, graceful, erudite in a wry light way (he's British but lives in Israel), with a gift for doinish characters caught in melodramatic situations. He's written five novels before this, of which "The Menorah Men" (about Biblical archaeology) and "Smith's Gazelle" (about eti
ogy) were well received in United States. "The Sun Che is an altogether deligi entertainment: it traces an reference in a 1933 letter Chaim Weizmann (first Pres of Israel and also a rese chemist) back to lab note 1904, crosses it with som Weizmann's obscure last w in 1952, drops lots of false and hints about the chem of fermentation, and ties whole thing into the oil c industrial espionage (and der), Nobel Prize cancer rese Israeli politics, and a pi sexuality among genuinely and flirtatious men and w (yes, women).

Mr. Davidson has an ori very personal voice that grow fond of as he scatter details about organic chem and Weizmann's astonishing with a bright dexterity and leisurely speed. He also k how to deliver a climax, com with a chase through the of a Crusaders' fortress at edge of the sea. But the fi the style, the fluency, the a airship and delight in contra complicated characters.

If Mr. Deighton is all and Mr. Davidson is style character, then Gerald Seym is overreaching himself in t for all three. "The Glory B is an ambitious hunk of m drama: an Arab terrorist g up with an IRA gunman to assassinate an Israeli atom s tist in London. In a "Day the Jackal" situation, a clutc British Secret Service bur crats and a tough English ma main try to beat the fanatic wing killers. Mr. Seymour s from France to the Arabian d to Israel to England to a shoot-out on the runway London's Heathrow airport. characters' backgrounds, mot ideologies are done to de without a gift for anyt beyond bland mid-Atlantic glish, Mr. Seymour gets no d for all his labor. He has a journalist's energy (he's a B TV reporter) and a skill at fisted construction; the moves much better than routine entertainments; and Seymour is certainly ser well-informed, earnest to pro value for money. He does but he's hardly the major fi claimed by many reviewers of leaner, better-built, first n "Harry's Game."

These entertainments w shake you, enlighten the d ness or probe the depths; t right-winging politics is as r mentary as cornflakes and falsely satisfying. But unlike ruck of best-seller candid these solid genre books de the goods—a touch of the s and economic texture behind chattering headlines of Ar Israel's and airport viole There's no short-weighting, sanitized name-dropping glam porn. Pick your poison enjoy it while it lasts.

BRIDGE — By Alan Truscott

The difficult deal shown in the diagram requires unblocking by the declarer in two suits.

Seven hearts is an excellent contract for North-South, but most partnerships would have difficulty in diagnosing the perfect fit and would rest in a small slam—luckily as it turns out, because the bad break creates problems in making 12 tricks.

South ruffs the opening club lead and leads the heart ace. When West discards a spade, the heart then must be played from the dummy, the first unblocking play. This permits the trumps to be drawn easily, with a marked finesse eventually against East's jack.

NORTH
♠ K
♡ K10 4
◇ A K Q
♣ Q 7 5 4 3 2

WEST
♠ J 9 8 7 4 2
♡ —
◇ J 7 6 4
♣ J 10 9

EAST
♠ Q 10 6 5
♡ J 8 7 6
◇ 5
♣ A K 8 6

SOUTH (D)
♠ A 3
♡ A Q 9 5 3 2
◇ 10 9 8 3 2
♣ —

Both sides were vulnerable. The bidding:

South	West	North	East
1 ♡	Pass	2 ♣	Pass
2 ◇	Pass	3 ♡	Pass
4 ♡	Pass	5 ◇	Pass
6 ♡	Pass	Pass	Pass

West led the club jack.

If the declarer plunges blin on without thought he will as the cards lie. He must realize that he is in jeopard one defender has J-x-x-x in trumps, and then he must find way to guard against that tribution. An unblocking carefully timed, is the solut

The first step must be to the spade king, the heart and one diamond winner. position is now this:

NORTH
♠ —
♡ 4
◇ K Q
♣ Q 7 5 4 3

WEST
♠ J 9 8
♡ —
◇ J 7 6
♣ 10 9

EAST
♠ —
♡ Q 9 5
◇ 10 9 8 3
♣ A K

SOUTH
♠ A
♡ Q 9 5
◇ 10 9 8 4
♣ —

The stage is now set for big unblock. The declarer ta the marked finesse of the nine and cashes the queen carding a diamond honor the dummy. He then cashes spade ace, discarding the diamond honor.

Now a diamond trick is ru rendered by the jack and h claims the rest. In this way scores four diamond tricks, any other play he would be ed to three diamond tricks, 11 tricks in all.

Budget for 1980 at $20 Million

U.S. to Spend Big to Develop Olympic Winners

By Neil Amdur

NEW YORK, Oct. 27 (NYT).—The United States Olympic Committee will spend more than $10 million in sports development for the 1980 Moscow Olympics, a commitment unparalleled in American amateur athletics.

Col. Don Miller, the USOC executive director, declined to disclose specific details of the committee's plans, which represent a 150-percent increase over previous developmental programs.

"We are preparing a $20-million budget for Moscow," Miller said during a recent interview. "It may wind up at $25 million with inflation. At least $10 million will be spent on development, and that's not counting any federal funds. This commitment will provide us with an solid test for the immediate future."

After Mexico City and Munich, the USOC treasurer said, 'I thought we'd have to sell out all our holdings.'

The USOC shift in emphasis toward development, over previous priorities such as team preparation, appears to reflect a growing concern over the improved performance level and long-range commitments of the Soviet Union, East Germany and other Eastern European countries.

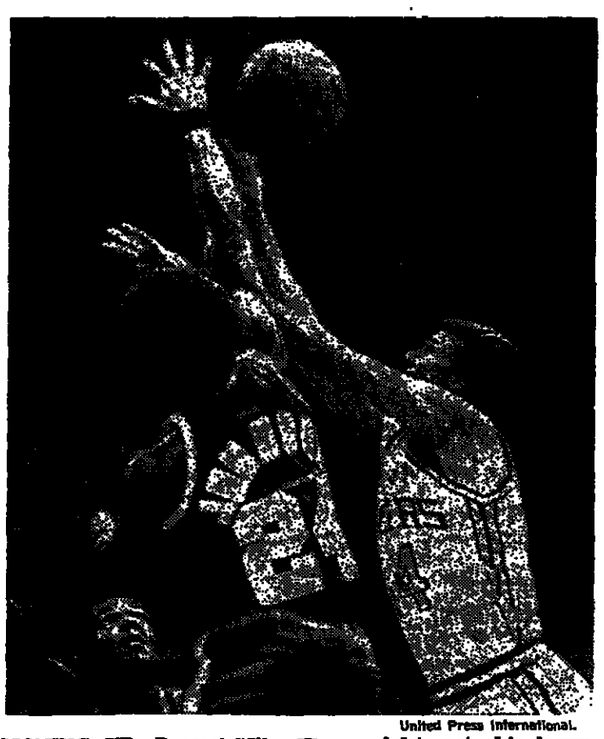
One program to assist athletes already has begun, with 75 major corporations offering to provide jobs and training time for competitors in skilled areas.

The program, still in the organizational stage, is being headed by Howard Miller, president of Canteen Corporation, a Chicago-based company. The USOC is hoping to enlist 150 corporations in the program.

Although suffering a gold shortage on the playing fields in Montreal, America's Olympic movement may wind up with a balanced budget, or even a gold surplus, for the first time in recent Olympics. A study of Aug. 31 balance sheets from the USOC indicates a deficit of $353,385.32 for the 44-month period, between Jan. 1, 1973, and Aug. 31, 1976.

However, USOC officials believe that funds from Canada's Olympic coin program, outside contributions and additionally committed revenue should cover the deficit of financing American participation of the 1976 Winter and Summer Olympics and the 1975 Pan-American Games.

The committee suffered deficits totaling $800,000 for the 1968 and 1972 quadrennials, which covered the Mexico City and Munich fiasco. "I thought we'd had to sell out all our holdings," Julian Roosevelt, the USOC treasurer, said, citing unfavorable publicity and problems associated with the 1972 Games.



"Without the increased support of corporations and the American public, we could not have met our commitment," Miller said.

Miller said corporate contributions increased more than 100 per cent between Munich and Montreal. A total of 42 agreements were signed with 36 corporations, and 275,000 individuals increased these contributions by $300,000 over the preceding quadrennial.

Total receipts through Aug. 31 were more than $11.3 million, compared with $7.6 million in 1972.

The corporate fund-raising over the last four years, most of it established by Miller, has allowed the USOC to retain more than $3.4 million in government securities, corporate bonds and notes and common stocks. The money is kept as a precaution against a shortage of funds that would inhibit any fulfillment of financial requirements for an Olympics.

The increased commitment to development was reflected in a budget comparison between Munich and Montreal. For Munich, only $21,000 was spent on the various United States trials in 27 sports. For Montreal, where the USOC paid for the transportation of all athletes to the trials, the budget totaled $856,000.

MOVING UP—Pacers' Mike Flynn, right, gets his layup past Sonics' Dennis Johnson while another Sonic, Bruce Seals, barely can help out his teammate. Pacers won game.

Record for New Orleans

Erving Draws Crowd, His 76ers Steal Show

NEW ORLEANS, Oct. 27 (UPI).—Julius Erving brought the largest crowd ever to see a basketball game into the Louisiana Superdome and then let his teammates steal the show.

A record crowd of 27,383 showed up last night to see the man the Philadelphia 76ers paid $6 million to hire. They saw him, but only for 25 minutes and only long enough to score 10 points.

Hardly anyone noticed. The crowd was too busy watching George McGinnis score 37 points and Doug Collins add another 25 to give the 76ers a 111-101 triumph over the New Orleans Jazz in the National Basketball Association.

"McGinnis was spectacular," said Philadelphia coach Gene Shue. "We got great production from him and Erving gave us some great rebounding in the first half (when he had nine) even though he wasn't on his offensive game."

The victory was the first of the season for the 76ers, who fell to 0-2 while Erving and his teammates began getting used to one another.

"We haven't really adjusted to him (Erving) and he hasn't really adjusted to the team," said Philadelphia guard Henry Bibby. "We'll get it all together, though."

McGinnis had his game together enough to carry the team. He had 11 rebounds and three assists to go along with his scoring.

"When we play a club, we've got to pound them," he said. "We've got to let them know we mean business."

The number of people who watched the 76ers was a far city from the crowds who first watched McGinnis in the now-defunct American Basketball Association five years ago.

"I just couldn't believe the enthusiasm of the crowd," said McGinnis. "I'd love to play in a place like this. I don't believe you'll ever find a more enthusiastic bunch."

In other NBA games:

Pacers 120, SuperSonics 90

At Indianapolis, the Pacers scored their first NBA victory by trouncing Seattle, 120-90. Indiana, playing without high-scoring forward Billy Knight, got balanced scoring from frontliners. Darnell Hillman and Wil Jones and guard Mike Flynn to earn their league wings after three straight setbacks.

Hillman finished with a game-high 24 points and Jones and Flynn added 23 each. High for Seattle was Mike Bantom with 18.

Blazers 110, Warriors 96

At Portland, Ore., Corky Calhoun and Herm Gilliam combined for 18 points in the third quarter to lead the Trail Blazers to a 110-96 victory over Golden State. Calhoun, acquired on waivers a week ago from Los Angeles, scored 10 points in the quarter and Gilliam added eight as the Blazers broke from a five-point lead to a 15-point margin, 85-70, at the end of the quarter.

Bulls 90, Bucks 88

At Chicago, Artis Gilmore's layup with just more than a minute left ended a seesaw contest and gave the Bulls a 90-88 victory over Milwaukee. The loss was the fourth straight for the Bucks.

The Bulls built up a 54-38 half-time lead, mostly on the strength of substitutes, led by Paul McCracken with eight points and Tom Kropp and Cliff Pondexter with six each.

Knicks 118, Braves 104

At New York, the backcourt of Earl Monroe and Walt Frazier combined for 50 points to lead the Knicks to a 118-104 victory over Buffalo. Monroe scored 29 points, including 11 in the first quarter as the Knicks moved to a 33-24 lead. After New York increased its lead to 48-32, Buffalo ran off 12 straight points to get back into the game.

In the third quarter, the Knicks ran off a 16-5 burst to take an 88-72 lead and break open the game. Spencer Haywood scored 12 of his 23 points in the period.

Hawks 122, Spurs 114

At Atlanta, Hawks, getting 33 points from John Drew and 25 from Ken Charles, beat San Antonio, 122-114.

Kings 117, Lakers 115

At Kansas City, Scott Wedman hit a short jump shot with 48 seconds to play in overtime and Ron Boone added two free throws with five seconds left to give the Kings a 117-115 victory over Los Angeles. Boone finished with 33 points and Wedman had 28 as the Kings took advantage of early foul trouble against Lakers' center Kareem Abdul-Jabbar to win the first game.

Baseball in Free Agent, Expansion Games

By Murray Chass

NEW YORK, Oct. 27 (NYT).—The World Series between the New York Yankees and the Cincinnati Reds represented the last game among baseball players until next March, but baseball officials are deeply involved in games of their own.

The expansion game began Monday when the 12 American League teams submitted their protected lists of 15 players each. The new clubs in Toronto and Seattle will scrutinize the list of unprotected players and devise their strategy for the expansion draft Nov. 5, in which each established club will lose five players.

Baseball's other draft—the selection of negotiation rights to free agents—will be held a week from tomorrow, and that figures to stir more discussion and controversy than this year's World Series. The 24 established clubs will be able to sign two free agents each. The expansion teams are not eligible.

The free-agent pool was reduced to 25 players over the weekend when Steve Byrd, the Minnesota outfielder, agreed to terms for a 1976 contract with the Twins.

The remaining free agents have until next Monday to sign with their old clubs. If they don't they will be eligible to be designated by a maximum of 12 teams in the draft and then must negotiate with only those teams, plus their old team if they desire.

The teams will select according to the inverse order of their won-lost records during the 1976 season, with the team that lost most choosing first. The National League won a coin toss to determine which league would select first, which means the Montreal Expos will lead off, followed by the Chicago White Sox. The Yanks will pick last.

The Yankees' Doyle Alexander and Don Gullett, the Cincinnati pitcher, were the last two players officially to become free agents. Their contracts with their teams expired at the end of the World Series.

There was some speculation that the ankle injury Gullett suffered in the first game of the Series would affect his attractiveness to other teams.

But, said agent Jerry Kapstein, "I was extremely gratified by the tremendous interest shown in Don. Only one club expressed some concern, but that club also said they would just have to see the doctor's report. All the other clubs told me they knew the fact that he was on crutches had nothing to do with his pitching."

Kapstein represents 10 of the 25 free agents. His other clients are Dave Cash of Philadelphia, Bobby Grich and Wayne Garland of Baltimore, and five Oakland A's—Bert Campaneris, Gene Tenace, Joe Rudi, Rollie Fingers and Don Baylor.

"I doubt that any of my people will sign between now and Nov. 1," Kapstein said.

There are those who believe at least some teams will meet their free agents' demands before next Monday just so they won't lose the players. Kapstein, however, said he had no indication of that happening.

Certainly not with Charles O. Finley, the agent added.

"I'm here if Charlie wants to contact me," Kapstein said of the A's owner, "but I don't plan to call him. Some of the players don't choose to play for him so there's no reason to talk to him."

Although millions of dollars will be spent on signing the free agents, many club officials agonize at least as much over the expansion draft and which players to protect from the two new teams.

The Yankees, for example, have more than 15 players on their 25-man roster they would like to have protected. And that doesn't even take into account good minor league prospects, such as Mickey Klutts, a shortstop, Ken Clay, a pitcher, and Terry Whitfield, an outfielder.

Herzog Honored

NEW YORK, Oct. 27 (NYT).—Whitey Herzog, who managed the Kansas City Royals to their first Western Division title in the club's eight-year history, yesterday was named American League Manager of the Year by United Press International.

The soft-spoken Herzog guided the Royals to the title despite season-long problems with an injured pitching staff.

Herzog was chosen by a panel of UPI baseball correspondents. He received 14 votes, compared with 10 for Billy Martin of the New York Yankees, and one each for Gene Mauch of the Minnesota Twins, Frank Robinson of the Cleveland Indians and Chuck Tanner of the Oakland A's.

Joe Morgan and three other members of the world champion Cincinnati Reds were named to the Associated Press All-Star team for 1976. Joining Morgan were Dave Concepcion, shortstop, and George Foster and Ken Griffey, outfielders. Mickey Rivers, of the Yankees, earned the other outfield post.

Joining Morgan and Concepcion in the infield were Minnesota's Rod Carew at first base and George Brett of Kansas City at Third. Thurman Munson, the Yankees' catcher, completed the infield, compiling the most votes, 298. Jim Palmer of Baltimore was named the right-handed pitcher and Randy Jones of San Diego was named left-handed pitcher. Morgan, Palmer and Jones were the only repeaters.

Welterweight Title Retained by Mexican

KANAZAWA, Japan, Oct. 27 (AP).—Hard-hitting Mexican champion José Peppino Cuevas floored Japanese challenger Shoji Tsujimoto three times in the sixth round and retained his World Boxing Association welterweight title tonight. Panamanian referee Carlos Berrocalo stopped the fight when Tsujimoto hit the canvas for the third time.

It was the first world welterweight championship fight held in Japan. Cuevas, nicknamed the Young Lion, was making his first defense of the 147-pound crown he won by knocking out Puerto Rico's Angel Espada in the second round in Mexico, July 17.

NHL Chief Calls Canada Cup a Waste

MONTREAL, Oct. 27 (AP)—Clarence Campbell, president of the National Hockey League, said yesterday the recent Canada Cup hockey tournament represented a stupid way to raise money."

"We drain the community by asking millions out of peoples' pockets to pay overseas teams to come here, and very little of that money ever finds its way back into hockey in North America," Campbell said.

Canada won the September tournament in a final series against Czechoslovakia after a round-robin schedule that included national teams from the Soviet Union, Sweden, Finland and the United States.

After expenses were paid, 50 per cent of the take went to the Canadian Amateur Hockey Association and Hockey Canada, while the other 50 per cent went to the pension funds of the NHL and World Hockey Association Players' Associations. The NHL association received 29 shares and the WHA organization two.

There was $465,000 in prize money, with $100,000 going to the first-place team.

Toronto lawyer Alan Eagleson, the NHL Players' Association mentor who organized the tournament, had estimated expenses of $3 million to pay for teams' travel, meals, rink rental, training camps, insurance and prize money. He also estimated gross revenue of $7 million including $5 million from television rights.

"The incredible thing is that the NHL Players' Association received $150,000 less from the Canada Cup than it did from our games against the Soviet Union last winter," said Campbell, referring to an eight-game tour of NHL cities by two Russian club teams last season.

Campbell said European teams have discovered that international tournaments are losing propositions because of the expenses involved.

"They can't even sell their own out. No wonder the Europeans jumped at the chance to come over here for the Canada Cup. We pay their transportation, expenses, everything. Then they bleed us dry and also wind up with a lot of our money. It doesn't make any sense."

Asked if he thought a low regard for the tournament was one reason the Soviet Union was represented by a team that many felt was less than that country's best, Campbell replied: "You said it. I didn't."

The NHL president said ticket prices for the tournament were excessive and "the average fan watching on TV got a real bargain."

Campbell suggested an alternative to tournament play. "The North American champion should play the European champion—it's as simple as that. Then you'd really see fan interest."

Solomon Is Upset in Paris

PARIS, Oct. 27 (IHT).—It is late in the season and little comes easy to the weary of the tennis circuit. Even Harold Solomon has a little left.

The sturdy American today couldn't make it past the second round of the Paris Open. He was beaten by fellow-countryman Erik Van Dillen, 6-3, 7-6, on the indoor surface of Pierre Coubertin Stadium.

Solomon's friend Eddie Dibbs found the work just as tiring but at least will be back for more, staying in the chase for a chunk of the $50,000 in prize purses by outlasting an up-and-coming American, Nick Saviano, 4-6, 6-2, 6-3.

Dutchman Tom Okker of Holland won in masterly fashion, beating Yugoslav Zeljko Franulovic 6-1, 6-1.

Others to survive in this Grand Prix event which has its final Sunday afternoon were Briton Mark Cox, a 6-4, 7-5 victor over American Fred McNair, and Chilean Jaime Fillol, a winner over Briton John Lloyd, 6-1, 6-7, 6-2.

In a Grand Prix tournament in Vienna, Brian Gottfried of the United States qualified for the quarterfinals by defeating Vladimir Zednik of Czechoslovakia 5-7, 7-5, 6-1.

Gottfried, 24, needed two hours 10 minutes to eliminate Zednik, who impressed with his powerful service.

Other players who qualified for the quarterfinals were Ove Bengtsson of Sweden, Victor Pecci of Argentina and Vitas Gerulaitis of the United States, the winner of the 1974 Grand Prix tournament in the Stadthalle here.

INDIANA—Signed Clyde Mayes, forward, free agent.

NFL FOOTBALL

NEW ORLEANS — Wayne Colman, linebacker, retired.

GREEN BAY—Signed Errol Mann, place-kicker, free agent.

Redskins in Talking Shape for Taking On Cowboys in NFL

By William N. Wallace

WASHINGTON, Oct. 27 (NYT).—Diron Talbert, Washington's ferocious defensive tackle, said yesterday that he didn't care if Tom Landry himself played quarterback for the Dallas Cowboys here on Sunday; the Redskins would be ready to conquer again.

Talbert was swaggering a little in the wake of Washington's remarkable 20-10 victory over the St. Louis Cardinals Monday night in the rain and mud of RFK Stadium.

The victory brought the Redskins into a tie with the Cardinals, one game behind Dallas in the hotly contested divisional race of the National Conference East. It was what the Washington coach, George Allen, likes to call "a championship game," meaning one of high stakes.

Allen has no peer at juicing up a team for a high-stakes game although earlier the Redskins fell on their faces in low-stakes games against Chicago and Kansas City, both defeats.

Sunday will bring on another "championship game" with Landry, the Cowboy's coach, indecisive until Thursday or Friday about his choice of quarterback, Roger Staubach or Danny White, because of Staubach's dislocated knuckle on the little finger of his passing hand.

Washington also has a quarterback situation with Allen's choices being sore-armed, 37-year-old Bill Kilmer, the Redskins' father image, or Joe Theismann, a younger, quicker taker of risks who started the last two games.

Swaggering like Talbert, Brig Owens said yesterday, "We'd have won on a dry field, on Astroturf, or any kind of field. The Cardinals had done a lot of popping off. We were fired up."

Discounting any luck that may have befallen his team, Allen said, "We had to play our best on offense, defense and special teams, and that's what we did."

There is more playing to be done, especially over the next two Sundays, with the 49ers the opponents of the Cardinals at St. Louis and then Washington in San Francisco. The 49ers' 6-1 won-lost record has injected this strong-defense, weak-offense team into contention for a playoff berth although it has beaten only one opponent—the Rams—with a winning record.

In the battle for the Eastern Division title, won the last two seasons by St. Louis, or a wild-card berth, the Cardinals have the most difficult schedule, the Cowboys the easiest. One of the several key contests will be the reprise, Washington at St. Louis on Nov. 21.

Running After Dorsett

PITTSBURGH, Oct. 27 (UPI).—Tony Dorsett, record-setting University of Pittsburgh running back, once was considered too small for the pros. Not anymore.

"He is big enough, fast enough, durable enough," said Ken Herock, Tampa's director of player personnel. "He has all the attributes of a great player.

"When people think of Dorsett as a small back, they're thinking of his freshman days. What was he then?—5-10, 160 or something. Look at him now—almost 5-11, 190. Dorsett is well-built, and he will continue to mature," and he will continue to mature."

Jim Lee Howell, director of personnel for the New York Giants, called Dorsett "a great player."

"I've seen him for two years," said Howell. "He runs right through people. All the scouts have seen and put him in the highest class. I don't know if he can start for all clubs, but he can start for some."

Art Rooney jr., Pittsburgh Steelers' player personnel director, figures Dorsett will go in the first five or seven players in the draft.

"Now Pitt is a must stop for pro scouts," said Rooney. "It's nice to have a guy in your city who is one of the ideals in the nation."

Dorsett enhanced his bid for the Heisman Trophy last Saturday by breaking the NCAA career rushing record of Ohio State's Archie Griffin. He has run for 5,206 yards.

Canada and U.S. To Have Playoff For Soccer Gain

TOLUCA, Mexico, Oct. 27 (UPI).—Mexico and Canada tied, today in the Northern Area qualifying group for the 1978 World Cup finals.

As a result, Mexico moved into the next qualifying round of the world tournament—not the finals while Canada and the United States must play each other again to see who advances.

The two of the three teams in the group play in the next round, but the United States and Canada tied on points and goal average.

Today's match was slow and passive, with the home team showing off form in comparison with its performance against the United States, whom it beat 3-0 on Oct. 15.

Mexico had vowed it would avenge its earlier defeat by Canada. But the visitors showed a more sophisticated man-for-man marking system and the Mexicans were rarely able to play open soccer.

What We Know

WASHINGTON.—As the exciting election campaign comes to a close we must come to the following conclusions.

Had Jerry Ford chewed gum on the second debate and walked at the same time, he would have never put his foot in his mouth.

Buchwald

The best time for Israel to get weapons from the United States is during the last three weeks of the presidential campaign.

The best time for American farmers to get increased supports for grain is three weeks before the election.

Vice-President Rockefeller points with the wrong finger.

Jimmy Carter does things in his heart that he could be arrested for if he did them in 30 of the 50 states he's been campaigning in.

President Ford can't balance his checkbook.

If Ford is elected, he will probably appoint a Polish-American to the Supreme Court.

If Carter is elected, he will pardon the editor of Playboy magazine.

Congress is responsible for everything that has gone wrong in the United States since Ford was sworn in as President.

The United States, according to President Ford, is respected throughout the world and anyone who says it isn't is tearing down the United States.

The United States, according to Jimmy Carter, is not respected around the world because Henry Kissinger makes secret promises he never keeps.

The League of Women Voters is on Eugene McCarthy's enemy list.

When someone apologizes for a goof during a presidential campaign, it's called a "clarification."

If Jimmy Carter gets elected, according to President Ford, it will cost the taxpayers (a) $100 billion, (b) $200 billion, (c) 300 B-1 bombers.

President Ford, according to Jimmy Carter, doesn't care about (a) people out of work, (b) people in need of health care, (c) lunches for schoolchildren.

Walter Mondale loves pizza.

Robert Dole is crazy about kosher salami.

Jerry Ford could live on soul food.

Jimmy Carter has a craving for Mexican tamales.

President Ford is for increases in oil and gas prices to provide incentives to private industry to see that the American people don't get cold this winter.

Jimmy Carter is for nuclear energy until we find means of harnessing the sun.

Never, never tell an ethnic story to John Dean on a plane during a presidential campaign.

Betty Ford is more popular with the voters than Jerry Ford.

Rosalynn Carter is more popular with the voters than Jimmy Carter.

If Jimmy Carter is elected to the presidency, he will never lie to the American people.

If President Ford is elected to the White House, he will rename the presidential yacht the "Mayaguez."

ABC Television needs a new sound system.

If Jimmy Carter wins, everyone who works for the government will have to go to Sunday school.

If Ford loses, he plans to write a book titled, "Washington on $5 a Day."

Throat Injury Halts Gov. Shapp's Speeches

HARRISBURG, Pa., Oct. 27 (AP).—Gov. Milton Shapp ruptured a blood vessel in his throat during a speech in New York City Saturday and will be unable to make any more speeches for Democratic candidates, an aide said yesterday.

"It's apparently not serious," the governor's press secretary said, but a doctor ordered Gov. Shapp to refrain from further political speeches this fall.

Fuller Named by AP

BOSTON, Oct. 27 (AP).—The board of directors of the Associated Press announced yesterday that Keith Fuller, 53, has been appointed president and general manager to replace Wes Gallagher, who has retired.

Turn-of-the-century news photograph shows the Czar and Czarina and children, Olga (born in 1895), Tatiana (1897), Marie (1899), Anastasia (1901) and the heir to the throne, Alexis (1904).

The Fate of the Romanovs—A New Mystery

By Bernard Weinraub

LONDON (NYT)—What happened to the Russian imperial family on the night of July 16, 1918? Were Czar Nicholas II, his son, his wife and four daughters massacred by the Bolsheviks in a cellar at Ekaterinburg in the Urals? Or did some members of the family disappear and live for months, perhaps years, after their capture?

The fate of the imperial family—one of history's riddles—has abruptly emerged as a source of new controversy with the publication of a widely praised book by two investigative journalists. They have uncovered evidence that demolishes the massacre theory and indicates that the Czarina and her four daughters lived months after the date of the alleged murders.

The book, "The File on the Czar," which is scheduled for publication in the United States by Harper and Row this month, was written by Anthony Summers and Tom Mangold of the British Broadcasting Corporation.

Perhaps the most significant facet of the book is the discovery by the authors, through a combination of luck and detective work, of a seven-volume dossier, collated by a monarchist official, of an investigation into the massacre. The dossier, which included original affidavits and police reports in Russian typescript, was found in a vault at the Houghton Library at Harvard.

"Inside the dossier," the authors say, "was detailed evidence, as compelling as any that exists for the massacre version, which shows that most of the Romanov family were alive for many months after their historical deaths."

The authors argue that Lenin probably made the decision to have the Czar and his young son executed at about the accepted date but that the Czarina and her four daughters were secretly moved to Perm, 200 miles northwest of Ekaterinburg, with the Bolsheviks hoping to exchange them for prominent revolutionaries imprisoned in Germany.

More important, the authors say, Lenin was prepared to barter the German-born Czarina and her four daughters for German good will. [The Brest-Litovsk treaty ending the war between Germany and Russia was signed March 3, 1918; but it left many issues unresolved.] Negotiating with the Kaiser, Lenin may have promoted the notion among his followers that the family were dead, thus making it easier to move them in turbulent conditions and avoiding the fury of militant Bolsheviks who insisted that they all be liquidated.

The authors, who worked five years on the book, substantiate their arguments with the publication of depositions found in the Houghton Library, interviews, documents found in German, British and American archives, and the uncovering of evidence that the first official White Russian investigations of the imperial family's fate found no evidence that the cellar murders took place.

Judge Ivan Sergeyev, who spent nearly six months gathering copious evidence for the White Russians, was quoted as saying, "I do not believe that all the people, the Czar, his family and those with them were shot there." It was not until Judge Sergeyev was abruptly dismissed in January, 1919 — and replaced by a lawyer named Nikolai Sokolov—that the mass-murder theory was turned into the definitive version. The two authors lose track of the Romanov women after their supposed confinement at Perm. "If Lenin kept the family alive as hostages for a deal with the Germans, the motive evaporated when Germany was defeated and the Kaiser toppled," said Mr. Summers. "Lenin either washed his hands of the surviving Romanovs or left them to their fate. What we know, what we're almost certain of, is that members of the family survived six months beyond their historic deaths."

PEOPLE: *When Daddy Is The Big Daddy . . .*

President Idi Amin of Uganda doesn't believe in sparing the rod. He has sent two of his sons to an institution for delinquents so they can learn useful skills. This comes from Uganda Radio, as monitored by Reuters in London. The radio said that the President wanted to prove to the boys that though they were his sons they should not misbehave. Last November, the boys, Akjia and Ali, ages unspecified, were sent to a prison. Later they were moved to the reformatory. President Amin was also quoted by the radio as saying that he would like to see other unemployed people training for useful jobs instead of becoming *kondos* (armed robbers).

When National Zoo authorities in Washington bought Humphrey the Camel last year, they had a definite purpose in mind. He would father a herd. "We checked his teeth and everything," said Theodore Reed, zoo director. "Our hindsight was not so good," he said. There will be no little Humphreys. The camel has no testicles. Dr. Reed has won the goof-of-the-year award from the American Association of Zoological Parks and Aquariums.

Designing star Yves Saint Laurent looked so sick Tuesday at his fashion show that by now the rumor mill has churned out a variety of explanations, savory and unsavory, plausible and implausible. The truth, said a spokesman for the house, was that the designer was simply exhausted. Yes, last month he had spent a few days at the American Hospital in the Paris suburb of Neuilly. It was for his annual checkup.

Spain Shuts Doors of Stone Age Cave To Tourists

MADRID, Oct. 27 (UPI).—Altamira caves, containing some of the world's best-known prehistoric drawings, will be closed to the public indefinitely after Nov. 1.

The Stone Age drawings of animals—mostly species that have since disappeared from Western Europe—have been damaged by temperature changes and moisture caused by the throngs of visitors. The caves are on Spain's Cantabrian coast, near Santander.

A Confession in the Nice Heist

Reported Mastermind Says Rightists Got His Share

NICE, Oct. 29 (AP).—Albert Spaggiari, an extreme rightist, confessed today to masterminding the 50-million-franc ($10 million) bank robbery here in July in which thieves tunneled into the bank from an adjacent sewer, police said.

Mr. Spaggiari, 49, a photographer and ex-paratrooper who is formally charged with robbery, the arrest of Sheikh Fahd's generals, Six other suspects have already been charged in the case and a seventh is awaiting arraignment. Another suspect was arrested this morning in Brussels, police said.

"Yes, it's me," police quoted Mr. Spaggiari as saying. "I planned everything. I thought about it for two years and then I decided."

After questioning Mr. Spaggiari for 30 hours, police said that he told them he decided to rob the bank after having rented a safe-deposit box, taking pictures of the vault and realizing that it had no burglar alarm.

Returned to Scene

"On several occasions I was able to take photos of the room and the comings and goings of personnel," a detective quoted Mr. Spaggiari as saying.

The suspect, who fought in Indochina and Algeria and later formed a militant underground anti-Communist movement, was taken to the Nice bank vault after his confession.

AP.

Albert Spaggiari

police said. Honoré Gevaudan, a senior police officer, said that Mr. Spaggiari also gave them the names of "several friends and professional criminals who took part in the robbery."

"Some of them are still at large, and I can assure you that these individuals will be caught sooner or later," he said.

Police said that Mr. Spaggiari told them he gave his unspecified share of the 50 million francs to an international group of rightist militants identified as "La Catena" (the chain). The organization is said to be based in Turin, and to be devoted to helping rightist extremists in trouble, notably in Italy and Yugoslavia.

2 Months in Sewers

Mr. Spaggiari said that an unidentified accomplice recruited about 20 bank-robbing specialists for the job and that they spent two months in the sewers before the July 17-18 theft, carefully building their tunnel to make it well lighted, ventilated and even covered with a carpet to deaden noise, police recounted.

Arms and explosives have been found in Mr. Spaggiari's home, police said, and burglar tools have been taken from two Riviera villas used by the thieves as headquarters.

Detectives also said that "an important part" of the 50 million francs has been recovered, but they did not say exactly how much. The suspect arrested in Brussels today—Daniel Michelucci—was carrying 420,000 French francs in cash and gold ingots, police reported.

In mid-August, about a month after the Nice robbery, a gang using the same sewer-tunneling technique took an estimated 25 million francs in cash and valuables from a Paris branch of the same bank. Police have not yet indicated whether they believe that the same gang committed both the Nice and Paris robberies.

Ford Lets China Buy Computers From U.S.

By Leslie M. Gelb

WASHINGTON, Oct. 29 (NYT)—President Ford, approving less than standard safeguards and making an exception to prevailing policy, has approved the sale to China of a computer system with military as well as industrial capability.

High administration officials said that the sale of two Control Data Corp. Cyber-172 computers and associated equipment was approved as a gesture of support to the new Chinese leadership.

The officials said that the United States did not intend to sell the computer system to the Soviet Union, and the deal was an exception to the policy of offering items to both Communist superpowers.

A National Security Council memorandum dated Oct. 12 and obtained by Aviation Week and Space Technology had recommended the lesser safeguards and the policy exception on the ground of overriding foreign-policy interests.

A State Department spokesman confirmed the decision to grant an export license. Negotiations to complete the deal are under way between Control Data and China.

Objections Overruled

U.S. approval, pending for more than a year, was finally given over the objections of the Energy Research and Development Administration. That agency, which is responsible for the nuclear-weapons program, said that the computer system was used in the United States for making calculations on nuclear tests and could be used by China for the same purpose.

The Pentagon, which had opposed the sale on the ground that the computer system could be used to support radar systems, withdrew its objections after the State Department agreed to press China to accept safeguards.

These include full access by Control Data personnel to computer centers and full information on computer use and programming. One computer is to be used in China for oil exploration, and the second, to be delivered later, is for seismic exploration. Only one Control Data official would be permitted at the first site for three years and only one at the second site for a limited period of time.

Memo on Standards

Safeguard standards for sales to Communist countries, including the Soviet Union, provide for blanket monitoring and inspection rights on a continuing basis. The National Security Council memorandum, signed by Lt. Gen. Brent Scowcroft, assistant to the President, acknowledged that standards in the China sale were less stringent.

The sales decision is in keeping with Secretary of State Henry Kissinger's assurances to the new leadership in Peking that the United States is interested in China's security relative to the Soviet Union. At a news conference last week, he denied that the United States ever had "any defense discussions with China," and said "we believe that the territorial integrity and sovereignty of China is very important to the world equilibrium, and we would consider it a grave matter if this were threatened by an outside power."

CLOSING THE DOOR—Security guard shutting off a passageway leading to the conference room at the Palais des Nations in Geneva where the second session of the Rhodesia talks were being held. Only participants could go in.

4 Blacks In Geneva Denounce Smith Rule

By Bernard Weinraub

GENEVA, Oct. 29 (NYT)—African nationalist leaders bitterly condemned Prime Minister Ian Smith's government today and demanded that Britain assume full responsibility for the transfer of power to black majority rule in Rhodesia.

The Africans, in opening statements on the second day of the Geneva conference on Rhodesia, told Mr. Smith to his face that his government was "fascist" and condoned "brutal atrocities" and torture of suspects. Mr. Smith termed the accusations "a complete pack of lies."

Although the speeches by four nationalist leaders were clearly prenegotiating positions at the talks, which are intended to arrange for a transition to black majority rule in Rhodesia, the accusations underlined the fierce anger toward Mr. Smith by the Africans and the gulf that separates the white and black sides at the conference.

After the 90-minute meeting, the conference was adjourned, possibly until Tuesday, to give time for informal talks. Later, Ivor Richard, Britain's ambassador to the United Nations and chairman of the parley, said that he was "extremely impressed" with the statements by the nationalists and Mr. Smith.

"To be brutally frank it went very much better than I had feared it was going to go," said the burly, bespectacled diplomat, standing outside an entrance of the Palais des Nations, the UN headquarters in Geneva and the site of the conference.

Colonial Role Stressed

Although the torture allegations overshadowed the conference today, the four nationalist leaders also struck one persistent theme: that Britain, which has been the colonial power in Rhodesia since the 1890s, bears total responsibility for the transfer of power in the nation of about 270,000 whites and 6 million blacks.

The Africans insist that Mr. Smith's government has been illegal since it broke away from Britain nearly 11 years ago rather than accept majority rule. "It is the responsibility of Britain as a colonial power and of no one else to grant us our right of self-determination," Robert Mugabe, a militant nationalist leader, said today. "We are assembled here to negotiate with no one else but Britain."

Joshua Nkomo, a prominent nationalist leader, said: "The simple and straightforward issue before the conference is that of the transfer of power from the colonizer, the United Kingdom government, to the people of Zimbabwe [Rhodesia] through a process of decolonization. The issue is independence from Britain."

It is the African view, voiced publicly and privately, that Britain, at the conference, has backed away from its colonial responsibility and must play a straightforward and powerful role guaranteeing majority rule. The Africans have strongly objected to the appointment of Mr. Richard to preside at the conference, and initially demanded a Cabinet official with political muscle. The issue has apparently been dropped.

Of the four nationalist leaders attending the conference—Mr. Nkomo, Mr. Mugabe, Bishop Abel Muzorewa and the Rev. Ndabaningi Sithole — it was Bishop Muzorewa, 51, a diminutive, U.S.-educated cleric, who delivered the most detailed and strongest opening speech.

He accused Rhodesia's security

Honecker New Chief of State, Stoph Premier in E. Germany

BERLIN, Oct. 29 (AP).—Communist party chief Erich Honecker became East Germany's head of state today in a surprise shake-up of top government posts.

With the economy evidently in trouble, former head of state Willi Stoph, 62, reverted to his old job of administering the ordinary job of running the government and economic bureaucracy.

The changes were confirmed unanimously by the Volkskammer (parliament), the official ADN news agency reported. It said Mr. Stoph would present his government Monday, along with a major speech outlining his program.

Outgoing Premier Horst Sindermann, 61, became president of the parliament, taking over from Gerald Goetting, 53, chairman of the Christian Democratic Union, a satellite party. The move gave the Communist party every top government post, including for the first time that of presiding officer of the parliament.

In a speech accepting his election as head of state by unanimous vote and to "stormy applause" of the parliament, Mr. Honecker, 64, emphasized domestic affairs. "We assume that economic achievement brings with it social achievement," he said.

ADN said that in foreign affairs Mr. Honecker described as "our most important concern" the constant deepening "of our brotherly association with the Soviet Union and the other countries of the Socialist community." The Soviet Union is believed to have more than 20 army divisions based in East Germany.

Concerning the non-Communist world, Mr. Honecker said, "there is no alternative to a policy of peaceful coexistence."

ADN said Mr. Honecker was also re-elected chairman of the National Defense Council, the post of commander in chief of all security and armed forces.

The shuffle left Mr. Honecker in the controlling post of party boss, the titular and ceremonial job of chief of state and head of security forces—all the major positions once held by the late Walter Ulbricht. His party title is the same as used by Soviet leader Leonid Brezhnev, general secretary.

The removal of Mr. Goetting dropped a facade the ruling Communist party had been maintaining. Mr. Ulbricht allowed non-Communist parties to exist but forced them into the Communist-run National Front to avoid criticism of one-party rule. The presidency of the Volkskammer had been the principal sop to the non-Communist parties.

The decisions confirmed today by the Volkskammer followed general elections Oct. 17 in which ADN said party-approved candidates on no-choice slates got 99.86 per cent of the vote.

Between Lebanese Foes

Fighting in Beirut Threatens Truce

BEIRUT, Oct. 29 (UPI).—Clashes between leftists and rightists in Beirut today threatened the crumbling nine-day-old cease-fire and tension remained high in the Chuf area southeast of the capital.

Although no reliable casualty figures were available, hospital spokesmen said at least two persons had been killed and 17 wounded along the confrontation lines that divide the capital. Rightists claimed to have killed 16 more leftists in south Beirut.

At the same time, the rightist Phalangist radio said the death toll in fighting that erupted yesterday in the Chuf area, 25 miles southeast of the capital, had climbed to 37 dead and "many more" wounded.

The casualty figures were the highest since the cease-fire went into effect.

From 6 p.m. on in Beirut, the sounds of machine-gun, and mortar and artillery fire echoed across the city.

The Phalangist radio also reported Egyptian Gen. Mohammed Hassan Ghoneim, commander of the Arab League peace-keeping forces in Lebanon, had been fired at in the afternoon when he crossed the so-called Green Line from east to west Beirut.

It was not known who fired on him and a Sudanese officer at Gen. Ghoneim's headquarters could not confirm the report, but the officer said the general was unhurt.

Cooperation Begun

Although the Lebanese leftists and rightists breached the cease-fire, their main allies—the Palestinians and the Syrians respectively—have worked out a rapprochement and begun to cooperate with each other.

The main evidence was the Syrian move to allow Palestinian forces through Syrian-controlled territory as the Palestinians shifted much of their strength from the central mountains to the south near the border with Israel.

President Elias Sarkis was pressing for combatants to pull back from their positions and a reopening of major highways, especially the Beirut-Damascus road, before additional Arab peace-keeping forces arrive. There are currently 2,300 peace-keeping troops in Lebanon.

But the Palestinians have said they did not plan to pull back completely from the highways until the proposed 30,000-man peace-keeping force arrived.

The Palestinians played down the significance of the fighting in Beirut and the leftists blamed the rightists for provoking the tension in the Chuf area.

However, leftist leader Kamal Jumblat issued a statement in which he called for "patience, awareness and tolerance" and urged combatants in the Chuf area to "avoid grudges and hatred against each other."

Militant rightist leader Camille Chamoun charged that the cease-fire was not being respected by the Palestinians and leftists,

Ulster Catholic Leader Slain; IRA Blames Protestant Gang

BELFAST, Oct. 29 (UPI).—Maire Drumm, Northern Ireland's fiery Roman Catholic spokeswoman, was murdered last night in her hospital bed. The outlawed Irish Republican Army today blamed Protestant assassins.

"We have no doubt that a loyalist [Protestant] murder gang was responsible for the killing," said the Provisional wing of the IRA in a statement issued within four hours of Mrs. Drumm's death.

Mrs. Drumm, 56, mother of five and a grandmother, entered Mater Hospital several weeks ago when she relinquished her official elected posts with Sinn Fein, the legal political front of the IRA.

Reports of Stroke

Her husband, a veteran IRA activist, announced then that she was undergoing surgery for cataracts in her left eye. But there were unofficial reports that she had suffered a stroke and was being hospitalized for treatment to her paralyzed left side.

Police, who also said they believed that Mrs. Drumm was the victim of Protestant assassins, said the three killers hid in a cupboard until about 10:30 p.m. after posing as visitors to enter the hospital. They emerged in white and green hospital gowns, a police spokesman said, and walked unchallenged into the room Mrs. Drumm shared with five other women.

After identifying Mrs. Drumm, they drew pistols and started shooting at her. Another woman was also wounded.

The gunmen fled. Mrs. Drumm died 10 minutes later while undergoing emergency surgery.

She was the first prominent Northern Ireland political figure to be killed since Protestant gunmen last year killed Billy MacMillan, leader of the Marxist-oriented Official IRA.

Paddy Devlin, a government minister in Britain's recent bid to give the province self-rule, predicted that Mrs. Drumm's death would spark revenge killings.

Its Pakistan Deal Was Opposed by U.S.

Paris Said to Ease Insistence on an A-Sale

By James Goldsborough

PARIS, Oct. 29 (IHT)—West European governments have not yet had time to react to President Ford's proposal yesterday for a moratorium on sales of nuclear reprocessing technology, but already there are signs of a modified French attitude.

Experts here now believe that there is a good chance that the French delivery of a reprocessing plant to Pakistan will not go through. The French sale, for which the contract has been signed, set off a controversy between Paris and Washington during the summer over the wisdom of such sales to sensitive areas.

But the French currently are indicating that they would not be part if Washington talked Pakistan out of the sale. The United States has been trying to do just that since Secretary of State Henry Kissinger's trip to Lahore in August.

The French set up a Nuclear Policy Council earlier this month to review their attitude on nuclear sales, but they said that already contracted deals, such as that with Pakistan, would be carried out. Now, however, they are indicating that the Pakistan sale is not essential to their nuclear export policy.

The Nuclear Policy Council was created to avoid the sort of problem now facing France. Before the council's establishment, nuclear sales were largely in the province of the Ministry of Industry, with the Foreign Ministry often being confronted with fait accompli.

The Industry Ministry's enthusiasm led both to the Pakistan sale of a reprocessing plant and to a similar deal with South Korea. The Korean sale was canceled after Washington intervened with Seoul earlier this year.

The Nuclear Policy Council has representatives of all Cabinet forces, including the office of the prime minister and the Ministry of Foreign Affairs, interested in nuclear-arms negotiations.

Pakistan has said that it would go ahead with the purchase despite threats from Washington to cut off both economic and military aid. But experts now believe that the deal stands no chance of going through as originally intended.

The French have never focused their nuclear disagreement with Washington on the Pakistan sale alone. Former Prime Minister Jacques Chirac's quarrel with Mr. Kissinger in August was rather

Controversial New Head of FAO Cuts Staff and Paper Work

By William Tuohy

ROME—A few months ago, the Food and Agriculture Organization of the United Nations was badly shaken by a public accusation that it was overstaffed and underworked and swamped with paper work, studies and conferences.

The Rome-based agency, largest of the UN's specialized organizations, was staggered because the biting criticism came not from a disgruntled outsider but from its newly elected director-general, Edouard Saouma.

Since then, stocky, single-minded Mr. Saouma has tried to whittle down the 6,400-member staff and redirect the efforts of the agency which is designed to fight the malnutrition that affects half the world's people.

In so doing, Mr. Saouma, a 49-year-old Lebanese Christian and 14-year veteran of the FAO, has brought the organization, in his words, "to a turning point in its history," and has become its most controversial head.

Mr. Saouma's supporters say that he is the kind of strong, forceful personality the sprawling agency needs. His detractors say he is a ruthless martinet, misguided in his aims.

Some critics even draw attention to the $26,000 he spent to redecorate the director-general's office with suede-lined walls and mount his desk on a slight podium. Employees call it "the throne room."

Currently, almost 40 senior posts remain unfilled by Mr. Saouma. Some senior officials are trying to find out what is going to happen next and morale has plummeted in the headquarters building—designed originally by Mussolini to house the Italian Colonial Ministry.

In his refurbished office, Director-General Saouma, who serves a six-year term, admits that there is a morale problem, but he believes it is only temporary.

"This happens when a large organisation passes through a period of transition," he said in an interview. "When I took over last January, I thought FAO had to be a more active organization, responding to the real needs of countries, instead of being an increasing bureaucracy and ivory tower of theoreticians in Rome.

"Studies, reports, assessments are nice. But we need more action to help the member governments in the field.

"I want to restore the leadership of FAO in world affairs relating to food and agriculture, and not just an organization that lives for its own bureaucratic sake."

Keystone.

Eduard Saouma at FAO.

Mr. Saouma's words have been accompanied by action: he canceled 330 new posts approved by his predecessor. He dropped 155 international meetings. And he junked 94 publications.

He thus effected savings of nearly $20 million in the $167-million biennial budget and was thereby able to set up an $18.5-million emergency field fund for FAO.

In principle, almost everyone has applauded Mr. Saouma's effort to cut down the tangle of bureaucratic meetings, conferences, reports, studies and programs, which sometimes seems to stifle the agency.

Yet some FAO officials and outside food experts fear that Mr. Saouma's insistence on field programs might undercut the analytical branches of the agency, which were its original reason for being.

"Long-range planning appears to be in disfavor now," said an official, "but FAO strengths have been in its ability to collect accurate worldwide information, analyze it and provide advice and recommendations based on these statistics.

"It would be a mistake to expend our efforts in small field projects all over the world. Private contractors and agencies like the U.S. Aid for International Development are better equipped for this.

"Here at FAO, we have developed an interdisciplinary capability for analysis of food production unique in the field. It would be a great mistake to break this up. This is the heart of FAO.

"And our long-range studies are not just theory. After all, you can't even evaluate whether a short-term field project is working properly unless you have some overall perspective by which to gauge it."

Danger of Dissipation

Mr. Saouma himself seems aware of the danger of dissipating too much effort in small-scale field problems, but he explained, "It is not generally understood that our field work is to maximize ongoing activities, not start new ones. We want to harmonize projects already in existence, to fill gaps, and basically to provide seed money for projects.

"I think it necessary to have an emergency fund for quick on-the-spot help. For instance, when the earthquake hit the Philippines recently, we were there quickly with aid, and we showed people that we could do something besides make studies.

"I think it is a question of balance. In recent years, FAO

Pound Is Up After Rise, Fall Prompted by Rumor, Denial

By Peter T. Kilborn

LONDON, Oct. 29 (NYT)—An unsubstantiated report about Arab holdings today sent the pound on its sharpest rise in months, but the rumor-sensitive currency slumped again when the latest rumor, like most others, was disavowed.

The pound closed here at $1.5865, an improvement over its record low yesterday of $1.57 but more than three cents under the peak it touched early today in Hong Kong.

The sharp rise and fall illustrated the nervousness of people and institutions who deal in pounds. And it also illustrated the importance of the Arabs to the price of the British currency.

The oil-exporting countries, like many others, hold pounds in their central banks. It was once a rock-solid investment for a country, as gold once was too, and partly for that reason it became a so-called reserve currency.

But the pound has in less than two years plunged from $2.40 to its present level, and its fall has been especially bad news for the Arabs. As of June 30, according to the Bank of England, they and the other oil exporters held 63 per cent of the $5 billion in pounds then in the possession of the world's central banks.

The Middle Eastern countries hold such a disproportionate share of sterling in their reserves because, until they finally began to worry about the pound, they accepted much of their oil-sale payments—from other countries as well as Britain—in sterling. When those countries quadrupled their oil prices three years ago,

Arabs at Unesco Conference Assail Israel, U.S., the Press

NAIROBI, Oct. 29 (UPI).—Arab delegates attacked Israel, the United States and the Western press today at the general conference of the United Nations Educational, Scientific and Cultural Organization.

Speakers from Jordan, Iraq and Libya accused Israel of bringing the "law of the jungle" to the Middle East, Washington of endangering Unesco by refusing to pay its contributions and the press of hindering development of Third World countries.

The Arabs were among a dozen speakers on the fourth day of the more than five-week conference convened principally to discuss a "new economic order" for developing nations.

But controversial issues such as press freedom and the status of Israel threatened to dominate proceedings.

Education Minister Thogan Hindawi of Jordan, in a criticism that has become ritual at international meetings, accused Israel of instituting the "law of the jungle" in the Middle East by its continued occupation of Arab lands and attempts to destroy historic Arab sites, impede worship and change traditional Arabic school curriculums.

He questioned Israel's right to Unesco membership and Iraq called for Israel's expulsion.

Libyan Attack

Libyan delegate Nori Ali-Cherif indirectly attacked the United States and accused Washington of trying to "impose certain policies and approaches on Unesco" by withholding its contributions.

The U.S. Congress two years ago cut off contributions—which account for 25 per cent of Unesco's budget — because of Unesco approval of what Congress considered anti-Israel resolutions.

Both the Libyan speaker and Iraqi delegate Mohammed Mahjoub criticized the Western press, which has attacked Unesco for sponsoring resolutions allegedly curbing press freedoms.

The Libyan called the attacks on Unesco "unjust and unfair." Mr. Mahjoub said the dominance of the Western media around the world was hindering the growth of developing nations and preventing them from being heard.

Yesterday Western news organizations and delegates expressed "deep concern" and "apprehension" that proposals before the conference were intended to hamper traditional press freedoms.

Warning of Censorship

WASHINGTON, Oct. 29 (IHT).—Leonard Marks, chairman of the U.S. Advisory Commission on International Educational and Cultural Affairs, said yesterday the United States should withdraw from Unesco if it approved governmental control of news.

The Unesco general conference has before it a proposal drafted by member states in Paris last year that would declare governments "responsible for activities in the international sphere of all mass media under their jurisdiction."

Mr. Marks, who was director of the U.S. Information Agency in the Johnson administration, said in an interview that adoption of such a declaration by the conference would legitimize state censorship, not only of domestic news but also of foreign correspondents' reports to their home bases.

If this happens, he said, "I would recommend that we pull out and take the $30 million a year we pay in dues to Unesco and use it for something like literacy programs in countries where help is wanted."

Soviet Aide Said to Give Rebuff to U.K.

LONDON, Oct. 29 (UPI).—A leading Soviet official said bluntly today that demonstrations and parliamentary protests to which he has been subjected here have ruled out an early visit to Britain by Soviet Communist party secretary Leonid Brezhnev, British government officials said.

The sources said the rebuff was delivered to Foreign Secretary Anthony Crosland by Boris Ponomarev, a Politburo member, who arrived yesterday at the head of a six-man delegation at the invitation of the governing Labor party's National Executive Committee.

The House of Commons went into an uproar when Mr. Ponomarev and his delegation visited it yesterday afternoon. Some British lawmakers asserted he "masterminded" the Soviet invasion of Czechoslovakia in 1968.

Demonstrators also dogged the delegation everywhere it went in London.

Mr. Ponomarev met Mr. Crosland for an hour at the Foreign Office this morning. The officials said Mr. Ponomarev told Mr. Crosland that conditions were not yet right for a Brezhnev visit and that he would not come until the atmosphere was right.

An invitation to the Soviet leader has been outstanding for more than a year. The British government had hoped he might come at the end of this year.

'Party Politics'

A Foreign Office spokesman said Mr. Crosland replied that although there might be some element of "party politics" in the protests against his visit, "some people here feel very strongly about it."

However, the spokesman described the meeting as "cordial." Mr. Ponomarev was accompanied to the Foreign Office by Soviet Ambassador Nikolai Lunkov and two members of his delegation.

The spokesman said Mr. Crosland proposed that their discussion take place "in the framework of détente and the indivisibility of détente."

He said there was a preliminary discussion on disarmament and Mr. Crosland agreed on the desirability of taking steps to slash arms spending but said the Eastern bloc appears to be spending more than the West.

Much of the talk, the spokesman said, was taken up with the question of human rights. He said Mr. Crosland told Mr. Ponomarev "there is deep and genuine concern in Britain" about some widely publicized cases involving Soviet Jews and dissidents.

Fall of the Pound Has Europeans Seeking Bargains

BRUSSELS, Oct. 29 (Reuters).—Thousands of Europeans headed for Britain today for the long All Saints weekend to take advantage of the latest slide in the pound.

Ferry operators and airlines reported heavy bookings for the weekend with many Channel crossings already oversubscribed.

British Transport Ministry officials estimated that betwen 15,000 and 20,000 Europeans would spend heavily in British shops, restaurants and hotels.

Since January, the pound has fallen by 1 French franc, by 20 Belgian francs, by 1.5 deutsche marks and by 1.4 gulders.

All Saints Day, Monday, is a holiday in many European countries.

Thai Regime Sets Austerity Ground Rules

Plans Strengthening Of Armed Forces

BANGKOK, Oct. 29 (UPI).—Thailand's new government today set guidelines that stress austerity at home, anti-Communism and a nominally neutralist foreign policy.

Premier Thanin Kraivichien, in a policy address to his 18-member Cabinet and the 24-man military junta, made no surprise announcements. He said the armed forces would be strengthened for the anti-Communist struggle inside Thailand.

Mr. Thanin, a bureaucrat with no high-level government or political experience, declared official government war on corruption and waste in spending

The former Supreme Court chief justice told his Cabinet and military backers that all policies of his new government would aim at retention of Thailand's three official institutions—nation, king and religion. He promised that Thailand will maintain and develop relations with all nations but excluded those "which attempt to commit aggression or threaten to subvert" Thailand.

Although he mentioned no other countries directly in this reference, it was believed he was speaking of the Indochina nations, particularly Vietnam.

Although he was not specific, Mr. Thanin said austerity at home was necessary to develop Thailand's economy and provide a base for enlarging and improving the army.

He pledged close Thai cooperation with the five-country Association of Southeast Asian Nations and said Thailand will support the establishment of "a zone of peace, freedom and neutrality" in the region.

3,420 Arrests

BANGKOK, Oct. 29 (Reuters).—The authorities have arrested 3,420 people considered dangerous to society since the Oct. 6 military take-over in Thailand, a police spokesman said today.

Interior Minister Samak Sunthornvej said yesterday that five detention centers would be built to house the detainees.

Police and troops also rounded up more than 3,000 students after bloody clashes at Thammasat University before the coup. Most of them have been released on bail.

Sakharov Urges Help for Defector Returned by Iran

MOSCOW, Oct. 29 (Reuters).—Nobel Peace Prize-winner Andrei Sakharov and two other dissidents today appealed to the Shah of Iran and President Ford to try to save the life of a Russian defector, who they said may be executed following his return to the Soviet Union by Iran.

The defector, Lt. Valentin Zachmiov, flew a small plane across the border last month and asked for political asylum in the United States. Iran handed him back Monday under the terms of an anti-hijacking agreement between the two countries.

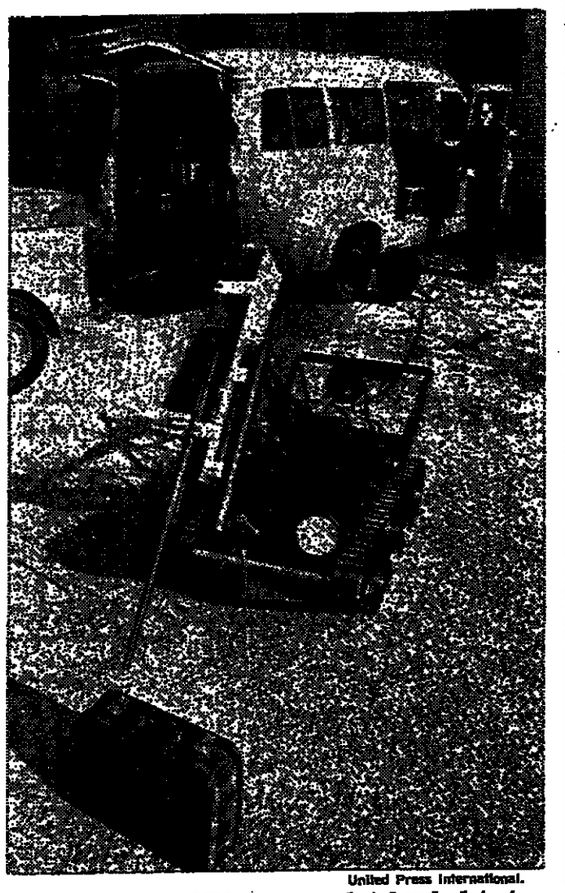
In an open letter to the Iranian and U.S. leaders, handed to Western correspondents here, Mr. Sakharov, his wife, Yelena, and former Maj. Gen. Pyotr Grigorenko said they had learned "with horror" of the Iranian action.

Hungary Official Gets a New Post

VIENNA, Oct. 29 (AP).—Arpad Pullai, 51, who two days ago lost his influential job as a secretary of the Hungarian Communist party's Central Committee, was today appointed minister of transport and post office amid other top personnel changes decreed by the party leadership.

The Hungarian news agency MTI said Mr. Pullai, whose ouster from the secretariat coincided with a call by the ruling Communist party for stepped-up indoctrination of party members, was elected to the post by the presidential council.

In the governmental posts, Mr. Pullai replaced Karoly Rodonyi.



Finland Reported Holding Spy Suspect

HELSINKI, Oct. 29 (UPI).—A Finnish customs official is in police custody charged with economic espionage for the Soviet Union that may have cost Finland hundreds of millions of dollars, a Swedish weekly magazine said today.

Authorities would not confirm the report, but police Chief Inspector Kyoesti Jousmaa said, "In the Helsinki Court of Appeals there is now a case where a person is accused of giving information to a foreign country. Because of the nature of the matter, all details and documents are secret."

Quake Funds Stolen

ROME, Oct. 29 (AP).—Bandits raided an office of the Italian Automobile Club today and made off with 5 million lire ($6,000) destined for victims of earthquake-stricken Friuli Province, police reported.

ROBOT BOMB SQUAD—This robot bomb detector, reportedly the first in continental Europe, was demonstrated recently in Duesseldorf. It has a rifle to destroy or detonate at a safe distance any device its sensors decide may be a bomb or booby trap.

Punishment of Four Radicals Is Asked by China Province

By Fox Butterfield

HONG KONG, Oct. 29 (NYT).—A Chinese province called on the Communist party Central Committee today to expel Mao Tse-tung's widow, Chiang Ching, and three other senior radical leftists from the party and deal them the "severest punishment."

A telegram from Fukien Province and its military command was the first specific call for punishment of the radicals since they were arrested nearly three weeks ago. But, at the same time, there were indications from other provinces that the current attacks on the four radicals will not be turned into a major nationwide purge of their supporters.

So far, there has been little official information on the fate of the four, who have been accused of a variety of charges ranging from tampering with Mao's directives to trying to seize power from the new party chairman, Hua Kuo-feng. In addition to Miss Chiang, the arrested radicals are Chang Chun-chiao, who was the senior deputy premier; Wang Hung-wen, the youthful second ranking member of the party, and Yao Wen-yuan, the party's chief propagandist.

The latter three have reportedly been stripped of the additional posts they held in Shanghai, where they occupied the top three jobs on the city revolutionary committee. A wall poster in Shanghai yesterday said that the Central Committee had decided to take away "all their posts both inside and outside the party in Shanghai."

Another poster in Shanghai said that the places formerly held by Mr. Chang, Mr. Wang and Mr. Yao have been given to two alternate members of the Politburo from Peking and a neighboring provincial leader. They are Su Chen-hua, the chief commissar of the Chinese Navy and an alternate member of the Politburo who will be the new chairman of the Shanghai Revolutionary Committee; Ni Chih-fu, a former Shanghai worker who is also an alternate member of the Politburo, and Peng Chung, the first party secretary of Kiangsu Province.

Analysts here believe that Mr. Hua, the new Chairman succeeding Mao, may not want to carry out a major purge because it would cause further disruption and might make him look no better than the "conspirators" he has arrested.

The analysts say there is contradictory evidence on whether the surviving top party leaders are continuing to meet in Peking, where they may be drawing up a new party Politburo and readjusting the long series of other party, government and army posts now vacant.

Some reports have indicated an expanded Politburo meeting will continue until tomorrow, with the possibility of some further announcements after it is over.

Czech Held by West Germany After Hijacking Prague Plane

MUNICH, Oct. 29 (AP).—A 26-year-old defector who hijacked a Czechoslovak airliner to Munich with 111 persons aboard was in police custody today awaiting probable air piracy charges in West Germany, Munich police said.

In Prague, the Czechoslovak Foreign Ministry identified the hijacker as Rudolf Becvar and said he was being sought for the robbery of a taxi driver and other crimes when he hijacked the plane last night at the Prague airport.

The ministry said that Becvar was placed on the most-wanted list on Oct. 22 when his brother, Stepan Becvar, was found shot to death.

Early today, Munich authorities rebuffed Czechoslovak requests that the hijacker be returned, and the Ilyushin-18 jetliner returned to Prague without Becvar.

Several hours after the Soviet-built four-engine turboprop returned to Prague, the Czech Foreign Ministry called a news conference to announce that a formal request for Becvar's extradition was being made to the West German Embassy.

In Bonn, the Foreign Ministry said that an extradition request would have to be decided on the basis of German and international law. In the past, the West Germans have refused to return plane hijackers to Czechoslovakia, and have tried them here on criminal charges.

The Munich prosecutor's office said Becvar told police interrogators that he would apply for political asylum in West Germany.

He also told police that he hijacked the plane alone. The office said that it will seek an arrest warrant against the Czech for committing an "attack on an aircraft."

The office declined comment on the Czechoslovak criminal allegations against Becvar, saying that he had not yet been questioned about the accusations.

Czech spokesman Milan Kadnar praised West German authorities for their handling of the incident, but he left no doubt that the Prague government expects Becvar to be returned.

Convicted of Burglary

Mr. Kadnar said that Becvar received a suspended sentence for housebreaking when he was 17 and was later jailed for six months on a burglary conviction.

Three days ago, Czechoslovak radio and television broadcast Beevar's description and said that he was suspected of a violent crime. Prague newspapers carried the description this morning before the hijacking became known.

Three years ago, a West German court sentenced nine young Czechs to prison terms ranging from three to seven years for hijacking a Slov-Air turboprop with 17 persons aboard to Weiden, just across the border from Czechoslovakia. In that hijacking, the pilot was shot and killed during a struggle in the cockpit. The 22-year-old hijacker accused of firing the shot hanged himself in his jail cell before the trial.

Gandhi Foe Gets Back Control of Newspapers

NEW DELHI, Oct. 29 (AP).—Ramnath Goenka, 73-year-old publisher of the embattled Indian Express, dismissed five pro-government directors and regained full control of India's largest newspaper group today, Express sources said.

In the latest development in the conflict between Prime Minister Indira Gandhi's government and India's main dissenting media voice, Mr. Goenka used an annual shareholders meeting in Bombay to oust the board chairman, pro-government industrialist K. K. Birla, and four other directors, the sources said.

Franco Criticism Stirs Uproar

Falangists Clash at a Madrid Rally

MADRID, Oct. 29 (Reuters).—A rally of right-wing Falangists broke up today amid fist fights and quarrels as one speaker spoke of shortcomings in the rule of the late Generalissimo Francisco Franco.

The Falange party, ideological core of the National Movement, which was the only political party allowed by Franco, was holding a 43d anniversary meeting in an effort to unite rival factions for general elections scheduled for next year. The government has ignored the anniversary this year.

Booing, whistling and cries of "Franco, Franco, Franco" erupted from the crowd of 2,000 after a dissident Falange official, Sigfrido Hillens, referred to the shortcomings of the Franco regime.

Looks to Future

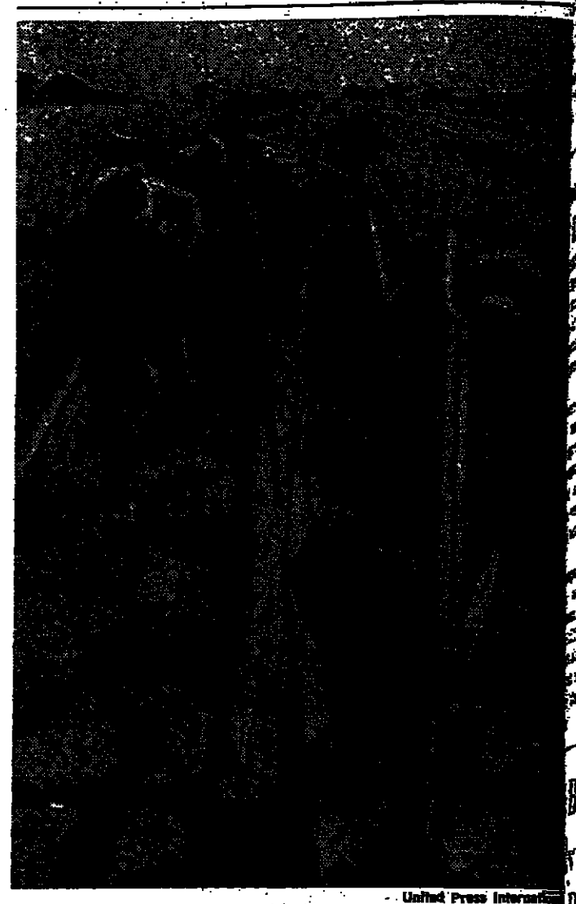
Mr. Hillens called on the party to look to the future rather than the past. He said that much importance had been attached to the economic progress achieved by Franco since the 1936-39 Civil War, but added that "Even in the Soviet Union, one lives better today than in 1936."

Blue-shirted young Falangists linked arms to protect Mr. Hillens as some in the audience stormed the stage, trying to attack him.

Fist fights broke out and several youths were kicked off the stage. Arguments broke out in the audience and there was general uproar despite cries of "Unity, Unity."

Several hundred persons shouting "Franco, Franco" marched out of the rally and were dispersed by police at the Palace of Congresses.

Cuesto Presides



Among those who walked out was Blas Pinar, leader of the extreme right political party Fuerza Nueva (New Force).

The meeting was presided over by Raimundo Fernandez Cuesta, president of the Falange faction recognised recently by the government despite rival claims from five other Falange groups.

In other violence here today, riot police fired tear gas and charged about 1,000 striking bus drivers who were protesting army troops running the city's buses.

About a million commuters were stranded by the strike yesterday and soldiers kept about one-third of the municipal bus fleet running. Armed police rode the buses to guard against picket violence.

The municipal bus drivers struck in support of demands for more pay and bargaining rig for illegal labor unions such the Communist-led Workers Commissions and the Soci General Workers Union.

2 Blacks Killed By Riot Police In South Africa

PRETORIA, South Africa, Oct. 29 (Reuters).—Two blacks were killed and two wounded when policemen fired on rioters in an African township near Dundee, about 180 miles southeast of Pretoria, the police announced today.

Gen. David Kriel, chief of the riot control police, said trouble broke out last night when a white government official went into the township to investigate a breakdown in electricity and water supplies.

The official was surrounded by a crowd of about 150 blacks, many of them armed with sticks, Gen. Kriel said. The police sent in an anti-riot squad to rescue the official and disperse the crowd. The chief said his men became the target of stone-throwers and were forced to open fire.

Ban on Gatherings Extended

PRETORIA, South Africa, Oct. 29 (AP).—The prohibition on a wide range of public gatherings was extended until the end of the year, the government announced today. The ban on gatherings, under the Riotous Assemblies Act, was imposed after rioting by blacks broke out in June. It was scheduled to end Sunday.

Man and Dog Climb Wall Into East Berlin

BERLIN, Oct. 29 (Reuters).—A man with a dachshund on a leash was arrested by East German border guards last night after climbing over the wall from West Berlin, West Berlin police said today.

They said a West Berlin resident saw the man being arrested by two armed guards. He was driven off in a convoy of four army vehicles.

Black Nationalists Denoun Smith Regime at Geneva Tal

(Continued from Page 1)

forces of committing "brutal atrocities upon defenseless civilians" and produced a grim catalogue of alleged torture techniques.

Bishop Muzorewa, who is at bitter personal odds with Mr. Nkomo and has broad support among urban blacks in Rhodesia, said that security forces were guilty of "indiscriminate maiming, killing and massacring of civilians" as well as "Gestapo-like methods of interrogation."

Similar allegations were made by the other nationalists at the closed, heavily guarded meeting. Copies of their speeches, as well as Mr. Smith's, were later issued to newsmen.

Mr. Smith apparently spoke off the cuff and defended his government as well as the British from the "insults" made by the nationalists. "I would like to say that I believe this kind of thing is uncalled for when one considers Britain's record, not only in Rhodesia but in other parts of the world, in spreading Christian civilization," he said.

Mr. Smith noted that his government had conducted "ext tive investigations" into the legations of torture and cor ed that the charges were He added, however, that "th are facts and ample evidence substantiate atrocious acts by terrorists against Rhodesian vilians." Most of the vi he said, were black.

Paris Said to Ease Insistence on an A-Sale

(Continued from Page 1)

over charges that Washington was trying to sabotage French overall nuclear-cooperation programs, including sales of ordinary reactors, plus enrichment and fast-reactor development.

Reprocessing technology—at the heart of the Ford call for a three-year moratorium yesterday—is highly sensitive politically, but not very important economically. The Pakistan reprocessing sale would be worth hardly more than a few million dollars. Reprocessing is a means of turning spent fuel from nuclear power reactors into plutonium of weapons-grade quality. Pakistan already has a Canadian-supplied nuclear power reactor in operation.

A spokesman said today that there was no official French reaction yet to the Ford proposals, which call for cooperation among nuclear nations both to insure supplies of nuclear fuel to developing countries and to halt weapons proliferation. The French spokesman said that the proposals were under study.

Meanwhile, the Foreign Ministry confirmed the imminence of the sale of a research reactor to Iraq. It would be that nation's first reactor. The sale of an Osiris 70-megawatt thermal reactor was condemned today in the weekly magazine Tribune Juive.

French sources said that the sale would be made under a bilateral nuclear cooperation accord signed last year. It stipulates that the technology not be used for making weapons. They also pointed out that Iraq has signed the nuclear weapons nonproliferation treaty.

Another controversial French sale, to South Africa, now has cleared all its final hurdles and construction of the equipment is set to begin. Under the agreement, France will provide two 920-megawatt reactors to South Africa in a deal worth about $1 billion. South Africa has not signed the nonproliferation treaty. Both the Iraqi and South African sales are subject to controls by the International Atomic Energy Agency in Vienna.

Spanish King's Tour

PARIS, Oct. 29 (Reuters).—King Juan Carlos of Spain today toured France's tactical nuclear missile center in the Alps in southern France before a final round of talks with President Valéry Giscard d'Estaing here tonight.

The 38-year-old monarch, on his first state visit to a European capital outside his country, inspected one of nine 150-kiloton missiles stored in silos in the Plateau d'Albion.

Spain has a share in a French-based international consortium, Eurodif, which is building two multibillion-dollar plants to provide nuclear fuels for electric power reactors.

The lightest of winter raincoats 100 % silk

TO KEEP you snug in the winter rain, Lanvin 2 has a raincoat in the warmest and most elegant material there is: silk. Above all, you'll be astonished at how light it is! In sand, anthracite or navy (F 1400).

You'll love this other model in wool gabardine, too. With its stylish but sober line, you can wear it just as well as a between-season coat (F 1350) in navy, beige or black.

A Record $10 Million Is Spent For TV Campaigning by Ford

By Warren Weaver Jr.

WASHINGTON, Oct. 29 (NYT). The President Ford Committee is already spent more money n campaign television advertising an any other national candiate in political history, and the d has not yet arrived.

In its most recent campaign- ending report, the committee sted more than $9.9 million in payments to the three major networks, 120 local television stations and Campaign '76, the in-house advertising agency that handles Ford media relations, from Sept. 26 to Oct. 18.

Royston Hughes, treasurer of the Ford campaign, reported in an interview that the campaign's television budget, which had been estimated at $6 million only six weeks ago, had been raised to $12 million, making it by far the most expensive component of the Republican drive.

Former President Richard Nixon set the previous broadcast-spending record of $7 million in 1972, but that figure covered some primary activity and the use of radio as well as television. His opponent, Sen. George McGovern of South Dakota, spent about $5.8 million on broadcast advertising.

[The Los Angeles Times reported from Washington that documents filed by the President Ford Committee show more than 200 instances of duplicate deductions of exempt expenditures during the campaign for the nomination, raising the possibility that more was spent than the law allows.

[The duplicate deductions resulted from a series of accounting procedures used by Ford campaign officials at a critical point in his battle with Ronald Reagan last summer, monthly reports to the Federal Election Commission show.

[Ford campaign controller Thomas Moran conceded in an interview that the procedures used may require the committee to file substantially revised spending reports when it is audited by the FEC next month.

[But Mr. Moran said he is confident that the spending limitation was not exceeded and that the committee has complied fully with campaign laws. He said that a cushion of unclassified exempt expenses would keep the campaign under the spending ceiling.]

Largest Share

Television spending appeared to command an overwhelming share of Mr. Ford's expenses, which the report listed as $10.1 million during the 23-day period. But the President's committee had about $1.5 million more in circulation that was obscured by a legal if confusing bookkeeping system.

Under the campaign law, presidential candidates must submit a final report on their campaign finances 10 days before the election, stating their position as of five days earlier. More information will be available 30 days after the election.

The largest single item of television spending listed by the Ford Committee, $7.4 million advanced to Campaign '76, will cover much of the budget for the remainder of the campaign, Mr. Hughes said, but some additional money may be forthcoming.

The final pre-election report by the Ford Committee disclosed a good deal about the shape of the Republican effort. More than $250,000 was paid to Northwest Orient Airlines for charter fees for Sen. Robert Dole, the vice-presidential candidate, but only $1,980 to the treasurer of the United States for political use of Air Force One, the President's plane.

The committee's September report did not list any campaign spending by Republican surrogates, Cabinet members and other administration officials making political appearances across the country on behalf of the Ford-Dole ticket.

Catnaps Cause U.K. Labor Tiff

MANCHESTER, England, Oct. 29 (Reuters).—The dock-workers' union has taken up the cause of 30 cats, which the management of a local dry dock claims are loafing on the job.

Talks were under way today between management and union representatives after the management cut off the cats' food allowance of £10 ($15.70) a week, claiming that they were not catching enough rats.

The company wants to replace the cats with professional human rat-catchers. But a union official said: "The cats aren't slacking. It's just that the rat output is increasing faster than the cats can kill them."

Miki Believed Likely to Set Vote Dec. 5

By Andrew H. Malcolm

TOKYO, Oct. 29 (NYT).—It appeared virtually certain tonight that Premier Takeo Miki will dissolve parliament early next month and set nationwide general elections for early December, probably Dec. 5.

That will give Japan's 77.8 million voters their first opportunity to pass judgment on their politicians since last winter's revelations of the $12.6 million in bribes and illegal fees paid here by the Lockheed Aircraft Corp.

It will also provide the politically beleaguered Mr. Miki with his first opportunity to lead the majority Liberal Democratic party in general elections.

Should the party do poorly, however, Mr. Miki, 69, would likely be replaced by Takeo Fukuda, the 71-year-old deputy premier, who has been maneuvering in the wings for many years.

While elections for the 511 seats in the Diet's lower house must be held by law by Dec. 16, the general timing and the identity of the ruling party's election leader were uncertain until today.

Convention Called Off

Then, continued squabbling within the party caused cancellation of a scheduled weekend party convention, which had been forced by Mr. Miki's critics in a bid to oust him from the party leadership. Thus, the cancellation was another surprising success in a string of political victories for Mr. Miki.

The leader of a junior party faction, Mr. Miki was elevated to the party presidency 28 months ago as an interim, compromise choice. Generally considered a liberal maverick throughout his 17-year Diet career, Mr. Miki has not grown in popularity within the party.

His consent to the Lockheed investigation here alienated many within his own party because it embarrassed the party and led to the arrest and indictment, among others, of Mr. Miki's predecessor, Kakuei Tanaka, who had remained a party power.

Late N.Y. Ballots Get Free Courier Service

PARIS, Oct. 29 (IHT).—Because absentee overseas ballots from New York County are arriving late and ballots must be in New York by Election Day, a courier service, Purolator, will fly the ballots to New York free. Ballots may be left at the American Embassy in London and Paris.

Efforts are being made to arrange for the forwarding of late ballots from Israel, where many voters from New York are awaiting their ballots.

Associated Press.

MEETING MINERS—President Ford, holdin g statuettes of miners, talked with helmeted miners who met him at the Greater Cincinnati Airport in Covington, Ky., Thursday.

After Stumbling at the Start

Ford Calm, Seems Confident About Race

By Edward Walsh

CLEVELAND, Oct. 29 (WP).—President Ford is ending his presidential campaign in an unexpected manner—with a display of calm self-assurance that reflects the growing confidence of the people around him.

His eyes grow puffy at night from fatigue and his voice is beginning to crack from the strain. But he shows no sign of cracking as he nears the end of his yearlong quest for election to the presidency, which he inherited as an appointed vice-president.

The Ford campaign rolled smoothly through industrial regions of the Midwest yesterday, visiting Indianapolis, Cincinnati and Cleveland with barely a hint of the time, toil and money it has taken to arrive close to Democratic nominee Jimmy Carter in the election odds.

"We've got our number together," White House Press Secretary Ron Nessen said midway through the day. He was reflecting the belief among Ford aides that, whatever the outcome of Tuesday's election, they have put together a remarkably effective campaign that has helped turn what looked like a Carter landslide into what many now consider a very close election contest.

Few would have predicted that the Ford campaign would approach Nov. 2 in anything like an orderly fashion, particularly those who witnessed the many stumbles, zigzags and false starts of Mr. Ford's long effort just to capture his own party's presidential nomination.

But what is even more unexpected is the demeanor of Mr. Ford himself, a combative man who at times has lashed out wildly at Mr. Carter and the Democrats.

Gone in this last week of the campaign is the shrill-sounding President who two weeks ago standing on the rear platform of a train in central Illinois, accused Mr. Carter of having a ruthless thirst for the presidency.

In his place is an apparently calm and deliberate President, delivering his last campaign speeches in an almost conversational tone that soothes rather than riles his audiences.

Mr. Ford gave such a speech Wednesday afternoon at Villanova University outside Philadelphia.

"For the past two years, I have done my best to put this nation back on an even keel, to chart a steady course for our country's future," he told the hushed student audience of several thousand. "We have come a long, long way. We have a long way to go, to do all the things that this country has the potential to do."

Delivery, Content

It was a performance remarkable less for what was said than for how it was said by a man who, a few months ago, saw many people stream out of auditoriums in the midst of one of his rambling discourses.

On Wednesday night, Mr. Ford repeated the performance at the Valley Forge Music Fair in Devon, Pa. Standing alone on a stage, microphone in hand like an entertainer, he put on a 15-minute one-man show, quietly describing his plans for the future to an audience of 2,700.

Yesterday morning, in Indianapolis, Mr. Ford became more directly critical of Mr. Carter, but without the harsh tone that had marked many of his earlier campaign speeches.

Speaking to about 2,000 people jammed into the Indianapolis Scottish Rite Cathedral, Mr. Ford pledged to make tax cuts the top priority of an elected Ford administration and challenged all candidates for federal office "to tell their prospective constituents before the election, not after the election, whether they will support the kind of additional tax cuts that I have proposed."

Of Mr. Carter he said:

"The American people today are in a very realistic frame of mind. They know that every promise has its price. The price in Gov. Carter's case would be a minimum of $100 billion, up to maybe $200 billion, every year out of the federal Treasury."

A Happy Place

Many had predicted last summer that by this point in the campaign Mr. Ford would be desperately trying to catch up with Mr. Carter. That he is not, that he and his aides appear so quietly confident, may be mostly show, but the Ford camp seems a happy place.

Flying from Indianapolis to Cincinnati yesterday, White House chief of staff Richard Cheney laid out the remainder of Mr. Ford's schedule and his strategy, its direction dictated by the latest findings of Ford campaign pollster Robert Teeter.

It will be Milwaukee, St. Louis and Houston today, back to Philadelphia and on to upstate New York tomorrow, Long Island and New York City on Sunday and Ohio and Michigan on Monday.

Too Little, Too Late

Carter Assails Ford's Plans To Curb Spread of A-Power

WASHINGTON, Oct. 29 (IHT).—Jimmy Carter yesterday criticized President Ford's proposals to curb nuclear proliferation as "too little, too late" and an election-eve attempt to "correct the timid record of the past."

The Democratic presidential nominee had announced his anti-proliferation proposals on Sept. 25. Mr. Ford's proposals were revealed earlier yesterday.

Both candidates have made the proposals in response to growing concern that the spread of nuclear materials could lead to the development of atomic weapons by many countries.

Mr. Ford called for U.S. and international sanctions against the misuse of peaceful nuclear aid to develop nuclear weapons, and a series of efforts to gain international cooperation in restraining the spread of plutonium production and reprocessing facilities to nations that do not already have them.

Mr. Ford's policies generally resemble those proposed by the Democratic candidate, but a spokesman said last night that Mr. Carter was nevertheless critical of Mr. Ford's position.

His Restrictions

Mr. Carter said that the United States should not proceed with any plutonium recycling unconnected with weapons production unless the recycling is proven safe, necessary and economical.

The Democratic nominee said he would seek to keep the use of nuclear power to a minimum throughout the world, while Mr. Ford advocated increased nuclear power regardless of the plutonium question.

Yesterday, Mr. Carter also raised the possibility of a tax cut if he is elected president, but then indicated that his statement should not be taken as a firm promise.

The Democrat campaigned in Pittsburgh, Erie, Pa., and Cleveland before flying to New York for appearances in Brooklyn and Nassau County on Long Island. It was his second visit to New York State, which has 41 Electoral College votes, in two days.

Although he has for many months called for wide reforms of the federal income tax system, Mr. Carter has not explicitly promised a tax cut as such, leaving the impression that his reforms would collect about the same amount of total revenues but would increase the burden on the well-to-do or those who enjoy large tax shelters.

'Top Priority'

But on Wednesday in Pittsburgh, during an appearance on a radio show to which listeners phone in questions, Mr. Carter said that his "top priority" would be to "not raise taxes." He added there is "a much more likely prospect of some tax reduction in the next four years—I think that is almost inevitable."

Yesterday morning at the Erie airport, Mr. Carter was asked to amplify his views on the subject. He said that if annual economic growth were raised to a rate of 5 to 6 per cent, unemployment were cut to 4 per cent and inflation were controlled, there would eventually be a total of $60 billion more federal revenues available annually.

"I would say that a substantial portion of that would go for a tax cut, a substantial part of that would go for implementing new programs, but the new programs would be very carefully phased in over that period to make sure that we do arrive with a balanced budget," he said.

All of this left some newsmen familiar with Mr. Carter's campaign uncertain of the significance of the candidate's words, especially since he was not using a forum such as a major speech to discuss the question and seemed to be dropping only sketchy hints as to what he meant. His press secretary, Jody Powell, said that Mr. Carter did not intend to inject a major new issue of tax reduction into the campaign, and Mr. Powell dismissed a suggestion that the remarks were meant to influence what may be a close election on Tuesday.

Supreme Soviet Votes 5-Year Plan

MOSCOW, Oct. 29 (UPI).—The Soviet Union's Supreme Soviet (parliament) today approved plans aimed at boosting the nation's economic might and speeding its pursuit of Western—particularly U.S.—achievements.

The 1,517 deputies of the Supreme Soviet unanimously voted approval of a five-year economic plan to 1980, a one-year plan for next year and the national budget for next year.

The five-year plan provides for a 38-per-cent increase in industrial production, a 26-per-cent growth in national income and a 16-per-cent rise in agriculture.

Crosland to Belgrade

BELGRADE, Oct. 29 (Reuters).—British Foreign Secretary Anthony Crosland will pay a three-day official visit to Yugoslavia beginning Tuesday.

U.S. Investigating Surveillance of Iranian Citizens

HARTFORD, Conn., Oct. 29 (UPI).—Secretary of State Henry Kissinger said this week that the United States is investigating whether Iranian secret police are shadowing Iranian citizens in the United States—as the Shah has said—and "if it is true it will be stopped."

At a news conference here, Mr. Kissinger was asked about the statement made by Shah Mohammed Reza Pahlevi of Iran on a television program. The Shah had said that his secret police are "checking up on anybody [in the United States] who becomes affiliated with circles hostile to my country." The Shah said he thought the surveillance was being done with the knowledge and consent of the U.S. government.

Mr. Kissinger said, "It is not correct that the United States is aware that Iranian intelligence personnel are checking on individuals living in the United States."

He added, "We are making inquiries and, if it is correct, we will ask that it be stopped."

Other Gift Attempts Recounted

Korea Bid to Give Nixon Aide $10,000 Alleged

By Maxine Cheshire and Scott Armstrong

WASHINGTON, Oct. 29 (WP).—During the final months of the Nixon administration, the South Korean government attempted to give $10,000 to a White House aide and 10 or 12 expensive gifts to presidential staff members and their wives, according to a former aide and State Department sources.

The $10,000 in cash, all in $100 bills, was in an envelope marked "bon voyage" given to John Nidecker, a White House aide visiting Seoul in May, 1974. Mr. Nidecker and State Department sources identified the Korean who signed the envelope as Park Chong Kyu, a close confidant of South Korean President Park Chung Hee.

Mr. Nidecker—he and State Department sources said—gave the cash-filled envelope to Philip Habib, then the U.S. ambassador to South Korea. Mr. Habib in turn gave it to the U.S. Central Intelligence Agency station chief to return it to Park Chong Kyu, who was head of the presidential security force in Seoul.

The incident occurred at the same time, investigators say, that the South Korean government was allegedly engaged in giving cash payment, gifts and campaign contributions to U.S. congressmen to influence congressional action concerning South Korea.

UP to $1 Million

Investigators say that Washington-based Korean businessman Tongsun Park dispensed between $500,000 and $1 million annually in gifts and contributions to U.S. congressmen and other officials during the 1970s.

Mr. Nidecker, who said he was in South Korea in May, 1974, to attend the seventh annual prayer breakfast for President Park, also was given a variety of gifts while there. They included a 1,000-year-old set of wine cups valued at $10,000 and a $500 painting. He turned the gifts over to the General Services Administration for disposal, according to records.

Shortly thereafter, Korean Assemblyman Ro Chin Hwan visited Washington and left expensive gifts for 10 or 12 White House aides and their wives, according to Mr. Nidecker. Each White House aide refused the gifts and Mr. Nidecker mailed them back to Mr. Ro, according to Mr. Nidecker, who was a special assistant to the President.

Nixon Meeting Sought

Mr. Nidecker recalled that Gen. Alexander Haig Jr., then White House chief of staff, and his wife also turned down expensive gifts. Mr. Ro indicated that he wanted to meet with President Richard Nixon at the time, but Mr. Nidecker met with him instead.

In February, The Washington Post reported that, twice in 1974, Mr. Ro offered campaign contributions to members of Congress. In addition to his blanket offer of support for congressmen designated by the White House, he offered campaign funds to Rep. Charles Wiggins, R-Calif. The offers were declined.

At least 22 congressmen are under investigation by the Justice Department for allegedly accepting payments from South Korean agents, including Tongsun Park, in return for favorable legislative actions affecting South Korea. [The New York Times reported this week that the inquiry was focusing on 90 members of Congress.]

Harassment Probed

WASHINGTON, Oct. 29 (NYT)—Federal authorities said yesterday that they had been investigating a wide range of allegations that South Korean intelligence agents and other Koreans had been harassing, coercing and violating the civil rights of Korean aliens residing in the United States and of Korean-Americans.

The investigation involves the Department of Justice, the Federal Bureau of Investigation and the State Department. It reportedly centers on the operations of Korean Central Intelligence Agency officers posing as diplomats or consular officials and other Korean agents in this country.

The investigation is said to be separate from the parallel inquiry into alleged South Korean efforts to bribe and influence congressmen.

New Tongsun Park Link

DETROIT, Oct. 29 (AP).—The woman who tape-recorded her love affair with Rep. Donald Riegle of Michigan has been linked with Tongsun Park, the Knight Newspapers said today.

The story, published in the Detroit Free Press, identified the woman as Bette Jane Ackerman, now an analyst for the Library of Congress. It said that Miss Ackerman dated Tongsun Park after Rep. Riegle broke off his brief affair with her.

Hanoi Calls U.S. Arrogant on Call For Missing GIs

BANGKOK, Oct. 29 (UPI).—Vietnam today called the United States "arrogant" for demanding full details on Americans missing in action as the first topic on normalization talks and branded the condition "a dirty electioneering move."

Hanoi's official daily Nhan Dan said that Vietnam "has agreed to the recent U.S. proposal for representatives of the two sides to meet and discuss issues of mutual concern," to eventually normalize relations between the two nations.

"The Vietnamese side has mentioned the obligation of the U.S. to contribute to the healing of the wounds of war and reconstruction in Vietnam, and the U.S. has raised the problem of seeking information about Americans missing in action in Vietnam," the newspaper said.

The editorial specified the cases of 39 Americans accounted for since the end of the war, but did not mention the cases of about 800 still missing, whom congressional investigators believe the Vietnamese could help identify.

Total of Cubans In Angola Said To Have Doubled

BRUSSELS, Oct. 29 (UPI).—The number of Cubans in Angola has doubled since Premier Fidel Castro announced plans for their gradual withdrawal last summer, Holden Roberto, president of the Angolan National Liberation Front (FNLA), said today.

"The only Cubans who left Angola were dead ones. Between July to now, their number increased from about 15,000 to 30,000," Mr. Roberto said at a news conference here.

He said there are also 1,200 Soviet citizens and about 2,000 East Germans in Angola and the imminent arrival of 1,000 Bulgarian agricultural experts has been officially announced. He showed copies of an Angolan newspaper announcing the coming of the Bulgarians.

"We know that these experts will actually be soldier-farmers," Mr. Roberto said. "They are coming to help establish a new colony."

Mr. Roberto's FNLA was the main faction that resisted the take-over of Angola by the Marxist Popular movement for the Liberation of Angola led by Agostinho Neto.

5.5 Million Get Flu Shots in U.S.

ATLANTA, Oct. 29 (AP).—More than 5.5 million Americans have been vaccinated against swine flu in the last two weeks, despite lingering fear about the deaths of persons who had received the shots, federal health officials say.

"A lot of that fear, we hope, has been allayed by the fact that the vaccine was not implicated in the deaths," Stafford Smith of the National Center for Disease Control said yesterday.

Most of the deaths were among the high-risk elderly and chronically ill who were the first to receive the vaccinations. A CDC spokesman said a number of deaths could be expected among any group of elderly and ill persons regardless of whether they had been vaccinated.

High Court Rejects Plea by McCarthy

WASHINGTON, Oct. 29 (AP).—The Supreme Court today rejected Independent presidential candidate Eugene McCarthy's request for an order requiring that his name be listed on the ballot Tuesday in New York.

The court acted on a request filed by attorney John Degraff on Mr. McCarthy's behalf with Supreme Court Justice Thurgood Marshall. A court spokesman said Justice Marshall had referred the request to the full court, and the court denied it.

Slide Blocks Rail Link

DOMODOSSOLA, Italy, Oct. 29 (AP).—A landslide early today blocked the major railway link between Italy and Switzerland north of this town.

Quake Jolts New Guinea

BERKELEY, Calif., Oct. 29 (UPI).—A severe earthquake rocked western New Guinea in the same area where a tremor four months ago killed nearly 500 persons. There were no immediate reports of casualties in the latest quake.

Europe Under Pressure

The economics of the mid-1970s are creating a special kind of hell for governments and politicians throughout Western Europe. The staggering decline of the British pound is only the most dramatic sign of the trouble, and it isn't confined to Britain. Over the past two decades all of the Western European countries have built expensive structures of social benefits and security, based on the assumption of strong economic growth. Now they have begun to realize that growth is unlikely to continue at a rate capable of sustaining these benefits, or the accustomed levels of high employment. They are all trying to steer resources away from personal consumption and into productive investment. That means cutting the public deficits.

The public begins to feel the pain immediately, as families' purchasing power drops. But the results of greater stability and higher investment will take years to develop —and the governments under duress are not apt to last that long. Britain has been under severe wage controls for 16 months, imposing a calculated drop in living standards on the whole country. Italy and France have embarked on their own austerity programs in recent weeks. The reasons for these unwelcome and onerous policies are all but incomprehensible to most citizens. International economics is not a subject that lends itself to easy explanations in political speeches. From a technical point of view it was a sudden rise in prices of raw materials and fuel—most spectacularly, oil—that revealed the frailties of a prosperity very rapidly acquired in the 1960s. But the citizen sees it as new taxes and higher prices that are taking away some of the affluence that he thought he had already earned. The effect is to sharpen all of the old quarrels over distribution of wealth and benefits. That strengthens the left in most of these countries.

The first results of Europes' new economics have not been terribly encouraging. By this time, Britain had hoped to be riding into a strong recovery led by an export boom. But the latest three months' figures show that British exports have, in fact, actually been falling. The Italian inflation rate is still rising and the government's attempts to cut consumption through price increases will, at first, make it rise still faster. That foreshadows a further drop in the value of the lira next year.

Even the immensely powerful and stable West German economy seems unlikely to do as well next year as its managers had hoped. During the recent election campaign Chancellor Helmut Schmidt repeatedly declared that this year's brisk 6-per-cent growth rate would continue through 1977. But West Germany is looking mainly to exports for that growth, and most of its exports go into other Western European markets where demand, these days, is lying flat.

The European Common Market has set a target of 5 per cent growth a year for the next five years—the pace, its experts calculate, that is necessary to bring unemployment down to the levels that the governments consider tolerable. But in the capitals the economists are beginning to pass the word up to the cabinets that, for the nine countries of the market, a rate of 5 per cent a year is highly improbable. Officials are beginning to discuss, quietly, the prospect of learning to live indefinitely with unemployment just about where it is now—the highest in a generation.

Every country has its own definition of social justice. When people think that they are being treated fairly, by their governments and by each other, they respond to public decisions in ways that help make policy work. West Germany is a good example of the principle. It is visible in most of the technical explanations of West German economic performance—the discipline of the labor force, the rational traditions of collective bargaining, the centrist politics of the country.

But if people's sense of justice is violated, they react in ways that will defeat even the sharpest of economic policies. If working people genuinely think that they are being exploited, they carry on a guerrilla warfare of strikes and demonstrations. If people with money expect to be pillaged by a hostile government, they hide it instead of investing it. There are a good many examples of that kind of thing in countries like Italy, France and Britain. That is why those governments have to go cautiously now in cutting social benefits. Too rough and rapid a retreat from the past year's promises will generate a kind of public opposition deeply harmful to the kind of economic performance that all of the European countries now urgently need to achieve.

There is a message here for the United States, which is pressing the debtor countries to cut their inflation rates and reduce their deficits. It is necessary, but it requires a great exercise of tact—not always an American virtue. Too little pressure risks that some of the Europeans will abandon austerity in all but name. Too great a pressure, and there is a much more serious risk that governments will collapse under the strain.

The Ford administration needs to keep it in mind that the European economy tends to follow ours. When our recovery from the recession goes into a long pause, as it has done in recent months, the recovery in Europe is suddenly thrown into great doubt. If the U.S. economy should not begin to pick up momentum very soon, the most severe effects would not be here but in Western Europe, in countries that are struggling to regain their balance. This country's domestic economic strategy is also, inadvertently, the most important element in its foreign policy for Europe.

THE WASHINGTON POST.

International Opinion

Egypt's Elections

The important thing about the general election in Egypt was not the result but the campaign which preceded it. There was never any doubt that supporters of the government and therefore of President Sadat's current policies would retain a large majority in the People's Assembly. What was new was that, for the first time since the 1952 revolution, opponents of the government were allowed and indeed encouraged to organize themselves, to present candidates for office, and to express their criticisms openly in the press and in public meetings. Of course this freedom was very far from being perfect. Even so, if Egypt is to be judged by the standards of the Arab world, it comes out well . . . Only Morocco could claim a remotely comparable degree of pluralism in its officially tolerated political life, and there is no doubt that President Sadat deals far more humanely with those who step beyond the bounds of official tolerance than does Morocco's King Hassan . . .

—From the Times (London).

European Communism

Karl Marx's specter of revolution haunting Europe has been regroomed. It now appears as a Pied Piper playing the seductive music of democracy, the mixed economy and independence of Moscow. Tens of millions dance behind it at election times to vote Communist. Large numbers of supposedly democratic socialists are prepared to accept the Communists as popular front partners. Many others are sympathetic to the Euro-Communist concept, believing that it will spread like some benevolent epidemic and liberalize the Soviet empire. The high priest of Euro-Communism is Enrico Berlinguer, leader of the booming Italian party. He has just made the most authoritative statement so far on Euro-Communist ideology and propaganda.

He offers the European workers deliverance from the miseries of capitalist exploitation and crisis. Yet even the worst-hit countries enjoy standards that are not only higher than ever before, but also incomparably higher than in the Communist countries, where a planned, or misplanned, grim uniformity irons out ups and downs. The aim of this document . . . is to paralyze Europe's will and ability to resist the Soviet military threat. Communization would then be completed under the shadow of the Red Army. If Comrade Berlinguer then really showed any serious deviationist tendencies he would soon be got rid of.

—From the Daily Telegraph (London).

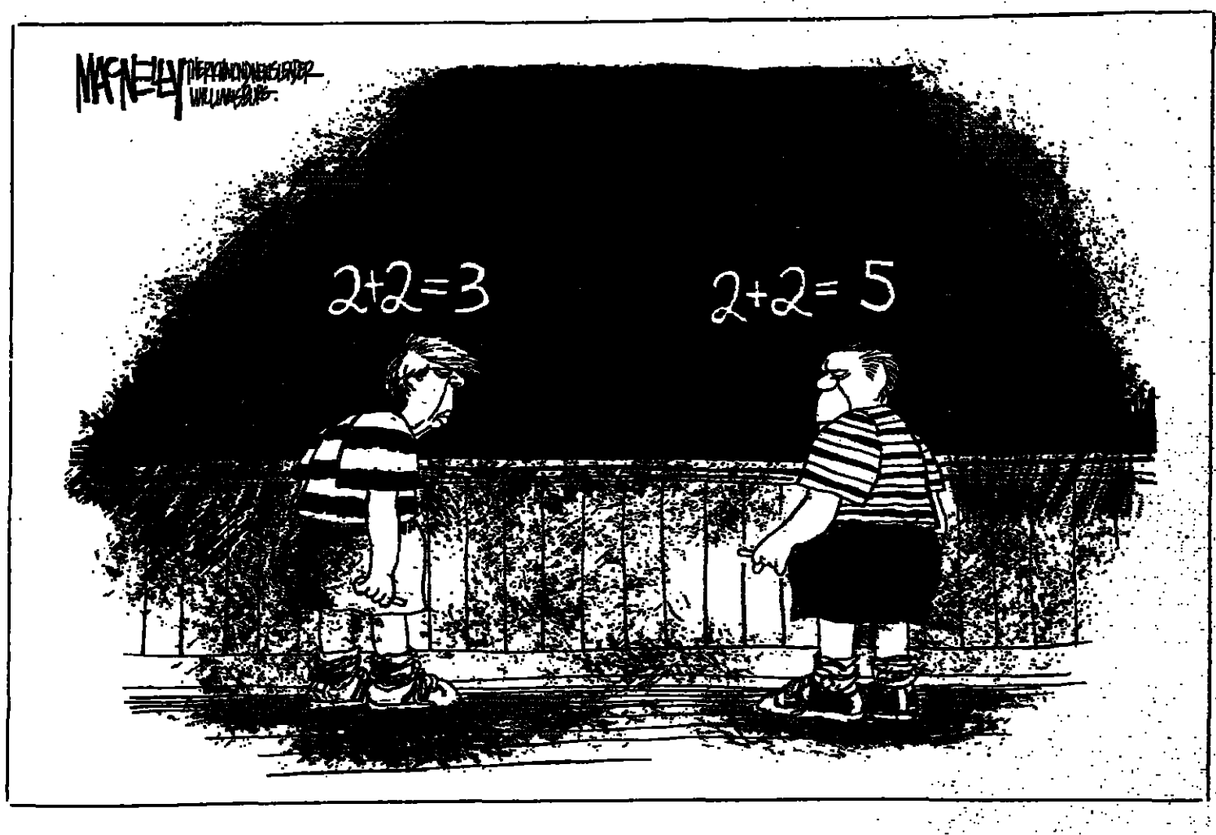
Russian Pressure on Norway

The hope that the recently signed fishing agreement would reduce the tension between NATO member Norway and the Russians seems to have been unfounded. Three days after the treaty was signed the Russians announced rocket tests in the Barents Sea for the end of October, the fourth series of such tests within a few months. In addition, a recent issue of Izvestia delivered a fierce attack on Norway's policies on Spitzbergen, where Norway enjoys territorial rights by virtue of a 1920 treaty but the Russians have certain economic privileges. The article accused Norway of infringing on the treaty by sending marines to the area and landing military aircraft there. It is not yet clear what the Russians are aiming at with these attacks, but if they hope that such methods will help to soften Norway's links to NATO it is just possible that they will find they have been achieving the opposite.

—From the Neue Zuercher Zeitung (Zurich).

In the International Edition

Seventy-Five Years Ago



October 30, 1901

PARIS—When the Beaux-Arts was thrown open to girl pupils four years ago, it was little suspected that the fair sex would invade the section of architecture. But Miss Julia Morgan of San Francisco has won another victory for "feminism" by not only being the first woman to graduate from the famous Institut des Beaux-Arts, but also by doing so with honors. She is a first rate architect.

Fifty Years Ago

October 30, 1926

PARIS—A remarkable improvement in the French franc occurred yesterday, when the Paris closing quotations for sterling and dollars were 154.15 and 31.80 against 158.58 and 32.66 on Thursday. A further improvement was seen in last night's New York parities, which according to the latest cables were 152.93 and 31.50, compared to Thursday's figures of 155.60 and 32.10.

Same Old Themes and a Different U.S.

By James Reston

WASHINGTON.—Since the presidential election of 1944, the Republicans have held the White House for 16 years and the Democrats for 16. During those 32 years the world has been transformed. And if this has been a strange election, it is partly because President Ford and Gov. Carter have applied roughly the same old party arguments to a different America and a wholly different community of nations.

It is startling, for example, to read in Joseph Lash's magnificent study of "Roosevelt and Churchill" that Churchill could refer to "this great republic of 137 million people." We are now 215 million, up from 202 million when Richard Nixon was elected in 1968, moving, changing, drifting west and south toward the sun.

Everything has changed more than the campaign arguments. Franklin Roosevelt won four elections by arguing that the government had to "comfort the afflicted and afflict the comfortable." It worked then because the majority of the American people were decidedly uncomfortable and at war.

Jimmy Carter is quite right in arguing statistically that the distribution of wealth in America, as measured in percentage of total income, is less equable today than it was eight years ago. For example, the lowest fifth and the second lowest fifth on the income scale are getting a smaller percentage of the total national income than they did in 1969, while the top twentieth have gone up from 14.7 per cent to 15.5 per cent. But they are all getting more, and in political terms it is an awkward argument.

Not Weeping

For elections are won by the majority of the votes in each state, and the majority today is not afflicted. They are much more comfortable, if not very happy, and they are not weeping on their pillows in the night about the truly afflicted Americans—and there are millions of them—who have been left behind.

The differences between economic statistics and politics, and between the compassionate and selfish instincts of the American people, are among the fascinating and confusing ironies of the 1976 campaign.

Statistically, Carter can show that almost 8 million Americans are out of work, that over 2 1/2 million dropped below the Ford administration's own "poverty line" in 1975, that there were 2.9 million Americans on food stamps at a cost of $600 million a year when Nixon took office and that last year, under the conservative President Ford and changes in the law, we had over 17 million on food stamps at a cost of $4.7 billion, and the largest peacetime budget deficits in history.

But statistics are not politics. In these last 32 years, the Republicans opposed Keynesian notions when they were out of office and swallowed them when they were in. They hooted at Henry Wallace's dream of "60 million jobs" and his dream that maybe we could make a deal for peace with Moscow. But now they are in agreement that the détente they had opposed has given us peace, and that the government pump-priming and deficit spending which was "leading to socialism" has produced, not "60 million jobs," but 87.8 million at last count.

Ford has come up in the polls at the end by arguing for the results of policies he has opposed for almost a quarter of a century. If something cost the American family $100 on the consumer price index in 1967, it cost the same family $106.70 in January of 1969, when Nixon took over. Now it costs (last figures, September of 1976) $173.80.

A Minority

In human terms, this is a tragic and even desperate problem for the young trying to make their way, wanting jobs, families and houses, and for the very old, living on pensions and worrying in the night about the cost of life and even of death.

But in political terms, the afflicted come out of the computers as a minority, and despite all the unemployment and inflation, the majority of voters are fairly well off and, to put it bluntly, unfairly selfish.

In this sense, the election of 1976 is really a test, not so much of the candidates or the parties, but of the spirit and philosophy of the American people. In the 16 years of Republican occupation of the White House, Gen. Eisenhower was a war hero who was, as he said, "above party." Richard Nixon was a psychological cripple who put his own interests above the interests of his party and his country, and Gerald Ford is an amiable accident, who has been crying all his political life for a world that is gone.

In these 32 years of residency in the White House since the last world war, both parties have stuck to the tiresome slogans of the past, but at least the Democrats have reached down for new and younger men in Kennedy and Carter with some vision of a changing world, while the Republicans have offered us Goldwater, Nixon, Agnew, Ford and now even Dole!

When confronted by such a pickle, maybe the only thing to do, as my puzzled friend Elizabeth Carter suggests, is to vote the straight vice-presidential ticket and pull the lever for Fritz Mondale. He is probably the best safety-valve we have.

A Leak in the 'Nuclear OPEC'

By C. L. Sulzberger

PARIS—Efforts by the United States to form a kind of international cartel and control the spread of nuclear installations for weapons manufacture have only partially succeeded. All countries known to possess nuclear warheads are included—except for China, India and Israel.

Late in 1974 Deputy Secretary of State Robert S. Ingersoll sought to initiate a seven-nation anti-proliferation group including the United States, the Soviet Union, France, Britain (all in the atomic arms business) and Canada, Japan and West Germany (not making warheads). West Germany and Japan, which hadn't then ratified the Nonproliferation Treaty, have done so since; France has not.

Last December the seven approved a set of basic guidelines establishing minimum safety conditions for a "nuclear OPEC" to which all would subscribe when selling peaceful nuclear installations to other nations. These were based on a French draft.

Paris had already advised Washington it was negotiating with South Korea and Pakistan for the sale of small plants to reprocess the plutonium produced by reactors. Washington was unhappy about this because any recipient country could copy such a small plant. Then the copy would not be subjected to the same controls as the original models purchased because, as the treaty was envisioned, copies wouldn't come under automatic inspection.

France proposed that copies of reprocessing plants should be submitted to the same safeguards as original installations purchased—for a period of 20 years. South Korea was prepared to accept this limitation. Pakistan, however, vigorously objected to the restriction.

The obvious reason for Pakistan's reluctance is that its arch-rival, India, has conducted a successful atomic test and is already known to have a small stockpile of warheads. Obviously, Pakistan intends if possible to accumulate plutonium and secretly start manufacturing weapons.

Meanwhile, the United States exerted pressure against South Korea and Seoul unhappily canceled its French deal. But almost immediately afterward, the Franco-Pakistani accord was concluded—with no clause safeguarding copied reprocessing plants.

Lack of Clout

Washington appears to have insufficient diplomatic clout in Islamabad to induce it to emulate Seoul, and Paris has refused to void the contract, pointing out that it followed all guidelines agreed on in 1975 even if it didn't accept subsequent stipulations on reprocessing, which Pakistan spurned.

The U.S. government is distressed by this, criticizing France, and fearing eventual tension in South Asia when both India and Pakistan have small stockpiles. The French resent any implication that they are either ignoring their obligations to the seven-nation cartel or endangering peace.

They argue that, in the end, the kind of warheads being made in India and ultimately perhaps to be emulated in Pakistan could probably be no more dangerous to human life than the holocaust following partition of the subcontinent. This is cynical logic.

Nevertheless, the French say it is far more important to insure that neither West Germany nor East Germany nor Japan get into the weapons business, because that might upset the international balance.

Moreover, Paris is vitally interested in keeping its own prominent place in the world market for peacetime nuclear facilities. Having hardly any fossil fuels of its own, France is vigorously developing its own reactor program and hopes to help finance it with sales abroad.

Electricité de France, the energy conglomerate, now builds only nuclear plants. Already they produce something over 10 per cent of the energy this nation requires. By 1985 nuclear power will provide about two-thirds of France's energy requirements.

Old Grudge

While Paris has agreed to join the loosely-constructed nuclear cartel, it has an old grudge against the United States on atomic matters. Although Free French scientists participated with Americans, British and Canadians working on the first A-bomb, Washington never qualified France as eligible for nuclear weapons or secrets following World War II—when it did so qualify Britain.

For years thereafter the United States had a near monopoly on uranium enrichment processes and could thus refuel virtually all free world nuclear energy plants. In 1971 France broke the monopoly by contracting with Moscow to send natural uranium to the Soviet Union to be enriched, and then returned here. Moreover, the Russians gave better terms for the deal than the Americans.

Despite improvement in Franco-U.S. relations during the past few years and despite basic accord on the seven-nation cartel—a kind of branch of that Nonproliferation Treaty to which France doesn't adhere—the needlessly acerb argument now over Pakistan is perhaps of exaggerated importance.

Letters

Disenfranchised

This is the time at which I was to have voted for the president of my choice, on an absentee ballot returnable by Nov. 2. Back in May, when I filed my notarized request through the U.S. Embassy to receive a ballot, my quandary involved choice of candidate: I knew that I would in any eventuality exercise my right to vote.

At that early stage, it was clear there would be no desirable candidate on the scene on Election Day, and I pondered what I would do with my vote, which I treasure as a right and a responsibility, but there was no question of not voting. With McCarthy's emergence as a creditable presidential candidate, that quandary was resolved. And yet, now, I can express my voting opinion only by the letter columns of this newspaper, since New York State has, for reasons unknown, withheld my ballot.

Are there other concerned U.S. citizens thus disenfranchised amongst this paper's readers? Would a combined shout of protest be more audible than a single voice?

RITA MARAN.

London.

Gen. Brown

Mr. Buckley's article in support of Gen. Brown (IHT, Oct. 25) was a nice piece of analysis and looked prima facie as justified. This impression could however last only if one forgets earlier "incidents" as well as overlooks the impact of "personal" opinions of high-ranking Pentagon officials on the implementation of U.S. foreign policy. Suffice it to mention the findings of Mr. Kalb in his book published after the Yom Kippur war of 1973. According to him, the delay in the supplies to Israel during the first days of the war was contrived between the State Department and the Pentagon, albeit a dictate from President Nixon.

As for our head of the armed forces, Gen. Brown had provoked an even larger storm some two years ago. Once again the subject had nothing to do with a military professional. And once again (coincidence?) Israel was his target. At that time he found it adequate to complain, and in quite blatant language, about the influence of the Israeli lobby on Capitol Hill, and the alleged control of American Jews over the media and Wall Street.

Certainly, he was officially rebuked by the President. Evidently, it made no dent in his career, nor did he learn to keep his personal opinions to himself and his family.

The inherent danger of personal opinions pertaining to policy is in influencing the tacticians and potentially obstructing the strategy. Courageous, experienced officers deserve our admiration. Nevertheless, the question is whether the tactless (not to say prejudiced) ones should hold and retain their place at the top.

M. ARIELI.

London.

Quality of Peace

If President Ford's claim to peace—while clarifying Mr. Dole's recent definition of it in his final debate with Mr. Carter—sounded more plausible than Chamberlain's plea of 1938: "peace in our time," he nonetheless stripped peace of self-respect by denying its true meaning and real depth.

Poland, Czechoslovakia, Chili, Romania, Hungary or the United States are all at peace; but the quality of peace Mr. Ford proposes and acclaims must surely be causing the cheeks of the Statue of Liberty to blush this Bicentennial Year.

HARRY SPIRO.

Geneva.

Presenting The Case For Carter

By Joseph Kraft

WASHINGTON.—If trust is t issue, Mr. Ford is your ma He has so much stopped gover ment by secrecy, lies and crit that his historic mission has a ready been accomplished.

Now the nation's most serio problem lies in promoting ec nomic growth with a decent r spect for inflation and the e vironment. In that context t Democrats and Jimmy Carter (that order) assert a strong ca

The standard of measure the performance of the Ford a ministration. Mr. Ford has cle ly not been a bad President. H led the country during a trid period, and avoided disaster home and abroad.

For the season after Wate gate, he has been a positive good President. In contrast wi Presidents Nixon and Johnson *is a serene man, sure of his ide* tity and free of destructive pe sonal hangups.

Delegates Authority

Far from having a thing abo his own power, he has broug into government persons of hi quality and delegated authori on a wide scale. It speaks whi encyclopedias of the differen between the Ford administrati and *the two preceding it*, that t Justice Department processed charge of corrupt practice agai the President without letting t White House know.

Mr. Ford's weakness has be the absence of enough intellect candlepower to light a way pa the stand-pat Republican 'de ogy of the old school. He h been a hardliner in foreign poli pulling back far more than ne essary from détente with t Soviet Union and a second agre ment on arms control. He h shoveled more money at the Pe tagon than even its free-spendi brass could expend in an orde way.

In economic policy he has be grossly oversensitive to the da gers of inflation. He has acce ed the traditional unwisdom th the principal engine of inflati *was government spending.* A cordingly, he has been extrem loath to use the budget for e pansionary purposes—first duri the recession of 1974 and m recently in the present "pau

The result has been slow e nomic growth, unemployme hanging at over 7 per cent, l federal revenues, and an absen of funds to meet the most urg domestic business—rebuilding t cities, subsidizing mass tran supporting low-income famili and starting up national heal service. While inflation h been cut, deficits have contin because of the low revenues a Mr. Ford has had to keep h foot on the brakes. The prese "pause" may not have come stay. But it is highly doubtf that Mr. Ford can achieve re covery, let alone the high grow *this* country needs for sever years to come.

The Democrats are free of th ideological bonds that Mr. Ford has been unable to break. Th overwhelming majority of th party believes in economic growth and is prepared to use the stim ulus of a budgetary deficit t promote expansion. It is commit ted to the necessary domestic programs, to an easing of tensio in world affairs, and to a muc slower buildup of defense expen ditures.

Undoubtedly the willingness t accept budgetary deficits expose the country to a higher risk o new inflation. But the economy is performing so far below ca pacity now that an inflationary surge will not assert itself for a year or two.

A Mystery

Exactly how Jimmy Carter fits into the Democratic party is something of a mystery. Though undoubtedly intelligent, though indeed gifted with startling in sight, he has quirky qualities. He seems to trust hardly anybody outside his own immediate family who has not originally served him as a driver or valet. He is what Saul Bellow calls "a morally ambitious man," with a will to make people better than they are.

Moreover, Carter and the small group around him know next to nothing about the federal government. Nobody can say with confidence how they will work with the Democratic Congress or with the party's most prestigious former officials—the warriors of the 1960s.

But where Ford is inept, Carter is merely inexperienced. Ford seems to forget nothing and learn nothing; Carter's disease is curable. So given a bad choice, I will be less unhappy if the victory goes to Mr. Carter.

ONE OF THOSE DAYS—Russell Townsend of Anaheim, Calif., knocked his mother-in-law's car through the garage and into the swimming pool, followed up with his own auto and wound up in the cooler charged with drunken driving. UPI.

Field Work Emphasized

New FAO Head Cuts Staff and Paper Work

(Continued from Page 1)

has given disproportionate attention to long-range and theoretical studies compared with the needs for practical solutions to current problems."

Part of FAO's current crisis stems from the changing nature of the agency since it was established 30 years ago as a clearing house for information on agriculture, fisheries and forests.

136 Members

Over the years, as its membership grew to 136 countries, the organization produced noteworthy studies predicting the world food shortage as well as highly regarded country studies which indicated how individual nations could produce more food.

But often member countries have ignored the FAO's recommendations because in the less developed nations any sharp change in the farmer's way of life becomes a political and social question as well as an economic one.

As an FAO expert put it, "Most developing-country governments tend to let agriculture shift for itself—until the city masses get hungry. Poorer countries find it easier to ask that factories be built rather than teach farmers new techniques. And agriculture ministers tend to take a very short-term view—only as long as they will be in office."

Or, as Mr. Saouma added, "Agricultural development is the most effective base for overall development. Yet some developing countries are still not giving sufficient emphasis to agriculture in their overall planning."

Field Projects

In recent years, developing countries became more interested in getting field projects than in studies showing how their agriculture should develop, and FAO increased its activities in the field.

Many field projects were bankrolled by the UN Development Fund and such organizations as the World Bank. FAO often provided the specialists to supervise such projects.

And so FAO broadened its activities along two divergent lines: the original studies and analyses side of the agency and the new field-oriented specialists providing technical help to developing countries.

That divergence has never been resolved within FAO, and as one official put it, "Our real problem now is to determine what we are supposed to be as an agency and what we are supposed to be doing."

Mr. Saouma, coming from a developing country himself, is firmly shifting the agency's orientation toward the field.

More Responsive

"I want FAO to be more responsive to the needs of the rural people," he said. "I would like to increase our training activities at the village level, and would like a greater proportion of our activities to have their impact at this level.

"I don't want to lose our long-term basic studies that only FAO has the worldwide scope to produce. But I do think we can do it at lesser cost with the same accuracy."

And an FAO expert who does not always agree with Mr. Saouma said, "Maybe Saouma's right. After all, if what the member countries really want from us is technical field help, maybe that is where we should shift our emphasis."

As to FAO's future, Mr. Saouma plans to fill the vacant top-level posts in the agency by the end of this year, a move he believes will restore sagging morale.

"Most of the appointments will come from within the agency," he said. "But I want to find and promote highly motivated leaders, not just career bureaucrats. I wish that I could examine a candidate's heart as well as his head."

Political Problems

Mr. Saouma hopes to avoid the political problems that have plagued other UN specialized agencies like Unesco in Paris and the International Labor Organisation in Geneva.

And he wishes that the big, developed countries would speak with one voice when it comes to agricultural policy. Too many times, he says, the agriculture minister and the finance minister from the same country take opposite positions on agricultural matters.

Further, Mr. Saouma, like other FAO officials, is impatient that the big food-producing countries, with a bountiful harvest in store this year, have not contributed yet to the food-storage pool recommended by the World Food Conference held here two years ago.

"The big countries are really stalling on this one," said an FAO official sourly.

Mr. Saouma is looking forward to the creation of the $1-billion International Fund for Agricultural Development, though FAO will have little control over how these food funds are spent.

The Hungry Increase

"Basically, I want to see quick and significant improvement in the world's food supplies," he said. "At present the number of hungry and ill-fed people is increasing every day.

"Our problem is that we are not a world ministry of agriculture. We cannot issue orders, decrees or instructions to anyone. We can exert no economic, financial or legal pressure on farmers or traders. We have to operate within the consensus of 136 member countries.

"This makes for moral strength but political weakness. Still, our role is to be a catalyst, to guide and help governments and farmers without bias or prejudice.

"This may not make us as sharp or aggressive as some would like us to be. But it does make us in the end more useful and acceptable to most member governments."

Argentina Moves Mrs. Peron Close To Buenos Aires

BUENOS AIRES, Oct. 29 (AP).—Deposed President Isabel Peron was taken today from the southern mountain retreat that had served as her prison and transferred to a naval base near here, military government sources said.

The transfer of Juan Peron's widow, under arrest since the military ousted her on March 24, was apparently made to speed up her trial for allegedly pocketing the equivalent of nearly $1 million in public funds.

She had been under heavy guard in a government-owned chalet in the foothills of the Andes Mountains near the ski resort city of San Carlos de Bariloche, about 1,000 miles south of Buenos Aires.

During 1974, it is charged, Mrs. Peron took nearly $1 million collected from public donations to aid victims of a flood in Argentina and deposited the money in her own bank account.

Several of her government collaborators also were charged with stealing public funds, including Jose Lopez Rega, who was considered her close confidant. He left Argentina several months before the coup. His whereabouts are not known.

Swedish Tax Men Eye Prostitutes, But the Women Have Their Price

STOCKHOLM, Oct. 29 (AP).—The Swedish tax authorities plan to have prostitutes declare their income, and some of the women seem willing to go along—provided they get tax-funded social benefits, too.

A task force of the Stockholm internal revenue unit that investigates sources of hidden income is engaged in Operation Hook the Hooker.

"Because prostitution means income from business activity, prostitutes should pay tax. If a woman has received more than three clients she should be regarded as taxable, provided she prostitutes herself with gainful intent and the income is not too small," a spokesman for the tax unit stated.

He added that the Internal Revenue Service expects to get the first income tax returns declaring "Profession: prostitute" within a year or two.

One prostitute, interviewed by the mass-circulation tabloid Expressen, said she is now doing her thing tax free under the sign "Pedicure," but was willing to change her mind.

"Completely, not only in the income tax return but in the phone book as well—but provided we are recognised as a professional group. It may sound strange but we have our ethics and business pride, too," she was quoted as saying.

Prostitution is legal in Sweden, even active soliciting, but procurement carries stiff penalties.

Prostitutes who may declare their income from the trade can expect stiff taxes, because they are liable to have to pay employers' duties as well, which are levied also on self-employed without any employees, such as artists, according to a tax inspector.

6. Somebody's birthday.
(A good reason to call home.)
An international call is the next best thing to being there.

New 'Drip' Irrigation Proves Boon for California Farmers

By Robert Lindsey

LOS ANGELES, Oct 29 (NYT).—Some farmers call it "drip." Others call it "trickle." Others, well, they just call it "spot irrigation."

The terms all apply to a radical change in farming techniques that is spreading in California's rich agribusiness industry and beginning to affect farming elsewhere.

By watering crops with carefully measured droplets of water instead of dousing them, many California farmers say they are sharply reducing the amount of necessary water. Moreover, they say, the technique is cutting labor costs, increasing yields of some fruit and vegetable acreage and making it possible to farm previously unusable soil and to grow fewer weeds.

Farmers conventionally water their crops much in the fashion of shotguns—using sprinkler systems, flooding the acreage or running streams of water in furrows alongside trees or row crops.

Plastic Tubes Used

The new technology is more akin to a periodic rifle shot of water than a shotgun blast. It utilizes a grid of plastic tubes stretched between rows of trees or crops and tributaries of smaller tubes that go directly to each plant and emit droplets of water, and sometimes fertilizer, under pressure from a central control point.

Instead of watering with a large dose of water once a week or so, the automated system emits a small amount of water once every day or so.

The technique is still somewhat controversial among farmers. Some say it is too expensive. Others have tried and abandoned it because they found their lines clogged and ruined crops. But the method seems to be spreading.

"Water is getting more and more expensive, and we just had to come up with methods to make better use of it," said Sterling Davis, irrigation research engineer of the U.S. Department of Agriculture and one of the pioneer researchers in the field.

Higher Production Seen

"Some papers on the subject show you can get 25 to 30-percent increases in production per acre, and that it takes two to three weeks less to produce row crops," said Mr. Davis, who is a member of a research group at the University of California's Riverside campus that is working on the technology and is now experimenting with advanced techniques using water-emission systems buried in root zones.

He estimated there were now about 80,000 acres of agricultural land in California equipped with the systems, mostly for citruses, strawberries, tomatoes, wine and table grapes and other crops that tend to have a high profit per acre. The profit yield of wheat and other grains generally is too low to make the approach profitable for these crops, he said. Typically, it costs $800 to $1,200 an acre to install this system.

In addition to California, Mr. Davis estimated systems are in use in about 80,000 acres in other states, and perhaps as much land is under drip irrigation in foreign countries. Israel has been a leader in the technology and, recently, U.S. companies have begun to export the technique.

William J. Sparks Dies; Co-Inventor Of Butyl Rubber

NEW YORK, Oct. 29 (NYT).—Dr. William J. Sparks, 72, co-inventor of synthetic butyl rubber and a distinguished chemist, has died after a long illness. He lived in Coral Gables, Fla.

Holder of 145 patents in the field of rubber chemistry, Dr. Sparks was former scientific adviser of the Esso (now Exxon) Research and Engineering Co., and former president of the American Chemical Society. He was co-inventor with R. M. Thomas of butyl rubber, which was credited with playing a major role in World War II by giving the Allied nations the synthetic rubber needed for tanks, planes and trucks.

T. H. Robsjohn-Gibbings

NEW YORK, Oct. 29 (NYT).—Terence Harold Robsjohn-Gibbings, 71, a London-born interior decorator, furniture designer and author, who had lived in Athens since 1964, died of a heart attack on Oct. 20. He underwent open-heart surgery in Dallas a year ago.

Mr. Robsjohn-Gibbings, who settled in the United States in 1930 and became a citizen in 1945, maintained a decorating studio on Madison Avenue for many years. He gained a reputation as a leading advocate of modern design with simple classic forms derived from classic architecture but largely devoid of surface decoration. He was a witty and pungent critic of the antiques business, modern art and American architecture and design.

Ruby Schut

YAKIMA, Wash., Oct. 29 (UPI).—Ruby Schut, 63, who said she was one of two women who made a rape charge in 1931 against the nine "Scottsboro boys" in Alabama, died yesterday.

Six months ago, she filed a $2.5-million suit against NBC, accusing the network of libel, slander and breach of privacy for its telecast of a program called "Judge Horton and the Scottsboro Boys." An epilogue to the television broadcast said that the Ruby Bates involved in the trial died in 1961, but Mrs. Schut said that it was she.

Mrs. James Dickey

COLUMBIA, S.C., Oct. 29 (UPI).—Maxine Dickey, wife of poet and novelist James Dickey, died last night. Mrs. Dickey is the former Maxine Syerson.

Britons Must Do Without Some Exotica

LONDON, Oct. 29 (AP).—From now on, leopard-skin coats, elephant tusks and rhinoceros horns will be unobtainable in Britain. The House of Commons today approved a measure called the Endangered Species (Import and Export) Bill, which bans their import into the country.

Also banned is whalemeat steak, a dish that formed a staple diet of Britons during World War II.

The bill prohibits the import of a wide range of exotic animals, birds and plants whose existence is in danger. Among the exceptions listed are the water buffalo, the crab-eating raccoon and the white-cheeked laughing thrush.

Paris Poll Shows Left Has an Edge

PARIS, Oct. 29 (Reuters).—France's leftist parties would win a general election if it were held now, an opinion poll said today.

The poll, conducted for the conservative daily Le Figaro, showed that 52 per cent of the French electorate would vote for the leftist parliamentary alliance and 48 per cent for the administration of President Valéry Giscard d'Estaing.

The poll, the first to be published since new Prime Minister Raymond Barre's controversial anti-inflation package was introduced, showed that the left had 1 per cent more support than in June, when the last sounding was taken. In previous polls taken in January and March, the left had 53 per cent.

Economists Urge Closer Control Of Multinationals

ALGIERS, Oct. 29 (UPI).—The Club of Rome yesterday ended a four-day meeting here with a call for closer control over multinational companies, a reduction in military spending and a better deal for poor nations.

Most of the proposals discussed at the meeting were contained in a report compiled by the Nobel Prize-winning economist Jan Tinbergen of the Netherlands, and 21 other experts, on the necessity of establishing a new international economic order.

The Club of Rome is an elite association of international economists who meet periodically to discuss world problems.

Mr. Tinbergen suggested that governments should keep a closer watch on multinational companies and proposed a code of conduct for such enterprises with respect to economic priorities of host countries.

On military spending, his report said money saved by cuts in arms production should be re-channeled to poor countries in the form of development money. The meeting called on scientists to stop collaboration with governments on military projects.

Sikkim Ex-King Released

NEW DELHI, Oct. 29 (UPI).—Palden Thondup Namgyal, the former King of the Himalayan state of Sikkim, was discharged today from a nursing home in Calcutta where he was hospitalised for 10 days following an overdose of sleeping pills.

New Book Claims Hauptmann Not Guilty in Lindbergh Case

By Peter Kihss

NEW YORK, Oct. 29 (NYT).—Drawing in part on hitherto unavailable law enforcement documents, a long-time crime reporter contends that Bruno Hauptmann was innocent of the 1932 kidnapping-murder of Charles Lindbergh jr. Hauptmann was electrocuted on April 3, 1936.

In a new book, Anthony Scaduto, a reporter for the New York Post from 1954 to 1970, charges that evidence was "suppressed" or "perjured."

He contends his data support Hauptmann's initial claims to have been at work in Manhattan on March 1, 1932, and April 2, 1932. The flier's baby was abducted on March 1 in Hopewell, N.J., and a $50,000 ransom was paid on April 2. A body identified as the baby's was found on May 12, 1932.

Mr. Scaduto says his findings uphold Hauptmann's contention that he only discovered a cache of Lindbergh ransom gold certificates in August, 1934, and started using it—not knowing it was ransom money—in the belief that it belonged to Isidor Fisch. Mr. Fisch had died in Germany allegedly owing Hauptmann money from fur and stock market deals.

The 512-page book, "Scapegoat: The Lonesome Death of Bruno Richard Hauptmann," is to be published Nov. 30. Hauptmann's 78-year-old widow is quoted as still maintaining her husband's innocence.

In Perth Amboy, N.J., David Wilentz, who as New Jersey attorney general prosecuted Hauptmann, said in an interview that he had talked with Mr. Scaduto. But Mr. Wilentz held that the evidence had been overwhelming, and that he knew of nothing to indicate that the verdict had not been just.

Mr. Scaduto's book cited documents he found in files of the Bronx district attorney and others obtained for him from New York City Department files. The FBI, he says, barred access to its more than 41,000 pages unless he paid more than $10,000 for a search and transcripts.

He quotes New Jersey's deputy superintendent of state police, Maj. George Quinn, as saying his agency still considers the case "open because there's a feeling that others were involved" and much of the ransom money was never recovered.

Egypt's Premier, 3 Aides Voted to New Assembly

CAIRO, Oct. 29 (Reuters).—Premier Mamdouh Salem and three of his ministers have been elected to Egypt's new People's Assembly during elections marked by clashes that killed at least three persons and injured many, it was announced today.

Mr. Salem belongs to the center group of the Arab Socialist Union, Egypt's only political organization. Under President Anwar Sadat's liberalization measures, ASU has become the umbrella for right-wing, centrist and left-wing groups.

First results indicated that the centrists were leading, followed by the right-wing and independents, who refused to join the three ASU groups.

Political parties were banned 24 years ago. The elections yesterday were part of Mr. Sadat's efforts to restore a multiparty system in Egypt.

About 1,600 candidates contested the assembly's 350 seats.

From Vienna with love.

It was a good idea to meet here.

... no matter who's it was. In fact, the idea of having a good time while talking business was born in Vienna.

So why not give your conference the atmosphere of "The Congress of Vienna"?

THE ART MARKET

Within Reach: Color Graphics

By Souren Melikian

PARIS (IHT).—When color lithographs started turning up in European galleries two decades ago, few people were interested. Times have changed, as witness the current show of "polychrome graphics" at the Galerie Médicis in Paris.

Until recently, graphics were the province of the favored few. The market was limited to connoisseurs who knew the rules of composition and draftsmanship within a given school. Or who knew the work of a particular artist. Black and white was what counted. Everything depended on linear composition and the technique. At best, color was a distraction; at worst, it obscured the technical quality of the work.

Two decades ago no gallery specializing in graphics would have dreamed of an exhibition of "polychrome graphics"—a catchall format far too vague for the then-specialist. Twenty years later, the term characterizes a certain clientele.

Masters

These are people who like late 19th-century and early 20th-century masters but who can no longer afford their drawings or watercolors. However, the engravings, lithographs and woodcuts are still within reach.

Typical is a study of a nude woman by sculptor Aristide Maillol (1861-1944), a first-class draftsman who occasionally tried his hand at graphics. His red-crayon lithograph looks deceptively like a drawing. As such it would have been considered with contempt by a traditional collector—until recently. The price is 4,000 francs—about a quarter of what an original drawing would cost. In the mid-60s, the same lithograph might have been worth only 400 francs—because Maillol was not nearly as sought after as he is now and because the graphic work of a sculptor would not have aroused much interest. Even more important would have been the prejudice against a technique imitating a drawing.

The same would have been true of Paul Helleu's drypoint of a woman leaning against an armchair. This silhouette, in a few strokes of yellowish brown, offers that extreme fineness that typifies the drypoint technique. Helleu (1859-1927) was considered a minor café-society artist, notable mainly for his portraits of fashionable women. His virtuosity and draftsmanship were largely ignored. The drypoint is priced at 1,900 francs, which would have seemed mad a few years ago. Now it is reasonable.

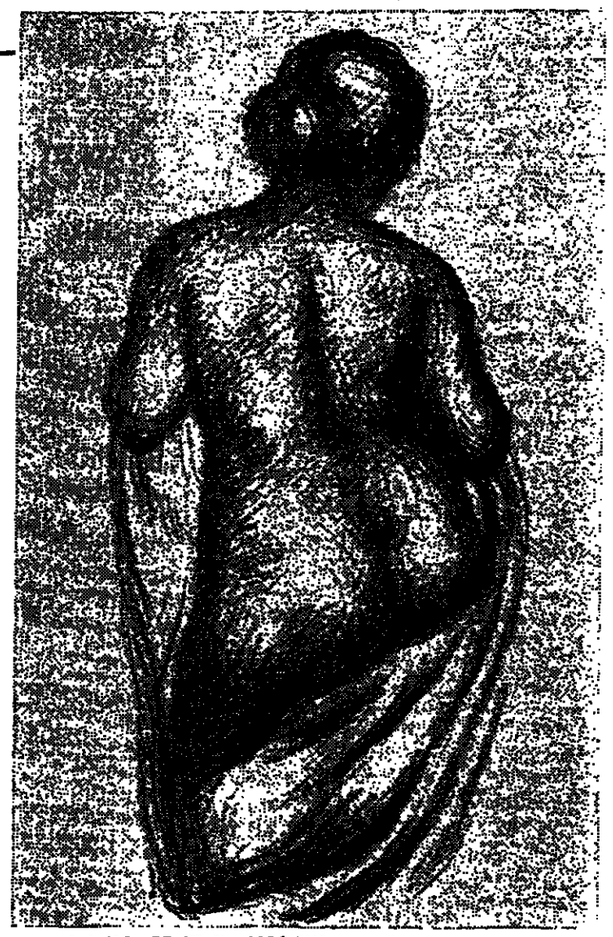
Pointillists like Signac belong in a different category. Signac translated his oil or water-color studies into another medium, thereby incorporating the graphic technique into the framework of his own aesthetics.

Signac Lithograph

There is a striking Signac lithograph done in the 1890s, called "The Beacon." Its blobs of blue, red and yellow are purer than those in his oils. The price of 40,000 francs reflects the present view that such pieces are works of art of almost equal importance to the so-called "original."

To my mind, this attitude applies to a greater degree to the graphics of the Nabi painter Maurice Denis (1870-1943). His portrait of a woman against a semiabstract background of fields, done for a portfolio entitled "L'Amour," published by dealer Ambroise Vollard in 1911, ranks among his masterpieces. The color scheme is rather different from Denis's heavier oil paintings. The light, pale yellow betrays the full impact of Japanese prints. The print is now priced at 7,000 francs—20 years ago it would have been selling in the 1,000 to 2,000-franc range.

Of the early 20th-century masters Edouard Vuillard (1868-1940) is perhaps the only one who fully realized the possibilities of color lithography. He was not much of a draftsman. But what a superb colorist! He applied his talents to lithography, devising special color schemes which he hardly ever used in his paintings. A Vuillard lithograph called "Playing Checkers" is based on manganese purple and an acid yellow. At 23,000 francs, it is about 10 times as expensive as it might have been in the mid-60s.



Woodcuts

Perhaps the most remarkable consequence of the new interest in color graphics is visible in the woodcuts. Henri Rivière (1864-1951) has been rediscovered. A member of the Pont-Aven school, Rivière was doubtless influenced by Gauguin. He was, at any rate, of an independent turn of mind. He must have studied Japanese prints more closely than many of his fellow painters for he created a color scheme incorporating some of the Oriental shades exactly—certain yellows and pinks, some grayish greens. But he used them in vastly different compositions, mostly landscapes.

Rivière was one of the first graphic artists to give up traditional perspective and volume, going much further in this respect than Emile Bernard. Interestingly, he expressed himself chiefly in the graphic form, lithographs being his supreme achievement.

There are two of his landscapes at the Galerie Médicis, both priced at 4,000 francs and both executed in editions of 20. In 1965, these same works would have been worth less than 100 francs apiece. A show at the Galerie Sagot-Legarrec in 1975 with the cheapest work at 4,000 francs helped boost his reputation. And last year some 14 of his woodcuts were sold at Drouot for prices ranging between 2,800 and 4,500 francs. Now he has a small group of collectors.

Ironically, while lithographs done in the middle of this century are suffering a commercial setback because of almost unlimited commercial impressions, colored lithographs by masters who supervised the production of their own graphics have not gone down in price.

Aristide Maillol's 1924 lithograph of a woman.

U.S. Enrollment Up For Minorities

WASHINGTON, Oct. 29 (AP).—Enrollment of racial minorities in U.S. colleges and universities rose 11.7 per cent between 1972 and 1974, with major strides in private institutions, the federal Office for Civil Rights announced yesterday.

The government survey showed that white enrollment in public institutions actually decreased slightly during the two years, from 3,986,450 to 3,964,292. White enrollment in private schools rose modestly from 1,305,863 to 1,448,368. Minority students represented 11.9 per cent of the total higher-education enrollment in 1972 and 13.1 per cent in 1974.

LONDON THEATER

Unhappy Family of 'Dear Daddy'

By John Walker

LONDON, Oct. 29 (IHT).—The game of unhappy families is one that has been enjoyed by English writers and audiences ever since "Hamlet" introduced the Œdipal strain into the playhouses. The appalling dangers of family life (to borrow a phrase of Aldous Huxley) are now endlessly represented on the London stage. At their best, these familiar plays manage to make their microcosmic view representative of the problems of a larger society. At their worst, they exhibit a tiny, enclosed universe, in which the sole inhabitants are the articulate upper-middle class bitching about a world that no longer allows them luxurious indulgence at the expense of others.

Dennis Cannan's "Dear Daddy" at the Ambassadors Theatre veers between the best and the worst of the genre. Through its central character, an old-fashioned man of letters, it is a bitter attack on the slipshod philistinism of the modern world and sometimes as intemperate as John Osborne in its defense of privilege.

But Mr. Cannan also manages to judge his protagonist by his own standards and finds him wanting. He is a man who, whatever else he has done, has failed his family—his two wives and three children—sacrificing them to his monstrous egotism, retreating into his books at crucial moments, providing them with no values and little help.

Mr. Cannan gathers his characters for a ghastly family occasion. Bernard, the father, has gathered his family together in order to raid a trust he set up for his children. Times have changed since he was a successful critic and television personality and he is broke. His life is a mess: His first wife is an alcoholic, he hardly communicates to his second, his children are united only in their dislike of each other.

One son, Billy (Joseph Blatchley) is an aimless drifter and sponger who has settled into apathy. The other, Charles (Patrick Drury) ruthlessly exploits his simple uncomplicated girlfriend (Rosalind March). His daughter Gillian (Jennifer Hilary) is supposedly liberated, ricocheting between unhappy affairs with men she half despises. And he has gradually robbed his second wife Mary (Isobel Dean) of her independence, reducing her to a cipher.

Mr. Cannan does not bother much about plot—the children's signing over of their funds takes but a few seconds—preferring instead talk, which is lively, often witty and penetrating. To spice the savage dialogue, as each member of the family turns to rend another, he casually introduces Bernard's first wife ("I happened to be passing by," she says, unconvincingly) who is slightly drunk, very miserable and longing to confront the second wife.

The play is too neat to be entirely successful; the characters of the children are too much types, given little chance of any individuality, differentiated mainly to provide a range of targets for the waspish wit of Bernard. But in this would-be patriarch, a dinosaur living out of his time, slowly sinking into a morass, he has created a memorable character, aided by Nigel Patrick's finely judged performance, ranging from the casual flippancy that has been his stock-in-trade to a passionate anger.

He manages to maintain a tricky position—Bernard is, in part, a representative of standards that reveal the shabbiness of much of modern culture, but he also partakes of that shabbiness, failing to live up to his own values.

Phyllis Calvert, too, is excellent as the cast-off wife, facing without much dignity an empty life. The rest of the cast, given less opportunities, perform admirably. And Hutchinson Scott has designed a fine, book-stuffed setting, on the wall of which can be glimpsed, as an ironic counterpoint to the action, a painting of paradisiacal family harmony.

At the Young Vic, Frank Dunlop praises the poetry of Shakespeare's "Anthony and Cleopatra" in his program note and then ignores it in his production, which is plain and vigorous but without enchantment. Carl Toms' vertiginous setting, better suited to mountain goats than stumbling actors, is an added obstacle. The chief attraction of the production is the casting of Delphine Seyrig as Cleopatra. Her performance is interesting but lightweight, spoken in faultless English but also lacking any sense of poetry.

Around the Art Galleries In London and Paris

London

Rory McEwen, Redfern Gallery, 20 Cork St., London, W1, to Nov. 3.

For more than 20 years, McEwen has been studying tulips, his interest initiated by a collaboration with Sir Sacheverell Sitwell. His new show is entirely devoted to the subject of striped tulips, cleverly combining factual representation with aesthetic sensibility.

* * *

Ernest Bottomley, Alwin Gallery, 9/10 Grafton St., London, W1, to Nov. 4.

This fourth exhibition of Bottomley's sculpture, titled "Capsules," once more has man caged in his own ego, ringed about by the hard walls of his environment. But for the first time, he is beginning to break free—a limb here, a head there projecting beyond the confines.

* * *

John Ward, Maas Gallery, 15a Clifford St., New Bond St., London, W1, to Nov. 5.

John Ward is one of the best of traditional English watercolorists. This latest show emphasizes the aptness of the medium for portraying the play of light and shade in intimate landscapes and interiors with people.

* * *

Francis Kelly, Heal's Art Gallery, 196 Tottenham Court Road, London, W1, to Nov. 5.

Canceled etching plates, mounted under plastic, and chiefly of landscapes, by the American-born Francis Kelly, make a pleasing variation on the usual graphics exhibition.

* * *

Victorian Panorama, Alexander Gallery, 45 Sloane St., London, SW1, to Nov. 6.

This collection of paintings and photographs of Victorian life foreshadows the book of the same title, to be published by Faber, and written by Christopher Wood, one of the directors of the gallery.

* * *

William Coldstream, Anthony d'Offay, 9 Dering St., New Bond St., London, W1, to Nov. 12.

One of the slowest, as well as the most thoughtful of contemporary English painters, Sir William is having his third one-man show in more than 30 years. A dozen paintings—nudes, still lifes and portraits—are worth long and careful scrutiny.

* * *

Desmond Morris, Lasson Gallery, 82/84 Jermyn St., London, SW1, to Nov. 12.

Dr. Morris has been a painter for as long as he has been a biologist. The biomorphs, as he terms the creatures who inhabit his imaginary world, evolve from painting to painting, as they lead lives independent of their creator.

* * *

Camden Town Recalled, Fine Art Society, 148 New Bond St., London, W1, to Nov. 12.

The group of artists around Sickert, to which the London district of Camden Town gave its name, flourished from 1905 to 1912, and was in a sense the origin of the still-existent London group. This loan show of more than 150 items includes all the Camden Town group, and with many of their best works, closely recreates their original exhibitions.

* * *

Joseph Herman, Roland, Browse & Delbanco, 19 Cork St., London, W1, to Nov. 13.

Ten drawings and 64 watercolors, all 10 by 8 inches, show that this lively master has lost none of his keenness, cunning or understanding of ordinary folk.

* * *

Contemporary Textile Art, Textural Art Gallery, 3 Lansdowne Row, Berkeley Square, London, W1, to Nov. 15.

The opening exhibition of this new, spacious gallery consists of the work of half the prizewinners in nationwide textile competition, defining textile art in a manner loose enough to include 3-D wall panels, soft sculpture, miniature embroideries, and woven pop pictures. A great sense of liveliness and ingenuity prevails in this exhibition.

* * *

English Painting & Drawings 1900/1940, New Grafton Gallery, 47 Old Bond St., London W1, to Nov. 17.

This pleasant potpourri of artists includes major oils by Malcolm Drummond, Paul Nash, William Roberts, Duncan Grant, Gilbert Spencer, Henry Lamb and Sir William Nicholson; and less important but beautiful drawings and watercolors by Sir George Clausen, Douglas Percy Bliss and John Nash.

—MAX WYKES-JOYCE

Paris

Les Nouveaux Réalistes, Galerie Beaubourg, 23 Rue du Renard, Paris 4, to Nov. 15.

The so-called new realists made their big splash in 1960 when they formally declared their existence as a movement. Among them: Tinguely, César, Yves Klein, Arman, Christo and many others. Their activity had a sort of manifesto to it—Tinguely's obsessive machines, César's compressed automobiles and Arman's smashed pianos and string instruments. Visibly, the participants had the conviction that they were smashing their way out of a narrow, "unreal," stuffy aesthetic universe which, on the artistic level, found its expression in the triumphant abstract art of the decade. Abstraction, they felt, was only offering "escape into an imaginary world" and they wanted "reality." Their idea of reality was philosophically banal and naive if one is to judge it by the texts through which critic Pierre Restany sought to formulate their collective views. Reality appears to be identified with the "object" on the one hand and, at the other extreme, in the super-lyrical cosmic marmalade with which Yves Klein surrounded his activities with quasi-ineffable forces leading mankind to a utopian mutation to which Klein was showing the previews. Neither path led out of the closed universe in which they felt themselves to be penned, despite energy and talent. As a result, their work remains today as an expression of rebellion although with a different connotation than in dada. Dada sought to insult the aesthetic canons of the day, but did not consider that its insults had any aesthetic value. The neo-dadaists (both in the United States and in France) wanted to produce what might be termed "beautiful disasters." As a result their production often has a certain beauty of eloquence and impact, but one goes away with the feeling of an implosion rather than the much hoped for explosion. The failure has more pathos to it, finally, than the original gesture and earns these artists the sort of respect one grants to veterans. The show is representative of their work.

* * *

Yves Klein, Galerie Karl Flinker, 25 Rue de Tournon, Paris 6, to Nov. 20.

More Klein, then. This time his "fire paintings." Klein obviously had panache and the works shown here have an elegant flair that cannot be denied. However, just as we had "instant history" in the sixties, so did we also have "instant art history." Klein's rather shrill and intense personality seems to have invited this sort of response and the same hangs about his work even today. If one does not subscribe to the mystique, the chic remains.

* * *

David Hockney, Galerie Sonnabend, 12 Rue Mazarine, Paris 6, to Nov. 15.

"Twenty photographic pictures by David Hockney" provide one with an amusing reflection on his paintings. The same themes appear in these color pictures—the composition, the fascination with the play of light on a swimming pool, even the choice of colors. A talented piece of Hockneyana.

—MICHAEL GIBSON

INTERNATIONAL EXECUTIVE OPPORTUNITIES

Experienced COMMODITY SPECIALIST or TRADER

WANTED BY INTERNATIONAL GROUP IN BRUSSELS.

Please reply with curriculum vitae to:
Box D-5,537, Herald Tribune, Paris.

MARKETING EUROPE

A British manufacturing group, engaged in the production of high quality kitchens, greenhouses, fencing and products for the home garden, wishes to employ a GENERAL MANAGER who would have full responsibility for the marketing activities of the group in Europe. The initial concentration would be on the development of the group's new fitted kitchen market.

Responsibility would be to the main board director, who is also chairman of the group's recently formed European subsidiary with working headquarters in Antwerp.

Entrepreneurial flair and a successful record of marketing experience are important, as is a demonstrable knowledge of modern business control techniques.

While nationality is not of itself important, the man envisaged for this appointment should be culturally at ease in the Western European business environment. He will now be living on the Continent, or will have been living there in the last year or two. He will be fluent in English, French and German. Travel within the area of the EEC will be extensive

The salary contemplated will be between French Francs 8,000 to 10,000 or the equivalent, per month.

Please reply in confidence to the company's advisors:

CONWAY & COMPANY LTD.
33 Bristol House,
67 Lower Sloane Street,
London, SW1W 8DD,
England.

International Petroleum Consultants

Arthur D. Little is one of the world's leading management consulting companies with an established reputation in the energy and petrochemical industries. As a result of our expanding activities, we need additional outstanding professionals to join our energy economics groups in Europe and overseas. We are currently seeking applications for three separate appointments in the following fields:

- Petroleum and petrochemical processing economics.
- Petrochemical marketing.
- Energy supply and demand economics.

The candidates must have:
- At least five years' experience in the oil and/or petrochemical industries.
- A proven record of ability to undertake major technical and economic studies.
- Thorough understanding of the economic bases for decision-making in the energy and/or petrochemical industries.
- Willingness to undertake overseas assignments for 2 to 3 year periods.

Fluent English is essential, and a second language, particularly French, highly desirable. Probable age 27-35 years.
The successful candidates can look forward to challenging professional assignments and will be given a high degree of responsibility at an early stage. Attractive compensation will be offered.

Please send your curriculum vitae in strict confidence to the Vice President Europe.

Arthur D Little
Berkeley Square House, Berkeley Square, London W1X 6EY.

Major American Textile Company
seeks
SALES MANAGER
EUROPE

We are looking for an experienced SALES MANAGER to introduce our line of leisure wear to major accounts and direct aggressively an existing sales organization.

PLEASE WRITE TO:
Box D 5,498, Herald Tribune, Paris.

THE INTERNATIONAL HERALD TRIBUNE
requires
two young but experienced
ADVERTISING SALES EXECUTIVES

—For its London office: an aggressive young man or woman preferably with experience in the financial and classified fields.

—For its Frankfurt office an equally dynamic young person with advertising sales experience. Must be totally fluent in German and willing to travel extensively within Germany.

For both these positions nationality is not a major consideration but EEC citizenship or valid work papers are essential. Salary commensurate with experience and market conditions. Excellent advancement prospects.

Box D-5,523, Herald Tribune, Paris.

Qualified Electrical Engineer

Capable of supervising large field construction projects. Required by important installation, construction and engineering French Group, Paris area.

Candidates must have at least 10 years experience in refinery and pipeline installations.

Must be fluent in English and willing to travel to Middle East countries.

Qualified Instrument Engineer

Capable of supervising large field construction projects. Required by important installation, construction and engineering French Group, Paris area.

Candidates must have at least 10 years experience in electronic and pneumatic instrumentation as well as telemetering systems, for refinery and pipeline installation.

Must be fluent in English and willing to travel to Middle East countries.

Please write to: Box D-5,532, Herald Tribune, Paris.

INTERNATIONAL SALES/MARKETING MANAGEMENT

Major Appliance Industry

We are a profitable international Division of top Fortune 500 corporation with a solid record of growth and accomplishment in international markets. Our success has been contributed to innovative sales and marketing strategies and strong executive leadership. We now have immediate opportunities for experienced professionals to join our international management team.

Sales Manager - Latin America

To qualify, you'll need a thorough knowledge of the Latin American markets encompassing at least 5 years field sales experience consisting of 2 or 3 years Latin American residency. Experience with air conditioning, white goods or brown goods would be helpful but not essential. Fluent Spanish is required, Portuguese a plus. You'll be working with established distributors as well as identifying and developing new distributors for consumer durables throughout Latin America.

International Product Manager - Appliances

Requires 10 or more years marketing and manufacturing experience, mostly international, with a manufacturer of major appliances, preferably air conditioners. Fluency in one or more languages in addition to English is desired. You'll work closely with overseas sales subsidiaries, field sales organizations, manufacturing facilities and licensing programs for overseas manufacturing and assembly.

If you have the experience coupled with strong management capability we can offer an executive level compensation package and definite career opportunities. Send a letter or résumé, stating salary history to:

BOX D.5,539 Herald Tribune, Paris.
An Equal Opportunity Employer M/F.

THE "INTERNATIONAL EXECUTIVE OPPORTUNITIES"
appears every
TUESDAY, THURSDAY & SATURDAY

EUROPEAN INTERNAL AUDITOR
BRUXELLES BASED

Fast expanding North American multinational company, marketing high volume consumer and leisure products in eight European countries, is searching for an internal auditor to set up the European internal audit function.
The successful candidate will be a CA or CPA with North American audit experience.
He/she will travel approx. 50 per cent and salary package will be around U.S. $27,000 on Belgian tax base.
Send C.V. in confidence to:
Simon Cooper, Vice President Europe
K-TEL INTERNATIONAL,
Schlitzer Strasse 6, 6000 Frankfurt/Main 62. Tel.: Frankfurt 41 01 91.

London? New York? Paris? Who Leads Culturally?

By Clive Barnes

NEW YORK (NYT)—What is the cultural capital of the old? At one time or another answer was easy enough. In ir day, Athens, Rome, even nstantinople had legitimate ims. But now? The cultural ders are surely—in tactful, habetical order—London, New rk and Paris. And this has n pretty much true for the quarter century. These places where the arts are not just opening but evolving.

or quite a long time, people ve recognized that while Lon- and Paris were still extra- linarily important in terms of stern culture, New York for ne decades had become the true ster, the leader of the trio of the heap. This may still true, but a recent visit to both ndon and Paris gave me pause thought. In London, the vier—the last of the three ditoriums in the National The- e complex—was about to open d in Paris there was much talk the Pompidou museum, which still under construction. Could be, I wondered, that the balance cultural power is changing and w York is not perhaps as im- tant to Western cultural life it was, say, 10 years ago?

Where New York is lagging hind is not in ideas but in the tentiality to develop ideas. The naissance was a time for pa- ons. Our present time is also time for patrons, but the pa- ons are now fundamentally the vernment and the British and e French governments are doing far better job in this regard an is the government of the ited States.

Literary Years

The reason is the simple, pol- monous word: money. What New ork needs are not promises to- orrow, but subsidies tonight.

New York Timesman Clive Barnes has an unusual vantage point for critical comparison of the arts in Europe and America. A British subject, he has worked as a critic on both sides of the Atlantic since the early '60s. He was principal ballet critic for The Times (London) and a contributor to The New York Times until 1965, when he moved to New York as daily NYT drama critic. In this article for The New York Times, Barnes reflects on the relative stature of London, New York and Paris as centers of the arts.

In Paris, there is a new spirit. Admittedly, some people are not altogether enthusiastic. They point out, with absolute validity, that the 10 years after World War II were the great literary years in Paris. Also, that the major names of French literary culture did their most imaginative work from 1947 to 1958. Some feel the same about French cinema, suggesting that the scope has become restricted to intimist films, genre-studies of customs, mild satire and provincial concerns.

Some are also rather despondent about the future of the French theater, pointing out that the major Parisian playwright of today is the Spanish writer Arrabal. This is probably true. Even though the reputation of La Comédie-Française is still high, the French theater does seem to be full of boulevard comedies of no particular value.

Yet where Paris is very positive is in the field of the fine arts. An art critic pointed out that the La Tour exhibition of a few years ago "represented a new inventiveness and creativity on the part of scholars." He was also very positive about what he called "the striking upgrading of the staff of the Louvre" and suggested that in painting and sculpture, "for the first time in some years Paris is in a creative ferment."

This seems to be true, despite the fact that France has been having its difficulties with culture. Michel Guy, the former minister of culture, apparently made many promises to arts organizations that he was unable to fulfill, and Françoise Giroud, the new minister, is faced with a huge program and only a half of 1 per cent of the total national budget. (In contrast, the National Endowment for the Arts gets only 0.2 per cent of the total U.S. budget.)

The New and the Old

Yet somehow, Paris, like London, still seems alive. There are two new things in Paris. The first of them is terribly old—the Paris Opéra—and the second really is new—the Centre National d'Art et de Culture Georges Pompidou.

When Mrs. Giroud was appointed minister of culture, she said, somewhat ingenuously it was thought, "Culture is what unites all Frenchmen." Well, not quite. But what certainly makes culture work is government support. And this kind of support can be seen clearly in the funding that Rolf Liebermann has acquired for the Opéra. He arrived in January, 1973, from Hamburg. This Swiss-born intendant is generally regarded as the most brilliant man in the field of opera presentation. He now has a budget equal to $35 million a year. Of that, $4 million comes in from the box office. The other $31 million is provided by the French government. Jacques Chirac, the former premier, guaranteed that this support would continue until the end of Mr. Liebermann's contract with the Opéra in 1980.

Compare this with the $12.7 million that Anthony Bliss, the executive director of New York's Metropolitan Opera House, is having to raise to balance his budget.

In about three years, Mr. Liebermann has turned around the Paris Opéra from being virtually the laughing stock of the operatic world to being one of the greatest opera companies anywhere. After all, it needed only money and taste. The money Mr. Liebermann demanded; the taste he had. Now he and his lieutenant, Hugues Gall, are moving toward the development of the Paris Opéra ballet, a group of splendid dancers in search of a repertory. They now have a good teacher, Raymond Franchetti, at the head of the school, and they have recently appointed the Franco-American ballerina Violette Verdy as the director of the company. She should presumably not only bring French dance into the 20th century, but also create a new tradition at the Paris Opéra.

Bird Cage

Then there is, of course, the controversial Pompidou museum, which opens officially in January of next year. The museum, which looks a little like a transparent bird cage, has been designed by an Italian-British group headed by Renzo Piano and Richard Rogers.

The idea has been, in the view of the museum's director, Pontus Hulten, "to provide transparent architecture in contrast to the old temples." The structure, which has a public library, will house not only the visual arts but will also embrace music.

Many Parisians do not like the building, but, in my experience, people generally do not like anything that is new. With increasing impetus since World War II, New York has been the world center of the visual arts and the development of a Pompidou museum is going to make a difference. It is going to provide a focus for the French artist. It will stimulate dealers. It will promote the entire Parisian art world. And this was not a world I thought was very active.

Over the Channel in London, things are happening, too. For one thing, buildings are happening. If Paris is getting its Pompidou museum of modern art, London is getting its new, and certainly equally controversial, National Theatre. The structure has been designed by Denys Lasdun and, in London, it's bad news. But this is a misconception, for the National is an extraordinary theater, with three ideally designed auditoriums—a proscenium-arch theater, the most sophisticated theater-in-the-round the world has ever seen and, finally, one of those particularly empty, but fillable, spaces that nowadays is the ultimate aim of every theater director. It is a beautiful building. It looks somewhat brutal from the outside, but as a theater, it looks as though it will function.

A Poor Year

In London the theater scene generally was poor this year—but so was it in Paris. And in both countries it will probably be better next year. The Tate Gallery (roughly the equivalent of New York's Museum of Modern Art) has one of the best acquisition budgets in the world and the major orchestras in London—there are six of them—seem to be excellent.

The curious thing in looking at these three cities is that New York should be the most ebullient, and yet, at least just at present, it is not. Paris is on its usual inflationary bend and London is declining with a gentle fiscal fall; yet both of them seem more active in the arts than New York. Not more innovative, more creative or more inventive, but simply more active. As indicated earlier, Mr. Liebermann at the Paris Opéra has more freedom than Mr. Bliss at the Metropolitan. And this is only one instance. Peter Hall, of Britain's National Theatre, has more money and scope than Joseph Papp and his New York Shakespeare Festival, and certainly infinitely more than Theodore Mann at the Circle in the Square.

I am reminded of the story Bernard Shaw used to tell about his relationship with the producer-director Gabriel Pascal, who made the cinematic versions of quite a number of his plays. Shaw said: "No, we don't get on that well, because Pascal is interested only in art and I am interested only in money." Shaw's instincts were absolutely right.

The vitality of New York still makes it the big apple in the world of art. Of course, it has lost most of its film and television business to Los Angeles, which does have an adverse effect upon its theatrical life, because—unlike in Paris or London where all the acting arts are centralized—there is a continual talent drain to the West Coast. Yet, in terms of every art form one might name, New York is still creatively more or less at the top of the heap.

Nevertheless, we really have to consider how long this can continue. It does seem to me that London and Paris are both more somberly and sensibly concerned with the arts, particularly with the performing arts.

ON THE ARTS AGENDA

Leonard Bernstein will conduct the Orchestre National de France in two sets of concerts at the Théâtre des Champs-Elysées in Paris. On Nov. 1 and 2, the program will be Berlioz's "Harold in Italy," with Donald MacInnes as the viola soloist, and "Symphonie Fantastique." On Nov. 8 and 9, Mstislav Rostropovich will be the cello soloist in the Schumann concerto and Bloch's "Shelomo," and the program will be completed by Milhaud's "La Création du Monde" and "Le Bœuf sur le Toit." The programs are to be broadcast by French television on Nov. 8 and 15 and recordings also are planned for the works on these programs by the same performers.

* * *

Dvorak's "Rusalka" will be given for the first time by the Netherlands Opera, in collaboration with the National Theater of Prague, with the first performance scheduled for Nov. 4 in Scheveningen. The work will be sung in Czech and produced by a Czech team comprised of Bohumil Gregor, conductor; Vaclav Kaslik, stage director, and Josef Svoboda and Jarmila Konecna, sets and costumes. Teresa Stratas will sing the title role, and the cast also will include Roberta Alexander, Gwendolyn Killebrew, Willard White, Anton de Ridder and Nico Boer. The work will be repeated Nov. 6 in Scheveningen, followed by six more performances in Amsterdam and Rotterdam through Nov. 24.

* * *

Berg's "Lulu" will be given a new production by the Lyons Opera in a staging by Gaston Benhaim and with sets and costumes by Jacques Rapp. It will be sung in the French translation by André Tubeuf and Louis Ducreux by a cast including Carole Farley and Caroline Dumas, alternating in the title role, Peter Gottlieb as Dr. Schön, Georges Liccioni as Alwa, Christos Grigorious as Schigolch and Emmy Greger as Countess Geschwitz. Sylvian Cambreling will conduct the eight performances scheduled between Nov. 13 and 30.

* * *

Karl Böhm will conduct and Filippo Sanjust will do the sets and costumes for a new production of Strauss's "Ariadne auf Naxos" that will have its first performance Nov. 20 at the Vienna State Opera. Gundula Janowitz and James King are scheduled to sing the principal parts, with Agnes Baltsa as the Composer, Walter Berry the Music Master, Heinz Zednik the Dancing Master, Edita Gruberova as Zerbinetta and Barry McDaniel, Kurt Equiluz, Manfred Jungwirth and Gerhard Unger as the commedia dell'arte quartet. Later performances are scheduled for Nov. 26 and Dec 2 and 7.

If you don't know what's going on in New York, you don't know what's going on.

THE NEW YORKER

To The New Yorker Subscription Dept., Condé Nast Publications Ltd., Belmont Road, London W4 5UJ.

I should like to be informed, entertained, illuminated by The New Yorker's views on all aspects of contemporary life.

Please air-deliver 52 weekly issues. I enclose my cheque for $38 or local currency equivalent (payable to Condé Nast Publications Ltd.).

apan Payment Surplus Videns as Exports Rise

OKYO, Oct. 29 (AP-DJ).—Finance Ministry's final ming for September shows an's overall balance-of-pay- its surplus expanded sharply $428 million from a $107-mil- surplus in August and a 4-million deficit in the like earlier month.

he ministry's final figures also confirm that increased exports was the major factor in the rise in the overall payments surplus. Japan's trade surplus rose sharply to $1.206 billion in September from $587 million in August and a year-earlier September surplus of $413 million.

Seasonally adjusted, the September trade surplus totaled $697 million, up from an adjusted $366 million in August.

Exports in September totaled $6.021 billion, up 11 per cent or $728 million, from August and up 36 per cent, or $1.558 billion, from September, 1975. The ministry said increased exports of ships, autos, light electrical products and metals were behind the sharp rise. Seasonally adjusted exports totaled $5.897 billion, up from $5.312 billion in August.

Imports in September totaled $4.815 billion, up a moderate $104 million from August imports and up $793 million from the year-earlier month. Adjusted imports totaled $5.200 billion, up from $4.946 billion in August.

Overall Deficit

The seasonally adjusted overall balance of payments in September was in deficit by $81 million, down from a $114-million deficit in August and a deficit of $491 million in September, 1975.

The current account was in surplus by $643 million, up from the $43-million surplus posted in August and a $41-million deficit in September, 1975.

The nation's invisibles account registered a $556-million deficit in September, compared with a $532-million deficit in August and a $438-million deficit in the year-earlier month.

September's transfer payments account posted a deficit of $7 million, compared with a $12-million deficit in August and a $16-million deficit a year ago.

Long-term capital flows showed a deficit of $291 million, compared with a $174-million deficit in August and a $247-million deficit in September, 1975.

The short-term capital account was in deficit by $13 million, compared with an $80-million surplus in August and a $147-million surplus in September, 1975.

ussians Sell ullion on wiss Market

URICH, Oct. 29 (AP-DJ).—e Soviet Union, which with- w as a seller from the Zurich d market late in June, return- last month in line with its p-go, price-oriented policy, ss dealers said today.

"The Russians have been selling ht and left," since then but bullion price, far from falling, firmed, a top expert at Swiss nk Corp. said. "It is true that thout the Russian sales, the ce would have been higher, but is not true that the Russian es have forced down the price. ey (the Russians) are very ice conscious and they don't do at," he said.

The recent firming in the bul- n price is variously attributed dealers to improved market timent, a strong offtake of e metal for industrial use and worries about renewed world flation.

A Swiss Credit Bank dealer said at until so far this year, the ssian sales probably total 150 etric tons. He said that a fair- ess for the full year would be the 200-ton area. The Swiss nk Corp. dealer would not timate the sales until now, but e bank said yesterday that in e first half of this year, the ssians are estimated to have ld 120 tons.

Last year, sales from all East ropean sources, which means ainly Russia, totaled 149 tons, cording to a Swiss Credit Bank timate. However, the Soviet ion is estimated by the bank have produced 407 tons in 1975.

Pound Is Up After Rise, Fall Prompted by Rumor, Denial

(Continued from Page 1)

ey were deluged with pounds. Since then, they have demand- l more and more that the pay- ents be made in dollars, but ey held the sterling that they d received following the price crease. Sometime last April, ey finally decided that they had en burned enough by their inking investment and they rted selling.

From then through June 30, e last date for which the Bank England has released such ta, the oil exporters sold $1 bil- n in sterling, leaving $3.1 billion their coffers. Part of that, t by bit, has been moving into rrency markets since June, help- g to depress the pound.

The unsold funds, along with e $1.8 billion in other countries' ults, have become an currency arkets an oppressive force own as the sterling balance erhang.

Lately, British Prime Minister mes Callaghan and Chancellor the Exchequer Denis Healey ve drawn attention to the erhang and suggested that ch strong Western economies West Germany, the United ates and Japan assume Brit- n's burden of protecting the und by converting the balances their own, healthier currencies by discouraging the pounds' les in some other way.

Last night, according to British dio reports, the British vernment was negotiating a billion loan to facilitate such conversion of other nations' serves. Almost immediately en the currency markets open in the Far East, the pound e sharply.

Indeed, the British have been ling informally with other ntries about "funding" the lances. And a government onomist predicted today that ter Britain gets the $3.9-billion loan it is seeking from the International Monetary Fund, there will be talks about another loan—he thought it would involve about $5 million—to remove the burden on the balances.

But it was clear that such a loan might not be arranged for months, and the Treasury today said that last night's report was erroneous. So the pound started drifting again.

Simon Denies Role

WASHINGTON, Oct. 29 (Reuters).—Treasury Secretary William Simon said today that he was not aware of any discussions for a loan to Britain other than the negotiations for a $3.9-billion loan from the IMF.

"I'm not aware of anything of that nature at all. . . This is something brand new to me," he said when asked about reports of a British bid for a separate, $10-billion loan.

This is your chance to WIN
$80,500.00 TAX FREE
IN THE MALTA NATIONAL LOTTERY FOR ONLY $1.40 A TICKET
$5 for 4 tickets. — $10 for 8 tickets.
CLOSING DATE: 6 DEC. 1976.

Herman de Groot

PEOPLE IN BUSINESS

Borg Warner Chemicals, Europe, announced the appointment of **Herman de Groot** as marketing manager for moulding polymers. He was formerly sales manager for the Benelux. He will replace **Raymond Quick**, who is returning to the United States where he will assume responsibility for technical and sales service in the United States and Canada.

* * *

William Duncan 2d, senior vice-president, has been named to head the European operations of Chemical Bank. He succeeds **Walter Shipley**, senior vice-president, who is now deputy head of the international division. Mr. Duncan was most recently in charge of the worldwide petroleum and minerals division of the bank.

* * *

Pierson, Heldring Pierson (U.K.) Ltd. has named **Anthony Best** as director. Mr. Best was previously an executive director of Rothschild Intercontinental Bank Ltd. and subsequently Amex Bank Ltd.

* * *

Emilio Collado was elected president and chief executive officer of Adela Investment Co. SA. He was most recently a director of the company.

IMF Gold Sale Banks Are Named

WASHINGTON, Oct. 29 (Reuters).—The Bank for International Settlements and the Bank of Oman were among 16 successful bidders at Wednesday's gold auction, the International Monetary Fund said today.

The fund released the names of the 16, but did not say how much gold each bought. Most of the winning bidders were the same dealers and banks which bid successfully at the third auction in September.

The other successful bidders were: J. Aron & Co. of New York, Bank Leu of Zurich, Bank of Nova Scotia in Toronto, Deutschebank AG of Frankfurt, Dresdner Bank AG of New York, Friedberg & Co. of Toronto and International Gold & Silver Corp. of Georgetown, Grand Cayman Island.

Other winners were: Johnson Matthey Bankers of London, Samuel Montague & Co. of London, N.M. Rothschild & Sons of London, Sharps Pixley Inc. of New York, Swiss Bank Corp., Swiss Credit Bank, and Union Bank of Switzerland, all of Zurich.

Bank Loans To Business Rise in N.Y.

Money Supply Drops In Latest Period

By Douglas W. Cray

NEW YORK, Oct. 29 (NYT).—Business loans increased $106 million in the week ended Wednesday at major New York City banks, continuing an uptrend that has added $1.2 billion to the commercial and industrial loan portfolios at these banks in the last nine weeks.

Reporting this yesterday, the New York Federal Reserve Bank again ascribed the bulk of the increase to a gain in bank holdings of acceptances. In the last nine weeks, bank holdings of these money-market instruments—trade bills whose payment is guaranteed by a bank—have increased about $830 million.

The latest weekly increase in business borrowing at the New York banks—the eighth in the last nine weeks—put the total outstanding up $56 million since the midyear point. This compared with a decline of $1.6 billion in the year-earlier period.

Money market observers, assessing the latest changes in M-1 and M-2, suggested that they did not point to the likelihood of any immediate changes in the Federal Reserve's present monetary policy objectives. Moreover, with the Treasury's $6-billion refinancing scheduled for next week, it was noted that the central bank would normally be expected to maintain an even-keel posture in the money markets.

National commercial and industrial loan totals lag behind the New York numbers by a week, but the Federal Reserve yesterday reported that in the week ended Oct. 20 business borrowing rose $481 million to a level of $112.9 billion.

Elsewhere in the weekly banking data, the Federal Reserve disclosed that the basic money supply declined $2.1 billion to a seasonally adjusted average of $308.6 billion for the week ended Oct. 20, from a revised average of $310.7 billion in the previous week.

In the latest four-week period the narrowly defined money supply, referred to as M-1 and consisting of demand deposits and currency in circulation, averaged $308.5 billion. This represented a 5.4-per-cent rate of growth in the latest statistical quarter, a 49-per-cent rate of growth in the latest six months and a 5.3-per-cent growth rate in the latest year. On this basis the growth rates remain on the low side of the central bank's presently indicated growth rate target of 4 1/2 per cent to 7 per cent in M-1.

The broader money supply, known as M-2, which consists of M-1 plus consumer-type time deposits and savings deposits at commercial banks, averaged $724.3 billion in the week ended Oct. 20, a decline of $1.3 billion from a revised average of $725.6 billion in the previous week.

In the four weeks ended Oct. 20, M-2 averaged $722.6 billion, representing a growth rate of 10.9 per cent in the latest statistical quarter, a 9.8-per-cent rate of growth in the latest six months and a 10.4-per-cent growth rate in the latest year. This remained on the high side of the Fed's stated growth-range objectives for M-2 which are 7 1/2 per cent to 9 per cent.

Foreign Nations Worried By Extension of U.S. Law

NEW YORK, Oct. 29 (AP-DJ).—Foreigners are increasingly worried over efforts to apply American laws to operations of U.S.-based multinational corporations abroad.

That is among the major findings of a study by the Conference Board, a New York-based nonprofit organization engaged in business research. Conference Board researchers conducted interviews with 247 "influential persons"—from government officials to labor leaders to businessmen—in Canada, where more than 4,000 U.S.-owned companies operate, and in Italy, with about 700 U.S.-owned concerns.

Other findings include a general acknowledgment that U.S.-owned affiliates have tended to foster economic growth in the respective countries and that "further economic development depends on continued foreign investment, especially from the United States."

However, the study also makes clear that a rising irritant is the effort "by the American government to apply U.S. laws—in such areas as anti-trust, unusual payments and 'trading with the enemy'—to the affiliates of multinationals."

A Canadian respondent, for instance, remarks that American anti-trust regulations applied to U.S. affiliates in Canada tend to "collide head-on with Canadian efforts" to avoid unnecessary duplication of production facilities.

Alluding to recent efforts by the U.S. government to clamp down on illegal payments abroad by U.S. corporations, the study says: "Italians are baffled by what they feel to be an excessive American penchant for public confessions and public atonement."

Wall Street Prices Advance On Gain in Trading Volume

NEW YORK, Oct. 29 (IHT).—A more active demand for glamour stocks and for certain issues with favorable corporate news enabled New York Stock Exchange prices to score a fairly broad advance today.

The Dow Jones industrial average was up 12.30 at 964.93. Volume amounted to 17.03 million shares compared with 16.9 million yesterday. Advances outnumbered declines, by about 1,060 to 365.

Analysts said part of the activity may have reflected a shifting of investment portfolios in the last weekend before the U.S. presidential election.

The news background, including a 0.7-per-cent decline in the government's index of leading economic indicators, and a lower banking-industry prime interest rate, had no apparent impact on stocks.

A number of major banks announced they are cutting their prime lending rates from 6 3/4 to 6 1/2 per cent. The low rate was first posted yesterday by Continental Illinois National Bank & Trust Co.

Citibank said its rate cut would take effect Monday, while Morgan Guaranty and Continental Illinois lowered their rates today.

Westinghouse climbed 1/2 to 16 1/2. The company said it plans to close down or sell its color television picture tube business by December.

Ford Motor gained 5/8 to 56 3/4, Aetna Life & Casualty rose 1 1/4 to 33 7/8, and other strong features included IBM ahead 5 1/4 to 271 3/4, Eastman Kodak 2 7/8 to 87 5/8, Walt Disney 1 5/8 to 46 1/4, Sabine Royalty 3 3/8 to 58 5/8, Fairchild Camera 2 1/4 to 44 3/8, and Polaroid 2 to 36 3/8.

Procter & Gamble gained 2 3/4 to 94 3/4, Digital Equipment climbed 3 to 151 1/2, Kennecott Copper 1 1/4 to 26 5/8, Du Pont 3 5/8 to 129 1/4, National Semiconductor 1 3/8 to 28 5/8, and American Telephone 1 1/4 to 61 3/8.

But Superscope fell 1 7/8 to 18. It reported higher third-quarter profits, but revised downward estimated 1975 net to $4 a share from an earlier projection of $4.70.

Ingersoll-Ran lost 1 1/4 to 73 7/8.

Prices on the American Stock Exchange advanced on light turnover. The Amex index rose 0.59 to 98.88

A late buying move by a major exporter and commission houses led soybean futures to a 19-cent advance on the Chicago Board of Trade.

Prices of other grains, soybean meal and oil had been mostly lower when the buying interest came into soybeans, and within minutes declines were erased in some sections or prices turned mixed.

Soybeans were up 19 cents, wheat more than 3, while corn and oats prices were mixed. Soybean meal was up to $2.50 higher while soybean oil gained about 75 points, or 3/4 cent a pound.

U.K. Strikes Increase

LONDON, Oct. 29 (AP-DJ).—The number of days lost to strikes in Britain rose for the fourth consecutive month in September to 349,000, up from 336,000 in August and 300,000 a year earlier, the Department of Employment reported. The major areas affected by strikes in September were the automotive and electronics industries.

Mitsubishi Car Denial

DETROIT, Oct. 29 (Reuters).—Mitsubishi Motor Corp. said in a statement issued by Chrysler Corp. here today that it "has no plans in any manner or form to have Chrysler Corp. build and/or distribute Mitsubishi cars anywhere within the European community."

Deutsche Bank in Paris

FRANKFURT, Oct. 29 (AP-DJ).—Deutsche Bank said it will upgrade its representative office in Paris to branch status sometime next year.

Markets Closed

All stock exchanges and banks will be closed Monday in Belgium and France. On Tuesday the closures affect the United States and France.

'Leading' Index Drops For 2d Month in Row

WASHINGTON, Oct. 29 (AP-DJ).—The government's index of leading economic indicators fell 0.7 per cent in September, making the second straight monthly decline, the Commerce Department said today.

The September drop was identical to the revised 0.7-per-cent decrease in the indicators for August. The August drop was originally reported as 1.5 per cent.

With the September decline, the index stands at 107.9 per cent of the 1967 average, the Commerce Department said, down from 108.7 per cent in August.

Seven of 11 indicators available for September pointed downward, with new orders for consumer goods contributing most of the decline. The other six were the average work week, the lay-off rate, the number of companies reporting slower deliveries, prices of sensitive materials, the money supply and liquid assets held by businesses.

Four indicators moved favorably—net business formation, contracts and orders for plant and equipment, common stock prices and building permits. Building permits had the biggest positive influence on the index.

Strike Losses

Meanwhile the Labor Department said the percentage of estimated total worktime lost to strikes in September was the highest for any September since 1970.

The department said 0.31 per cent of estimated total working time last month was lost to strikes, up from 0.29 per cent in August and 0.22 per cent in September a year ago.

The loss in September, 1970, was 0.57 per cent.

The department said the percent of lost working time due to strikes was higher in the first nine months of 1976 than in the same period last year.

About 0.22 per cent of estimated working time was lost in this year's nine months, compared with 0.17 per cent in 1975.

Trade Gap Gains In Third Quarter

WASHINGTON, Oct. 29 (AP-DJ).—The U.S. merchandise trade deficit widened in the third quarter after having narrowed in the second quarter, the Commerce Department said today.

Calculated on the "balance-of-payments basis" to exclude federal military trade and adjust for certain other factors, third quarter imports exceeded exports by $2.88 billion compared with the second-quarter deficit of $1.29 billion and the first-quarter deficit of $1.67 billion.

On the more widely watched "census" basis the figures released yesterday by the department indicated much the same trend. On the census basis, which includes the military trade, the third-quarter deficit was $2.36 billion, compared with deficits of $183.8 million in the second quarter and $864.3 million in the first.

On the balance-of-payments basis, second-quarter exports rose 4.3 per cent to an adjusted $29.68 billion while imports spurted 9.5 per cent to an adjusted $32.55 billion.

Petroleum imports rose 10.7 per cent in the third quarter to $9.45 billion as the nation imported a record 8.5 million barrels of oil a day, up from 7.7 million in the second quarter.

Farm exports totaled $6.32 billion in the third quarter, up 7.6 per cent from the second quarter. Non-farm exports rose 3 per cent, the department said.

The figures are adjusted for normal seasonal variations.

More Spending Reported Needed For the Concorde

PARIS, Oct. 29 (AP).—The French-British supersonic airliner Concorde has already cost the two nations 14.25 billion francs ($2.85 billion) and another 2.3 billion francs will be needed to complete the 16 planes now being built, according to a report to the French National Assembly.

The report was published during debate on the Transport Ministry budget.

Nine of the planes have been sold to British Airways and Air France. The British and French governments have authorized construction of an additional seven planes in anticipation of future orders.

But Pierre Baudis, an Independent Republican deputy reporting on the transportation budget, warned that there should be no excessive optimism about possible sales to nations such as Iran, China or Japan, which at one time had expressed interest in buying Concorde.

Study Says Oil Price Rise Should Be 2.7% to 7.8%

NEW YORK, Oct. 29 (AP-DJ).—The Organization of Petroleum Exporting Countries can justify another oil-price increase of only 2.7 to 7.8 per cent on the basis of increased costs of their imports.

So concludes a new study by the Petroleum Industry Research Foundation, a New York-based research group supported by a cross section of the U.S. oil industry.

The oil ministers of the 13 member states of OPEC will meet in Qatar in mid-December to discuss a new price for the cartel's benchmark crude, Saudi Arabia's light petroleum, currently priced at $11.51 a barrel.

"There is general expectation, based on implicit and explicit statements by responsible government officials of several OPEC members, that the price will be raised once again" at the meeting, John Lichtblau, executive director of the Petroleum Industry Research Foundation, said.

The size of the next price increase, if there is an increase, will not be known until the conference. But there have been indications from some OPEC members that increases ranging between 10 and 25 per cent might be considered.

Up To $31 Billion

The annual amount of money involved in such increases would total $12 billion to $31 billion at next year's expected OPEC rate of oil exports of about 29.5 million barrels a day. And adjustments for import-cost inflation has been the principal reason given by OPEC spokesmen as the need to raise oil prices.

But Mr. Lichtblau said that according to the oil-research group's calculations, the cost of imports into OPEC nations rose only 2.7 per cent from the third quarter of 1975, when the last OPEC oil price increase was announced, through the third quarter of 1976.

The OPEC import index used in the calculations is entirely in dollar values. "This fact, more than any other, explains why OPEC's import costs showed such a minute increase in the last 12 months despite continuing substantial inflation in many industrial countries," Mr. Lichtblau said.

"Since all OPEC oil prices are set in dollars or dollar terms," he added, "the strengthening of the dollar during the last 12 months has largely protected OPEC from the impact of world inflation."

Mr. Lichtblau said another qualification in the foundation's study is that all import prices are on a port of export basis. On a landed basis, he said, the index could conceivably be higher, but that is because the rapid increases in import purchases in most OPEC countries has engendered port congestion, adding to costs. Also, Mr. Lichtblau said, most military equipment purchases are excluded from the OPEC import price index.

Less Than 3%

With these qualifications, Mr. Lichtblau said, if the dollar purchasing power of the OPEC oil price established on Oct. 1, 1975, were to be preserved, the price would have to be raised less than 3 per cent. Based on the current benchmark price, that would mean an increase of about 31 cents a barrel, or less than 1 cent a gallon.

But Mr. Lichtblau said that if the first quarter of 1974, the period immediately following the exceptional prices increases by OPEC in late 1973, is used as a base, the composite price index of OPEC imports rose 25.8 per cent by the third quarter of 1976. This consists of a 22.5-per-cent increase to the third quarter of 1975, the time of the last price increase, plus the nearly 3-per-cent increase since then.

Government revenue on OPEC's benchmark crude oil, the Saudi light, so far has risen 18 per cent to $11 a barrel from $9.32 a barrel, over this entire period, Mr. Lichtblau said. Thus, on that basis, he said, a 7.8-per-cent oil price increase could be justified at this time. That would translate into an increase of about 90 cents a barrel, or slightly more than 2 cents a gallon.

OPPORTUNITIES IN U.S. REAL ESTATE
Atlanta based Robinson-Humphrey, members NYSE, offers you full line real estate expertise in fast growing southeastern U.S. Farm land, office buildings, shopping centers or raw land for future residential development are offered by our real estate department. Established in 1894, our reputation and our personnel are available for your investment needs.
The Robinson-Humphrey Co., Inc., 2 Peachtree Street, N.W. Atlanta, Georgia 30303.

Your castle in Spain
Selling one? Buying one? We've helped sell a few Spanish castles and German castles and French castles and a lot of other real estate as well.
Some of our readers buy castles, others buy more modest apartments. The thing they have in common is the fact that they can afford to buy and invest in real estate. And since they are international they can come to see it, and find time to live in it.
'International Real Estate' appears every Friday.
Contact our office in your country or write directly to:
Mr. Max FERRERO, I.H.T., 21 Rue de Berri, 75380 Paris Cedex 08.

For the best brief on Europe in Europe, read James Goldsborough.

Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or paid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

BOOKS

THE LONG TUNNEL

A Coal Miner's Journal

By Meade Arble. Atheneum. 239 pp. $8.95.

Reviewed by Anatole Broyard

THE space you are working in is 42 inches high. The 12 inches at the bottom is icy water, but after swinging a pick or shovel in a half crouch for a couple of hours, you finally have to kneel down in the wet, which further stiffens your already stiff joints. Sometimes the water has sulfur in it, which, when it inevitably gets inside your boots, burns the outer layer of skin off your feet. After a backbreaking eight hours' work, you may have a choice of crawling on your hands and knees through a half-mile of low tunnel or risking a ride on the conveyor belt. Sometimes the belt is moving fast, too fast for you to jump off if there's an obstruction ahead; sometimes it does not stop when you pull on the automatic brake

For Meade Arble, author of "The Long Tunnel," the job was bad enough, but he was only 34 and he knew it was not going to last for his whole active life. For others, it meant 30 or more years and an eventual retirement with "black lung." According to one of the safety inspectors, mining was the most dangerous occupation in the country and the mines Arble was working in were the worst, with regard to safety, in the United States. The statistics show that six times as many miners died per million-man shifts in the United States as in West Germany; four times as many as in Britain, and three times as many as in Poland. Each year, one out of 14 American miners was injured.

The roof could cave in or a circular section, like a plug, could fall on you. A cable catching fire could release poisonous fumes. Any one of a number of machines could seize you in its embrace if you were not alert. But these hazards were not as bad as the constant discomforts: the bolts in the roof scraping your back as you "walked in the low": the pain in your knees and lower spine which, many miners claimed, eventually had the effect of eliminating sexual desire.

Meade Arble is not a self-pitying crybaby. In "The Long Tunnel," he describes his various assignments with a most effective matter-of-factness, expressing relief, even gratitude, if he could stand up straight on a particular job or work in a warm, dry place. When two women are sent to work in the mine, he does not editorialize about it, but it is obvious in his neutral account that they cannot do the work. One of them is small and thin, assigned to a job that wears out even big, strong men. The other woman sits around and chats with her partner on a job, or sings country songs. While Arble does not mind working with them, some of the older men resent having to do most of the heavy work instead of sharing it.

The author of "The Long Tunnel" had gone to college in America and Europe, ending up as something of a dropout in Spain where he had lived with his wife's parents. Returning to America, he found himself broke, with a wife and two children and another on the way. He instinctively gravitated toward the small Pennsylvania mining town where he grew up as the son of the town's doctor. There was no other way to make $12,000 a year, so he went down into the mines, "just until he got back on his feet." In most cases, these were famous last words.

One has to admire Mr. Arble's restraint as he describes the trailer camp where he and his wife and three children lived. Their trailer was one of about 100 in the park. There was a bedroom at either end and the kitchen and living room were in the middle. The children's bedroom had no heat and the trailer was uninsulated. The baby's crib was wedged into the bathroom, which made washing rather difficult. Mr. Arble's evocation of the landscape is casual, but enough to fill one with horror: piles of "boney", which is waste from the mines, everywhere; a foggy, sulfurous haze; dead trees killed by sulfur fumes. Perhaps only an ex-hippy, as the author describes himself, could look at this landscape with anything resembling equanimity.

Mr. Arble's wife, Grada, liked to play bridge. He did not, so their social life was largely separate. He went to the miners' bars, danced and drank. He, too, found himself losing all desire for his young, attractive wife, but he could not tell whether it was because of the mysterious effects of "walking in the low" in the mine or because his wife always seemed to be wearing hair curlers.

While a mine with a 42-inch ceiling is not an ideal theater for the flourishing of personality, the author gives sharp thumbnail sketches of his fellow-workers, especially Zurko, a former football star in school who sees himself as a philosopher, poet and revolutionary, but who may be only a drunk with delusions of grandeur. Mr. Arble is especially good, too, on the old miners who are just a year or two away from their pensions and trying gamely to hang in there when every part of their body hurts.

Every time the author managed to pay his bills and get a few dollars the union would call a strike, or the company would shut down the mine because the lift or something else was broken. It began to look as if he would spend the rest of his life in "the long tunnel, crawling all the way," but as soon as he finally managed to draw even, he and his family loaded their life in his temperamental old car and took off. Among the things he had dug out down in the mine with a pick and shovel was a sense of who and what he was. With his hard-earned knowledge as his resumé, he intends to try his calloused hand at writing. If "The Long Tunnel" is any indication, he will not have to stash the baby in the bathroom any longer.

Anatole Broyard is a book reviewer for The New York Times.

NFL's Swann Reflects After 4th Concussion

TTSBURGH, Oct. 29 (UPI).—There some nagging questions about pro- ional football in the mind of the sburgh Steelers' flashiest receiver— hersome enough to make Lynn Swann there's a "50-50, one-to-one" chance l retire rather than sign a new con- ct when his current pact expires this r.

Swann said there are three major ngs that bother him about profes- al football—what he sees as increas- "extracurricular violence," political sions without benefit to the game the parochialism of a pro athlete's

Swann has had these kinds of doubts ore—at the University of Southern lifornia and during the most recent season, a time when any football yer contemplating training camp is ely to have second thoughts about career.

ut Swann said he has been second- ssing himself more since he suffered fourth concussion of his life in the elers' season opener against Oakland. Swann, 24, was the Steelers No. 1 ft choice in 1974. Last year, he led American Conference in the regular son with 11 touchdown catches. In mary's Super Bowl, he caught four ses for 161 yards, including the ning touchdown. He was an All-Pro t year.

"What happened to me only intensifies y feelings of football getting out of ntrol," Swann said. "Look what hap- ned to Terry Bradshaw [a neck in- y on a rough tackle by Cleveland's rkey Joe Jones], and the other things n see, like Isaac Curtis standing in e end zone after he scored a touch- wn and somebody comes out and d-cocks him. I mean he's already in, s a touchdown, he's doing his number like Billy (White Shoes) Johnson does his dance and the guy just comes up and nails him.

"What is that? is that a part of the game? Has that become a part of the game?"

Those are the kinds of questions Swann said come to him "when I'm home and I'm talking to friends and I'm wondering why I'm still going out there. Why?"

"Am I really in love with the game

'Is the money that good that I want to keep going out there and exposing myself to these dangers when nothing significant has been done to protect people? Especially when it seems this year that football seems to be getting somewhat out of control . . .'

or do I enjoy it that much, or is the money that good that I want to keep going out there and exposing myself to these dangers when nothing significant has been done to protect people? Especially when it seems this year that football seems to be getting somewhat out control as far as the violence in the game is concerned, the extracurricular contact as I call it at times."

And Swann reads with horror about arguments over NFL rules, the lawsuits over the draft.

"Everything is political to some extent, but I think football has gone beyond that necessary for it to be a good strong institution, a profitable business, entertainment," Swann said. ". . . I'm referring to all of football. Not just decisions on the fines [levied against Steelers and Raiders alike after

Lynn Swann

the game in which Swann was hurt], but the decisions everywhere else, the court cases, and the draft being illegal, people being political about rules because their team's composed of certain talent and can do certain things, so they can [get] a rule change on this or a rule change on that which would help their team. Those kind of politics."

"In college," Swann said, "football was never very political as it is now in professional football, so it was always fun, going to classes, you're always active, you're out meeting all types of people in university life and it was fantastic. Here, you're really more restricted to people who are playing the game because you spend so much time at the stadium and playing the game . . .

"Football is not a lifetime thing. It's a part-time thing. It's a part-time job. You can't play football forever. Even . . if you play 14 years and you do nothing else, you've wasted seven years, because you're only working for six months of the year . . .

'So Much More Out There'

"It depends on whether you want to ce that inactive. For me, it's like, hey, I've got other things I want to do, and I'm prepared to do those other things. And football is a good thing along the way, but there is just so much more out there."

Swann has a degree in public relations and, he said, "I've turned down job offers in P.R. I'd [also] like to get into broadcasting. I think I could have a good career in that if I could get started in it and get some work done."

Swann also has investments started in California and, he said, "I think I could make as much money or probably more money faster outside of football than I can in football."

And with fewer personal risks.

"Maybe I shouldn't be out there because another concussion could cause serious and permanent damage," he said. "I've had four concussions—one in college, two last year and one this year. So it's a decision you have to worry about."

United Press International.

Cleveland's Jim Brewer, left, takes rebound away from N.Y.'s John Gianelli Thursday.

NBA's Cavs End Knick Victories

RICHFIELD, Ohio, Oct. 28 (NYT).—Four games into the National Basketball Association's 31st season, the New York Knicks discovered they were not so perfect after all.

Coach Red Holzman's club, which had opened the season with three straight victories, was the victim of a 114-90 thrashing by the Cleveland Cavaliers last night.

The Knicks, not displaying the cohesion that was evident in the first three games, were outplayed by the Cavaliers in virtually every department. They were outrebounded, 52-41, outshot, 48 per cent to 39 per cent, and never got their running attack going. The Cavs broke the game open with a 31-17 second quarter.

"We played good in the first quarter . . . that's all," said Holzman, who was forced to operate without Walt Frazier at guard. Frazier, averaging 17.5 points a game, was still in Atlanta after the funeral of his 28-year-old sister.

McMillian's Poor Night

The one member of the Knicks who seemed to feel the effect of Frazier's absence the most was Jim McMillian at forward.

McMillian, who had been averaging 17 points and was shooting 51 per cent from the field, could not adjust to the guard combinations that involved Earl Monroe, Dennis Layton and Ticky Burden.

McMillian scored just one field goal in five attempts for 2 points. He was hounded all night by Bobby (Bingo) Smith, who led the Cavaliers with 23 points and 10 rebounds.

McMillian, a newcomer to the Knicks, said: "My poor performance tonight was a combination of things—the bad timing between me and the guards and the fact that Smith did play me tough."

In games reported by UPI:

Warriors 112, Trail Blazers 92

At Oakland, forward Rick Barry scored 13 of his game-high 34 points in the final period to give Golden State a 112-92 victory over Portland.

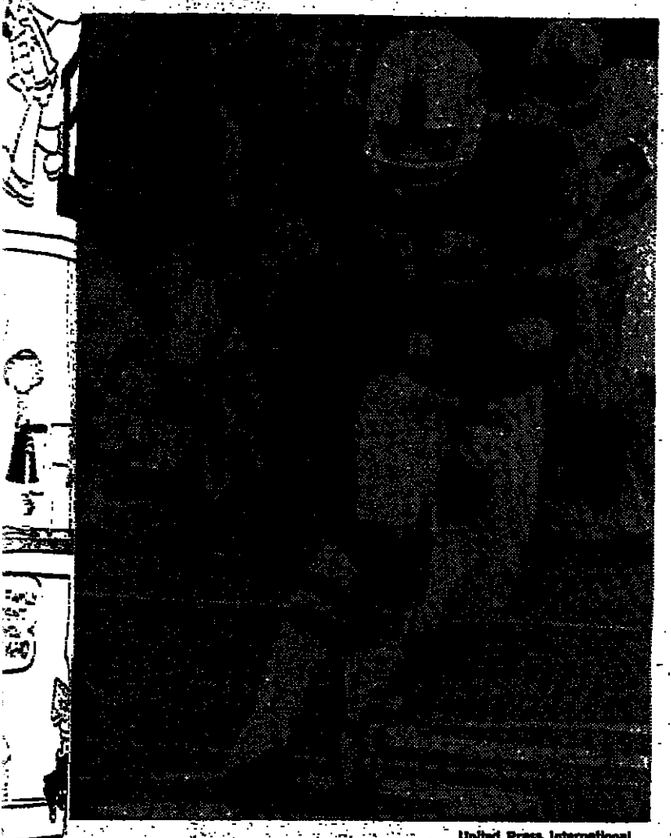
The triumph was the first of the season for Golden State following two losses. It was the Blazers' first loss after two victories.

Golden State held a slim 77-73 lead entering the fourth quarter, but dominated the final period for an easy victory. In addition to Barry's scoring, the Warriors received a big lift from reserve guard Charles Dudley, who finished with 19 points, four steals and a game-high 12 assists.

Nuggets 119, Bucks 100

At Denver, center Dan Issel scored 20 points in the first quarter and finished with a game-high 30 to lead Denver to a 119-100 victory over winless Milwaukee.

Issel, a six-year veteran who leads the Nuggets in scoring with a 28-point average this season, hit his first eight field-goal attempts before missing in the second quarter.



Celtics 112, Braves 105

At Hartford, Conn., Boston, led by Charlie Scott's 31 points, ran their season's record to 3-0 with a 112-105 victory over Buffalo.

The Celtics placed six players in double figures. The Braves played without All-Pro center Bob McAdoo, who is recovering from a back injury.

In addition to Scott's 31, Jo Jo White had 17, Kevin Stacom 16, Sidney Wicks and Dave Cowens 13 and Curtis Rowe 12.

Don Adams led the Braves' scoring with 26, while Adrian Dantley and Randy Smith each had 18.

United Press International.

IN THE OPEN—O. J. Simpson, the NFL's all-time No. 2 rusher, picking up yardage against the New England Patriots last weekend. His career 8,909 yards places him second to only Jim Brown, who rolled up 12,312 yards.

Bengals, Browns Battle for Lead

CINCINNATI, Oct. 29 (UPI).—The Cincinnati Bengals-Cleveland Browns clash Sunday will be more than just another chapter in the "battle of Ohio" saga—a division leadership is at stake.

The Bengals, rolling along this season as expected, lead the American Conference Central Division with a 5-2 record while the Browns, a surprise so far, are tied for second place with a 4-3 mark.

The game figures to be the biggest yet in the brief head coaching careers of Forrest Gregg and Bill Johnson.

"In terms of the division race, it has to be," said Gregg, who is in his second year of trying to rebuild the Browns.

Johnson, in his first year at the Bengals' helm, said: "This should be another real battle. We had a tough game with them in Cleveland early in the season and we were fortunate to win it."

That wild affair wound up 45-34.

The Browns haven't lost since, although their winning margins have been slim—topping Pittsburgh, 18-16, shading Atlanta, 20-17, and edging San Diego, 21-17.

Browns' quarterback Brian Sipe comes into this Sunday's game fresh from a dazzling performance against San Diego. The young, improving signal-caller broke Otto Graham's team record by completing 23 of 28 passes for 82 per cent. At one point, he hit 12 in a row to erase the mark of 11 held by George Ratterman and Milt Plum.

The following preview of the NFL weekend was prepared by William N. Wallace of The New York Times. Team records are in parentheses.

AMERICAN CONFERENCE

Cleveland at Cincinnati—Thanks to Sipe, the quarterback for whom no one had much regard, the Browns are now rolling. But the Bengals were encouraged by their decisive triumph over Houston. Favorite: Cincinnati by 11 points.

Jets (1-6-0) at Buffalo (2-5-0)—Mark the date. Richard Todd on Oct. 31 succeeded Joe Namath but no one knows as yet if a star is being hatched. Gary Marangi, who has been sharp in preseason games the last three summers, is the Bills' new quarterback, with Joe Ferguson gone for the season. Favorite: Buffalo by 12.

Denver (4-3-0) at Oakland (6-1-0)—The Raiders' six victories have come by a total margin of only 30 points, but they have a two-game lead in their division because the Broncos and Chargers seem unable to beat them. Favorite: Oakland by 8.

Kansas City (2-5-0) at Tampa Bay (0-7-0)—Quick, what team was it that lost all of its 14 games? Answer: No team has ever lost 14 games in the NFL, which isn't to say it will never happen. The Buccaneers have all the qualifications. Favorite: Kansas City by 6.

New England (5-2-0) at Miami (3-4-0)—Only Baltimore a year ago beat the Dolphins twice in the same season during Don Shula's seven campaigns in Miami. *The Patriots could do it too by* winning this game. They have not won in the Orange Bowl in 10 years. Dolphins' injury excuses have worn thin. Favorite: New England by 3.

San Diego (4-3-0) at Pittsburgh (3-4-0)—Whatever happened to Lynn Swann, the graceful receiver who was the most valuable player in the last Super Bowl? The Steelers are passing less, with Terry Bradshaw still out, and Swann is being covered more. He has yet to score. Chargers do poorly on defense, especially against the pass. Favorite: Pittsburgh by 12.

NATIONAL CONFERENCE

Dallas (5-1-0) at Washington (5-2-0)—Roger Staubach has a splint on his passing hand and has not thrown a pass this week. The replacement, Danny White, was the best in the World Football League at Memphis. Four other Cowboy regulars are hurt but the depth is there so it does not matter. George Allen won't tell who the Redskin quarterback will be but look for Bill Kilmer. Favorite: Dallas by 5.

Minnesota (6-0-1) at Chicago (3-4-0)—The Cowboys took the bite out of the Bears, who lost to the Vikings by a point three weeks ago. Fran Tarkenton, who sometimes leans to excess, claims his halfback, Chuck Foreman, is the world's greatest football player. Foreman has already gained 1,006 yards rushing and receiving. Favorite: Minnesota by 6.

San Francisco (6-1-0) at St. Louis (5-2-0)—It is probable that the winner will make the playoffs and the loser will not. "Our backs are to the wall," says Dan Dierdorf, the Cardinals' All-Pro offensive tackle. The team's strength, protecting the passer, negates the 49ers' big asset, pass rushing, and the St. Louis offense is far superior. Favorite: St. Louis by 8.

Green Bay (3-4-0) at Detroit (3-4-0)—Lynn Dickey, the Packer quarterback, has completed 50 of 77 pass attempts in the last three games and the team has *learned how to score. The Lions* are just about out of defensive linemen and running backs. Favorite: Detroit by 5.

New Orleans (2-5-0) at Atlanta (1-6-0)—Both sides are likely to try new quarterbacks. It would be Scott Hunter, once a regular at Green Bay, for the Falcons and Bobby Douglass, the big leftie once a regular at Chicago, for the Saints. New Orleans won the earlier game, 33-0, thanks to seven turnovers in their favor. No favorite.

Seattle (1-6-0) at Los Angeles (5-1-1)—The Seahawks coach, Jack Patera, denies that last week's victory has gone to their heads. For a change, the Rams have all three quarterbacks available, with Ron Jaworski the likely starter. John Cappelletti, who began the season as though he would run for 1,500 yards, has been eclipsed by Lawrence McCutcheon. Favorite: Los Angeles by 21.

Philadelphia (2-5-0) at Giants (0-7-0)—The Giants are the favorites, the worst insult the Eagles have taken lately. As for newly hired coaches in the NFL this season, the Lions won in Tommy Hudspeth's debut but the Bills' Jim Ringo and the Falcons' Pat Peppler have not yet experienced victory. Favorite: Giants by 3.

MONDAY NIGHT

Houston (4-3-0) at Baltimore (6-1-0)—The Oilers will be severely handicapped if neither of their adept but ailing wide receivers, Ken Burrough and Bill Johnson, can play. A lot of people think the Colts will play the Cowboys in the next Super Bowl. Favorite: Baltimore by 10.

Thoughts of a Cotton Bowl Bid Dominate in Clash of Texans

NEW YORK, Oct. 29 (UPI).—ure, Texas Tech has played in owl games before—the Sun Bowl 1972, the Gator Bowl in 1973, e Peach Bowl in 1974. But those re not the postseason games st the Red Raiders really de- re.

Texas Tech longs for the Cotton owl, which it never has won. course, the Red Raiders have en invited only once and that as so long ago, in 1939. Their pponent was St. Mary's of Cal- rnia.

Now, there is excitement in ubbock, Texas. The Red Raid- s, 5-0, and ranked No. 6 in the ation, are getting close to their al.

"There is a feeling among the ople of this town that they ant to go to the Cotton Bowl," exas Tech coach Steve Sloan ys. "That's what they are talk- g about. And whenever they do at, they get excited."

Obstacle in Longhorns

One of the biggest obstacles ocking Tech's goal is tomorrow's me against No. 17 Texas, which ows something about clearing path to the Cotton Bowl. The ngborns have been there 15 mes. Texas Tech has defeated exas only four times in 25 meet- gs and last year was routed the Longhorns, 42-18.

Tomorrow's game, however, is the Red Raiders' home field, here they beat Texas two years o, 26-3. Both teams, along with kansas, are 2-0 in the South- est Conference.

"It's probably the biggest game ve ever been in as a head ach," Sloan said. "And the way feel is that we have a good ance to win the game."

The Texas Tech offense, averg- ing 32 points a game, will be allenging a Longhorns defense at has allowed only 12 points contest. Texas's problem has en its offense, which has scored only 18 points a game.

Much of the Red Raiders' confidence this season comes from the success of running backs Larry Isaac and Billy Taylor, plus backup quarterback Rodney Allison, who is filling in for injured Tommy Duniven.

The Top Ten

Elsewhere, top-ranked Michigan (7-0), the nation's highest-scoring team, with a 43.9 average, faces its toughest test so far against Minnesota (5-2). No. 2 Pittsburgh (7-0) should not have trouble against Syracuse.

In other games involving the top 10-ranked teams, No. 3 UCLA visits Washington, fourth-ranked Southern California is host to California, fifth-ranked Maryland seeks its eighth victory without a loss against Kentucky, No. 7 Georgia faces No. 18 Cincinnati, eighth-ranked Ohio State plays Indiana, No. 9 Nebraska visits Kansas and No. 10 Missouri, following its upset victory over Nebraska last week, plays No. 15 Oklahoma State.

Borg Wins at Superstars

VICHY, France, Oct. 29 (UPI).—Sweden's Bjorn Borg turned his hand to sports other than tennis yesterday and today to win the 25,000-franc (about $5,000) first prize in France's first Superstars competition.

Borg, 20, better known for his two-handed backhand on the tennis courts, piled up 53 points in the competition here. He won in canoeing and in the 600-meter steeplechase.

The Superstars competition, imported from the United States, puts athletes through their paces in sports other than their own.

Olympic 110-meter hurdles champion Guy Drut of France was second with 45 points. He had five second places.

Third place went to Olympic 800 and 1,500 meters silver medalist Ivo van Damme of Belgium, who totaled 44 points, ahead of Welsh Rugby Union captain Garreth Edwards, fourth with 42.5.

The unofficial prize for the most entertaining performance went to French cycling star Raymond Poulidor, known affectionately as "Poui Poui," but he finished last with 3 points.

Dibbs and Smith Gain Semifinals In Paris Tennis

PARIS, Oct. 29 (IHT).—Top seed Eddie Dibbs of the United States defeated Italian Paolo Bertolucci, 7-6, 7-6, and Stan Smith outplayed fellow American Sherwood Stewart, 6-4, 6-2, today to qualify for the semifinals of the $50,000 Paris Open indoor Grand Prix.

Dibbs will play Smith and Chilean Jaime Fillol will face Britain's Mark Cox in tomorrow's semifinals.

Dibbs, 25, steadily wore Bertolucci down with his dogged baseline play. But the Italian Davis Cup player took the No. 1 seed to two tiebreaks before he clinched it. Dibbs won the tiebreaks 7-2 and 7-3.

Smith, 29, turned on some attractive tennis for 2,000 spectators at the Stade Pierre de Coubertin to dismiss 30-year-old Stewart.

Americans Out in Vienna

VIENNA, Oct. 29 (AP).—The last Americans were ousted today in the Grand Prix tournament here as fifth-seeded Vitas Gerulaitis and third-seeded Arthur Ashe were eliminated in quarterfinal play.

Ove Bengtson, a tall Swede with a steady serve and great reach, upset Gerulaitis, winner of the tournament here two years ago, in 90 minutes, 7-6, 2-6, 6-3.

And Poland's Wojtek Fibak, dubbed the "newcomer of the year," later took the same time to subdue an unconvincing Ashe, 6-2, 1-5, 6-1.

NBA Results

Thursday's Games

Golden State 112, Portland 92 (Barry 34, Smith 20; Walton 21, Holland 19).

Boston 112, Buffalo 105 (Scott 31, Stacom 16; Adams 28, Smith 18).

Cleveland 114, New York Knicks 90 (Smith 23, Russell 18; Layton 34, Monroe 22).

Denver 119, Milwaukee 100 (Thompson 24, Issel 30; Bridgeman 19, Buckner 18).

NHL Results

Thursday's Games

Toronto 3, Detroit 1 (D. Williams, Neely, Slittler; Grant).

Philadelphia 3, Pittsburgh 0 (Leach, Bridgman, Clarke).

New York Islanders 5, St. Louis 2 (J. Potvin, Drouin, Hart, Nystrom, Gillies; Brechkosy; Macmillan).

Los Angeles 5, Atlanta 1 (Goring, Kozak, Wilson, Dionne, Murphy; Simpson).

Vancouver 2, Cleveland 1 (Blight, Ververgaert, Spruce; Klassen).

WHA Results

Thursday's Games

Houston 1, Minnesota 1 (Larway; Ward).

Edmonton 1, Quebec 3 (Hamilton, Sheehy, Sather, Peacock; Marlin, Nistico, Nedomansky).

Many U.S. Racetracks Limp Toward Last Call

By Gerald Strine

WASHINGTON, Oct. 29 (WP).—An ad in the Oct. 21 Daily Racing Form reads:

"Horsemen! The city of Hialeah, in conjunction with John J. Burnett, has undertaken the task of rescuing America's most beautiful racetrack . . . but we need help... Of the $9,000,000 needed, several banks have committed $5,500,000.

"We need banks, or individuals, willing to participate, in increments of $500,000 or more, to raise the remaining $3,500,000 immediately. For details, write or call Mayor Dale C. Bennett, city of Hialeah, 501 Palm Ave., Hialeah, Fla. 33011. Office (305) 885-153. Home (305) 821-6142."

Hialeah racecourse, for decades one of the most fashionable sporting spots in America, is, like so many racetracks in the country, fighting for survival.

"We've had a few calls," said Mayor Bennett, "but people are saying it was a wasted effort to draw attention. They tell me bankers don't read the Daily Racing Form, and that all the horsemen are broke."

Hialeah's plight is becoming commonplace as more and more tracks throughout the United States stagger from increased financial burdens.

For example:

• Naragansett Park and Lincoln Downs are closed. The two Rhode Island tracks supposedly have been shut down for parimutuel alteration, which may or may not be forthcoming.

• Santa Fe Downs, Inc., has declared bankruptcy. "The track, built in 1971, cost $1,400,000 more than anticipated," said Mark McFeeley, the trustee, from his New Mexico office. "The corporation took this office to hold off creditors but we believe it will reopen. We have one bid from $3,400,000 to $4,150,000."

• The Atlantic City (N.J.) track was forced to shift to major night racing this summer in an attempt to survive. The result was the same, for the sixth straight year: losses.

• Delaware Park, also one of racing's showplaces, has been saved only by the Sabbath, but it's questionable as to how much longer the Stanton (Del.) plant can continue on the faith of Sunday bettors alone.

• Yonkers Raceway, once a tremendously successful harness-racing track north of New York City, is suffering sharply from the success of the New Meadowlands track in northern New Jersey.

• The Shenandoah Downs and Charles Town tracks are being purchased for $18,500,000 by a group of Midwest investment bankers. Once considered "West Virginia gold mines," Shenandoah was closed last year and Charles Town is limping along.

• The only thoroughbred tracks in New Hampshire and Vermont also are struggling. They are Rockingham Park, in Salem, N.H., and Green Mountain Park, near Pownal, Vt.

• Maryland's Laurel racecourse reportedly is for sale, although track officials deny it.

• Keystone, the relatively new track north of Philadelphia, is in a financial bind.

• Scarborough Downs, Maine's only thoroughbred track, has closed.

Why the financial disasters? There are no more racing dates remaining on the calendar; no more extra races to be tacked onto the daily programs; no more gimmicks left with which to attract fans, no more exotic bets left with which to lighten the bettors' pocketbooks.

Neither are the nation's horseplayers assisted by increased taxes taken from the pari-mutuel pools by the states for revenue.

"Inflation has completely caught up with the racetrack business," Laurel president John Schapiro said in a recent interview. "We're all in a bind... and there's no place else to go."

The Debates Must Go

HOLLYWOOD—The TV networks are starting to cancel their fall shows that didn't make it. One of the first to go will be the presidential debates. Television executives from all networks have decided the show just doesn't have enough interest to continue it through the rest of the year.

Buchwald

They called in the TV agents for Jimmy Carter and President Ford to break the news to them.

The programming director of CBS said, "We're sorry, boys, but the debates have to go."

"But the ratings have been fantastic," Ford's agent protested.

"They were good," a man from NBC said, "but the problem is that in spite of the ratings we couldn't get a sponsor. Nobody would buy it for a series."

The ABC programming chief said: "It just wasn't playing in Peoria. People don't want to hear about unemployment, inflation and wheat embargoes. They want entertainment. We had hopes for this show when we put it on the air, but we didn't know it was going to be so downbeat."

* * *

The Ford man said, "That wasn't our fault. Carter was the one who made the debates downbeat. He kept talking about what a mess the tax system was, how the poor and the old weren't getting anything out of the government and how the cities were being ignored by the Republicans. Ford was upbeat. He talked about the Fourth of July and how his administration had solved the economic and environmental problems of the country. Play the tapes back and you'll see that Ford made it a happy show, but Carter kept throwing cold water on it."

The Carter man said, "Oh yeh? All Ford kept doing during the debates was to spout a lot of figures that put half the country to sleep. Carter was the one who put life into the show and kept people on the edge of their seats."

The CBS programming chief said. "There is no sense blaming each other. The format wasn't right to start with. You can't have two wooden barrels and saying the same thing week after week and expect to hold the audience."

* * *

"We'll change the format," the Ford man said. "We'll build a new set and have Betty Ford and Rosalynn Carter living next door to each other. They'll be good friends and their husbands will always be getting into trouble like Jackie Gleason and Art Carney did on 'The Honeymooners.'"

The ABC man said, "Jerry Ford and Jimmy Carter are not Jackie Gleason and Art Carney."

Carter's agent said, "We'll add the Carter kids and the Ford kids to the show. They could always be getting into fights with each other and Amy Carter could keep bugging Jerry Ford and driving him crazy like 'Dennis the Menace.'"

Ford's agent said, "We'll make Jack Ford into another 'Fonzi' and Susan Ford could play a 'Laverne' character."

The Carter man said, "Ford could be an Archie Bunker."

"Wait a minute," the Ford man said. "The President is not going to be Archie Bunker. I think Jimmy Carter should play a character like Redd Fox on 'Sanford and Son.'"

Carter's agent said, "You're out of your mind."

The NBC programming chief said, "We're sorry, gentlemen. It just won't work. We can buy Betty and Rosalynn and the Ford and Carter kids. But Jerry and Jimmy are just not up to playing situation comedy. The show has to go."

"But what do we tell our clients? They put everything they had in these debates."

The CBS man said, "Tell them that we may have a show for the one who wins the presidential election."

"What kind of a show?"

"We'll let him do a press conference in the White House. But not on a regular basis."

Paris Gasoline Prices

PARIS, Oct. 29 (AP).—Gasoline prices will rise 15 per cent in France at midnight Monday.

Mary Blume

In America, money is something that will grow. In France, it is something to hold on to. Americans want money to move; the French are afraid it will move out of their grasp.

The Meaning of Money in France

PARIS (IHT).—The Wall Street Journal *may be forgiven—although not*, apparently, by the French government—for suggesting that France's new anti-inflation plan will, to the contrary, increase the rate of inflation. The Wall Street Journal should be forgiven because no economic theory that makes sense elsewhere can be applied to France, where money is a different substance from anywhere else.

One can, of course, gibe that the French franc is alive and well and living in Switzerland, but the subject under discussion is not what the French do with their money so much as what their money means to them.

It means a lot. The French say Americans are always talking about money. It could with equal truth be said that the French are always thinking about it. The materialism of each country is different. Each French franc, each centime, seems to have a palpable existence. In America, money has a more abstract quality: It is thought of in terms of what it will buy. A man will be said in the United States to be worth x amount of dollars; in French one says "his surface" is x amount of francs, a phrase dating back to the days when wealth was measured in acres.

The American phrase "She looks like a million dollars" makes no sense to the French, although they rightly find it repellent. In America, money is something that will grow. In France, it is something to hold on to. Americans want money to move; the French are afraid it will move out of their grasp. Americans invest; the French tuck away. Wars and financial crises have made the ideal French investment a gold bar buried on a piece of one's own land; there have been too many property busts for land in the United States to have the absolute value it has here, and Americans are not salting away gold bars although they do invest in gold-mine shares.

A French money manager, asked if he advised his clients to invest in French equities, replied, "Almost never." Americans boast about their salaries and investments. The Frenchman, remarks a Paris banker, would never boast of having made a killing, for it would let the world know he had money.

There is nothing more private than money. Singer Juliette Gréco was once interviewed at length on her love life. When the interviewer asked how much she earned, she bridled. "Some things," she said, "are private."

In France, the notion of money is invested with the anxiety of impermanence, a fear that it will be taken away. Gertrude Stein wrote, "Anyway the French people never take money very seriously, they save it certainly, they hoard it very carefully but they know really that it has no very great permanence. That is the reason they all want a place in the country."

The French view of money seems even to affect the French seasons. The autumn, a rich and lush time in other places, is crabbed and pinched here because it is tax time and school-fee time and the time when the cost of having lived it up on summer holiday catches up. While in New York and London, September and October mark the crackling start of a new season, here it is known as the *rentrée*, the return from vacation, the return to grim real life, a return made even more numbing this year by Prime Minister Raymond Barre's belt-tightening anti-inflation plan.

The Barre plan and its permutations have made this autumn especially morose and the subject of money even more overbearing than usual. The lively leftist weekly Le Nouvel Observateur (from which the above anecdote about Juliette Gréco was taken) has brought a certain freshness to the subject with a three-part series, "La Fortune des Français," directed by staff journalist Josette Alia (salary 9,000 francs per month).

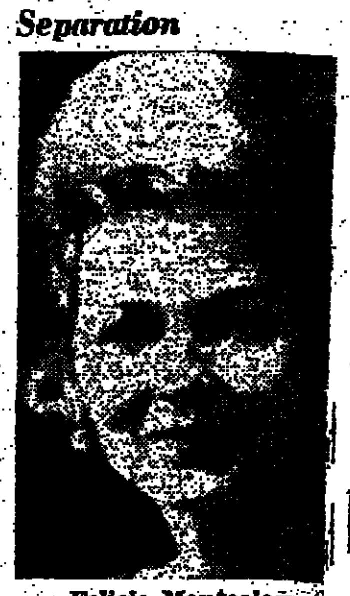
The last article in the series appears this weekend and is centered on the proposed wealth tax. Nouvel Observateur polls have indicated that a majority of the population favors such a tax—possibly, Josette Alia suggests, because they think it will reduce income taxes.

The first article in the series sold out immediately, for in it the journalists somehow persuaded France's leading political figures, from Gaullist to Communist, to list their assets (or *patrimoine* in French, a much richer-sounding word suggesting the accumulations of the years). As may be expected, the political leaders tumbled all over each other to show how little they possess.

In the second part of the series, the *magazine asked, is the French attitude to* money different from other people's? Yes. Quoting an OECD report, the introductory article notes that France is the only country to combine republican egalitarianism with the utter inviolability of the strongbox.

Avarice is found to be peculiarly French and is traced by sociologist Jean-Paul Aron in the Nouvel Observateur to the Revolution, when the peasant, who had been subservient to the landowner and the church, suddenly found himself free but still attached to his ancient reflex of hiding his possessions for fear that his masters might seize them. Even when the peasant became in time a salaried bourgeois, this atavism remained.

"Avarice," Mr. Aron continues, "is the contrary of exchanging and circulating wealth; it is accumulation, pinning down. This avarice is the perfect explanation of an economy that is based on the value of real property, the earth."



The earth, like gold, is infinitely reassuring, according to another contributor to the series, psychiatrist René Held. A miser, he adds, is still at the anal stage of development and he is likely to suffer from constipation.

Dr. Held's remarks make a rather jarring detail of the Barre anti-inflation plan fall into place. At the same time as major measures, it was announced that the government health service would no longer reimburse citizens for the purchase of laxatives. Why such a detail at such a time, one wondered. Dr. Held's theory makes the reason clear. The government is encouraging avarice, with its attendant constipation, as part of its tightening measures on consumer spending.

The Wall Street Journal thinks, of course, that money should be encouraged to circulate freely instead of being blocked up, but then it is not for them or for us to try to change the French. The Barre plan may lead to an explosion or it may be giving the French what they secretly want. To quote again from Gertrude Stein on the French attitude to money:

"Money to spend is not very welcome, if you have it and you try to spend it, well spending money is an anxiety, saving money is a comfort and a pleasure, economy is not a duty it is a comfort, avarice is an excitement, but spending money is nothing, money spent is money nonexistent, money saved is money realized..."

PEOPLE: *Bernsteins Begin Trial Separation*

Felicia Montealegre
... hope to reconc

Felicia Montealegre, a Chilean-born actress, has announced that she and her husband, conductor **Leonard Bernstein**, have begun a trial separation but "hope to reconcile." The couple married in 1951 and have two daughters and a son, aged from 14 to 23. Associates of the Bernsteins said that the decision had evidently been made since Bernstein's Oct. 12 departure for Europe with the New York Philharmonic.

* * *

John Ehrlichman, one of former President Richard Nixon's top aides, Thursday voluntarily began serving his Watergate and "plumbers" sentences in Safford, Ariz. He will continue to press appeals of his convictions while in the minimum-security prison camp. Ehrlichman went to jail at his own request, evidently preferring not to exercise his right to remain on the outside until the Supreme Court has ruled. The Safford camp has 250 inmates, most of them either drug offenders or Mexican nationals convicted of entering the United States illegally.

* * *

Telephone fraud charges against actor **Robert Cummings** were dismissed Thursday by the Washington Supreme Court. The charges were dismissed because they were improperly filed.

* * *

Fourteen American high school students and the three leaders of their group were rescued early Friday morning after spending the night near the top of Mount Snowdon, the highest peak in Wales. The students, all children of U.S. Air Force servicemen stationed at Bentwaters, England, were on a weeklong wilderness-skills outing. Climbing the 3,560-foot mountain was part of the exercise. "Everybody is fine," said one of the leaders, who refused to give his name. "We've been up for 30 hours. We applied everything we learned and it worked." The group will continue its excursion.

* * *

A World War I ambulance driver, **Kenneth Jones** of Milwaukee, Ore., has been awarded his Purple Heart, 58 years after he was wounded in France. "There aren't too many of us left," he declared. "I'm very pleased." Jones, now 84, worked for the Postal Service and Bureau of Customs before retiring 1959.

* * *

Las Vegas oddsmaker **Jim (the Greek) Snyder** said Thursday that it's **Jimmy Carter** (... 5) over **President Ford**.

* * *

An unemployed test pilot built his own F-104 Starfighter and then broke the world speed record for its class is going to try to break the altitude record. **Darryl Greenamyer**, 40, of Los Angeles, spent 10 years building the Starfighter. He beat the 15-year-old 903-mph record on Oct. 2, flying 1,100 miles an hour at an altitude of 100 feet. Next summer, he's going to try for an altitude of 123,000 feet—the record is 118,000.

* * *

The conductor of Queen Elizabeth's favorite military band has vowed to clear his name after being dismissed from the British Army for keeping money gained through unauthorized performances. **Maj. Peter Parkes** was dismissed Thursday after a court-martial in London. The former conductor of the Grenadier Guards Brass Band is planning an appeal. Proceeds from private appearances ("nalls" are supposed to be turned over to the regimental fund.

Tomorrow's Election Almost Even

...rd Has Narrowed the Lead ...eld by Carter, Polls Indicate

By David S. Broder

WASHINGTON, Oct. 31 (WP).—President Ford has battled past the presidential campaign finish...inds an almost even chance of ...eying Jimmy Carter a long-...ispated victory, a final state-by-state roundup by The Washington Post indicates.

The survey indicates that Mr. ...arter is favored to carry 18 ...ates and the District of ...lumbia with 214 electoral votes, ...ile Mr. Ford is favored in 24 ...tes with 197 votes.

Eight other states with 127

A state-by-state forecast on Tuesday's vote, Page 2.

...ectoral votes, are so closely con...sted that neither candidate can ...im an edge. Victory requires ...70 Electoral College votes.

In a Harris poll taken for ABC ...ews, Mr. Ford has pulled to ...thin 1 percentage point of Mr. ...arter. The poll, released Friday, ...ave Mr. Carter 45 per cent to ...4 per cent for Mr. Ford. Former ...en. Eugene McCarthy received ...per cent, and 7 per cent was ...ndecided.

A New York Times-CBS poll ...eased last night gave Mr. Car...a slight lead, but it did not ...ve total figures. It said Mr. ...arter's lead was within the 2.5-...r-cent margin of error and that ...argin could put Mr. Ford ahead. The Times-CBS poll showed the ...gest gains for Mr. Ford among ...dependent voters, but noted ...at 10 per cent of those ...erviewed were undecided.

Final newspaper polls published today indicate the rivals are less than 2 points apart in such key states as Illinois, Iowa and Michigan — with Mr. McCarthy, who is on the ballot in 30 states, holding enough votes to tip the balance. Private soundings say the race will be just as close in Pennsylvania and Texas. Those states, plus Mississippi, South Carolina and South Dakota, which are also listed as toss-ups in this survey, could hand the election to either man.

Reports from political correspondents in all 50 states, plus checks with Republican and Democratic officials and the Ford and Carter staffs, point to a slow erosion of support from Mr. Carter in the campaign's closing days in most—but not all—the closely contested states.

In Michigan and Ohio, Mr. Carter's support has firmed in the last few days. Mr. Ford is no longer certain of carrying his home state of Michigan, and Ohio—which has gone Democratic only once in the last six presidential elections—has a slight tilt in Mr. Carter's direction.

California and New Jersey have moved the other way, and are now listed as leaning toward Mr. Ford. New York—where the President is campaigning today—may have seen a slight gain for Mr. Ford, but not enough to overcome Mr. Carter's early lead.

Five Needed

Thus, of the big eight states, Mr. Ford and Mr. Carter are each leading in two, with the other four rated as toss-ups. Republican strategists have always calculated—and this survey confirms—that Mr. Ford would need to win five of the big eight states to have even a narrow electoral majority.

Thus, if Mr. Carter is able to win two of the four toss-up states—Illinois, Michigan, Pennsylvania and Texas—he would probably take the presidency.

The closeness of the contest in its final days measures an extraordinary degree of voter resistance to the former Georgia governor, who came out of the Democratic convention last July as a prohibitive favorite for the White House and had a 15-point lead over Mr. Ford when the campaign began on Sept. 6.

That fact is highlighted by the survey finding that the Democrats as a party stand to do very well in the Senate, House and governors' elections around the country.

'Political Surprise'

While Mr. Carter is struggling to prevent Mr. Ford from achieving what the President has said would be "the political surprise of the century," the Democratic party is likely to cement the "Watergate" election year gains of 1974 into a continued domination of both houses of Congress.

The survey indicated that the Democrats, who gained 43 House seats in 1974, stand to lose no more than 15 seats this year—and could, with some breaks, retain their present 290-to-145 majority.

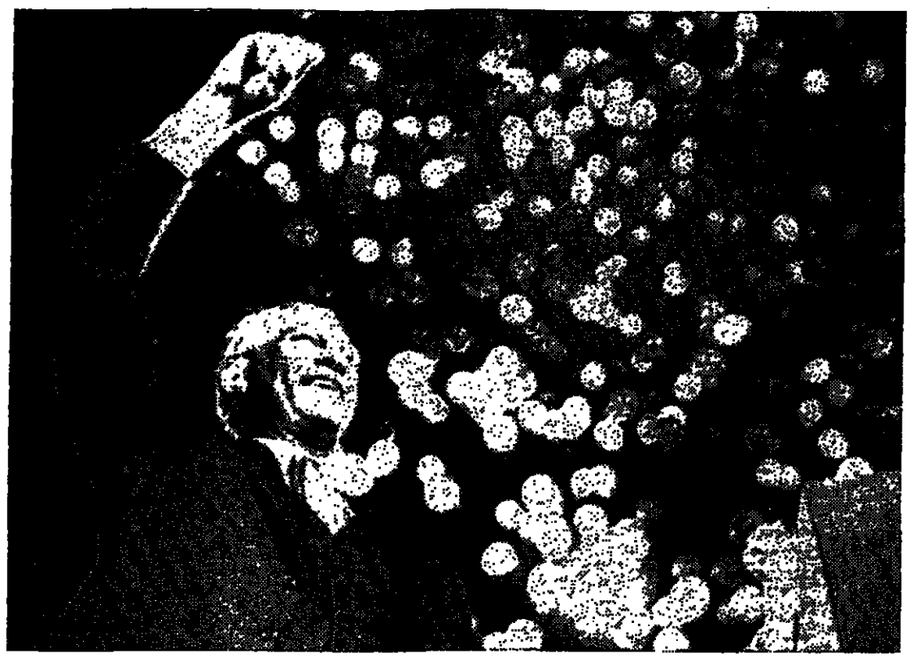
Of the 74 freshman Democratic House members seeking re-election, only 14 are now viewed as being in serious jeopardy.

In the Senate, the prospect is that the Democrats may actually add a seat or two to their present 61-to-38 margin. (Independent Harry Byrd jr. of Virginia, favored for re-election, caucuses with the Democrats).

Hawaii, Maryland

Democrats are favored to take Republican-held seats in Arizona, Hawaii, Maryland, Nebraska, New York and Ohio, while Republicans are now reported leading for Democratic-held seats in Indiana, Missouri, New Mexico, Rhode Island and Utah.

There are six toss-up races, three now held by each of the parties: California, Michigan, Pennsylvania, Tennessee, Vermont and Wyoming.



If all those went Democratic, the Democrats would have 65 senators; if they all went Republican, there would still be 60 Democrats left.

The most endangered incumbents in the Senate races are Democrats Vance Hartke of Indiana, Joseph Montoya of New Mexico, Frank Moss of Utah, Gale

On Final Campaign Drive

Ford Asks Prayers—Plus Ballots

By Edward Walsh

HOUSTON, Oct. 31 (WP).—President Ford, his voice growing hoarse after seven days on the road, began his final campaign drive this weekend with an appeal that the American people confirm him in the office he has held for more than two years without an election mandate.

Mr. Ford, with spirits remaining high in the last days of campaigning, also said "We're going to win and win overwhelmingly" on Tuesday.

Addressing about 7,000 persons yesterday in a parking lot outside the Houston Music Theater, the President evoked memories of the day he succeeded Richard Nixon, contrasting the state of the nation then and now.

"America has made an incredible comeback in the last 26 months," Mr. Ford said, adding:

"Yes, as I said on that day, Aug. 9, 1974, I had not been confirmed by your ballots, but I have since been supported by your prayers. And now I ask you that on Tuesday, Nov. 2, to not only support me by your prayers, but to support me by your ballots."

The crowd, which grew restless waiting for Mr. Ford as a succession of high school bands played, was somewhat disappointing, given the sunny weather and location of the rally in a heavily Republican area of southwestern Houston.

But Mr. Ford's campaign strategists continued to insist that their latest polls showed the President had inched ahead of Democratic nominee Jimmy Carter in Texas, one of eight crucial large states.

After taping a statewide television program for Texas, the President left Houston, nearing the end of a 10-day campaign swing that has taken him 14,000

Assails 'Last-Minute Promises'

Carter Decries Ford's Tax 'Tricks'

By Helen Dewar

NEW ORLEANS, Oct. 31 (WP).—Jimmy Carter, his spirits buoyed by increasingly large and friendly crowds, accused President Ford yesterday of "last-minute political tricks and promises" in pledging to reduce taxes.

The Democratic presidential nominee, who stopped short of making such a promise himself early last week, charged at a huge rally in the French Quarter that Mr. Ford's proposed $10-billion income tax cut would simply ease the tax burden of the wealthy.

With polls pointing to an increasingly tighter election on Tuesday, Mr. Carter once again latched onto his applause-getting theme that only the wealthy stand to gain from continuation of Republican leadership.

The $10 billion that Mr. Ford proposes to cut from income taxes would be offset by resorting to other, "regressive" tax mesures that hit the poor harder than the rich, principally higher Social Security payroll taxes, Mr. Carter said.

Moreover, the Ford plan contemplates an eventual $20-billion tax cut "boondoggle" for corporations and the "very wealthy," said Mr. Carter, asserting that it would be financed by cuts in assistance to states and local governments and would therefore contribute to higher local property taxes.

"It's important that the people realize that the longer we have the Republicans in office, the worse off the American family is," Mr. Carter said. "The American people are tired of last-minute political tricks and promises. We've had too many promises. We've had too few deliveries on promises."

Thus, Mr. Carter attempted to turn the tables on Mr. Ford, who has been accusing the Democratic candidate of promising more than he can deliver.

Mr. Carter appeared relaxed as he lashed out at Republican economic policies at a big tent rally in Tulsa, Okla., before going to New Orleans.

Late in the day, emboldened by

Christians Snag Beirut Meeting Of Rival Forces

BEIRUT, Oct. 31 (NYT).—A meeting of military commanders of rival factions in the Lebanese crisis failed to materialize today as rightist Christian leaders clearly indicated the Arab peace plan for Lebanon could not be fulfilled before the arrival of an Arab deterrent force.

The meeting of rightist, leftist and Palestinian representatives was proposed by Gen. Mohammed Hassan Ghoneim, the Egyptian commander of the small Arab peace-keeping force already here. At first, Christian commanders objected to the venue of the conferences, a hotel in Moslem-held west Beirut proposed by Gen. Ghoneim. Later they said the Egyptian general was no longer empowered to bring about an end to the 18-month-old civil war.

The 2,300-man force under Gen. Ghoneim came here four months ago merely to separate the combatants. Two Arab summit conferences held in October expanded the force and gave it additional powers. Renamed the "deterrent force," it was also placed under the direct and personal orders of Lebanese President Elias Sarkis.

The rightists have attached special significance to the announcement that the Syrians will provide the majority of the proposed 30,000-man force. Although Syrian-rightist relations are not as good as they used to be, the Christians have shown that they preferred Syrian troops to soldiers from other Arab countries.

Karim Pakradouni, a member of the Politboro of the Phalange party, Lebanon's principal Christian paramilitary organization, was quoted in the press here today as saying:

"Even if the conference [proposed by Gen. Ghoneim] takes place, its decisions will not be executed. Gen. Ghoneim is the commander of peace forces and not commander of the new deterrent force The proposed timetable for reopening highways and withdrawing combatants cannot be fulfilled before the arrival by the end of this week of the Arab forces of which the Syrians will comprise the majority."

Maroun Helou, a leader in the National Liberal party, the second-largest rightist grouping, said Arab summit conferences have replaced Gen. Ghoneim by President Sarkis as commander of the Arab forces in Lebanon.

Informed observers found significance in Mr. Pakradouni's remark that the deterrent force with Syrians forming its bulk will begin to function by the end of this week. Mr. Pakradouni was a member in a rightist delegation that held talks in Damascus during the last few days.

Troops Inspected

Ten thousand Syrian soldiers were reported to be concentrated in the Lebanese mountains. They were inspected yesterday by Maj. Gen. Mustafa Tlas, the Syrian defense minister, and Vice-Air Marshal Naji Jamil, the air force commander

The state-controlled radio in Damascus quoted the two officers as telling the troops that henceforth they will act in an Arab capacity to bring peace to Lebanon.

Until recently, these troops acted as a unilateral Syrian force and drove Palestinian guerrillas and their Lebanese leftist allies out of the mountains east and northeast of here. The guerrillas were reported to have subsequently moved the majority of their forces to south Lebanon not far from the border with Israel. There, they were reported to have received the blessing and assistance of the Syrians.

Arab league secretary-general Mahmoud Riad was reported to have sent urgent messages to certain Arab countries to speed up the dispatch of forces to Lebanon.

There were sporadic exchanges of gun and mortar fire on Beirut's front lines and the southern suburbs today.

Britain Faces Pressure at Geneva Talks

A More Active Role Expected on Rhodesia

By Bernard Weinraub

GENEVA, Oct. 31 (NYT).—The United States is convinced that Britain must play a pivotal role in the transition to black majority rule in Rhodesia or face an escalation of the guerrilla war there, according to well-placed diplomatic sources.

Despite Britain's insistence, at the Geneva conference on Rhodesia, that it will not accept responsibility for running an interim government in Rhodesia, U.S. officials expect London to face the option of acceding to African demands and taking a powerful role in the transfer of power or seeing the collapse of the current meeting and a rapid increase of warfare.

The U.S. position reinforces the view of the four African nationalist delegations who have gathered in Geneva with Prime Minister Ian Smith of Rhodesia and Ivor Richard, Britain's ambassador to the United Nations who is presiding at the conference. The meeting follows Mr. Smith's acceptance of a plan advanced by Secretary of State Henry Kissinger for the creation of an interim biracial government that would set up, within two years, a black majority government in the nation of 270,000 whites and 5 million blacks.

U.S. Aide Arrives

Meanwhile, U.S. Under Secretary of State William Schaufele arrived here yesterday to join in behind-the-scenes talks at the conference. At the airport, Mr. Schaufele said he would act as a contact point between the conference and Mr. Kissinger.

Current discussion here among diplomats and delegates centers on a British figure serving as a governor in the interim period or as chairman of the Council of State, part of the two-tier temporary government. Mr. Smith has called this "the supreme body," which will appoint a council of ministers who will have executive responsibility over government departments.

Should the British appoint a Cabinet official as governor, sources say, he would serve as the arbiter of disagreements within the biracial government and play an important role in the drafting of a new Rhodesian constitution.

Mr. Richard has vehemently rejected a significant British role in the interim government, and his associates say privately that it is "an absurdity to accept responsibility without power."

African, U.S. View

The Africans publicly, and the Americans privately, disagree. They say that Britain, as the colonial power in Rhodesia since the 1890s, bears responsibility for the territory, despite Mr. Smith's breakaway from Britain in 1965 rather than accept majority rule. The nationalists insist that only Britain can guarantee a transfer of power and thwart any prospect

(Continued on Page 2, Col. 7)

Kissinger's Aides Sure He'll Stay At Least Two Years if Ford Wins

By Bernard Gwertzman

WASHINGTON, Oct. 31 (NYT).—Henry Kissinger's closest aides say they are virtually certain that if President Ford wins Tuesday's election, Mr. Kissinger will agree to remain at least two more years as secretary of state.

Mr. Ford has publicly and privately informed Mr. Kissinger that he wants him to stay in office, and Mr. Kissinger's associates say that he seems as eager as ever to continue his African and Middle East diplomacy, to contact the new Chinese leaders, and negotiate an arms control accord with the Russians.

So far, however, Mr. Kissinger has kept his plans to himself and has sometimes appeared to enjoy teasing his associates and reporters who try to extract a flat answer from him.

If Jimmy Carter wins, Mr. Kissinger will begin looking over the million-dollar offers received from publishers for his memoirs, will probably remain in Washington for the near future, and possibly consider some "special relationship" with Harvard that would allow him to return in the future in some capacity other than as an ordinary professor.

Mr. Kissinger's future plans have become one of the livelier topics of conversation in Washington.

But Mr. Kissinger, who has steadfastly refused to state what he will do before the elections are over, has seemed amused by the speculation.

No news conference passes without his being asked his plans, and he usually replies in a mixture of jest and seriousness.

But in private talks with friends and colleagues Mr. Kissinger, who earlier in the year seemed determined, no matter what, to leave office, has talked of the future in a way that suggests he is more than willing to stay.

...EC Agrees on Fishing Limit ...f 200 Miles, Avoids Crisis

By David Haworth

THE HAGUE, Oct. 31 (IHT).—A collective 200-mile fishing ...it will be declared by the ...mmon Market Jan. 1, it was ...ded here over the weekend by ...reign ministers of the European ...nomic Community.

They also agreed on mandates ...at allow negotiations with Ice...nd to replace existing arrange...ents between Britain and Ice...nd that ended the "cod war." The current agreement expires ...n. 1. Urgent negotiations for ...w terms will begin between ...e European Commission and ...landic representatives in Brus...s Wednesday.

A threatened crisis within the EEC has, therefore, been avoided. The British were insisting that, unless the EEC was prepared to have a common negotiating mandate, they would have to conclude a bilateral deal with Iceland that would have prevented a common fishing policy.

Irish Demands

Two weeks ago, the Council of Ministers was deadlocked over the mandates issue because the Irish minister, Garret FitzGerald, insisted that adequate safeguards for Irish in-shore fishermen were a precondition for his country's agreement.

Yesterday, he won such safeguards, which included a promise that the EEC would protect the growth of the Irish fishing industry at a time when other European countries may have to cut back their fishing industries in the interests of fish-stocks preservation around the Continental Shelf.

"This is a completely successful outcome from our point of view," Mr. FitzGerald said at a news conference. "We have made no concessions at all on our demand for a 50-mile exclusive zone round our coasts."

The British foreign secretary, Anthony Crosland, also expressed satisfaction with the meeting's outcome. Like the Irish, he has asked for an exclusive zone of up to 50 miles.

However, there was no detailed discussion of exclusive zones during the meeting. And both the British and the Irish announced that they would continue to press for 50-mile exclusive zones.

...S. Navy Picks ...ecret Missile ...ff Ocean Floor

...ONDON, Oct. 31 (Reuters).—...e U.S. Navy has recovered its ...-secret Phoenix missile that ...anged from the aircraft carrier ...m F. Kennedy on Sept. 14 off ...pland, a Navy spokesman said ...te today.

The pencil-shaped missile at...hed to the F-14 Tomcat fighter ...en it slipped overboard was ...overed by a nuclear-powered ...ubmarine yesterday, the ...okesman added.

The F-14 was still at the bot...m of the sea more than 1,900 ...et deep, about 75 miles from ...ps Flow in the Orkney Islands, ...said.

Two attempts to raise the ...ne have failed so far because ...-foot waves snapped the cables ...pped around the Tomcat as it ...s being winched to the surface.

Vegas Odds Switch From Carter to Ford

NEW YORK, Oct. 31 (AP).—Jimmy (the Greek) Snyder has switched his presidential election odds from favoring Jimmy Carter to President Ford.

The Las Vegas oddsmaker's odds had been 6-5 for a Carter victory. Now they are 6-5 for Mr. Ford, he said Friday.

The change followed new poll results from Ohio, Florida, Texas, New Jersey, New York and Illinois, he said.

Tension Mounts Along Border

Rhodesians Make 2 Thrusts Into Mozambique

By Robin Wright

SALISBURY, Rhodesia, Oct. 31 (WP).—Rhodesia's guerrilla wars reached a new peak of tension today as Rhodesian officials disclosed that the army had launched its second major penetration in 48 hours into neighboring Mozambique.

It said the actions were in response to "transborder acts of aggression by terrorists," referring to the recent intensified penetrations and attacks by insurgents.

At the same time, a military communiqué announced that guerrilla bands crossing from both Zambia and Mozambique had hit three corners of the country this weekend—a tourist hotel in Victoria Falls on the northern Zambian border; at Filabusi, a small mining and farming town in the southwest, and in the southeast at Vila Salazar, on the Mozambique border.

Four white civilians, three African civilians, a white soldier and 12 guerrillas were killed in the three attacks.

No details of any of the actions are available. But the rapidly intensifying onslaught by both sides reflects the hardening positions in the increasingly bitter and brutal war, with serious implications if the troubled peace negotiations between the white government and four African nationalist leaders in Geneva should break down.

The firm stand of the government on the strict implementation of the Kissinger proposals and the weekend actions indicate that the Rhodesians plan to defy further external pressure to hand over the reins of power before the stipulated transition period.

But the new guerrilla incursions seem to back up the insurgents' claims that they will continue the war until majority rule is established.

Rhodesians are increasingly despondent about the possibility of a peaceful settlement.

The most ominous aspect of the latest escalation is represented in the Rhodesian Army's punitive raids into Mozambique, believed to have been against a guerrilla base in the region across from the eastern border town of Umtali.

The government claims that there has been only one previous such action, in August, during which at least 340 were killed—the largest single death toll in the war. Mozambique later charged that the camp hit was for refugees, not guerrillas, and that over 600 were killed.

S. Africa Condemnation

Subsequent international condemnation, even from South Africa, led observers to predict that the Rhodesians could not politically afford another military offensive, especially during the Geneva talks.

But sources in Salisbury believe this weekend's actions were equivalent in scale to the August operation. The weekend actions show just how far the govern-

(Continued on Page 2, Col. 6)

Standard Oil (Calif.) Probed By U.S. on Bias Against Jews

By Noel Epstein

WASHINGTON, Oct. 31 (WP) —The U.S. Equal Employment Opportunity Commission has stepped into the Arab-boycott issue with an investigation of whether the giant Standard Oil Company of California has discriminated against Jews in employment here and abroad.

The investigation, begun in July, is expected to be completed in three to six months and, if the results warrant, may be extended to other companies or industries.

A spokesman for Standard of California, which is known as Socal and ranks sixth on Fortune magazine's list of the 500 largest U.S. corporations, denied that the company discriminates on religious or other grounds but declined to discuss this specific case.

Guy Carruthers, Socal's assistant general manager of public relations, confirmed that the EEOC inquiry was under way but added that he could not comment on it "because everything about it is supposed to be confidential."

'General Policy'

He added: "All I can say is that, as a general policy, we have not and do not discriminate against employees by reason of their religion or race."

Socal has about 42,000 employees worldwide and is the fourth-largest U.S. oil company in terms of last year's sales, which totaled $16.8 billion.

It is also one of four U.S. companies that together own 40 per cent of the Arabian American Oil Co., or Aramco. The controlling 60-per-cent interest is held by Saudi Arabia's state-run oil corporation.

The investigation of whether Socal has discriminated against Jews was triggered by a charge filed this summer by EEOC commissioner Daniel Leach.

Mr. Leach acknowledged that he had charged a "major American oil company with an alleged pattern and practice of discrimination against Jews" and that the company has been asked for "voluminous data on their employment practices."

Mr. Leach, however, refused to discuss what company and what specific charges are involved in the case. EEOC law bars the agency from such public disclosure unless a court action is filed.

EEOC investigations of this kind usually involve the way a company hires, fires, promotes, assigns employees to specific posts or departments and other job policies.

Mr. Leach said he filed the charges "in part because of information presented to me in confidence and in part because of my own belief that the alleged discrimination may have resulted, in part or whole, from the Arab boycott."

The charge apparently stems at least partly from a case pending in San Francisco's Federal District Court, in which a Jewish lawyer long employed by Socal has alleged that he was discharged in 1971 because of his religion.

The lawyer, Monroe Baer, twice has unsuccessfully sought to compel Socal to compile and present information on the religion of its managers and lawyers. The case is expected to go to trial late this year or early next year.

In the Arab boycott of Israel, U.S. companies doing business with Arab oil-producing nations are asked to certify that goods entering Arab lands were not made in Israel, that they do no business with Israel, and that they have no dealings with others doing business with Israel. They are also asked if they have Jews as directors, managers or on their payroll.

United Press International.

MILITANT PACIFISTS—Helmeted anti-war demonstrators skirmished with helmeted and armed riot police yesterday at a Self-Defense Force base at Asake, Japan, during a military parade marking 22d anniversary of the force's founding.

Berlinguer Finds Regime 'Elusive' On Summit Call

REGGIO CALABRIA, Italy, Oct. 31 (AP).—Italian Communist party secretary Enrico Berlinguer yesterday accused the Christian Democrats of avoiding the issue in response to his party's call for a political summit meeting on Italy's economic problems.

"Socialists, Republicans and Social Democrats have responded positively, recognizing the necessity of what we ask," he said in a speech here. "We are awaiting the response of the Premier.

"As for the Christian Democrats, they have answered by proposing a parliamentary debate That is an elusive response to the question we raised or, to be kinder, one of openness to further discussion."

Premier Giulio Andreotti, whose Christian Democrat government depends on Communist and leftist abstention in parliament, said after his party's meeting Friday that he expected economic strategy to be debated in Parliament as soon as it could be fit into the schedule.

Qadhafi Seeks Sadat Meeting

CAIRO, Oct. 31 (UPI).—Col. Moamer Qadhafi, in a new attempt to make peace with President Anwar Sadat, has enlisted the help of Rose El Youssef, an Egyptian weekly magazine.

"All I want is to meet Sadat and sort out our differences. I want to meet him alone, without a third party. Sadat is an honest man. In fact, my feelings toward him are like those of a son toward his father," the Libyan leader said in an interview published in the magazine's edition dated yesterday.

Relations between Libya and Egypt have been on a downward slide for some time. Egypt has accused Libyan intelligence agents of a number of sabotage activities in Cairo and other cities, and President Sadat, in recent statements, has said "Qadhafi will not escape my hands."

Some Arabs Seek to Join Israel Forces

TEL AVIV, Oct. 31 (NYT).—Scores of Christian Arab citizens of Israel have recently volunteered to serve in the Israel defense forces, apparently as a response to Israel's reported military assistance to the Lebanese Christians in their civil war.

Samuel Toledano, Prime Minister Yitzhak Rabin's adviser on minority affairs, confirmed in an interview today that Maronites and Greek Catholics recently said they wanted to serve. "It's a trend," he said. "But before we respond, we're checking whether it is a spontaneous move reflecting emotions that could change or whether it is something deeper and broader."

Military service is compulsory in Israel but the government has exempted Arabs, considering that it was not feasible to expect them to fight their brethren, Israel's only potential enemies. However, leaders of the Druze and Circassian communities, both offshoots of Islam, asked that their young men be conscripted, the same as Jews, and the government complied.

Bedouin Volunteers

Some bedouin have volunteered and are serving as officers and soldiers throughout the forces, mainly as trackers. Other Israeli Arabs have been free to volunteer individually but no Christians have done so in recent years, according to Mr. Toledano. Some Christians serve in the Israeli police, however.

The Maronites and the Greek Catholics said they wanted to integrate in regular units, rather than serve in special minority units established for the Druze and Circassians. They also said they wanted the same terms as bedouins, who are paid like soldiers in the regular army and not like conscripts, whose pay is very small.

At the weekly Cabinet meeting in Jerusalem today, Mr. Rabin and Defense Minister Shimon Peres said that notwithstanding press reports, there had been no substantial change in Arab deployment across the Lebanese border since the agreement to end the civil war.

Rumors that droves of guerrillas were streaming to the border area were dismissed by the ministers as psychological warfare.

Czechs Reported 99.97% for Party

PRAGUE, Oct. 31 (Reuters).—The Czechoslovak Communist party's Central Committee has approved a report on last weekend's general election, which it hailed as approval of its policies.

The turnout was reported as being 99.70 per cent and the party's candidates received 99.97 per cent of the votes.

Israel Reported in Agreement To Buy Coal From S. Africa

By Thomas O'Toole

WASHINGTON, Oct. 31 (WP). —Israel is understood to have signed a long-term agreement to buy coal from South Africa, in part to reduce its dependence on Iranian oil.

Neither the Israeli nor the South African Embassy here would confirm or deny that an agreement had been reached, but highly placed sources in the Ford administration and the oil and coal industries said it had been signed to let Israel move from an economy electrified entirely by oil from the Middle East to one energized at least partly by coal —which is cheaper than oil— from a source outside the Middle East.

"Israel is making this move for two reasons," a Ford administration source said. "Price and security."

The coal agreement is fresh evidence of the growing economic ties between Israel and South Africa, which were strengthened by the visit to Israel last spring of South African Prime Minister John Vorster.

Trade between the two countries has tripled in the last four years. Israel sells chemicals to South Africa, while South Africa ships steel to Israel. Fully 60 per cent of the steel exported last year by South Africa was bought by Israel.

The first step in what sources described as a 10-year coal agreement is a contract for South Africa to supply coal to an electric power plant being built by Israel between Haifa and Tel Aviv. The plant had been planned three years ago as an oil-burning facility, but soaring world oil prices and the Arab oil embargo caused Israel to reject the use of oil for this plant.

The next step is said to be an agreement by South Africa to supply coal to one of three oil-burning electric plants that Israel plans to convert to coal.

Sources said they did not know which plant would be converted to coal. There is an aging plant in Haifa, a newer one in Tel Aviv and another plant in Ashdod. The three plants generate a total of 1.5-million kilowatts of electricity.

Ship, Rail

The coal to be shipped from South Africa to Israel will be carried by rail from coal fields in the Transvaal and Natal to a new coal port that South Africa has built at Richard Bay on the Indian Ocean. The coal will then be carried by ship through the Gulf of Aden to the Red Sea and on to the Israeli port of Eilat on the Gulf of Aqaba.

South Africa has contracted with Israel to build a railroad from Eilat to Beersheba, where it will join existing railroad lines.

Israel has one of the most electric-intensive economies in the world, mostly because it uses much electricity to pump water out of the Sea of Galilee for irrigation and drinking.

The price of oil is three times the price of South African coal.

Sadat Backers Are Winning Large Majority in Parliament

CAIRO, Oct. 31 (NYT).—The political organization supporting the policies of President Anwar Sadat apparently will win an overwhelming majority of seats in the People's Assembly in the freest elections in Egypt in nearly 25 years, according to preliminary results yesterday.

Political analysts said the "leftist organization," which advocates a return to stricter socialism, was "massacred" and won only one seat in the Assembly. The "rightist organization," which advocates increased economic and political freedom, fared little better, with four elected representatives, two of whom immediately announced that they were defecting to the centrist group supporting the President.

The centrist organization, headed by Premier Mamdouh Salem, won 83 seats and independents took 15 in Thursday's balloting. Results were in from 80 per cent of the races.

In most races, no candidate received a majority of the votes cast. Runoff elections will be held on Thursday between the two highest vote getters in those contests.

But political analysts said it is likely that the centrist organization will get at least 300 of the 350 Assembly seats. The leftists are likely to get only two or three more seats on Thursday, the rightists about another 10, studies of the final lineup indicate.

President Sadat decided this year to allow the formation of three political organizations within the Arab Socialist Union, the only party allowed. They are generally referred to by Egyptians as the left, the right and the center.

Independents were also allowed to run, and about 900 declared their candidacies, including several prominent figures.

The large number of independents was attributed here partly to nonserious candidates who received only a few votes and partly to a rejection of the three organizations by persons well-known enough to run on their own.

Two members of Premier Salem's Cabinet failed to win majorities and will have to enter runoffs. They are Zakaria Tewfik Abdel Fattah, minister of trade and supply, who was accused by opponents of favoring his constituency with imported goods, and Agriculture and Irrigation Minister Abdel Azim Abul Atta, whose adversaries accused him of giving constituents jobs in his ministry.

FAA Chief Supports Landing SST in N.Y.C.

WASHINGTON, Oct. 31 (UPI). —Federal Aviation Administration chief John McLucas has reported that routine airline operations, such as using small jets instead of jumbos when traffic is light, add more noise at New York's Kennedy Airport than a supersonic transport would cause.

Mr. McLucas said there is no reason, based on the noise record of the Anglo-French Concorde at Dulles Airport near Washington, to keep the supersonic jetliner from landing in New York.

Gromyko to Bulgaria

VIENNA, Oct. 31 (Reuters).—Soviet Foreign Minister Andrei Gromyko will pay an official visit to Bulgaria early next month, the Bulgarian news agency announced.

Interference Over Rhodesia Discouraged

U.S. Said to Warn Russia on Geneva

By Don Oberdorfer

WASHINGTON, Oct. 31 (WP). —The United States has warned the Soviet Union against interfering with the current Geneva negotiations aimed at a gradual transition to black majority rule in Rhodesia, informed sources have reported.

The admonition was delivered by Secretary of State Henry Kissinger to Soviet Ambassador Anatoly Dobrynin in a lengthy breakfast meeting on Friday.

Mr. Kissinger reportedly told Mr. Dobrynin that a mischievous Soviet role in Africa at present could only be interpreted as an effort to inflict maximum damage on the West. Mr. Kissinger is said to have added that chaos in Africa will not benefit the Soviet Union in the long run.

Reports from Africa said that terrorist action by black insurgents in Rhodesia has increased sharply since Prime Minister Ian Smith announced on Sept. 24 acceptance of the Kissinger plan for transition to black majority rule within two years.

No Evidence

No evidence has been presented that the Soviet Union is behind the upsurge in guerrilla action, but U.S. officials fear that the Russians may employ such methods to interfere with a negotiated Rhodesian settlement.

Soviet press statements have denounced Mr. Kissinger's negotiating efforts in southern Africa as a "dangerous plot between Imperialists and racists." Soviet news media and officials have taken the view that the Kissinger plan and the Geneva negotiations are aimed at perpetuating racist rule.

Mr. Kissinger has been guardedly optimistic in public and private assessments on the outcome of the Rhodesian talks, which began Thursday, saying he believes they have a better-than-even chance for success by the end of the year. However, he has often added that a major Soviet effort to derail the negotiations would change his assessment.

In his meeting with Mr. Dobrynin Friday, Mr. Kissinger also protested recent harassment of Soviet Jews. Contrary to the usual State Department practice, Mr. Kissinger's meeting with Mr. Dobrynin was announced in advance and department press spokesman Robert Funseth said afterward that "the situation of Jews in the Soviet Union was discussed."

While State Department officials would not publicly acknowledge any political motivation, disclosure of the discussion about Soviet Jews appeared to relate to the presidential campaign.

Democratic candidate Jimmy Carter has attacked the Ford administration for allegedly not doing enough to intercede in behalf of Soviet Jews.

The Soviet Union and the United States had confronted each other in Africa over Angola, where Soviet and Cuban support was provided to the winning side in the civil war.

President Agostinho Neto of Angola—who led the Popular Movement for the Liberation of Angola to victory over two U.S.-backed factions—signed a 20-year friendship treaty with the Soviet Union during a six-day visit to Moscow earlier this month. A communiqué issued at the end of the visit indicated that Angola will receive additional Soviet military aid.

U.S. AIDE IN GENEVA—Under Secretary of State for African Affairs William Schaufele arriving in Geneva to be an observer at the Rhodesia conference. He accompanied Secretary of State Henry Kissinger on the trip to Africa that resulted in the Smith-Africans talks.

U.K. Under Pressure to Take More Active Rhodesia Role

(Continued from Page 1)

of Mr. Smith and his Rhodesia Front party undermining majority rule, a persistent fear among the Africans.

Mr. Kissinger, according to sources, has told aides that Britain faces the choice of taking a significant role in the transition or the prospect of the collapse of the talks, the escalation of the guerrilla war and direct threats toward whites, many of whom have dual British citizenship. Most white Rhodesians were born in the British Isles, Australia, New Zealand or South Africa.

This view is echoed by members of the nationalist delegations here, which include experts, some of them in Britain. Joshua Nkomo, a nationalist leading one of the delegations, has a staff of seven advisers, mostly working on details of the transfer of power and constitutional issues.

Legal Position

One lawyer from Britain, asked to remain unidentified, said this morning: "It's absurd to say Britain has no power in Rhodesia. Her excuse is that she has not got a single politician or soldier. That's her wish and desire. She has got the legal power to send troops there. She's sent troops there before. She'd probably do so again if the white minority were directly threatened."

Another member of the Nkomo delegation, former Prime Minister Garfield Todd of Rhodesia, who espoused the nationalist cause and was held under house detention a total of five years, said:

"The first thing the nationalists want is for Britain to play a much more definite role than she appears to be taking."

"The only definite power Britain," he added, "She has the legal right to take over the situation. But Britain seems determined to leave power with the Rhodesians to fight it out among themselves."

Part of Britain's reluctance to engage herself in Rhodesia is based on fear of troop involvement and the specter of British soldiers fighting African guerrillas. Other reasons are Britain's diminished role abroad, her lack of leverage and the yearning to decrease, rather than increase, involvement in an area simmering with racial tension.

The conference adjourned after a plenary session on Friday and is set to resume in the middle of the week, after private meetings.

Two Thrusts Into Mozambique Are Conducted by Rhodesians

(Continued from Page 1)

ment is willing to go to prevent guerrilla take-over, even though African majority rule now appears inevitable.

A government official today criticized the Zimbabwe Peoples Army for its policy of "negotiating at Geneva and making war in Zimbabwe [the African name for Rhodesia] simultaneously" and for the "increased tempo of terrorist attacks against innocent civilians."

He also said there has been "a substantial build-up in terrorist concentrations along the Rhodesia-Mozambique border."

The government tonight is bracing for a retaliatory attack on Umtali. Two days after the August action, guerrillas launched a mortar and rocket attack on the eastern border town. A military spokesman said a build-up of guerrilla forces was visible from a border post at Umtali.

He added that 75-mm recoilless rifles and six to nine heavy mortars were seen being set up on the other side of the border.

The government is so convinced of a retaliatory bombardment that officials organized a plane to transport local and foreign journalists to Umtali to witness the anticipated shelling.

Penetrations by guerrillas have escalated dramatically in the month since Prime Minister Ian Smith announced that his government would surrender power to Rhodesia's 6-million African majority.

Insurgent strength inside the country is now estimated to be roughly 3,000. Until recently, guerrillas were crossing into Rhodesia from Mozambique in groups of 40 to 50, then breaking up into smaller groups of 9 to 11. According to military officials, the bands are now penetrating in strengths of 90 to 100.

With Rhodesian troops already stretched thin and morale among white troops an increasing concern, the government has decided that defensive actions will not stifle the intensifying incursions.

But residents and observers here fear that a guerrilla offensive will provide the Soviet-equipped forces with an excuse to appeal for further international aid and support, opening the way for escalation that would amount to an open war.

China Again Cites Vigilance Against Attack by Russia

TOKYO, Oct. 31 (AP).—China today repeated pointed references to vigilance against a surprise Soviet attack.

The Chinese News Agency said Communist party Chairman Hua Kuo-feng received a message of support from the northwest frontier province of Sinkiang that declared: "We will firmly bear in mind that the main danger to Sinkiang comes from Soviet modern revisionism."

Sinkiang, which has a common border with the Soviet Union, is the site of China's nuclear installations. The Chinese have referred from time to time to unspecified Soviet provocations along the border.

The message said Sinkiang's people would "be ready at all times to smash the subversive and disruptive activities and surprise attack by Soviet social imperialism, deal a telling blow at the sabotage by a handful of class enemies and build the northwest border area of our motherland into an impregnable stronghold against revisionism so that the Central Committee headed by Chairman Hua Kuo-feng can rest at ease."

It did not elaborate on class enemies, but apparently was referring to supporters of the "gang of four" accused of plotting a coup against Mr. Hua.

SOS From the Atlantic

NEW YORK, Oct. 31 (AP).—A Dutch tugboat received a distress message yesterday from a young sailor who had not been heard from for 17 days when he reported hull damage in the mid-Atlantic, the Coast Guard said. The sailor, Bob Gainer of Hillsdale, N.J., was trying to solo around the world.

Bhutto Defends Plan to Purchase French A-Plant

ISLAMABAD, Oct. 31 (Reuters).—Prime Minister Zulfikar Ali Bhutto said yesterday that Pakistan's acquisition of a nuclear fuel reprocessing plant from France would be a nonevent as far as nuclear proliferation was concerned.

Mr. Bhutto, in a signed 35-page article on foreign policy, said Pakistan had repeatedly given categoric assurances about the peaceful intent of its nuclear program.

The assurances are not just verbal pledges, but written safeguards agreed with the International Atomic Energy Agency, he said.

He questioned why the purchase of a $150-million plutonium-producing plant should be turned into an event "while the unrestrained nuclear programs of Israel, South Africa and India are considered nonevents."

Secretary of State Henry Kissinger visited Pakistan last August and warned Mr. Bhutto that Pakistan probably would lose all U.S. aid unless it backed out of the deal to buy the plant from France.

Socialist Leaders Of Europe Join Soares in Lisbon

LISBON, Oct. 31 (UPI).—European Socialist leaders are arriving in Lisbon to throw their prestige behind Premier Mario Soares at his party's national congress.

West Germany's Willy Brandt arrived this afternoon and was driven to the hall where 1,2 Portuguese Socialist delegates are holding their congress.

A party spokesman said Mr. Brandt would be joined by Sweden's Olof Palme, Austria's Chancellor Bruno Kreisky and France's François Mitterrand among other major Socialist figures.

Party sources called their presence an endorsement of Mr. Soares and his party's moderate wing in their fight for control of government policy over the party's Marxist wing.

In a speech at the congress Mr. Soares urged total loyalty to his minority government's policies.

"It is indispensable that the party as a bloc support the government as a bloc," he told the morning session.

Time Change in U.S.

Private Firm's Exports Approved

U.S. Selling Computer System To Russia as Well as China

By Leslie H. Gelb

WASHINGTON, Oct. 31 (NYT). An executive of the Control Data Corp. has said that his firm had received Ford administration approval to sell computer systems of comparable capability to the Soviet Union and China, and this was confirmed by an administration spokesman.

James Bowe, a vice-president of Control Data, stated late Friday that the Cyber 76 computer being prepared for delivery to the Soviet Union is the equivalent of the two Cyber 172 computer systems approved for sale to China.

The New York Times erroneously reported (IHT, Oct. 30-31) that the administration had no intention of licensing the sale of the Cyber system to the Soviet Union. But the statements by the Government and Control Data make it clear that the administration has not breached its long-standing policy of selling high technology items to one Communist superpower only if it is prepared to sell comparable items to the other.

Mr. Bowe denied that the Cybers, being sold for making calculations on oil explorations and earthquake detection, had any value for making calculations for military purposes—beyond those of a hand-held computer.

Supporting View

He was supported in this view by State Department spokesmen who stated that while any computer could be used for military purposes, the two Cyber models were not of any special or additional value for military programs.

Officials of several different agencies, including the Pentagon and the Energy Research and Development Administration, known as ERDA, continued to insist, however, that similar Cyber systems have been used by the United States in making calculations of nuclear tests and controlling radars.

As one Commerce Department official put it, "If there were no potential military applications, there would have been no reason to take a full year to review the sale and no reason to impose safeguards on the use of the equipment."

Officials of every agency involved, with the exception of ERDA, said—as was reported in the earlier dispatch—that the provisions for monitoring and inspecting the use of the computers were fully adequate to prevent diversion to military uses.

Different Assurances

They again said that the safeguards in the sale to China were not as stringent as those generally prevailing for comparable transfers of technology. They said that the principal difference was that whereas the Soviet Union has been required and prepared to give government-to-government assurances that the equipment will have only civilian uses, China is being permitted to give similar assurances to the Control Data Corp. alone.

They said that China has been unwilling to give government-to-government pledges so long as the United States retains diplomatic relations with the Republic of China on Taiwan.

Other deviations from prevailing practices purportedly have to do with some minor details regarding supervision and servicing of the computers.

A variety of officials also again confirmed that Secretary of State Henry Kissinger pressed for approval of the sale to China at this time as a gesture to the new Chinese leadership.

Associated Press.

BATTERED IN NAPLES—Weekend storm that raked Italy from south to north smashed boats in a marina at Naples. Heavy flooding was reported elsewhere, especially at Milan.

Milan, Venice Inundated

Storms Abate After Flooding in Italy, France

From Wire Dispatches

MILAN, Oct. 31.—Rain-swelled rivers flooded parts of this industrial metropolis and other northern Italian cities, towns and farmlands yesterday and the month's third Adriatic tide swirled over Venice streets and piazzas.

At least a dozen persons were injured and scores were left homeless in various Po Valley areas. Damage in the province of Pavia alone was estimated at more than 10 billion lire ($11.6 million).

The violent storms, which struck as far south as Naples, abated today and the country got down to the task of clearing up the damage.

A high tide that was expected to inundate Venice failed to materialize during the night and St. Mark's Square, flooded yesterday, was back to normal today.

Reports reaching Milan today said the Po's level was now dropping. Milan's flooding yesterday was described by one leading newspaper as the worst in memory. Seven rivers in Lombardy overflowed yesterday and almost all the towns north of Milan were flooded.

Water from the overflowing Lambro and Seveso Rivers stood three feet deep in Milan streets around Niguarda Hospital and water spouted geyser-like from sewer manholes. The flooding stranded scores of automobiles and short-circuited traffic lights. The Milan fire brigade said it received 2,000 calls in 24 hours but managed to answer only 300 of them.

"A number of houses are almost uninhabitable," a police spokesman said.

The meteorological observatory said 3.5 inches of rain fell in Milan in 10 hours.

Authorities in the Po delta uneasily watched its level rise up to 4 inches an hour as the tide slowed its flow into the Adriatic. Officials said it was the same combination that caused extensive flooding there in November, 1966, simultaneous with the floods in Florence and Venice.

The storms that swept Italy also caused flooding and cut highways in southeast France. One of the heaviest hit areas was the delta of the Rhône, where a number of roads were still unusable today.

Most of the streams swollen by three days of torrential rains in the south of France were subsiding today, but there was still risk of flooding along the Allier River, which received much of the runoff.

As the flooding decreased in the area, temperatures fell and up to 15 centimeters of snow was reported in the southern part of the Massif Central above 1,000 meters.

Mussel Poisoning Fells 18 Germans And 20 in France

FRANKFURT, Oct. 31 (UPI). —The Public Health Department said today that 18 persons who became ill after eating mussels imported from Spain have been released from hospitals.

"There have been no reports of new cases of mussel poisoning," a department spokesman reported. He said the mussels contained a nerve poison that caused itching in the fingertips and a numb feeling in the mouth.

The spokesman added: "All those hospitalized Saturday are in good shape again and were sent home today."

In Paris, medical authorities reported today that about 20 persons have been hospitalized in Metz, Strasbourg, Nancy and Marseilles after eating Spanish mussels.

They said that the importing of the mussels, apparently all from the Vigo area, has been temporarily halted.

Mysterious Disease Wanes in Zaire, Sudan

GENEVA, Oct. 31 (UPI).—The mysterious green monkey disease that broke out in Zaire and the Sudan last month has apparently disappeared, the World Health Organization said Friday.

There have been no deaths from the disease since Oct. 16, when the total was 262 in Zaire and 59 in the Sudan, a WHO spokesman said, adding, "It obviously has waned, at least for the time being."

Series of Unauthorized Actions

Hua Said to Detail Crimes Of Mao's Widow to Politburo

By Fox Butterfield

HONG KONG, Oct. 31 (NYT). —China's new leader, Hua Kuo-feng, reportedly told a critical meeting of the Communist party Politburo recently that Mao Tse-tung's widow, Chiang Ching, had tried to increase her own power by a series of unauthorized actions, including an extraordinary weeklong interview with an American woman scholar in 1972.

According to the Hong Kong newspaper Ming Pao, Mr. Hua made his accusation against Miss Chiang to explain why he had ordered her and three other senior radical leftists arrested. The newspaper, a respected independent daily, said its account was based on documents that are being circulated in Canton to inform Communist party members about the sudden downfall of the four.

Ming Pao said that Mr. Hua had told the Politburo that when Mao found out about the interview with the American scholar, Roxane Witke, he was furious and it adversely affected his health. Mr. Hua reportedly said that Miss Chiang had used the interview to "establish a cult of herself," and betrayed party secrets to a foreigner.

Tampering Reported

The Hong Kong newspaper reported that Mr. Hua also had caught Miss Chiang tampering with two of Mao's personal documents after taking them out of the Party Central Committee's archives.

There was no way to confirm the Ming Pao account. But analysts here believe it may, in fact, be at least partly what party members in China are being told to explain the arrest of the leftists.

Several of the charges in the Ming Pao account, including the one about the interview with the American scholar, have also been made in an official editorial last week or in wall posters in Peking. In addition, a Chinese official confirmed to foreign diplomats in Peking earlier that Miss Chiang had been attacked for the interview with Miss Witke, an associate professor at the State University of New York at Binghamton.

The analysts caution, however, that it is possible that these charges may only be a cover for the real reason why Mr. Hua and his allies among the veteran party bureaucrats and army commanders moved against Miss Chiang.

Ming Pao said that Mr. Hua and another Politburo member, Wang Tung-hsing, who was once head of Mao's personal bodyguards, also had made these other charges against Miss Chiang at the Politburo meeting on Oct 7, the day after the arrest:

- That Miss Chiang had sent documents and personal letters on two occasions to army units, allegedly to "ingratiate herself with the units and split the the army."
- Mao was said to have known of her "ambitions" and gave her a three-point order. It said she should make fewer public appearances, make fewer remarks on documents and should not organize her own "personal cabinet."
- But Miss Chiang disobeyed the order and insisted on making a speech last year at the national conference on agriculture held at the Tachai Brigade, China's model farm unit. Her talk was said to be rambling and trivial, and so it was not published. This angered Miss Chiang, who later ousted the director of the Chinese press agency, Chu Muchih, and made him spend his time sweeping the floors at Tsinghua University in Peking, a center of her supporters.
- On Sept. 2, a week before Mao's death, the Politburo members were worried about Mao's condition but Miss Chiang decided to go to Tachai again and on the way gave several lavish banquets.
- On Sept. 8, the day before he died, Miss Chiang evidently returned from Tachai and insisted on moving Mao, despite advice from doctors. The newspaper did not specify where he was moved to or why. But the newspaper added that, as Mao lay dying, Miss Chiang was said to have constantly disturbed him by talking, and thus "Mao could not die in peace."

Petty and Squalid

The last two charges were also made in wall posters in Peking. Taken together, the charges seemed less serious than they did petty and squalid, presenting a picture of narrow-minded political intrigue at the pinnacle of power in Peking.

According to Ming Pao's account, which was said to have been provided by a Chinese traveler from Canton, Mr. Hua told the Politburo that Miss Chiang had provided Miss Witke with distorted and inaccurate information in their 1972 interview. In particular, Miss Chiang was accused of overstating her own role in the Cultural Revolution and underplaying that of Mao.

UPI.

Tongsun Park in London.

South Korean Denies Role In Briberies

LONDON, Oct. 31 (UPI).—Tongsun Park, the Washington-based South Korean businessman sought for questioning in the alleged bribery of U.S. congressmen, arrived in Britain yesterday and denied charges against him "most strongly."

Tongsun Park, 41, who flew from Tokyo to London via Moscow, has been a subject in the scandal involving at least 22 and perhaps as many as 90 U.S. congressmen said to be under Justice Department investigation for allegedly taking payments from South Korean agents in return for supporting legislation favoring the Asian nation.

"I understand that there have been some charges made against me saying that I was involved in questionable activities in the name of the South Korean government," he said at the airport.

"I deny these charges most strongly," he said.

He said he gave no money at all to U.S. congressmen but was "too exhausted after a long flight" to go into any details.

"I hope that I can clear all of this up when I get to Washington and I am sure that there will be a happy outcome for everyone," he said.

Reports 'Preposterous'

SEOUL, Oct. 31 (WP).—A high-ranking aide to President Park Chung Hee said Friday that the U.S. investigation to a payoff scheme allegedly ordered by South Korea's ruler was nothing but "a third-rate thriller."

Kim Kyong Won, the President's foreign-policy assistant, ridiculed reports on the scandal as "preposterous" and dismissed any prospect it could cause long-term harm to the U.S. relationship with South Korea.

Don't expect any favor in the world's biggest marketplace.

You have a quality product? Competitively priced? You ought to be in America, the biggest market in the world.

But it's also the toughest. Business here is rough-and-tumble, clients and competitors are seasoned professionals. They play for keeps, so don't expect any favor.

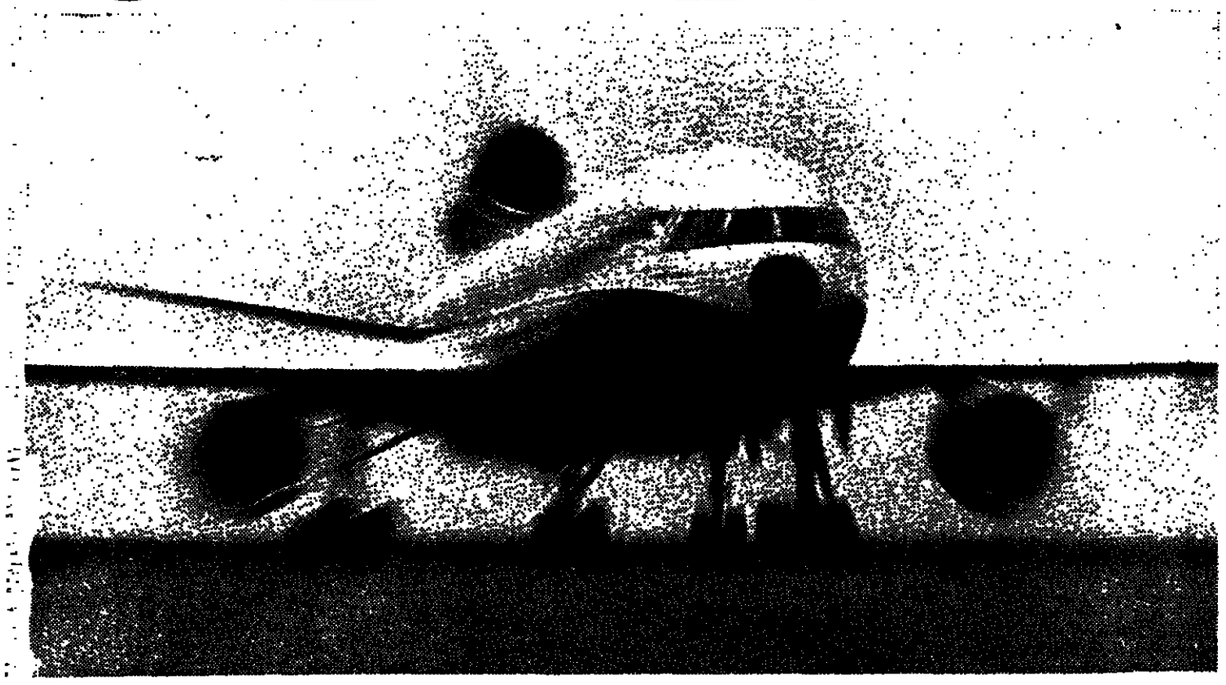
That's why you need to go to the United States well prepared. That's why you need to go with Société Générale.

We've been in the United States for over thirty-five years. We know the country, the people and how they do business. Société Générale is part of the European-American Banks Group, the largest holder of European capital in the United States, and a shareholder in the investment bank Sogen Swiss.

In France our U.S. specialists can provide you with complete information on this market, help you find the right outlets and put you in touch with the right people.

In the United States French and American officers of the European-American group and Sogen Swiss are at your disposal and can provide assistance from the beginning of negotiations through to the fine print on the contract. (You will find European-American at 100 branches in New York City and Long Island, as well as in San Francisco and Los Angeles. And in Chicago, we're represented by a branch of European Banking of London).

We have a special service to organise your entire business trip while you're in the United States. And if you're considering setting up a major operation in America, Société Générale and its American affiliates can show you the best way to go about it, with the most reliable partners and the most suitable financing.



Commercial field or finance, whatever your needs, Société Générale can help you. Everywhere.

Carter Is Trying to Capitalize On the Popularity of Mondale

By R.W. Apple Jr.

ERIE, Pa., Oct. 31 (NYT).—Jimmy Carter has been making an unusual effort to capitalize on the popularity of his running mate, Sen. Walter Mondale of Minnesota.

As he races from city to city in the big industrial states in the final days of his presidential campaign, the Georgian is emphasizing in almost every speech that he is part of a team, acting on the basis of poll data that show Sen. Mondale an asset to his candidacy and Sen. Robert Dole a detriment to President Ford's.

The new tactic, a follow-up to one of the main points made by Mr. Carter in the final television debate Oct. 22, is yet another effort by the Carter forces to generate the largest possible turnout of voters in what appears likely to be a relatively close election.

"Don't forget when you go to the polls on Tuesday that you are voting for a ticket," the Democratic nominee said at the Pittsburgh airport Wednesday night, adding that he had no doubt that Sen. Mondale "would make the greatest president."

2 Chosen Mates

At a senior citizens' breakfast Thursday morning, Mr. Carter spoke of the time "when Sen. Mondale and I are at the head of our government." In Cleveland, where he was introduced by his wife, Rosalynn, he complimented himself on having chosen her and on having chosen his running mate. Here in Erie, he said in his conclusion:

"If you prefer me to Gerald Ford, I know you'll prefer Walter Mondale to Bob Dole."

Even the new Carter television commercials, which have Sen. Mondale's name in letters almost as large as Mr. Carter's, reflect what an aide calls "the simple fact that, among Democrats especially, Mondale is probably the most popular of the four men on the national ticket."

Patrick Caddell, Mr. Carter's pollster, has discovered that the inclusion of the Minnesota senator's name in questions—that is, asking respondents whether they prefer Carter-Mondale to Ford-Dole—increases Mr. Carter's national standing by about 3 percentage points. A similar finding emerged in a survey by Louis Harris.

'Not Qualified'

Mr. Caddell said that after the vice-presidential debate, a plurality of voters agreed in a national survey with the proposition "Bob Dole is not qualified to be president."

In contrast to Mr. Carter, Mr. Ford has been making relatively *little mention of his running mate* during recent speeches in California and Pennsylvania. When he does mention Sen. Dole, it is usually in a brief reference to the "Ford-Dole ticket."

Even among Republicans, Sen. Dole has been under fire for having seemed too abrasive in his debate with Sen. Mondale, not only in his comments about "Democrat wars" but also in his critical remarks about Franklin Roosevelt, the League of Women Voters and Sen. Mondale's nervousness.

"That stuff may be fine on the stump, but it won't sell on television," commented a senior Republican official in Ohio.

Sen. Dole's stature has not been enhanced, in the view of most political analysts, by his attempts all last week to extricate himself from the controversy over "Democrat wars." In the view of the Carter camp, he has only compounded his difficulties.

Industrial States

According to several of his associates, Mr. Carter has felt for some time that his choice of Sen. Mondale, as contrasted to Mr. Ford's selection of Sen. Dole, could help the Democratic ticket in the pivotal industrial states. After the vice-presidential debate, the associates said, the Carter staff discussed ways of capitalizing on what they saw as an opening.

Then, in the third presidential debate, Mr. Carter was asked whether he could—as a newcomer to Washington—build a talented staff. The best evidence that he could, the candidate replied, was his choice of Sen. Mondale, adding that he had never heard Mr. Ford argue that Sen. Dole was the best-qualified man in his party to assure the presidency should the need arise.

Returning to that theme Wednesday, Mr. Carter said:

"The one major decision that President Ford and I have had to make since our nominations was to choose our vice-presidential running mates. I searched the nation over and I had one thought in mind—to choose the one person who I thought would make the greatest president. I chose Walter Mondale and I think all of you know I made the right choice."

N.Y. Ordered To Hold Votes Mailed Late

By Linda Greenhouse

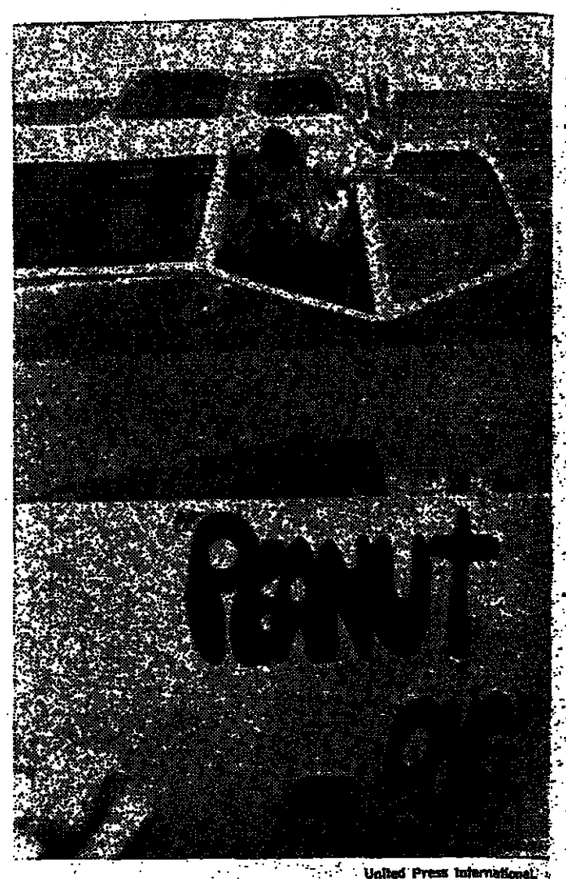
NEW YORK, Oct. 31 (NYT).—A federal judge has ordered the state's Board of Elections to preserve all overseas absentee ballots that arrive at local elections boards after Election Day but are postmarked on or before Nov. 2.

Judge James Foley issued the order in Albany at the request of the U.S. Department of Justice, which is trying to insure that such ballots are included in final election results.

Under state law, ballots received after Election Day are not counted. However, the Justice Department contends that under federal law absentee ballots postmarked by Election Day must be counted.

The order by Judge Foley, chief judge of the U.S. District Court in Albany, was the outcome of a "friendly" suit brought with the encouragement of the Boards of Elections of both New York State and New York City. The boards wanted to grant the extension themselves, but did not have the legal authority to do so.

Late Delivery



Hundreds of New Yorkers overseas who requested their absentee ballots in time either have not received them or received them too late to get them back to New York by Tuesday.

"This is a great thing for the Justice Department to do," Jeffrey Siger, a New York City lawyer representing several dozen New Yorkers in London, said. "It's a tremendous relief to all the people over there."

The Justice Department drew its authority to intervene from the Overseas Citizens Voting Rights Act of 1975.

A spokesman said the department had compiled the names of dozens of New Yorkers living in Canada, Western Europe and the Middle East who by late Thursday had not received their absentee ballots. He said it was apparent that these people would be disenfranchised unless the government acted.

The basic problem was *this year's election calendar in New York*, which left only seven weeks, an unusually short time, between the Sept. 14 primary and Tuesday's elections. In that time, the state's Board of Elections had to wait out challenges to the primary results before certifying the official ballot. The ballot was certified on Oct. 8, and the local boards then had to print and mail their ballots.

United Press International

FLYING VISIT—Democratic presidential candidate Jimmy Carter waving from his campaign jet, "Peanut One," as he arrived for rally in McAllen, Texas.

Carter Says Ford Is Using 'Last-Minute Political Tricks'

(Continued from Page 1)

reports suggesting that Mr. Ford might lose his home state, of Michigan, Mr. Carter disclosed through aides that he and his running mate, Sen. Walter Mondale, will wind up their campaign tomorrow night in the President's backyard, in Flint, Mich.—a last-minute gesture of confidence, bravado, or a combination of the two.

In New Orleans, sitting on a car, Mr. Carter waved, smiled and blew kisses to well-wishers who jammed the sidewalks and hung out over wrought iron balconies along the narrow streets of the French Quarter to see his parade—a mini-version of the late-winter Mardi Gras festival, costumed marchers, completed with jazz bands and

Although Republicans are counting on Louisiana to be a major crack in Mr. Carter's anticipated capture of Southern state electoral votes, Louisiana Gov. Edwin Edwards said the rally crowd (estimated by the Secret Service to be about 15,000) was the biggest political gathering he had ever seen in the city.

The crowds massed along the parade route were dotted with Ford-Dole signs, but the GOP fans were vastly outnumbered by Carter supporters who brandis placards with messages rang from "Jimmy's a Good Ole B and "Cajuns Pour Carter" to lust After Jimmy for Presid a reference to his controver remarks on religion and sex i Play Boy magazine interview.

Mr. Carter drew all Louisiana's most prominent De ocratic officials to his rally, the appearance by Gov. Edwa was viewed as especially sign cant in light of Gov. Edwar earlier coolness to Mr. Carter, his wife's open support of Ford.

Gov. Edwards was booed lou by many in the crowd when got up to speak but rapidly qui ed them by asking how m planned to vote Democratic Tu day and then shouting, "I state will be in the Democr column on Tuesday night."

In his speech, Mr. Carter m only passing reference to his nounced plans to overhaul tax system and relieve low income and middle-income t payers by shifting more of burden to corporations and wealthy.

And he went out of his to praise Senate Finance Co mittee chairman Russell Lo D-La., who joined him on platform, for "working very h with the Congress to stop Republican administrations fr giving extra benefits to the c porations of our nation.

Mondale Cites Watergate

RIVER GROVE, Ill., Oct. (WP).—Sen. Mondale yester accused his Republican oppone of failing Americans "at the m crucial moment in American h tory" by supporting Richard N on in the Watergate scandal.

He accused Mr. Ford and running mate, Sen. Robert Do of defending Mr. Nixon "right to the dying moments of the N on administration."

Sen. Mondale's charges, ma in an address to approximat 400 persons at a rally at Trit College here, marked the seco time in two days that he has us Watergate as the main weap in his attacks of the GOP tick

Ford Asks Voters' Prayers —Along With Their Ballots

(Continued from Page 1)

miles since he left Washington for Williamsburg, Va., and his final debate with Mr. Carter on Oct. 22.

Philadelphia Stop

Mr. Ford headed back North, for a brief stop in a Philadelphia suburb, after which he will concentrate his energies in the final 48 hours before the election in three states with a total of 87 votes—New York, Ohio and his home state of Michigan. It takes 270 electoral votes to win.

Last night, Mr. Ford attracted 20,000 persons to a shopping-mall rally in Bucks County, Pa., and a capacity crowd of 8,000 to another rally at the Syracuse, N.Y., Civic Center.

He repeated his familiar themes at both stops and continued to predict victory, telling the Pennsylvania rally that "our campaign has gathered momentum every day."

Throughout the day and into the night, Mr. Ford's voice continued to sound hoarse and raspy. His personal physician, Dr. William Lukash, said the President was drinking tea with honey and would inhale steam to ease the condition.

Making his last campaign appearance in Texas before the election, Mr. Ford stayed close to his themes, stressing national defense, calling for tax cuts, especially for middle-income families, and implicitly asking the American people to compare Mr. Nixon's legacy with the Ford administration's accomplishments.

The President was sharply critical of Mr. Carter's proposals to cut the Defense Department budget, a point he first began stressing last week in Pittsburgh.

For the most part, the President steered clear of direct criticism of Mr. Carter and stressed his own accomplishments.

When he took office, he said, "America was divided, there was a great loss of confidence in ourselves, our government and our nation. America was having troubles."

"We put the ship of state on an even keel, we set a steady, commonsense course," he added.

Dole Is Confident

SACRAMENTO, Oct. 31 (AP).—The Republican vice-presidential candidate, Sen. Robert Dole of Kansas, said his remaining job before the election is to "rev up" supporters, criticize the opposition and to "stay out of trouble."

Buoyed by recent polls showing GOP gains, Sen. Dole was campaigning in California—with its 45 electoral votes—at stops in Sacramento, Visalia, Bakersfield and Ontario.

"We're winning, we're winning," he told a rally in a San Jose neighborhood Friday. He displayed a copy of a newspaper bearing the headline: "Ford Leads in State."

It was based on a survey by pollster Mervin Field, who said President Ford has a 6-per-cent lead over Mr. Carter in California —46 to 40.

Chile Formally Quits Andean Market Pact

LIMA, Oct. 31 (Reuters).—Chile yesterday formally announced that it had quit Latin America's Andean Pact common market.

Andean officials had been negotiating for months to accommodate Chile's demands for a more liberal market economy. The other Andean Pact members —Venezuela, Peru, Colombia, Ecuador and Bolivia—had given Chile until yesterday to accept a special regime within the market.

Carter Church Bars Application By Black Cleric

PLAINS, Ga., Oct. 31 (AP).—Services at the Plains Bapt Church, of which Democrat presidential nominee Jimmy Ca ter is a member, were cancel today when a black minister w had applied for membership a tempted to join the worshipe

"The only thing I know is th our church for many years h accepted any worshipers w came there, and my own be belief is that anyone who liv in our community who wants be a member of our church, r gardless of race, ought to be a mitted," Mr. Carter told repor ers after hearing of the cance lation while campaigning in Tex today.

"I know that the pastor agre with me. I hope this will be th outcome of the problem in Plain I don't know what happened."

The Rev. Bruce Edwards, wh said the black minister's attemp to join the church was politicall inspired, said the decision wa made Tuesday at a meeting o the church's board of deacons which voted to affirm a 196 resolution which bars blacks an civil rights agitators from th church.

That resolution was passed over the protest of Mr. Carter and his family, said Mr. Edwards. He said the attempt by the Rev Clennon King to join the church was "Republican politics" and said "I am sure it is an attempt by enemies of Gov. Carter to sabotage his campaign."

Leaders of the U.S. Business Community Are Hoping for a Ford Victory in Tomorrow's Election

By Leonard Silk

NEW YORK, Oct. 31 (NYT).—What would a victory for Jimmy Carter mean for business and the economy? And what would a Ford victory mean? Much of the business community has decided that a Republican victory would be good news, a Democratic victory bad news—and it is quite possible that the markets will, immediately after Tuesday's election, reflect that common appraisal by people with money to invest or stocks to sell.

But, for the longer run, it is far from clear that the sharply contrasting business forecasts based on either a Carter or a Ford victory make much sense.

And during the first year of the next president's term there is unlikely to be a massive difference in the amount of overall stimulus that a Democratic or Republican administration would put into the economy.

In the realm of monetary policy, Arthur Burns will still be chairman of the Federal Reserve Board and there are unlikely to be enough changes in the membership of the board or of the Federal Open Market Committee, the key policy-making body, to make much difference.

Mr. Carter has clearly indicated his desire for a more expansive monetary policy. But if Mr. Carter proposes, it will be Mr. Burns who disposes. And Mr. Burns insists that he has no intention of resigning.

Some Caution

It is highly unlikely that Mr. Carter, if he is elected, would immediately try to force Mr. Burns out of office. With the economy's "pause" turning into a "lull"—and in danger of becoming something worse—a cautious new president might hesitate to alarm the business and financial world by a direct assault on the Fed leader.

Mr. Burns has withstood heavy administration pressures before—from Richard Nixon, who was then president, with the help of Charles Colson and other White House aides.

This is not to say that Mr. Burns's feet are planted in concrete. If the now laboring recovery seriously threatened to collapse, Mr. Burns probably would press down interest rates and push for a faster rate of monetary expansion than existing guidelines specify. This would be true whether Mr. Ford or Mr. Carter sat in the White House.

However, if Mr. Carter is elected, he doubtless will press the Fed for a more "Democratic" (that is, easier) monetary policy. And to a degree, the Federal Reserve, like the Supreme Court, tends to follow the election returns—helped along by presidential appointments as well as impreca tions.

But Mr. Burns is not looking for a battle with Mr. Carter. Even before the election, he has told some of Mr. Carter's advisers that he believes he could work with the former Georgia governor as president. Mr. Carter might find a useful conservative ally in Mr. Burns on at least one key issue—the adoption of an incomes policy to restrain prices and wages.

Mr. Carter and his advisers have made it clear that they would, in the words of economist Walter Heller, "maintain and unchain" the Council on Wage and Price Stability, which has been deprecated during the Ford administration.

On fiscal policy, Mr. Carter would be for greater stimulus than Mr. Ford, but it would be a good while before that stance could be translated into more public or private spending.

Mr. Carter would preside, in his first year, over a budget inherited from President Ford and the 94th Congress.

Mr. Carter hopes to put through some important social spending programs later, but he has promised a balanced budget by the last fiscal year of his four-year term.

Since Mr. Carter has also said that he would take a year to study tax reform, it seems unlikely that he would want to rush into tax cutting (needed to lubricate reform) soon after taking office. To be sure, if the economy were to deteriorate rapidly between the election and January, it is possible that Mr. Carter, egged on by his economists, would hurry into a tax cut as a quicker way of recharging the economy's batteries than trying to extract hasty (and budget-busting) expenditure increases from a reluctant Congress.

Mr. Ford might be just as prompt to ask Congress for tax cuts. He has already staked out his basic fiscal policy as being for more tax cuts—matched or partially offset by cuts in spending.

Over a period of time, Mr. Ford's combined fiscal policy of cutting both taxes and expenditures would be less stimulative than Mr. Carter's, but in the short run Mr. Ford could well forgo spending cuts and produce as much stimulus.

Republican spokesmen concede that Mr. Carter's greater fiscal and monetary stimulus might get the jobless rate down faster, but they insist that this would also generate more serious inflation. Sooner or later, they say, this would cause interest rates to rise and would hurt the stock and bond markets, curb investment and choke off economic growth.

Democratic spokesmen reply that a more stimulative policy would be scarcely more inflationary because there are so many unemployed workers and so much spare industrial capacity and because greater utilization of capacity would improve productivity.

Mr. Carter's economists contend that the United States is not really an inflation-prone economy. Inflation here, they argue, has resulted from exceptional circumstances, such as wars or the Arab oil embargo and the world commodity boom of 1973-74.

But, they insist, the United States economy is recession-prone, especially when conservative, timorous Republican are in control of the White House.

Mr. Carter is likely to plunge hard into one area where he may consider he has a mandate—for manpower and job-creating programs.

Neither candidate appears to be paying much attention to the sector that many economists fear may pose the greatest threat—the world economy.

A widespread slowdown has developed in the major industrial countries. The British pound has been sinking like a rock. A huge balance-of-payments deficit hangs over the oil-importing countries—a deficit that private commercial banks are increasingly loath to finance, fearing that many debtor countries, both developing and developed, are overextended. The danger of massive defaults looms.

The Ford administration is taking an extremely resistant line against providing extra monetary reserves to rescue international debtors—even through the World Bank or the International Monetary Fund, let alone through bilateral aid.

A Carter administration would probably be more responsive to the threat of a world monetary crisis. A more rapid growth policy in the United States might help stave off such a crisis by increasing the market for other countries' exports. Mr. Carter's economic policy makers would also be more likely to press West Germany and Japan for faster expansion than Mr. Ford's key aides, especially Treasury Secretary William Simon, here.

Many businessmen and stock-market investors are apparently prepared to be upset over the possibility of a Carter victory. However, as one corporate executive said, "Business prefers Republican presidents but growls all the way to the bank under Democrats."

Ford Has Narrowed Carter's Lead, Polls Show

(Continued from Page 1)

McGee of Wyoming and John Tunney of California and Republicans Glenn Beall of Maryland, Bill Brock of Tennessee, Robert Stafford of Vermont, Robert Taft jr. of Ohio and James Buckley of New York, who also is endorsed by the state Conservative party.

Almost a Standoff

In the gubernatorial elections, the prospect is for a near-standoff. Republicans are favored to succeed Democratic governors in Delaware, Illinois and Vermont while Democrats are expected to take over the state capitols in North Carolina and West Virginia. Montana and Washington are toss-ups.

The projections in the survey on the presidential race are hedged with more than the usual number of cautions. As pollster George Gallup has pointed out, the volatility of this year's candidate standings is literally unprecedented in survey research history, and the proportion of voters who affirm no more than a "soft" commitment to either candidate is exceptionally nigh.

Late polls in several states found the number of undecided voters increasing, not decreasing—a reversal of the normal pattern in the closing days of a campaign.

Today's Iowa poll of the Des Moines Register-Tribune, for example, reported that 16 per cent of the Ford supporters and 19 per cent of the Carter supporters in that state told interviewers last week they might change their minds before Election Day.

The obvious wavering of millions of voters on a presidential choice makes highly uncertain how large the turnout will be on Tuesday.

Early predictions were that less than half the potential electorate might go to the polls, continuing a steady decline in voting participation from 1960 onward. But the number of absentee ballots cast in such states as Texas and Michigan has been a record and experts on voting behavior have begun to guess that the turnout may be higher than it was in 1972.

A large turnout nationally would almost certainly favor Mr. Carter, particularly if the increase was among blacks and other minorities—who are traditionally among the most difficult to get to the polls. Labor unions, civil rights groups and the Democratic party organizations have made unprecedented efforts to turn out their members for Mr. Carter. If he wins Tuesday, those organizations will be able to claim a large share of the credit.

Republicans, who have been equally avid in identifying potential Ford supporters through phone bank operations, concede that heavy turnouts in such closely contested states as Texas, Mississippi and South Carolina would deny Mr. Ford any prospect of victory.

The mere fact that Mr. Ford is in a challenging position as the campaign ends is a credit to his tenacity and the success of his basic campaign strategy of "making Carter the issue."

Peter Hart, a pollster for Democratic candidates, said his surveys have shown "the people are philosophically in tune with the Democrats in believing it is time for a change." Mr. Gallup reported that voters, by a 3-to-2 margin, rate the Democrats as better able to deal with the nation's top problems.

"The problem," Mr. Hart said, "is the translation of that belief to the candidacy of Jimmy Carter... Ford couldn't win the election on the basis of either his job rating from the voters or their belief about the prospects for the country if he remains President. But Carter could lose it, on the basis of the doubts people have about him."

Robert Teeter, pollster for the Ford campaign, said the forces propelling the President's gains have stemmed from "the tremendous doubt about Carter's character." The Georgian was a newcomer to presidential politics this year, a man who won his nomination without significant help from traditional Democratic leaders. In the crucible of the fall campaign, his lead melted as voters' reservations about him increased.

The Ford strategy, developed immediately after he won a hard-fought battle to secure the Republican nomination from former California Gov. Ronald Reagan, was one of tightly controlled appearances—the "Rose Garden" campaign.

Mr. Teeter said that "except for the second debate, he [Mr. Ford] has been seen in public in his best light—not strident or stumbling."

While Mr. Carter's television ads continued to stress broad themes of competence, honesty and compassion, Mr. Ford's ads—in greater volume—focused on the voters' doubts about Mr. Carter.

The result has been that Mr. Carter's vote base has been shrinking toward his own home region, plus the few Northern states with strong Democratic electorates.

Of the 18 states The Post rates safe or leaning toward Mr. Carter, 11 are in the South or border region: Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Maryland, Missouri, North Carolina, Tennessee and West Virginia.

Except for Oregon and Ohio, both of which are shaky for the Democrat, the only other areas rated in Mr. Carter's column are Democratic bastions: the District of Columbia, Hawaii, Massachusetts, Minnesota, New York and Rhode Island. The large Appalachian population in Ohio is a key to Mr. Carter's strength there, as is the Fundamentalist vote in Oregon.

The Ford base, on the other hand, reaches from the three states of upper New England and the bedroom communities of Connecticut and New Jersey, across the Midwest and the mountain states into California and Washington on the Pacific Coast.

Mr. Ford is credited with a lead in only three Southern and border states—Louisiana, Oklahoma and Virginia—but he has overcome farm disaffection enough to be favored in all the farm states except Iowa and South Dakota, both rated toss-ups.

In many of the Ford states, his lead is narrow, and it would be surprising if some of them did not wind up going for Mr. Carter, just as the reverse is true for a few of the Carter states.

Delaware, which has voted for the winner of every presidential election since 1952, appears to be in Mr. Carter's column, while New Mexico—which has been on the winning side in every election since statehood in 1912—is reported leaning to Mr. Ford.

Two wire services last night released their own surveys of the 50 states, with both indicating more of an edge for Mr. Carter than The Post's rundown.

The Associated Press said Mr. Carter is leading in 22 states and the District of Columbia, with 295 electoral votes; Mr. Ford, in 14 states with 89 votes, and 14 states with 154 votes are rated toss-ups.

United Press International said Mr. Carter leads in 18 states and the District of Columbia with 220 electoral votes; Mr. Ford, in 16 states with 109 votes, and 16 states with 210 votes are toss-ups.

Humphrey Released From N.Y. Hospital

NEW YORK, Oct. 31 (UPI).—Sen. Hubert Humphrey said yesterday that he is in better shape than expected after cancer surgery and is ready to win another six-year term in the Senate, where he will work to become majority leader.

The 65-year-old Minnesota Democrat was cheered by well-wishers as he left the Memorial Sloan-Kettering Cancer Center, where he underwent surgery Oct. 7 to remove a cancerous bladder. The hospital reported that Sen. Humphrey "has made exceptional progress."

The senator said his doctors "think I'm in better shape than I ought to be... I'm feeling fine and prepared to go back to the Senate if the votes come in right." He is expected to win reelection easily on Tuesday.

Reforming the Reforms

Then there was the one about the two sorority sisters in the Midwest who wanted to make a parachute jump while carrying a huge Ford-Dole banner, but who couldn't figure out how to make their venture legal under current campaign law. The anecdote was just one more in the series of thighslappers and guffaws that have come out of the effort of both parties to observe a new, strict and baffling set of injunctions concerning the raising and spending of money to elect a president. The parachute caper (the Republican campaign official the two young women consulted was himself constrained by the law from advising them, unless he wanted to pick up the parachute tab) can now take its place in the burgeoning anthology of campaign reform jokes. It approaches, but does not surpass, the pickle of the congressman in New York who was afraid that putting the names of Gov. Carter and Sen. Mondale on his campaign buttons would amount not to a statement of the ticket he *is running with, but rather to an illegal* contribution to the campaign of the other two Democrats.

* * *

What are we to make of all this? What lessons should be drawn from it concerning the worth of our painfully enacted campaign financing reform legislation? Lesson No. 1, it seems to us, is that the legislation itself could stand some reforming. This should not come as a surprise to anyone. In fact, given the sweeping nature of the law that was enacted in the wake of the campaign financing scandals of 1972, it is hardly surprising that this year's maiden effort to campaign within its confines should have *presented the candidates with so many* problems. 1976, in other words, can be regarded as a kind of test run of the reforms. A great deal has been learned about their imperfections and their unforeseen impact on the realities of campaigning itself. These things should not be viewed as a reason to overturn the law or as the necessary flaws of any reform. Rather they should be considered by the next Congress in relation to reforming the reforms.

There seems to be a gathering bipartisan consensus about the principal difficulties. And these add up to a single massive irony. It is that the attempt to limit severely the influence of "special interests" and big-money donors on presidential campaigns and to make the campaigns themselves more dependent on the involvement of regular folk has, somehow, managed to diminish public participation in the campaigns—at least in the general election when the presidential campaign committees are supported entirely by federal funds. *Bumper-stickers*, buttons and other campaign paraphernalia that tend to stir up interest and generate activity have become too expensive to afford, given the limited amount of money available to candidates. The same is true of campaign literature, which includes speeches, position papers and other useful material that candidates can no longer afford to distribute except in the most stingy way. Fund-raising parties for the candidates have been proscribed: fund-raising for the national party committees does not seem so urgent. And the ban on private contributions to the presidential races has created endless tangles —of which the parachuting and button incidents are only two—that tend to discourage campaign initiatives.

* * *

Both parties, evidently, and the people who are working most closely with the two candidates feel the impact of these limitations and constraints. Both sides are also said to have been astonished at the degree to which public involvement dropped off with the removal of the need and/or right to engage in fund-raising. And there is also apparently an emerging consensus on raising the limit on contributions from $1,000 to $5,000, the theory being that no one in a multimillion-dollar presidential election is going to be "bought" for the larger amount.

It says something to us that, between them, the two parties this year will have spent over $1 million merely to deal with the provisions of the new law. Part of that expenditure of course is a result of the law's unfamiliarity. But part of it is a result of the law's intricacy and its ambitious attempt to proscribe every abuse in the book. By attempting too much, it may be harming the election process in unexpected ways. You can believe, as we do, that on the whole the campaign financing legislation has been a good thing and still think Congress should make it its business to begin reforming the reforms in the next session.

THE WASHINGTON POST.

Britain's Tough Choice

Prime Minister James Callaghan has warned the International Monetary Fund—and the United States and Britain's other principal allies—against trying "to force us into policies which would be so harmful to the economy that we would go into a downward spiral."

But this appears to distort for domestic political reasons what Britain is likely to be asked to do, as a condition for receiving the $3.9 billion it seeks from the IMF. Essentially, the IMF is likely to insist that the Callaghan government live up to the very stabilization program it has already announced as being in Britain's own best interests.

This program includes three major goals: to keep the money supply from growing at no more than a 12-per-cent annual rate; to bring public sector borrowing down from 9 per cent of Britain's total domestic output to 6 per cent, and to keep in place through the coming year the government's incomes policy, which limits wage increases to 5 per cent per annum.

Those measures are not so harsh as to wreck the British economy, indeed, they may be too mild to restore confidence in sterling, for the markets may conclude that, with inflation continuing or coming down very slowly, it is still too risky to continue holding pounds.

It does not seem credible that the IMF, under United States prodding, would—as reported by a British newspaper—have demanded that the Labor government devalue the pound to $1.50 as the price of getting *the $3.9-billion loan. Both the IMF and the* United States have abandoned the idea of a "right rate" for any currency, and in the midst of Britain's monetary crisis it would be foolhardy to try to peg sterling—and hand billions of dollars over to speculators willing to bet on a further fall of the pound.

If the British government wants to prevent the pound from continuing to fall, it must, at minimum, hold to the monetary and fiscal guidelines it has already announced. If that is not enough, Britain would have to choose between alternatives. One would be to take an isolationist line, including import controls (which would threaten to set off a round of trade restrictions by other countries) and troop withdrawals from the NATO command.

* * *

The other would be to let the exchange rate of the pound go, and hope that, by adhering to "sensible" fiscal and monetary policies over the longer run, the pound would *ultimately stabilize at a level appropriate to* Britain's real productive and export potentials. That route would involve dangers of ongoing inflation, depreciation, and withdrawal from Britain of funds for investment —and hence a continuing downward spiral in Britain's capacity to produce, unless Britain adhered to fiscal and monetary policies that were truly non-inflationary.

But has Britain the political will to do it? Even the moderate program to check inflation put forth by Prime Minister Callaghan has received a damaging rebuff from the majority of the executive committee of the Labor party, which voted this week to support a lobby fighting against public spending cuts proposed by the Labor government.

It is in the strong interests of the entire world monetary system—and the Western alliance—to help the British avoid either a swing to protectionism and isolation or a *spiraling economic tornado*; and the big loan through the IMF can help Britain buy a little more time. But only the British people and their government can take the steps that will halt the inflation that is the underlying cause of Britain's troubles.

THE NEW YORK TIMES.

International Opinion

Britain's Creditors

Prime Minister James Callaghan . . . warned the International Monetary Fund and some of our key creditors that if they insisted on "too much deflation" both Britain's social cohesion and her contribution to the defense of the West, would be threatened. Taken in a strictly literal sense this is so blatantly obvious that one would not think it needed saying. The impression which the Prime Minister conveyed though, whether deliberately or not, was that Britain's chief allies—they after all are meant when we talk of the fund—for some reason or another might wish to push Britain into a slump. Nothing, of course, could be further from the truth. Their one objective is to see a Britain restored to economic health as an essential partner of the alliance and a valuable market . .

In the International Edition

Seventy-Five Years Ago

November 1, 1901

PARIS.—*A lead article in Figaro today warns* the French and English press against indulging in periodical outbursts of enmity. Pointing out that the press now fulfills the duties formerly monopolized by diplomacy, which has much of its influence and prestige owing to the advances of democracy, the article concludes that the press has now more reason than ever to be responsible.

Fifty Years Ago

November 1, 1926

WASHINGTON.—*One hundred of the country's* labor leaders, headed by Secretary of Labor James J. Davis, urge the election of a Republican Congress in a manifesto made public today. The manifesto said in part: "We urge the wage earners to elect a Republican majority to the Seventieth Congress, because of their *policy on restrictive tariffs and immigration* which has helped the American worker."

Reflections on the 1976 Campaign

By James Reston

WASHINGTON.—We have loitered down now in this presidential campaign to the two-minute warning—the television pause before the last trick plays at the end of the game.

It is a time for reflection, not primarily about Gerald Ford and Jimmy Carter who are the acci*dents of our life, but about Amer*ica and the civilization it must defend in the last years of the 70s—and about the ideals it will place before its own children and the world as we enter the last quarter of the 20th century.

The decisions of the American people in the presidential elections of this century give us very little assurance that they understood the great struggles between freedom and tyranny in the first *two quarters of the century, or* even knew how to defend their own vital interests until they were forced to do so.

Isolation?

The American people thought we could isolate ourselves from the world in the tragic civil war within Western civilization that led to the First World War and the emergence of Communist Russia.

They rejected Woodrow Wilson's dream of a new world order under the League of Nations, and gave us Warren Harding in 1920 as a presidential consolation prize. They thought they could "do business with Hitler" in the Second World War, even after the German breach of the Maginot Line and the threat to Paris, and were rescued from their folly only by the cunning of Roosevelt and the monumental stupidity of the Japanese attack on Pearl Harbor.

After all this and Nixon too, we have managed somehow to survive, but the crisis of Western civilization goes on. Britain, if you read the headlines, is now *sinking into bankruptcy*, Europe is becoming as a military and political force what it is in geographical reality—"a little promontory on the continent of Asia"—our own hemisphere is breeding itself into economic chaos from the Rio Grande to the southern tip of Argentina, and still we babble on about *increasing* the *military* budget to protect a hungry world.

It will take more than a man to reverse this slow drift of Western civilization into confusion, isolation, and defeat in the last quarter of this century. It will take a philosophy and a government that has enough gumption to define it, and enough common sense, energy, and power to restore the trust of the American people in their government—particularly to get the attention, if not the support, of the people of our country under 30, who are now more than half of our 215 million.

Beyond that, it is obviously going to take a new look at this country's economic and racial problems in the Caribbean, in Mexico, and even in Canada. Henry Kissinger's shuttle diplomacy in the Middle East and lately in South Africa has been helpful, but we have more illegal Mexicans in this country today—almost 10 million—than we have unemployed, and we are getting *into more and more trouble* even with our closest friends and neighbors in Canada.

Whether the human family keeps the ideal, if not the reality, of personal liberty and the freedom of the mind depends in large measure on what America does between now and the beginning of the 21st century.

Freedom

"Have the elder races faltered, do they droop and end their lesson, over there beyond the seas?" Walt Whitman asked. Well, it is fairly obvious that the new world now has to come to the rescue of the old and that if the "center" of Western civilization is to "hold," it must obviously be held in America.

As the world is new, we must think anew, Lincoln said, and at the two-minute warning in this campaign, I think this is the *main argument for Carter.* I don't know whether he has this vision of the future, but he clearly has the conviction of the American dream—anybody who has talked to him at length personally knows this—and he has energy and a chance to bring back the young and the rejected South.

In short, Carter offers the opportunity of something new for the future, and paradoxically something old in American life, which may be more essential to the salavation of our civilization than a bigger budget for the Pentagon.

"We later civilizations, we too now know that we are mortal," Paul Valery said in discussing "The Crisis of the Mind" in Western civilization.

"We had long heard tell of whole worlds that had vanished, of empires *sunk* without a trace, gone down with all their men and all their machines into the unexplorable depths of the centuries.

"We were aware that the visible earth is made of ashes, and that ashes signify something. Elam, Nineveh, Babylon were but beautiful vague names, and the total ruin of those worlds had as little significance for us as their very existence. But France, England, Russia—these too would be beautiful names. Lusitania, too, is a beautiful name. And we see now that the abyss of history is deep enough to hold us all. We are aware that a civilization has the same fragility as a life."

The World and the White House

By C. L. Sulzberger

PARIS.—The only good thing about the U.S. election as viewed from abroad is that one of the candidates has to lose. They have recently been hammering away at each other on matters of foreign policy that neither shows impressive evidence of understanding.

Quite obviously it is less a question of persuading nations overseas of the wisdom of one or the other on world affairs. The appeal is directed at ethnic minorities in the United States itself—because foreigners don't vote.

The *olla podrida* cooked in the U.S. melting pot has been a matter of internal political concern since the mass emigrations from revolutionary Europe of 1848. In recent decades, however, the ethnic emphasis has shifted somewhat.

Neither Jerry Ford nor Jimmy Carter took the usual preconvention tour of the three "T" league —Italy, Ireland and Israel. Nevertheless, Italo-American, Irish-American and Jewish-American sentiments are still carefully addressed although there is increased focus on Afro-Americans and Slavic-Americans.

Reckless

Ford and Carter each spoke recklessly on Eastern Europe. The President mixed up his footwork and his dental work when he said the area was not under Soviet domination. This was a boost for Carter until the ex-governor stuck his nose into the affairs of Yugoslavia, a country he was possibly not well acquainted with.

He announced if he were boss we wouldn't go to war should Moscow try to seize that nation. But Carter has kept on recklessly making statements on subjects he is not yet versed in, like Yugoslavia and Ireland. He insists Yugoslavia is not important enough to U.S. interests to fight for although even the Italian Communists (who frighten him less than Ford) are worried sick about their neighbor's future after Tito dies.

Also, Carter has made sonorous threats about how he would apply a counter-embargo against any Arab oil embargo. If he becomes president and such a boycott starts, he might find it difficult to go it alone; yet it is sure that Western Europe or Japan wouldn't merrily follow him along that course.

Innocent of Wisdom

All these arguments, often innocent of wisdom, puzzle more than amuse people overseas. But foreign lands have to postulate certain assumptions anyway. For example, a well-known chief of government recently observed to me: "I wonder if Moscow would prefer a Polish secretary of state to a German secretary of state. I doubt it." Of course he was referring to Zbigniew Brzezinski, one of Carter's chief foreign-policy counselors, and Henry Kissinger.

The chances are neither may be secretary next year regardless of who wins. The real worry abroad is that if Carter is the *victor*—regarded as likely by London's leading betting brokers—it will mean another shakedown cruise while a new U.S. president bones up on the rudiments of foreign policy.

After all, the only chief executives since Herbert Hoover who entered the White House with any advanced training in this arcane field were Dwight D. Eisenhower and Richard M. Nixon. And many people forget that—although the former is not admired as a great president and the latter is condemned as an amoral one—in this realm both did well.

Fortunately, most foreign chanceries comprehend our eccentricities and know there is a difference between what Americans vote for and what they get.

Nowadays, many Americans wonder whether habits established by the Founding Fathers in a horse-and-buggy age when travel was long and mass communications didn't exist must still govern electoral rules.

Dreary Debates

Foreigners aren't even doubtful. They think our elections should be more related to factual actualities than to ethnic prejudices when overseas matters are discussed. Above all, they want shorter U.S. campaigns because Washington's policy is habitually paralyzed once every four years.

Thus, in 1976, we see canal negotiations with Panama frozen stiff; our participation in southern African affairs abruptly souped up, then quieted, until we see where the black vote goes; statements on Italy (especially the role of its independent-minded Communist party) confused according to what politicians calculate will appeal to Italo-Americans.

Since the dreary debates, both Ford and Carter have been more under the control of party diplomatic experts and therefore less inclined to rush in where advisory angels fear to tread. The incumbent President has benefited from this phase more than his rival.

Ford has tried to extricate himself from the mire of confusion he got stuck in when discussing Communist East Europe. But Carter has kept on recklessly making statements on subjects he is not yet versed in, like Yugoslavia and Ireland. He insists Yugoslavia is not important enough to U.S. interests to fight for although even the Italian Communists (who frighten him less than Ford) are worried sick about their neighbor's future after Tito dies.

Also, Carter has made sonorous threats about how he would apply a counter-embargo against any Arab oil embargo. If he becomes president and such a boycott starts, he might find it difficult to go it alone; yet it is sure that Western Europe or Japan wouldn't merrily follow him along that course.

Innocent of Wisdom

All these arguments, often innocent of wisdom, puzzle more than amuse people overseas. But foreign lands have to postulate certain assumptions anyway. For example, a well-known chief of government recently observed to me: "I wonder if Moscow would prefer a Polish secretary of state to a German secretary of state. I doubt it." Of course he was referring to Zbigniew Brzezinski, one of Carter's chief foreign-policy counselors, and Henry Kissinger.

The chances are neither may be secretary next year regardless of who wins. The real worry abroad is that if Carter is the *victor*—regarded as likely by London's leading betting brokers—it will mean another shakedown cruise while a new U.S. president bones up on the rudiments of foreign policy.

After all, the only chief executives since Herbert Hoover who entered the White House with any advanced training in this arcane field were Dwight D. Eisenhower and Richard M. Nixon. And many people forget that—although the former is not admired as a great president and the latter is condemned as an amoral one—in this realm both did well.

Venezuela Takes a Look Around

By William Buckley Jr.

CARACAS.—Carlos Andres Pérez, the President of Venezuela, is passionate on the subject about which almost every Latin American is passionate: national sovereignty. And of course no discussion of national sovereignty can go forward in any other context than the relation between a Latin American country and the United States. President Pérez will wince as he recalls the American "intervention" in the Dominican Republic as lately as in 1965.

Does this mean that President Pérez regrets the Monroe Doctrine?

No. The Monroe Doctrine was okay for back when it prevailed. In those days—in the early hours after liberation from European colonialism—the little republics of Latin America needed a helping hand from the colossus of the north. But now, the Monroe Doctrine is an anachronism.

How can it be an anachronism if we have the colonization of Cuba going on before our very eyes?

Cuba

At the mention of Cuba, public officials of Latin America have considerable difficulty. The grand old man of Venezuela democracy, Romulo Betancourt is at once the political godfather of President Pérez, and the liveliest enemy of Fidel Castro alive. It was Betancourt who was substantially responsible for the boycott of Castro by the Organization of American States. His hostility has not lessened. But his protégés, while substantially sharing his sentiments about Castro, find it politically unsuitable to ventilate that hostility which is why they lean now toward the normalization of relations with Castro.

Pérez is cagey in discussing the matter. What—he is asked—would Venezuela do if, for instance, Castro proceeded to foster a revolution in Jamaica, an international development at least as imminent as the much-discussed Soviet intervention in Yugoslavia. Well, President Pérez would *not intervene directly* under any circumstances, non-intervention being the supreme commandment in foreign policy. On the other hand, any inchoate threat to Venezuela's own sovereignty would be "realistically dealt with." Well, if Castro, financed by the Soviet Union, should begin to extend his empire, for instance into Jamaica, and then hopscotch his way eastward along the Caribbean, skipping over, say, Puerto Rico, and the Dominican Republic, would Venezuela sanction sanctions?

The President of Venezuela here clutches into the Aesopian mode. We begin to talk in terms of the "neutralization" of offensive powers. Questions about how exactly neutralization is effected are neither welcomed, nor answered.

New Variety

Carlos Andres Pérez is a bright and sophisticated statesman of the new variety moving circumspectly, obliquely, always avoiding confrontation, even rhetorical.

Pérez is conscious of the latent power of the Third World community. He is happy to work as an agent of that power. Venezuela, with its huge wealth, its optimistic democratic inclinations, *is perfectly situated to act* as something of a bridge between the Third World and the West. If such countries as Venezuela are detached from the Third World bloc, would it not mean that such countries as Libya and Iraq would take over the leadership of that bloc unopposed?

Venezuela, facing such problems as potential Castro expansionism, thinks in terms of pressures jointly exercisable alongside Costa Rica and Mexico. These require, in the opinion of the President of Venezuela, extreme care not to give the impression that Venezuelan foreign policy is in any sense an instrument of American foreign policy: this would blow the whole operation, leaving policy exposed to the criticism and even the ridicule of the left.

Venezuela, with its triumphant victory over its local left-totalitarians (the Communists and their fellow travelers achieved less than six per cent of the vote the last time around), is cocky, perhaps even complacent about the threat of Caribbean Communism. An American observer is forced to reserve judgment. It wasn't, after all, Venezuelan foreign policy that created Fidel Castro.

Letters

A Lutheran Bishop

Re the article "Hungary Easier on Catholics as Key to Relations with U.S." (IHT, Oct. 9-10):

Murray Seeger errs when he identifies Bishop Zoltan Kaldy as a "Calvinist." Bishop Kaldy is head of the 430,000-member Evangelical Lutheran Church in Hungary. He is a member of the Commission on Church Cooperation of the Lutheran World Federation and is active in a number of inter-Lutheran and ecumenical activities.

CHARLES M. AUSTIN,

Geneva.

South Korean Defense

The *International Herald Tribune* (Saturday-Sunday Oct. 30-31) carried a story about me when I was in a public office in 1974.

According to the Washington Post story which was edited in *the IHT, the less-informed read*ers must have been misled. The reported story is not true and factual.

My self-imposed obligation to tell the readers about the true situation forces me to write this letter to you, as I am on the way home from Paris after having finished my official work of an international organization.

I was then not acquainted with John Nidecker, "a White House aide of the Nixon administration" at all, though one of the local political figures asked me to meet him in person. Incidentally, I had to refuse to meet him due to the pressure of work of public office which I held.

It was one Saturday afternoon, I recall, when Mr. Nidecker accompanied by a U.S. Embassy staff in Seoul visited me without any pre-arranged appointment at the Seoul Country Golf Club and inquired if they could see me, though briefly.

All Mr. Nidecker told me then at the golf club restaurant was nothing but that he wanted to acquaint himself with me. This was all that I know about Mr. *Nidecker's visit to Korea and to* me in 1974. Since then I had neither chance to see him again nor heard from him.

I should tell you and readers that I have not the slightest *knowledge about the reported* present of $10,000 to Mr. Nidecker and my personal signature on the envelope which contained the said cash, according to the reported story.

You are assured of my full-fledged cooperation in your finding of the real story.

I could have brushed aside this story as mere absurdity, though it offends me. Nevertheless, my second thought obliged me to write you in order to prevent the readers from being misled and your story abused for the U.S. political campaign.

CHONG KYU PARK.

Rich and Poor Countries Share Trend

Birth Rates, Hunger Slow Growth

UNITED NATIONS, N.Y., Oct. (AP).—Falling birth rates and reseen deaths from hunger slowed global population th to the point where a ling of world population by year 2000 is no longer anticid according to the World-h Research Institute.

ced by two of the world's four populous countries, China the United States, population th has decreased in rich and countries alike, reversing for first time in history a trend radually accelerating growth, study adds.

e institute is based in Washon and is funded in part by United Nations. Its purpose study environment-related lems in the world.

Lester Brown, an agricul-l economist who heads the institute, says in the report released here Thursday that the decline in population growth reflects more than anything else the widening availability of family-planning services, including both contraception and abortions, and a growing desire to use them.

Spread of Legal Abortion

By early this year, 64 per cent of the world's people lived in countries where abortions were legal, up from 38 per cent in 1971, the report says.

But in some of the poorest countries, such as India and Bangladesh, food shortages have pushed up death rates, resulting in millions of "additional and avoidable" deaths over the last five years, according to the report.

The study shows that the rate of world population growth reached an all-time high about the beginning of his decade and then began to subside.

In 1970, the number of humans grew by an estimated 1.9 per cent annually, or 69 million based on the world population of 3.59 billion. The most recent data show a marked decline since then to 1.64 per cent in 1975, or 64 million out of 3.92 billion.

The slowing of population growth was concentrated in three regions—Western Europe, North America and East Asia. The growth rate fell by almost one-half in Western Europe and by a third in North America and East Asia.

East Europe Rates Up

The few that still have rising birth rates are mostly in Eastern Europe, where the governments recently adopted policies encouraging births, reversing long-standing declines in population growth.

The dramatic drop in the birth rate of China from 1.85 per cent in 1970 to 1.18 per cent in 1975 was the most rapid of any country on record, the report says. China's current population was estimated by the institute to be around 823 million, a fifth of the world's population.

Dr. Brown says China's performance should come as no surprise: the comprehensive Chinese effort focuses not only on increasing family planning services, including abortion, but also upon reshaping economic and social policies to encourage small families, and on an intensive public education campaign extolling the benefits of smaller families.

In the United States, the report continues, the expected upturn in birth rates in this decade, when the children of the postwar baby boom entered their reproductive years, has not materialized. Instead, the population growth rate declined by a third, from 0.9 to 0.6 per cent between 1970 and 1975, and the decline is continuing in 1976.

lection for India Parliament Postponed for Another Year

EW DELHI, Oct. 31 (NYT)—ne Minister Indira Gandhi's rnment announced yesterday elections for Parliament were postponed for another year, early 1978.

ay minister H.R. Gokhale inned the lower house of Parlia-t that the term of the House, ch was extended by a year March, would be extended by ther year.

lections for the 525-member se were due last March at the ration of its five-year term. wever, following the declara-n of national emergency in ne last year curtailing civil rties, the government decided to hold the elections as eduled.

he move has helped Mrs. ndhi, whose Congress party trols more than two-thirds of membership in the lower se, to adopt far-reaching legis-ve measures. Currently the se is debating a constitutional endment bill containing 59 ses, which, when adopted, ld place the executive and liament above the judiciary insure the Prime Minister's tion from opposition on-ghts.

he bill has already received initial approval of the mem-s and will be finally voted on y this week. Its adoption is oregone conclusion because of overwhelming numbers of the ng party members. Moreover, st of the opposition parties are cotting the discussions on the und that an extended Parlia-nt has no mandate to adopt such far-reaching changes in the Constitution.

One of the provisions of the bill has provided for a six-year term for the lower house instead of five years. Some Congress party members have demanded that the term be made seven years.

Mr. Gokhale said the government favored postponement of parliamentary elections now because "the time is not ripe for elections."

He said the immediate task before the country was to consolidate the gains of emergency.

"The disruptive forces that had forced the governments to declare emergency are still active," he said. "Though they are dormant, they are continuing their activities in a more dangerous manner.

"I do not think that we have come to a situation when it is desirable, in the larger interests of the country, to go in for polls now."

Probe of Riots Urged

NEW DELHI, Oct. 31 (UPI).—Legislators of Prime Minister Gandhi's own party and of the pro-Moscow Communist party, which normally supports her, have joined demands for a judicial investigation of riots against forced sterilization in a village north of New Delhi.

Witnesses to the riots Oct. 18 and 19 in Muzaffarnagar estimated the death toll at from 50 to 150 after police opened fire on crowds protesting that members of their families and friends had been dragged away by police and forced to undergo sterilization.

Proposal by Turkey Rejected by Nicosia

NICOSIA, Oct. 31 (AP).—The Cyprus government yesterday rejected a Turkish proposal for setting up a temporary joint Greek-Turkish government on the island.

A Cyprus spokesman said the proposal was aimed at "the undermining of the position of the internationally recognized Cyprus government, or rather its abolition." The proposal, made Friday, said each side's view on the final solution of the Cyprus problem would be reserved and the temporary administration would not be a model for a future Cyprus state.

United Press International.

SEARCHING—A Sakata, Japan, resident picking in the ruins of his home, one of the more than 1,000 buildings destroyed Friday in a fire in the city in northern Japan. More than 3,500 persons were left homeless, but no deaths had been reported from fire.

Airlines Allowed to Keep Fares At High Rate on Atlantic Route

WASHINGTON, Oct. 31 (AP).—A federal judge has agreed to stay a decision by President Ford that would have prevented international airlines from maintaining the higher fares that they wanted on Atlantic flights this winter.

The decision Friday by U.S. District Judge Oliver Gasch means the airlines will be able to put the higher fares into effect tomorrow so long as they file the necessary papers with the U.S. Civil Aeronautics Board before that time.

Judge Gasch's order stayed the effectiveness of the President's order until Thursday. The judge scheduled a hearing at that time to decide whether to issue a permanent order.

The airlines traditionally charge their highest fares in summer, medium-priced fares during the fall and spring seasons and the lowest fares during the winter. However, the airlines flying the Atlantic were not able to agree among themselves what fares to charge this winter.

They therefore sought to continue the fall fares throughout the winter season.

Thailand Reinforcing Outpost Under Attack

BANGKOK, Oct. 31 (AP).—Reinforcements were being rushed to a remote defense outpost in northeastern Thailand to help fight off an attack by Communist insurgents in which eight government soldiers have been killed and a helicopter has been damaged, authorities said today.

The clash, which started two days ago, is taking place in Loei Province, 275 miles northeast of Bangkok, in an area infested with Communist guerrillas. Authorities also reported continued fighting between insurgents and border police 350 miles north of Bangkok, but no details were available.

Foreign Control Dwindling

Nigeria Is Moving to Increase 'Indigenization' of Companies

By John Darnton

LAGOS, Oct. 31 (NYT).—In an effort to wrest control of the economy from foreign hands, Nigeria has embarked upon a stepped up policy of forcing foreign-owned companies to increase Nigerian ownership.

The policy, called "indigenization" or "Nigerianization," has caused an outcry from international businessmen, who assert that it will discourage the flow of investment capital to what is the biggest, most profitable marketplace in black Africa.

A major bank, Citibank, has already decided to pull out rather than accede to the government demands. It is in the process of liquidating a loan and lease portfolio amounting to $60 million.

Other foreign banks have decided to remain, at least temporarily, by selling a required 60 per cent of their equity shares to the Central Bank of Nigeria at the beginning of this month, the deadline set by the government for the banks to act.

Profit Motive

The federal military government, for its part, has gone to great lengths to assuage the fears of foreign investors. It is not nationalizing the businesses, it points out, but merely increasing the proportion of ownership by Nigerians in order to become master in its own house. A handsome profit can still be made, it says, by those who follow the rules.

"In embarking on idigenization, the government has been influenced by the need to place control of the Nigerian economy squarely in the hands of Nigerians and to insure that Nigerians are the main beneficiaries of the resources of their country," said Lt. Gen. Olusegun Obasanjo, the head of state, in a broadcast on June 29.

Throughout much of black Africa, there is a trend toward "Africanizing" the management or ownership of key industries, but nowhere is it as pronounced as in Nigeria, whose gross national product is equal to that of all the other black African nations combined.

As spelled out in a white paper issued by the government in July and soon to be legislated in a military decree, the indigenization is a radical extension of an effort started in 1972 under the regime of Gen. Yakuba Gowon.

Failure Is Cited

That effort largely failed, according to a report by an Industrial Enterprises Board set up last November by the more nationalistic military regime that ousted Gen. Gowon in July of last year.

Under the provisions of the white paper, the categories for Nigerian ownership are broader and the amount of ownership greater than under the Gowon decree for indigenization. There are now three categories. The first, 100-per-cent Nigerian owned, ranges from cosmetics manufacture to film distribution and covers a wide scope of businesses. The second, to be 60 per cent Nigerian owned, includes banking, insurance, mining, fertilizer production, pulp and paper mills, plantation agriculture, cement manufacture, construction industries and large-scale department stores and supermarkets. Any foreign enterprise not in these two categories falls automatically into the third, which calls for 40-per-cent Nigerian ownership.

The businesses have until December, 1978, to meet the deadline. In drawing up the white paper, the government softened somewhat the recommendations of the board.

The banks, however, were the sole exception to the two-year deadline. They had until Oct. 1 to achieve 60-per-cent indigenous equity participation—a date that was set, Gen. Obasanjo said in his broadcast, because of the "critical nature of banking institutions to the success of the indigenization effort and indeed the health of the Nigerian economy."

The largest banks here, Barclays International and Standard and Chartered, agreed to increase Nigerian equity—already more than 40 per cent—to 60 per cent. The U.S. banks were 100-per-cent foreign owned.

Chase Manhattan sold 60 per cent of its equity shares at 1.24 naira, or almost $2 a share. Under the arrangement, the federal military government will control three of the five seats on its board, including the chairmanship. The bank will continue to operate under its own name.

First National Bank of Chicago also sold 60 per cent to the central bank but won the right to function under a new name. The Bank of America held to the same agreement.

In capitulating to the government's demands, the foreign banks were clearly looking to the time a year or so from now when Nigeria—whose imports are skyrocketing and whose capital needs increase with each new development project—will go into the overseas money market. They want to be in on the ground floor.

3 Catholics Are Slain in North Ireland

Following Killing Of Maire Drumm

BELFAST, Oct. 31 (UPI).—An upsurge of sectarian killings—starting with the slaying of Maire Drumm, one of Northen Ireland's most prominent Catholic figures—claimed at least three more lives during the weekend.

Police sources said today they believed the police may have identified the gun used to kill Mrs. Drumm, 56, in her room in Mater Hospital Thursday night.

The sources said preliminary forensic reports indicated the fatal bullets were fired from a weapon that police previously determined was used by an extremist Protestant paramilitary organization, the Ulster Volunteer Force.

The funeral for Mrs. Drumm, a former vice-president of Sinn Fein, the legal political arm of the outlawed Irish Republican Army, is scheduled for tomorrow.

Three more Catholics were shot to death during the weekend.

A young Catholic was stopped on the street at 3:30 a.m. yesterday as he walked with his girl friend. She was ordered at gunpoint to lie face down on the sidewalk while two gunmen abducted the youth, then beat him severely before shooting him to death with a bullet in the head.

Two more gunmen, thought to be Protestants, hijacked a newspaper delivery truck last night and, while the 10-year-old son of one of the victims watched, shot two men to death at point-blank range.

The boy, son of John Maguire, 56, was hit in a leg in the burst of gunfire. The victims were both Catholics.

The Ulster Freedom Fighters group was blamed for the killing of the Catholic youth. Police said they were tipped off to that assassination by a caller claiming to speak for the group.

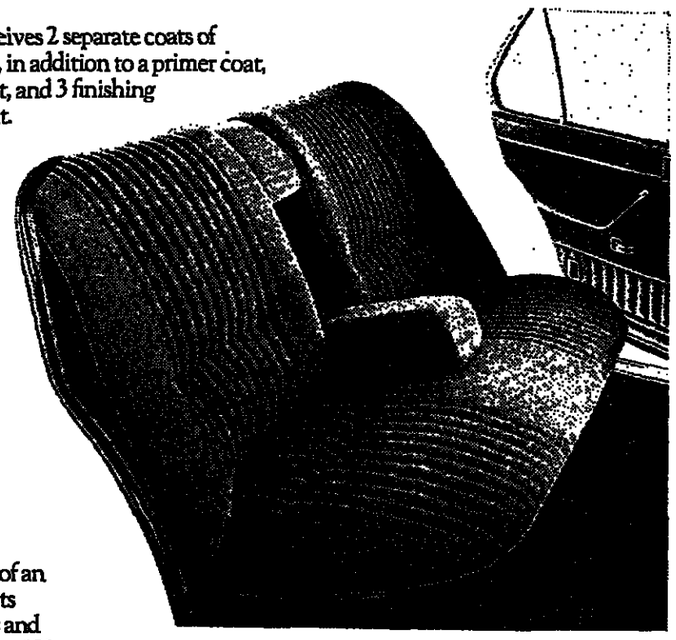
But sources connected to Protestant paramilitary groups denied the groups were involved in any of the weekend slayings.

The sources revived charges that Protestant and Catholics both have made concerning past assassinations—that the slayings may have been engineered by the British Army's undercover Special Air Services regiment.

Cape Town Allows Ebony

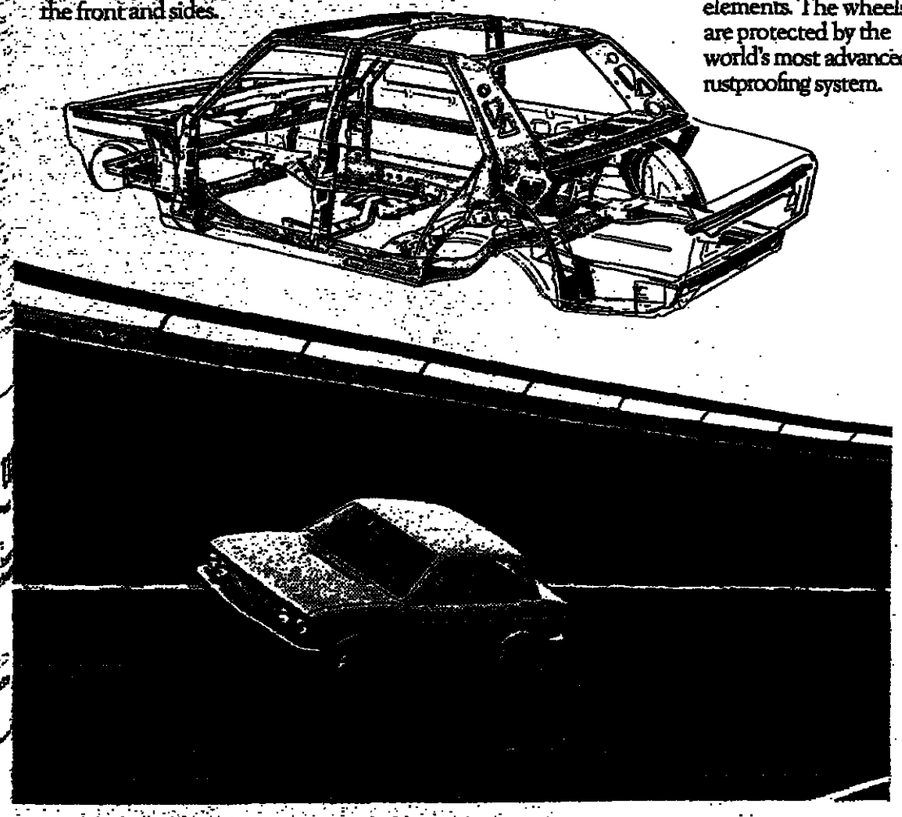
CAPE TOWN, Oct. 31 (AP).—South Africa's censors have lifted a 20-year-old ban on the black U.S. magazine Ebony, which may now be imported, it was announced.

What we did with the bigger, more luxurious Fiats besides making them bigger and more luxurious.



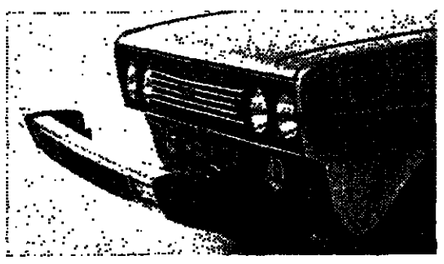
It's easy to see how the Fiat 131 and 132 are different from other Fiats. They're bigger. They're more comfortable. They're more luxurious.

But the biggest differences are those you can't see. They're deep in the engine. Inside the body. Under the paint.



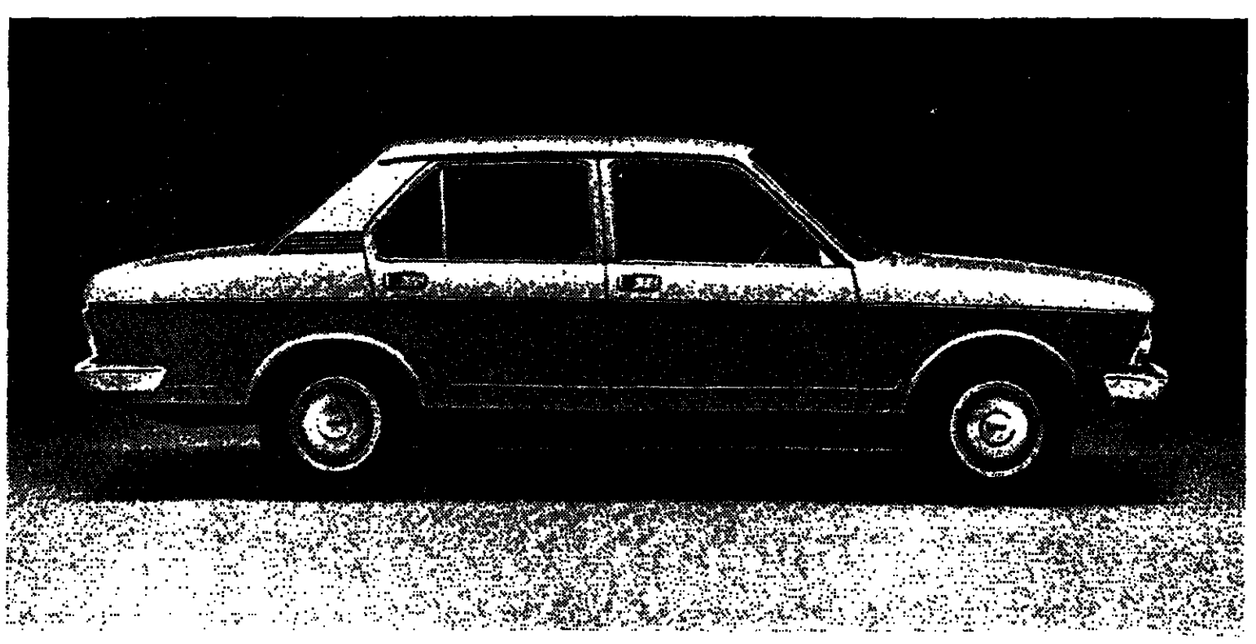
According to a Swedish government study, the average Fiat will last 11.9 years. We built the 131 and 132 to do better.

Each car receives 2 separate coats of rustproofing, in addition to a primer coat, an undercoat, and 3 finishing coats of paint.



The passenger compartment of the 131 is protected by a steel cage. This makes it indeformable from both the front and sides.

The entire underbody is sealed against the elements. The wheels are protected by the world's most advanced rustproofing system.



In the event of an accident, parts like bumpers and fenders on the 131 are easily removed and replaced.

Like most luxury cars, the 132 is very roomy in the front. Unlike most luxury cars, it's also very roomy in the back.

FIAT

The engines on our 131 and 132 have been tested for over a million miles. The valves last twice as long as ordinary valves. The rings last far longer than ordinary rings.

State-by-State Checkoff Shows Close Race for White Hous

WASHINGTON (WP).—Here is a state-by-state glance at Tuesday's U.S. elections as compiled by The Washington Post.

It gives the chances in the presidential contest, plus how things look in the governors and Senate races and some of the more important battles for House seats. Figure after the state name is its electoral vote.

The East

Connecticut (8)

Resistance to Carter among both Italian Catholics and some liberals propelled Ford into a 7-point lead in a GOP poll two weeks ago, and the state was all but written off at that time by the Carter headquarters in Atlanta. But the Democratic registration lead is up by 32,000 in the past year and labor is making a massive effort to turn out the vote, so some veteran local observers still put it into a tossup category.

The loss of any coattail help for Democratic challenger Gloria Schaffer, the secretary of state, erases whatever worries Sen. Lowell P. Weicker jr. (R) had about a second term. He's been heavily favored from the start. No change is expected in the House delegation.

Delaware (3)

Republicans have been looking for a sweep of major races in Delaware, but the presidential contest appears to be very close. A Wilmington News-Journal poll in mid-October gave Carter a 5-point lead and both sides say the size of the turnout could determine the race in a state that has voted for the winner in every election since 1952.

Gov. Sherman Tribbitt (D) is trailing Rep. Pierre S. (Pete) duPont by a 2-to-1 margin in the same poll and duPont is rated a sure winner. The heat has increased in the Senate race between incumbent William V. Roth jr. (R) and Wilmington Mayor Thomas Maloney (D), but Roth appears to be holding a comfortable lead. The race for the House seat vacated by duPont is considered a tossup.

District of Columbia (3)

Say Carter and make it emphatic. There is just no suspense here.

Maine (4)

Traditionally independent, Maine voters appear to be leaning Republican this year. Ford edged ahead of Carter by 2 points for the first time last week in a series of polls by the Bangor Daily News, and has the endorsement of Gov. James Longley, an independent. It is still close, but Democrats are worried.

There's also some nervousness about Sen. Edmund Muskie (D), challenged by Robert Monks (R), a wealthy businessman and former state energy commissioner, who has run the most expensive TV campaign the state has ever seen, blaming Muskie for Maine's worsening economic problems. But observers still rate Muskie the favorite.

Maryland (10)

Carter's lead in Maryland, long considered one of his safer states, has dropped to a shaky 5 per cent, according to a statewide poll taken after the last debate and published Friday by the Baltimore Sun. That would normally put the state in the tossup category, but Republicans virtually abandoned hope some weeks ago and Ford has not campaigned here.

In the Senate race, Rep. Paul Sarbanes (D) of Baltimore is almost universally expected to defeat Sen. Glenn Beall (R) with independent Bruce Bradley bringing up the rear.

Democrats expect to hold Sarbanes's House seat with Baltimore Councilwoman Barbara Mikulski (D).

Massachusetts (14)

The only question on the statewide races is the size of the margin for Carter and for Sen. Edward Kennedy (D), a cinch for reelection over Republican businessman Michael Robertson.

Republicans are concentrating on one House race, where Rep. Robert Drinan (D), the Jesuit priest who has won three straight squeakers, faces a strong opponent in Arthur Mason (R), a Brookline lawyer with unusually good connections to top-level GOP officials. The race is rated a tossup.

New Hampshire (4)

This state did well by both Ford and Carter in the primaries last March, but signs are it is reverting to its normal conservatism now, with the President out front. Both Reagan and Ford leaders are backing the GOP ticket.

Controversial Gov. Meldrim Thomson (R), seeking a third term, has made peace with party moderates by endorsing Ford and is favored to defeat Harry Spanos (D), former party leader in the state senate.

New Jersey (17)

From a once-solid lead of 15 points, Carter has slid to the point that he could lose New Jersey on Tuesday. Constant feuding between state Democratic factions and the out-of-state Carter coordinators has hampered organizational activity, and Republicans have capitalized on the situation to give Ford a chance in the eighth-biggest state.

AP.

Daniel Patrick Moynihan
. . . running in New York.

Sen. Harrison (Pete) Williams (D) faces no threat from underfinanced and unknown David Norcross (R).

New York (41)

Late polls have eased the Democrats' worry that Carter might lose New York, which their nominee has carried in three of the last four elections. Surveys for Newsday, The New York Times and the New York Daily News have put Carter ahead, the last of them by a 6-point margin. Ford has spent much of the weekend in a blitz of the state, but with Eugene McCarthy barred by the courts from a place on the New York ballot, the odds against Carter's losing the state seem heavy.

The same surveys give a stable lead of 5 to 10 points to Daniel Patrick Moynihan (D) over Sen. James Buckley (Cons.-R). The former United Nations ambassador has rallied from a slump with the help of an expanded television campaign, and appears to have a solid advantage.

Pennsylvania (27)

Democrats have been discouraged about the inability of Carter, who won a major primary victory, to assemble the ingredients of a winning campaign despite repeated visits since Labor Day and an economic situation worse than that of most states. He has been plagued by factional problems, including a very tenuous truce with Philadelphia Mayor Frank Rizzo (D), the target of Carter attacks during the primary. But Republicans say Ford has been able to take only minor advantage of Carter's troubles, and claim no more than an even chance in the state.

In the race for the seat of retiring Senate minority leader Hugh Scott (R), both parties' private polls two weeks ago showed Rep. H. John Heinz 3d (R) opening a narrow lead over Rep. William Green (D), thanks in part to a television blitz fueled by Heinz's $1.5 million in gifts to his own campaign. But Green has made effective use of the spending issue, at the same time cranking up his own answering television barrage, and the race is moving back to a tossup.

Rhode Island (4)

Normally one of the most Democratic states in the nation, Rhode Island, with its heavy Catholic population, has been cool to Carter who has not bothered to campaign there since losing the primary last June. Nonetheless, a recent poll puts Ford 9 points behind, and the betting is that unemployment and tradition will give Carter a narrow win.

Lt. Gov. Joseph Garrahy (D), a non-controversial figure, is expected to win the gubernatorial battle from James Taft (R), the aggressive mayor of Cranston, but serious factional fights in the Democratic party could cause Garrahy problems.

Vermont (3)

Ford has been favored here, but a mid-October Vermont Opinion Research poll gave the President only a 3-point lead, and Carter has had his "Peanut Brigade" of Georgians working the state. At best, a narrow win for Ford is now foreseen.

In the gubernatorial race, the same poll says State Rep. Richard A. Snelling (R) has moved ahead of State Treasurer Stella Hackel (D), a conservative who had a tough primary fight and has been repudiated by prominent liberals in her own party. Snelling is now favored.

On the other hand, Sen. Robert Stafford (R) has come perilously close to an upset at the hands of Gov. Thomas Salmon (D) in a race whose name-calling has come as a shock to Vermonters, accustomed to much gentler contests. Stafford's incumbency gives him a slight edge, but Republicans concede it is very close.

West Virginia (6)

Carter appears headed for an easy victory, part of a Democratic sweep of 1964 proportions.

John D. (Jay) Rockefeller 4th (D) could win a 2-to-1 victory over ex-Gov. Cecil Underwood (R) in his comeback from defeat four years ago at the hands of retiring Gov. Arch Moore (R).

Sen. Robert Byrd (D) is unopposed.

The only serious House contest involves the effort of Rep. Ken Hechler (D), beaten in the Democratic gubernatorial primary, to retain his House seat on a write-in campaign against Nick Joe Rahall (D) and E.S. (Steve) Goodman (R).

The Midwest

Illinois (26)

Carter has been fading steadily in the Chicago Sun-Times straw poll, which has a fine record of historical accuracy. Saturday, Ford, who had begun the race 10 points behind, overhauled Carter, 49.7 to 49.0, with Eugene McCarthy taking 1.3 per cent. Republicans say their private polls show the same trend and believe Ford will win this key state. As usual, Democrats say Chicago Mayor Richard J. Daley will deliver enough votes to win if the race is really that close.

The same poll gives James Thompson (R), 40, a former federal prosecutor, a 2-to-1 lead over state Secretary of State Michael Howlett (D) in the race for governor. Howlett had Daley's help in beating Gov. Dan Walker (D) in the primary, but he is beyond rescue by anyone now.

Indiana (13)

Ford overcame Carter's early lead during September, then slipped back a bit after the resignation of Hoosier Earl Butz as secretary of agriculture, but now seems to have moved ahead to stay in this normally Republican state. His margin is not large, however, and Democrats hope their successful registration drive may yet key an upset.

Republicans look for a strong state ticket to help Ford. Gov. Otis Bowen (R) is a heavy favorite for reelection over Secretary of State Larry Conrad (D). Former Indianapolis Mayor Richard Lugar (R) continues to lead Sen. Vance Hartke (D), who barely survived a primary challenge from Rep. Philip Hayes (D) and has been trailing in his race from the start.

Democrats gained five House seats in Indiana in 1974 and will be hard-put to hold all of them.

Iowa (8)

Carter is hanging tough in this state, which has gone Democratic only once in the last six presidential elections. Farm issues and a strong organization going back to last January's Iowa caucuses work in Carter's favor and make Iowa anything but safe for Ford. The Des Moines Register poll shows it a tossup.

Kansas (7)

Ford, strengthened by the choice of Kansan Bob Dole as his running mate, has been running anywhere from 7 to 17 points ahead in broadcast and published polls in October, and earlier GOP nervousness about a farm revolt appears to have ended.

The key House race pits Rep. Martha Keys (D) against Ross Freeman (R), a Topeka businessman. Keys won an upset victory in 1974, subsequently was divorced and has married her Ways and Means Committee colleague, Rep. Andrew Jacobs (D-Ind.). The issue of alleged "divided loyalities," though not raised explicitly by Freeman, puts the district in extreme jeopardy for the Democrats.

Michigan (21)

Democrats are encouraged by a big registration boost, record absentee voting and a mid-October Detroit News poll showing Carter within 3 points of Ford. Republicans concede the trend has been to Carter, but count on Ford's final appearances today to cinch a narrow victory for the homestate boy.

The race for the seat of retiring Sen. Philip Hart (D) between Reps. Donald Riegle (D) and Marvin Esch (R) is also tight. Riegle has been slugged with stories in the News recounting details of an extramarital love affair and a financial dispute with his former wife, and his lead dropped to 1 point in mid-October. But there has been some backlash to the newspaper campaign and the young Flint congressman, who switched from Republican to Democrat a few years ago, may have a slight edge on his indefatigable campaigning.

The House seat Esch is vacating could go Democratic, but Democrats worry about losing the seat of veteran Rep. James O'Hara (D), beaten by Riegle in the Senate primary. Several incumbents face tough races, among them Democrats Richard Vander Veen (in Ford's old district) and Bob Carr, and Republicans Garry Brown and Philip Ruppe.

Minnesota (10)

With native son Walter Mondale on the ticket, Carter bought some insurance in Minnesota and figures to win the state by at least 10 per cent, with former Sen. Eugene McCarthy of Minnesota polling considerably less than that as an independent candidate.

Republicans are saying Sen. Hubert Humphrey (D), recovering from bladder cancer surgery, owes the voters a candid assessment of his long-term health prospects. But his unknown GOP opponent, Gerald Brekke, a professor, is not trying to exploit Humphrey's illness, and the veteran is regarded as a cinch.

UPI.

John D. Rockefeller 4th
. . . trying again.

No change is expected in the House delegation, except the replacement of retiring Rep. Joseph Karth (D) with St. Paul teacher Bruce Vento (D).

Missouri (12)

The state is still a battleground, with late visits from both presidential candidates, but Carter rates a narrow edge. A late October St. Louis Globe-Democrat poll gave him a 5-point lead, with 3 per cent for Eugene McCarthy. Gov. Christopher Bond (R), who neglected his own race to try to help Ford, was jolted by the same poll showing that Joseph Teasdale (D), a former Kansas City prosecutor, had climbed within 6 points of him. But Bond is still favored.

Attorney General John Danforth (R) is on his way to a landslide victory over ex-Gov. Warren Hearnes (D) for the seat vacated by Sen. Stuart Symington (D), giving the GOP one of its surest Senate pickups.

Nebraska (5)

Mr. Ford is running far in front, leading by 17 points in an early October poll, in the state where he was born and which has gone Democratic for president only once since 1936.

The shocker is the Senate race, where Omaha Mayor Edward Zorinsky, who switched from the GOP to the Democrats last year in order to run, is in a very close battle with Rep. John McCollister (R). McCollister has been the heir-apparent to retiring Sen. Roman Hruska (R), but Zorinsky is also a conservative (he avoided appearing with Mondale on the latter's visit to Nebraska) and is a strong campaigner. An Oct. 10 Omaha World-Herald poll put Zorinsky 10 points a head, but McCollister has counterattacked on his rival's labor support and most rate the race a tossup.

North Dakota (3)

Lowered wheat and sugar beet prices are a worse problem for Ford than Carter is, and recent administrative actions to help the farmers were an acknowledgment of the farm-state problem. But most observers rate Ford a narrow favorite in a state which has gone Republican all but once since 1940.

Gov. Arthur Link (D) is favored to turn back a strong challenge from Richard Elkin (R), a member of the state Public Service Commission.

Sen. Quentin Burdick (D) has no problems with his challenger, state Sen. Robert Stroup (R), and Rep. Mark Andrews (R) is a cinch for reelection.

Ohio (25)

The fascinating struggle here could be a key to the election. The Columbus Dispatch, published Sunday, gives Carter a 49-to-42-per-cent lead, with McCarthy drawing 5 per cent, a highly encouraging result for the Democrats. A private Democratic poll showed Carter only 2 points ahead last week. Carter has held unusual strength in small-town and rural Ohio, whose Appalachian migrants helped him to a vital primary victory, but Ford is running better than most Republicans in Cleveland, and anti-abortion sentiment helps him in Cincinnati. Democrats and labor are working with rare unity on their get-out-the-vote effort, and Sen. John Glenn (D) is helping in the small towns. But the state GOP organization is all out for Ford, and the President is coming back today for a final try. Call it a tossup, and watch it closely Tuesday night.

Sen. Robert Taft jr. (R) is lagging in his lackluster contest with ex-Sen. Howard Metzenbaum (D), trailing by 8 points in a private Democratic poll and by 6 points in the Dispatch poll.

South Dakota (4)

George McGovern could not carry his own state of South Dakota in 1972, but Carter may do it this year. Drought and farm discontent plus the personal popularity of both members of the Democratic ticket could make this the second time since 1940 the state has gone Democratic. But Republicans report growing support for Ford in the cities and the late rallying of backers of Ronald Reagan, who won the GOP primary. Both sides claim a narrow lead, and say the race will be won with 52 per cent of the vote. The two Republican representatives appear safe.

Wisconsin (11)

Ford is showing unusual strength in the Milwaukee area and Carter is benefiting from voter disaffection in farm counties, so the race looks very close. McCarthy could take 5 to 10 per cent of the vote in liberal Madison, and that could be enough to tip the state to Ford.

Sen. William Proxmire (D) is rated a sure winner over his opponent, former state Rep. Stanley York (R).

The most embattled incumbent is freshman Rep. Alvin Bladus (D). Rep. Robert Cornell (D), another freshman and a Jesuit priest, is now favored in his rematch with ex-Rep. Harold Froehlich (R).

The West

Alaska (3)

A mid-October Anchorage poll gave Ford a 15-point lead in that normally Republican city, which casts about 40 per cent of the state's vote. Democrats say the margin will be cut by the "bush vote," and foresee a close race after Carter documentaries have been seen by TV viewers. But Alaska has been Republican in three of four elections since statehood, and the odds favor Ford.

Rep. Donald Young (R) is rated a cinch over his cancer-stricken Democratic challenger.

Arizona (6)

The Democratic presidential nominee hasn't carried Arizona since 1948, and this does not seem to be the year. Carter is trailing Ford by 6 to 8 points in October polls, barely breaking even in liberal Tucson and losing in Phoenix.

Democrats now count on gaining the Senate seat, with Dennis DeConcini (D), 39, a former district attorney from Tucson and political moderate, rated 5 to 14 points ahead of Rep. Sam Steiger (R) in various polls. Steiger still suffers from his bitter primary with Rep. John Conlan (R) for the nomination to succeed retiring Sen. Paul Fannin (R).

Democrats have a good chance in at least one of the two House districts vacated by Steiger and Conlan. House minority leader John J. Rhodes (R) and Rep. Morris Udall (D) are strong favorites to hold their seats.

California (45)

The trend in California points to a Ford win, but neither side is claiming or conceding it. Both men began from weak bases here: Carter lost every county in the primary to Gov. Jerry Brown (D), while Ford carried only two counties against ex-Gov. Ronald Reagan (R). But in four successive polls by Mervin Field, Ford has moved up from 33 to 40 to 44 to 46 per cent, while Carter has dropped from 53 to 44 to 43 to 40 per cent.

Two weeks ago, Carter belatedly asked two of Brown's top organizers to try to save the state, in conjunction with Cesar Chavez's United Farm Workers, an earlier ally. But Republicans here traditionally have won the close races, where organization makes the difference, so Ford rates a narrow edge in what is, for him, a "must" state.

The strange contest between Sen. John Tunney (D) and 70-year-old S. I. Hayakawa, former president of San Francisco State University, is rated a tossup by both parties and by the polls, with Tunney still unable to stem heavy Democratic defections to the conservative semanticist. The final Field poll gave Tunney a 45 to 43-per-cent lead, with 12 per cent still undecided.

In the House races, there are several possible switches. Rep. Burt Talcott (R) may be the most vulnerable incumbent, while three Democrats, Reps. Robert Leggett, Mark Hannaford and Jim Lloyd, face challenges of some seriousness. There is also a close battle for the seat vacated by Rep. Alphonzo Bell (R).

Colorado (7)

Ford rates a definite edge in Colorado, despite the fact that Democrats have given Republicans a hard time in recent state races. Carter never paused long enough to build a base in this state.

Hawaii (4)

Despite the huge Democratic registration edge and a Carter lead of 17 points in one early poll, Republicans sensed a chance for an upset and slipped in $50,000 for a late TV blitz. Hawaii has not seen Carter, but the Democrats have carried the islands in every election since statehood, except 1972, and a late poll by local Democrats said the situation looked safe.

In the battle for the seat of retiring Sen. Hiram Fong (R), Rep. Spark Matsunaga (D) is favored over ex-Gov. William Quinn (R). Matsunaga won the primary handily, but Republicans see possible voter resistance to having the governorship and both Senate seats in the hands of Japanese-American Democrats. The GOP also hopes to pick up the House seat Matsunaga is vacating, but the Democrat is lavishly financed.

AP.

S. I. Hayakawa
. . . on a see-saw.

Idaho (4)

Ford has widened his lead over Carter with each debate, claiming a 15-point advantage in a mid-October Boise Statesman poll. The Playboy interview hurt Carter among Mormon voters.

One House seat is safely Republican and the other would be were it not for Rep. George Hansen's (R) penchant for trouble.

Montana (4)

Ford holds a slight lead in Montana, despite Democratic efforts to use the wheat embargo issue against him. Carter's support of handgun registration and the cultural remoteness of a Georgia peanut farmer work against him.

The gubernatorial battle between Gov. Thomas Judge (D) and Attorney General Robert Woodahl (R) has developed into a wild affair. Woodahl was found in contempt of the state Supreme Court last week for talking in his campaign about pending prosecutions of state workmen's compensation fund officials. Earlier, newspapers had reported he used a strong and potentially addictive drug for migraine headaches, and then disclosed that the report had come from a Judge campaign official, who had obtained confidential hospital records from a part-time reporter. Before that, Judge was on the defensive about the source of $94,000 in 1972 election funds which he had failed to report. Judge is favored, but no one knows how the voters will react to all this.

Rep. John Melcher (D) is expected to defeat Stanley Burger (R), a former Farm Bureau executive, for the seat of retiring Senate majority leader Mike Mansfield (D).

Nevada (3)

Ford is a narrow favorite here thanks mainly to organization efforts by Sen. Paul Laxalt (R), pre-convention chairman of the Reagan-for-President campaign. Carter has skipped Nevada, but his backers are working actively and the race is expected to be close.

New Mexico (4)

This state, which has supported the winner in every national election since it entered the Union in 1912, has teetered narrowly between Ford and Carter in polls taken this fall. Carter is a shade ahead, but not conclusively, in the latest readings after a successful campaign stop and some hard work by his "Peanut Brigade" of visiting Georgians.

Private polls of both parties show former astronaut Harrison Schmitt (R) holding his narrow lead over veteran Sen. Joseph Montoya (D) in a battle that has focused on conflict-of-interest charges against the incumbent. There was a negative reaction to a Montoya speech comparing Schmitt to an experimental monkey used in early space flights, but, as that story shows, Montoya is a tough campaigner, and his strong support in the Hispanic areas makes everyone reluctant to count him out. No change is expected in the House delegation.

Oregon (6)

The presidential race is very close, with Carter leading Ford, 43 to 40, in a two-week-old Oregonian poll which gave Eugene McCarthy 6 per cent and had 11 per cent undecided. Since then, Ford has visited the state, and most observers call it a tossup, with a possible lean to Carter.

No change is expected in the all-Democratic House delegation.

Utah (4)

Carter made an effective campaign stop in Salt Lake City in early October, but every indication is that this is one of Ford's strongest states. Sunday's Deseret News poll gives the President a 60 to 33 per cent lead among likely voters.

Democrats were almost resigned to losing the governorship, with the retirement of 12-year veteran Calvin Rampton (D). But Attorney General Vernon Romney (R), the early favorite, has lost ground steadily to Scott Matheson (D), a former president of the state bar association and political newcomer. In the Deseret News poll, Matheson led by 12 points among likely voters.

However, a Republican newcomer, attorney Orrin G. Hatch, is bidding strongly to deny a fourth term to Sen. Frank Moss (D).

Washington (9)

Ford had a 4-point lead in the Seattle Times poll before his visit last week and, despite the exceptional number of undecided voters, he is favored to win the state. Sen. Henry Jackson (D), a cinch for reelection over airline pilot George M. Brown (R), and Sen. Warren Magnuson (D) are featured in Carter ads, but one leading Democrat says, "Jerry Ford looks and sounds like the voters here, and Carter just doesn't."

Equally close is the gubernatorial battle between Dixy Lee Ray (D), former chairman of the Atomic Energy Commission, and King County (Seattle) executive John Spellman, an ally of retiring Gov. Daniel Evans (R). Spellman has been on the offensive in the final week, but Democrats think their unconventional candidate will win.

Wyoming (3)

Ford appears safe in this state, where government spending is a big issue.

Sen. Gale McGee (D) has run into stiff resistance to his bid for a fourth term from state Sen. Malcolm Wallop (R). Polls give McGee a narrow lead, but he is anything but safe.

The South

Alabama (9)

With Gov. George Wallace heading a "straight-ticket" drive, involving everyone from Sen. James Allen to the Rev. Martin Luther King Sr., Democrats expect to carry the state for their presidential nominee for the first time since 1960.

Arkansas (6)

A state poll shows Carter's margin dropping from an unreal 41 points in September to a modest 14 points in October, but Arkansas is regarded as safely in the Democrat's column.

The same is true, but more so, for Gov. David Pryor (D), and the only change expected in the House delegation is Attorney General Jim Guy Tucker (D) stepping in for retiring Rep. Wilbur Mills (D).

Florida (17)

The once-secure Carter lead has been dwindling under a heavy barrage of GOP campaigning, but most Ford strategists doubt he can overcome the Georgian here, and the state was omitted from Ford's closing blitz. A few Republicans still hope the retirees will outvote Carter's combination of support from blacks, Jews and "cracker" neighbors.

Sen. Lawton Chiles (D), a strong favorite, took the risk of two television debates with his challenger, John Grady (R), a member of the national council of the John Birch Society. Grady, an effective TV performer, scored well, but Chiles still seems secure.

Georgia (12)

Republicans insist Carter will have no landslide in his home state, where an active Ford organization has kept peppering away at him. But a poll of 500 voters last week gave him a 2-to-1 lead, and the state is as secure as anything in politics.

There are no major statewide races.

Kentucky (9)

Neither presidential candidate has visited Kentucky, and the softness of support on both sides makes an upset possible. But Carter is a clear favorite, coming off a strong showing in the primary, and with Gov. Julian Carroll (D) leading a united Democratic party effort to exploit a 2-to-1 registration edge.

Louisiana (10)

Ford has edged ahead of Carter here, in the judgment of both sides and in an October poll conducted for Gov. Edwin Edwards (D), which showed Carter trailing by 4 points. Edwards belatedly joined other Democrats in helping Carter, but despite a late visit to New Orleans, Carter is a distinct underdog.

Republicans are aiming for an upset in the 1st District, where a protracted political and legal battle involved two claimants to the Democratic nomination to succeed retiring Rep. F. Edward Hebert (D). The GOP has a chance, but less of one, against Jerry Huckaby (D), who beat veteran Rep. Otto Passman (D) in the 5th District primary.

Mississippi (7)

A tough, spirited contest has developed here, even though neither Carter nor Ford started as Mississippi favorites. George Wallace came in to campaign for Carter last week, and the GOP countered with Sens. Strom Thurmond and Jesse Helms. It's ideology vs. Southern pride, and most local observers see the to Ford in a very close

Sen. John Stennis (D) tain of reelection and House incumbents are ex back.

North Carolina (1

As in many other So states, Carter's early le melted under the GOP att his "liberal" or pro-labor tions and his Playboy int A late-October newspape gave him only a 1-point lea top state Democrats have a ed a united rescue effort, i on conservative Democrats eastern part of the state.

That drive is led by Le James Hunt (D), who is certain to move up to go by defeating David Flaher a member of the cabinet o going Gov. James Hol (R).

Oklahoma (8)

The state has been a battleground, but the latest lished and private polls giv an edge. Carter came flyin to Tulsa on a last-minute effort, and still has a char pull it out.

South Carolina (

Carter's lead faded fr points in mid-September, points in mid-October. taken for The State new in Columbia, and the Dem was worried enough to sch a last-week appearance in C bia to counter a visit from three days earlier. Carter narrow favorite, particula there is a successful get-ou vote drive in black precinct his lead is very shaky.

Tennessee (10)

Ford has made some from his extraordinarily beginning, but Carter remai clear favorite in a state that him a primary vote perce second only to his own as Georgia.

The odds have shifted daily in the Senate race, challenger James R. Sasse a former state party chairm in a close, bitter struggle Sen. Bill Brock (R). Sas Carter ally, had put Bro the defensive on the iss financial disclosure and pa payments and had moved narrow lead last week, series of indictments roc administration of Gov. Ra ton (D), in which Sasser Brock has seized that issu the race is now a tossu perhaps a slight edge to the lenger.

Texas (26)

Carter's Playboy interview cisms of Lyndon Johnson vided the cue for a massiv "negative campaign" in eac tober, which moved this from the Carter column battleground category. But crats insist that Carter holding his support in th areas, and the party mobilized by Gov. Dolph (D), were out in force last end on Carter's final through the state, in an to keep ex-Gov. John Co (R) from delivering Tex Ford. The state has had voter registration increase tor which Democrats hop reduce the GOP margins and Houston. But a lig vote could cripple Carter. polls range from a 2-point lead to a 5-point Carter with turnout in different the likely key.

Sen. Lloyd Bentsen (D) seemingly insurmountable over Rep. Alan Steelman who has been battling problems from the start campaign.

Virginia (12)

Carter has fought hard to Virginia's quarrelsome Demo factions united behind him the state appears to have into the Ford column in two recent polls. It is not a but the tilt is in Ford's direc Sen. Harry Byrd jr., an pendent, holds a comfortable over Elmo Zumwalt (D), chief of naval operations. Martin Pergel, a Republican ning as an independent, says he will caucus with Democrats again if reelected.

By James Furlong

...ise on Hopes of Loan-Rate Drop ...rices of Deutsche Mark Bonds

...KFURT, Oct. 31 (AP)—...rices of deutsche mark ...ds are firming strongly ...ectations of a drop in West ...man capital market interest ...

...tations for mark-denomi... external bonds rose an ...age of one-half point over ...last week, adding to a three-...ter-point gain in the pre-...ing week. The domestic bond ...ket, which interacts with the ...ernational market, is experi-...ing a boom that enabled the ...desbank to sell some 250 mil-...marks of public sector paper ...the open market Thursday. ...he expectation of lower rates ...t is creating these buoyant ...ditions is based on evidence ...slowing inflation as well as ...strong bank liquidity result-... from higher-than-expected ...eral tax receipts, heavy for-...n exchange inflows, and rel-...ively small company borrow-...g, bankers say.

The latest favorable inflation ...dicator came Wednesday from ...rth Rhine Westphalia, Ger-...any's most populous state, ...ere the statistics office es-...mated that the cost-of-living ...dex gained only 3.9 per cent ...ar-to-year in October, down ...om 4.1 per cent in September. The major German economic ...search institutes predicted last ...eek that the cost-of-living in-...ease for Germany as a whole ...ould decline to 4 to 4.5 per ...nt next year.

As evidence of the strength of ...nk liquidity, the annual in-...rest rate for call funds in the ...erman interbank money mar-...t hit 3.375 per cent around ...idday Friday. Bankers, ex-...aining the phenomenon, point ...t that federal expenditures in the first nine months of 1976 ran only 3.6 per cent above year-earlier levels, against an expected rise of 5 per cent for 1976, while revenues were up 10 per cent, against an estimated 6.6-per-cent gain.

Liquidity also has been enriched by the influx of speculative foreign funds, which since the beginning of August has swelled the Bundesbank's net central foreign currency reserves by 8.7 billion marks.

These funds have been neutralized only partly by an increase in public sector deposits with the central bank. In any event, these deposits are due to flow out of the central bank into the banking sector in the final months of this year.

A banker said that with industrial capacity use currently running at about 80 per cent, there is relatively little private sector demand for capital to help absorb this money.

The picture could change suddenly if, as some speculate, the Bundesbank central bank council decides at its meeting next Thursday to raise minimum reserve requirements, possibly in combination with an increase in the Lombard rate.

However, some observers feel the Bundesbank will choose to reduce surplus funds gradually through quiet open-market operations, rather than risk hurting capital investment sentiment with a noisy change in credit policy.

The only new public deutsche mark Eurobond issue announced in the past week was a seven-year, 100-million-mark offering of the Mexican energy supply company Petroleos Mexicanos (Pemex). The bonds are expected to carry a coupon of 8.75 per cent, well above the most favorable rate for borrowers.

The previously announced 50-million-mark convertible issue of Sekisui Prefab Homes Ltd. due 1987 was given a 6.25-per-cent coupon and priced at 100. Conversion premium was set at 7.3 per cent.

In the dollar sector, European Investment Bank Ltd. is to raise $50 million through a five-year issue at 7.75 per cent. Most of the issue will be placed with

The World Economic Scene

Plenty of Problems Facing New U.S. President

By Thomas E. Mullaney

NEW YORK, Oct. 31 (NYT).—Some rather dramatic developments have been unfolding recently on the international and the domestic scenes, but most of them have escaped adequate attention because the nation has been distracted by the presidential election campaign, dull and unilluminating as it has been, that is now winding down to its finale.

In addition to the leadership challenge in the People's Republic of China, other notable news from abroad that warrants deeper analysis in this country includes the deteriorating state of the British economy, the currency turmoil there, in Mexico and in other nations, and the growing controversy over the impending price action to be taken by the oil-producing nations.

All of those developments pose potentially serious problems for the United States and the rest of the world. They could prolong the current slackening of economic growth, strain the international financial system, inhibit the expansion of world trade, weaken foreign investment, strengthen inflationary forces and intensify balance-of-payments difficulties in many lands.

Oil-Price Rise

The threat of a new oil-price increase by the OPEC nations at their December meeting in Qatar—reportedly in the range of 10 to 20 per cent—is particularly worrisome. But the renewed weakness of the British pound last week to the area of $1.57 has widespread implications as well. The drop in the once-proud currency, from $2 last March and by almost 50 per cent in less than five years, is astonishing. So is the 52.8-per-cent drop of the Mexican peso in the last two months.

On the domestic front, meanwhile, there has been further evidence that the U.S. economy is still sputtering in its recovery (now 19 months old), though indications are that it is not about to slip into a full stall. But the latest adverse trends in the leading economic indicators, orders for durable goods, retail sales and the financial markets also seem to deserve closer scrutiny than they have been given. The erratic pace of inventory buying has been another factor in the recent economic pause.

Are they the transitory hiccups that normally develop at this stage of almost every business recovery, or do they represent a fundamental change in the health of the economy?

Does the recent downward course of the stock market merely reflect the uncertainty of the U.S. election outcome, or does it convey investor conviction that the business upturn may soon be aborted?

Business circles remain generally optimistic that the economy will soon be regaining much of its earlier momentum in this cycle, but the evidence to support that view is quite slim. The only recent encouragement has come from the September upturn in machine-tool orders (a rise of 13 per cent), the five-month improvement in housing activity, and the continuing production and sales gains by the automotive industry.

Unfortunately, in all of the partisan rhetoric of the election campaign, more nonsense has been spouted on the state and prospects of the U.S. economy than on perhaps any other major issue. Its current condition is neither as sanguine as the incumbent Republican administration contends it is nor as bleak as the Democratic opposition maintains.

Needs to Do Better

Nevertheless, that does not bespeak satisfaction with the present level of overall economic activity. The economy ought to be doing better to assure a growth rate that will bring down unemployment significantly without simultaneously worsening the level of inflation to a dangerous degree.

What is clear is this: the recovery is still going on, though at a sub-par pace (about 4 per cent in real terms since the first quarter of the year), unemployment is still too high (7.8 per cent), though employment remains at a record level, and inflation is down substantially over the course of the last year to around 5.5 per cent annually.

What is debatable at this time is the likely direction of those key indicators in the absence of any major changes in national economic policies.

The electorate will have to cut through the maze of confusion—misleading statements, misinterpretations, half truths, etc—on economic matters that has permeated the recent political campaign. Tuesday it will have to decide, not whether one side or the other is correct, but which party is more likely to lead the economy and the nation to the

(Continued on Page 11, Col. 1)

New York Stock Market

By Alexander R. Hammer

NEW YORK, Oct. 31 (NYT).—The stock market registered a sharp advance last week, with the Dow Jones industrial average gaining 26.18 points to close at 964.93. Turnover on the New York Stock Exchange, however, contracted to 78.81 million shares from 83.62 million shares in the preceding week.

Analysts attributed the market's price upswing mainly to the announcement by a Saudi Arabian official on Tuesday that his country would press for only a "moderate rise" in oil prices at the Dec. 15 ministerial meeting of the Organization of Petroleum Exporting Countries. Other OPEC countries had indicated they would seek a rise of 10 to 25 per cent at the meeting.

Analysts noted that considerable bargain-hunting also helped spur prices, especially in many of the glamour and blue-chip issues. In the previous four weeks the widely watched Dow had tumbled 70.56 points, mostly on concern over the sluggish economic recovery.

Contributing to the advance was the move by many major banks to trim their prime interest rates to 6 1/2 from 6 3/4 per cent. Analysts said that declining rates for commercial paper and soft loan demand apparently touched off the prime-rate reduction.

The news by the Commerce Department at the opening Friday that the index of leading economic indicators fell 0.7 per cent in September, its second straight drop, had little effect on the market. When a 1.5-per-cent drop in the indicators was announced a month ago (it has been revised to 0.7 per cent) the Dow plunged 18 points in a single day.

The credit markets stabilized last week after bond prices in the previous week had their largest decline since May.

Over-Counter Market

BANK INVESTORS, U.S.A.

Prestigious Chicago-based banking organization desires quality individual, family or institutional partners for commercial bank acquisitions to take advantage of anticipated favorable new banking laws in Illinois, particularly in Chicago metropolitan area.

Box D-5,535, Herald, Paris.

EUROPEAN PROPERTY INVESTMENT COMPANY N.V.

established in Amsterdam

THE ANNUAL GENERAL MEETING OF SHAREHOLDERS

will be held at the offices of the company, 548, Herengracht, Amsterdam, on Tuesday, 23rd November, 1976, at 11.00 a.m.

The agenda of the meeting and the Annual Report 1975/1976 will be available free of charge at the office of the company and at the offices of:

Bank Mees & Hope NV in Amsterdam
Banque Bruxelles Lambert S.A. in Brussels
Banque de Neuflize, Schlumberger, Mallet in Paris
Morgan Grenfell & Co. Limited in London
Westdeutsche Landesbank Girozentrale in Düsseldorf.

Shareholders who wish to attend this meeting, have to lodge their shares with one of the above-mentioned banks at least three days before the meeting against delivery of a receipt which will serve as ticket of admission to the meeting.

THE BOARD OF MANAGING DIRECTORS

Amsterdam, 1st November, 1976.

Plenty of Problems Facing New U.S. President

(Continued from Page 9)
...tions they should occupy in ...next four years. That's the ...gh decision.

Two Polls

...lso confusing are the divergent ...lts of two prominent polls on ...state of consumer confidence. ...a prestigious Conference Board ...orted that confidence, as mea... ...ed by its bimonthly survey, ...sharply this month. Its index ...pped 7.5 points to 79.8. But ...public's buying intentions for ...s, homes and appliances de... ...ed by a much smaller margin ...points).

...y contrast, earlier in October, ...University of Michigan's Sur... ...Research Center announced ...its consumer-confidence index ...risen sharply—up 6.6 points ...m the previous survey in May ...to the highest point in four ...rs.

...Which survey do you believe? ...According to all the polls, eco... ...mic issues are paramount in ...s election. The public is con... ...ned about pocketbook questions ...obs and the inflation rate, in ...t order. While the inflation ...e has subsided substantially over the course of the last year, the overall price level is still very high by historical standards, and the danger is ever present that it will tend higher if the expansion phase of the business cycle proceeds.

Thus, it was probably not surprising that, in a recent poll of almost 500 of the nation's top business economists, a total of 38.9 per cent ranked inflation as the most important economic problem in the picture for 1977, while 23.3 per cent put unemployment at the top of the list and 17.6 per cent named excessive government controls as the leading issue.

Only a small minority of the economists (6.3 per cent) said they expected the next economic downturn to begin next year. However, a big group (53.6 per cent) looked for one to develop in 1978.

Once the election is over this week, Washington can begin to concentrate on the big domestic and international economic issues confronting the nation.

Top priority, of course, must be assigned to the unemployment problem. Many critics feel that the Ford administration should have undertaken some moderate "micro" stimulative steps in that area long ago through a public-works program of some sort. The jobless problem remains, and will have to be addressed soon, whether President Ford is returned to office or the mantle of the presidency is passed to Jimmy Carter. Some selective job-creating plan, especially for youths and the unskilled, appears to be necessary.

Energy Policy

Top priority will also have to be assigned to the construction of a comprehensive, meaningful energy policy that will put the national imprimatur behind the effort to increase supplies of alternative sources of energy, to replace heavy volumes of imported oil. The lack of a positive energy program has been one of the most glaring failures of Washington in the last three years.

The longer the United States tries to live with energy controls, the more hazardous will its long-range energy situation become.

Another important question to be tackled once the political campaigns are out of the way involves the state of the overall economy. Will it regain its old momentum without fresh fiscal or monetary stimulus? Will there be a need for another round of tax cuts for individuals and for business?

The next president will face a test of the willingness of the country to try to reduce inflation further. Will the public go along with relatively slow growth in the interest of squeezing more inflation out of the system, or will pressures be so great to cut joblessness that national policies will have to become more stimulative?

In the international arena, the United States will have to try to assume a greater leadership role, pressing for the financial and other remedies that Britain needs to meet its deep-seated economic problems and supporting the financial rescue effort through the International Monetary Fund.

The United States will also have to exert its muscle against the push of the OPEC countries for a big price increase in December. Such an eventuality would be an acute problem for many industrialized countries, but it would be an outright catastrophe for the less-developed nations.

Sad to say, there has been no economic leadership in the free world for years. It is a role that the United States is uniquely able to fill—and must fill.

While the outcome of Tuesday's presidential balloting is uncertain in an election that the polls indicate will be close, one prediction seems quite certain. No matter who wins, it is likely that the United States will move to a somewhat more stimulative policy, either in the fiscal or monetary field, fairly soon, unless the recovery picks up on its own power.

That likelihood would be widely cheered in other parts of the world that depend heavily on economic developments and leadership in the United States.

PREPAREDNESS—Soviet military band marching through Moscow, drilling for national day celebration on Nov. 7. Recent Red Square parades on the official birthday of the Soviet Union have been non-military, youth-oriented.

Spain, After 52-Year Hiatus, May Give Gambling a Spin

MADRID (Reuters).—The government is taking steps to legalize gambling casinos—banned for more than half a century.

According to officials, a commission set up to draft a law to legalize gambling may present its findings by the end of next month. A decree setting up casinos is expected to follow soon afterward.

Baccara, roulette and blackjack were outlawed in 1924 during the dictatorship of Miguel Primo de Rivera. Until recently, government opposition to gambling remained rigorous.

In 1968, Manuel Fraga Iribarne, then information minister and interior minister, said, "Gambling is like selling your soul to the devil."

But Spaniards have not lost the taste for risk. Millions play the national lottery and the football pools. Bingo, only recently permitted, has proved a big attraction.

In the Discotheques

Youngsters in discotheques spend more time sitting with bingo cards than on the dance floor.

Affluent Spaniards drive across the French border to spend evenings at the gambling tables of Biarritz, or take weekly charter flights to the casino at Monte Carlo. Biarritz casino owners estimate 80 per cent of their clients are Spanish.

But within Spain, roulette wheels have spun legally only once in the last 52 years. On Sept. 1, 1963, the casino at San Sebastian was allowed to open for just one night. The proceeds, more than 500,000 pesetas ($7,300), went to charity.

A gradual relaxation of the late Generalissimo Francisco Franco's authoritarian regime, however, combined with a crisis in the Spanish tourist industry, has prompted a vociferous campaign to legalize *El Juego*.

The Spanish tourist industry badly needs an injection of cash. After a boom year in 1973, it has attracted fewer and fewer visitors, and those who have come have tended to spend less.

Bid in Cortes Failed

The mayor of the northwestern resort of San Sebastian, Fernando de Otazu y Zulueta, led 89 deputies in the Cortes (parliament) last March in proposing legalization of gambling. The bill was rejected. But the government of Premier Adolfo Suarez has decided to lift the ban, to bring Spain into the circle of Mediterranean nations which thrive on the extravagances of Europe's jet set.

Under Secretary for Tourism Ignacio Aguirre said, "Gambling would help alleviate the problems of our tourist industry. It would attract a different kind of tourist—one with money and class.

"Casinos must be exploited by the state, and in any case by Spanish business, so that foreign impresarios do not get access to the profits.

"We must not have a situation in which our casinos fall into the hands of international organizations, as happens in other countries."

The potential rewards of gambling are enormous. Campaigners for legalization estimate that Spain would have gained about $3 billion in May and June alone if there had been gambling casinos.

The government commission is studying how large a slice of the cake the taxman should take.

Only six or seven casinos would be authorized, one in each of the major tourist centers, and gambling would be restricted to the casinos, the sources added.

Sweeping Change in U.S. Immigration Law

By Philip Shabecoff

WASHINGTON, Oct. 31 (NYT).—Just before midnight Oct. 20, President Ford signed without fanfare a bill effecting the most sweeping changes in the nation's immigration laws since 1965.

The bill, which will give immigration from the Western Hemisphere the same status as that from the Eastern Hemisphere, had been supported by many Hispanic-Americans.

But the new laws will sharply reduce the number of Mexicans who receive permanent visas each year, and the bill was strongly opposed by some leaders of the Mexican-American community, where Mr. Ford may now have some new political problems as Election Day approaches.

A spokesman for the Immigration and Naturalization Service said that as a result of the change in the law there may be a sharp increase in the number of Mexicans seeking to enter the country illegally.

Mr. Ford indicated in a written statement issued when he signed the legislation that he was aware of the impact on the Mexican-American community. He said that he would introduce legislation next year to raise the immigration quota for Mexico.

The new law retains the overall annual immigration ceilings established in 1965—170,000 entries a year for the Eastern Hemisphere and 120,000 for the Western Hemisphere. But other differences in status between the hemispheres have been erased.

Under the old law, immigration from the Western Hemisphere was on a first-come, first served basis. There was no quota for any individual country.

For the Eastern Hemisphere there was a ceiling of 20,000 permanent visas for any one country a year. There was also a system of "preferences" related to such goals as reuniting families and attracting professionals and skilled workers.

These rules are retained in the new law and are now applied to the Western Hemisphere as well.

Rep. Joshua Eilberg, D-Pa., who was a chief sponsor of the law, said, "For over 10 years, our immigration laws have severely disadvantaged our neighboring countries in the Western Hemisphere and have created hardship and inconvenience to many persons in this hemisphere seeking to join their families in the United States."

Mexican-Americans, however, are strongly opposed to the new law. Legal Mexican immigration to this country has been averaging 40,000 a year in recent years. Under the new law, that number would be cut in half.

A spokesman for the Immigration Service said that the pressures caused by the reduced quota for Mexico would probably produce an increase in the number of Mexicans seeking to enter the United States illegally.

The service has estimated that there are a million aliens now in this country illegally, and that 500,000 illegal aliens have been apprehended each year, most of them from Mexico. Spokesmen for the Mexican-American community were sharply critical of President Ford for signing the immigration bill. They did not appear to be aware of his plans to introduce new legislation next year.

Middle East financial concerns.

Oesterreichische Kontrollbank AG announced plans to raise $40 million through an offering of six-year floating rate notes due 1982. The bonds carry interest at 1/4 point above the London interbank Eurodollar rate, but there is a minimum of 6.5 per cent.

Ricoh Co., of Japan, is floating a $15-million convertible issue due 1981, sources said. The bond for the Japanese optical and office equipment manufacturer is expected to carry a 6.25-per-cent coupon and it is likely to have a fixed yen-dollar exchange rate for converting the dollar bonds into yen-denominated common shares.

Another issue expected to be officially announced shortly is a $40-million floating-rate note for Banco Urquijo, of Spain. Interest on the loan is expected to be 1/4 point above the interbank Eurodollar rate, sources said.

The size of the recently announced Canadian National Railways 10-year issue bearing 8.5 per cent has been increased to $85 million from $75 million.

Meanwhile, the loan for Nippon Fudosan Bank has been increased to $25 million from the initially indicated $20 million and the coupon will be set at 8 per cent, down from the 8.25 per cent indicated earlier.

U.S. Business Failures

NEW YORK, Oct. 31 (AP-DJ).—Commercial and industrial failures rose to 174 in the week ended Oct. 21 from 134 in the preceding holiday week but fell from 195 in the year-earlier week, Dun & Bradstreet Inc. reported. For the year to date, such failures fell to 8,225 from 9,912 a year earlier.

BOOKS

VICTORIAN AMERICA

Edited with introductory essay by Daniel Walker Howe. University of Pennsylvania Press. 184 pp. Hardcover, $15. paperback, $5.95.

Reviewed by Alden Whitman

THIS illuminating and invigorating collection of essays by 10 distinguished scholars traces the rise, supremacy and decline of what have been called Victorian values in American life. A hundred years ago these values dominated social, political and economic institutions. They set the nation's cultural tone, and they abided well into this century.

Derivative, in the sense that it was imported from England, Victorianism was nonetheless distinctively American in its manifestations in the United States. For one thing, it was more intense, and for another it was more diverse. Even so, although there were various subcultures and countercultures, the official culture was stoutly Victorian. It expressed itself in religion, art, literature, science, public morality, the theater and in public opinion.

"Victorian culture," Dan Walker Howe reminds us, [has] a class derivation, as well [as] an ethno-religious (Anglo-Sa[xon] Protestant) one. It was bourg[eois] in origin, and the era of [its] flourishing coincides with [that] of the predominance of the bo[ur]geoisie in Western civilizati[on].

Prof. Howe, a historian at [the] University of California at [Los] Angeles, sets a brisk pace for [his] fellow contributors, which [they] manage to match. Their es[says] cover such seminal topics [as] modernization, American intel[lec]tuals, the origins of the ref[orm] movement, the beginnings of [the] voluntary hospital, literature [and,] ultimately, the attack on [Vic]torianism that took place in [the] early years of this century.

Without exception, the es[says] are lucid, well-informed and [emi]nently readable. Their tot[al] provides, if not an easy, at l[east] a coherent, synthesis of the [Vic]torian age in the United Sta[tes]. Nostalgically, many Ameri[cans] often look back to its stand[ards] of conduct and values, espec[ially] at a time when we seem to [lack] a dominant cultural pattern. [All] the more interesting, there[fore,] is this book's intelligent sync[hesis] of an era with a virtually abso[lute] certitude that whatever [was] wrong with society and cul[ture] would yield to high-minded muscular correctives.

Alden Whitman is on the [staff] of The New York Times.

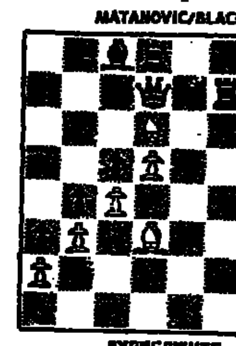
CHESS — By Robert Byr[ne]



How do you deal with a *truly excellent defense such* as the Breyer variation of the Ruy Lopez; which has proven almost invulnerable for the last 15 years?

There may never be a long-lasting way to stop it from achieving flexible, unhampered, weakness-free play, but you cannot afford to be intimidated: it is necessary to wrack the brain for a nuance, or if possible, a whole series of new ideas every time you run into a Breyer. In my game with Aleksandar Matanovic of Yugoslavia in the 18th round of the Biel Interzonal Tournament; I scored a success with my original 12 QN-Q2, but of course it's too early to know whether this move is more than a flash in the pan.

Putting the white Qn at Q2 (instead of the normal 12 N-B3) protects the QBP so that 13 B-B2 becomes possible, threatening a queenside attack with 14 P-QN4. However, Matanovic's 13 . . . N-K1 required a change in strategy, since 14 P-QN4 would then be punished by 14 . . . PxQP1; 15 NxP, B-B3; 16 N2-B3, PxP, gaining a pawn.

Since the white center held very solid after 15 N-N3, he had nothing better than closing that sector by 15 . . . P-QB4: 16 P-Q5, yielding me a clear advantage in space. When 17 B-Q2 threatened to pick off a pawn by 18 B-R5 and 19 PxP, he was also forced to block the queen's wing by 17 . . . P-N5.

MATANOVIC/BLACK

BYRNE/WHITE

Position after 47 BxQP

The question of the gam[e] then became whether th[e] white attack or the black de[fense] would prevail on th[e] kingside. Afterward, Mata[novic] thought that he shoul[d] have tried to beat me to th[e] punch by 23 . . . P-B4, bu[t] White would keep the advan[tage] with 24 KPxP, PxP, 2[5] N-N5, threatening a line-opening sacrifice with 26 N-K6.

My 30 N-K1 forced Blac[k] out of his defensive crouch for 31 P-B4 was threatene[d] and 30 . . . P-N4 leaves hi[m] helpless on the KR file afte[r] 31 P-R4, followed by 32 R-R1 33 K-N1 and 34 R2-R2. H[e] could not retake the paw[n] by 32 . . . NxP; 33 NxN, BxN 34 BxB, RxB because 35 Q-N4, threatening two mates is immediately fatal.

Recovering a pawn by 4[2] . . . NK2xBP: 43 NxN, NxN di[d] not get Black out of trouble, for my 44 Q-KN2 forced the awkward 44 . . . N-R3. Later, 45 . . . QxP; 46 QxQ, BxQ; 47 BxQP would have allowed Black no defense to 48 B-K5ch.

Matanovic could not an[]swer 46 R-R5 by 46 . . . R-N1 because 47 B-N3, R-B3; 4[8] RxN, RxR; 49 B-K5ch forces mate. His 46 . . . N-N1, however, ran into the deflection sacrifice 47 BxQP, setting u[p] my second piece offer, 4[8] BxP. He could not capture 4[8] . . . RxB because of 49 Q-N7-mate.

The only defense available was 48 . . . N-B3, but after 49 B-N8ch, NxR; 50 BxR, he had to give back the knight as well for the sake of covering mate at KN7. The whole combination netted me only a pawn after 52 . . . BxQ, yet that meant the game, since 53 B-N4, BxB; 54 RxB resulted in a winning rook and pawn ending.

The key move, 55 R-N1, to get the rook behind the QP, led to a quick finish. After my 60 P-Q7, Matanovic resigned because 60 . . . RxP; 61 RxR, KxR; 62 K-B4 wins the king-and-pawn ending.

Chicago Ends Minnesota's Unbeaten Streak, 14-13

CHICAGO, Oct. 31 (UPI).—...alter Payton sped 39 yards for ...first-quarter touchdown today ...give the Chicago Bears a lead ...ey never lost in a 14-13 victory ...r the Minnesota Vikings, ruin...g Fran Tarkenton's performance, ...hich set a National Football ...ague career-passing record.

It was the first loss in eight ...mes for the Vikings and knock...t out the last remaining un...aten team in the NFL. The ...ictory evened the Bears' regular ...ason record at 4-4.

Tarkenton had to bring his ...am from behind throughout the ...me and he surpassed Johnny ...nitas's record 40,239 career yards ...th his ninth completion.

But Tarkenton was unable to ...mplete a touchdown pass al...ough he hit on 24-of-45 tries ...r 288 yards for a career total ...f 40,419 yards.

The Vikings might have pulled ...out, too, except for a despera...on throw by Tarkenton when ...e Vikings were threatening on ...e Bears' 15 in the second period. ...nebacker Ross Brupbacher inter...pted and returned 21 yards to ...e the Bears out of danger.

Jets 19, Bills 14

At Orchard Park, N.Y., rookie ...ichard Todd, subbing for the ...jured Joe Namath, threw a 20-...rd touchdown pass to David ...Knight and Steve Poole picked ...up a blocked punt and ran six ...yards for a score as the New York ...Jets defeated Buffalo, 19-14.

Buffalo fought back in the third ...quarter when Gary Marangi ...threw touchdown passes of 11 and ...9 yards to Bob Chandler to close ...the score to 16-14, but New York ...managed to hold on for the vic...tory.

The victory was the Jets' second ...of the season—both over Buffalo ...—to give them a 2-6 record; the ...Bills are also 2-6 in the AFC ...East.

O. J. Simpson continued his im...provement since joining the Bills ...just before their opener, picking ...up 166 yards in 29 carries.

Eagles 16, Giants 0

At East Rutherford, N.J., Mike ...Boryla hit Harold Carmichael ...with a 13-yard second-quarter ...touchdown pass and Horst Muhl...mann added a 29-yard field goal ...five minutes later to give Phila...delphia a 10-0 victory over the ...winless New York Giants.

The last time Philadelphia ...shut out a team was in 1968 ...when it beat Detroit, 12-0. The ...Eagles preserved the shutout over ...the Giants with a brilliant goal-...line stand after New York had a ...first down at the Philadelphia ...three late in the fourth quarter.

After Craig Morton hit Jim ...Robinson wih a 26-yard pass to ...put the ball at the three, the ...Eagles stopped three runs and ...threw the Giants back three ...yards in the process. A fourth-...down pass by Morton sailed over ...everyone's head to end the drive ...and give the Eagles the ball with ...three minutes left.

Bengals 21, Browns 6

At Cincinnati, Bobbie Clark ...scored two touchdowns and rush...ed for 100 yards to lead Cincin...nati to a 21-6 victory over Cleve...land as the Bengals tightened ...their grip on first place in the ...AFC Central Division.

Clark bolted over on a pair ...of one-yard runs and Ken An...derson teamed with Isaac Curtis ...on a 69-yard TD pass to push ...the Bengals' record to 6-2.

Cliveland, which slipped to 4-4, ...mounted three first-and-goal ...situations but could not get a ...touchdown. The Browns had to ...settle for field goals of 18 and ...26 yards from Don Cockroft.

Clark ground out 100 yards in ...21 carries to become the first ...Bengal to get 100 yards in a ...game since 1973 when Clark ran ...for 104 against Kansas City.

Dolphins 16, Patriots 3

At Miami, Bob Griese found ...Jim Mandich open in the end ...zone for a 13-yard score and a ...rejuvenated Dolphin defense ...stopped the explosive New En...gland attack for a 10-3 victory.

The Dolphins sprung the mild ...upset by building a 10-3 halftime ...lead and then handing the game ...over to an aggressive defense, ...which apparently got an emo...tional lift when Miami rehired ...defensive coach Bill Arnsparger ...after he was fired as head coach ...of the New York Giants last ...week.

The Dolphin defense, led by ...linebackers Bob Matheson and ...Steve Towle, had been rated sta...tistically among the worst in the ...NFL going into the game.

But the Patriot's high-scoring ...offense was forced to punt fre...quently and was held without a ...first down in the first 13 1/2 ...minutes of the third quarter.

The Dolphin offense was led ...by Griese and Benny Malone, ...who carried 21 times for 120 ...yards.

Lions 27, Packers 6

At Pontiac, Mich., veteran Ray ...Jarvis had his finest day as a ...wide receiver by catching six ...Greg Landry passes for 163 yards ...and two touchdowns to lead De...troit past Green Bay, 27-6.

Landry completed 12-of-19 ...passes for 211 yards and the two ...touchdowns. His 74-yard TD pass ...to Jarvis with 10:12 to play in the ...first quarter was the longest Lion ...score by passing or running in ...three seasons, since Landry threw ...an 86-yard scoring strike in 1973.

When Jarvis caught a 13-yard ...scoring pass from Landry with ...3:30 left in the first half, it nuked ...Detroit's lead to 24-3 and assured ...the Lions vengeance for a 24-14 ...loss the Packers hung on them a ...month ago which cost Rick For...zano his job as head coach two ...days later.

Detroit is now 3-1 under Tom...my Husdpeth—while NFC Central ...Division rival Green Bay slipped ...to 3-5.

Chiefs 28, Buccaneers 19

At Tampa, Fla., Mike Livingston ...threw a pair of two-yard touch...down passes in the third period ...and Jan Stenerud kicked two field ...goals to lead Kansas City to a ...28-19 victory over error-prone ...Tampa Bay.

Livingston found Billy Masters ...for the first touchdown pass early ...in the third period after Larry ...Brunson took a Dave Green punt ...47 yards to the Tampa four. On ...the next series, the Chiefs went ...63 yards in eight plays, with ...Livingston tossing to tight end ...Walter White for the score. That ...drive was aided by a 15-yard ...penalty against the Bucs.

The Chiefs added a third TD ...in the final period when Mac...Arthur Lane went over from the ...two. Stenerud kicked the first ...two extra points but was wide on ...the third attempt.

Steelers 23, Chargers 0

At Pittsburgh, Terry Bradshaw, ...returning to action after miss...ing two games with a neck in...jury, passed for a touchdown ...and ran one yard for another ...in a three-touchdown fourth ...quarter that lifted the Steelers ...to a 23-0 victory over San Diego ...in a game played in intermittent ...drizzle.

Frenchy Fuqua added a touch...down on a three-yard plunge ...after John Banaszak had recov...ered a San Diego fumble. Bana...szak had run in for an apparent ...TD but it was called a fumbled ...lateral.

Falcons 23, Saints 20

At Atlanta, Scott Hunter, a ...third-string quarterback who did ...not even play football last year, ...completed 10-of-11 passes, two ...of them for touchdowns, in the ...second half to rally the Falcons ...to a 23-20 victory over New ...Orleans.

The Falcons trailed 14-0 in ...first half when they were able ...to collect only 38 yards and two ...first downs. But Hunter took ...over after intermission and tied ...the score at 14-14 with TD passes ...of 17 and five yards to Alfred ...Jenkins and Haskel Stanback.

The Saints capitalized on a ...fumble recovery deep in Atlanta ...territory and regained the lead ...with 8:28 left on a two-yard run ...by rookie Tony Galbreath. But ...Rich Szaro was wide on the ...extra-point try and the Saints ...led only 20-14.

Namath Replacement Leads Jets Over Bills

United Press International.

Pass interference was called against Ted Burgmeier (right) as Navy end Steve Scott reaches for the ball.

Notre Dame Tops Navy for Sixth Straight

CLEVELAND, Oct. 31 (UPI). —Rick Slager threw two touchdown passes and set up two other scores yesterday to lead 11th-ranked Notre Dame to its sixth straight victory, 27-21, over surprisingly tough Navy.

Slager hit Dan Kelleher with a 58-yard bomb to start the Irish comeback from a 14-3 deficit in the second period, then threw 28 yards to Al Hunter for a 24-14 lead at the half.

Hunter ran five yards for another Irish touchdown and Dave Reeve hit field goals of 47 and 24 yards, Barely missing a 29-yard attempt as the first half ended.

Bob Leszczynski of Navy hit 20 of 40 passes for a touchdown, keeping his team in the game with a brilliant passing attack to Kevin Sullivan and Steve Scott.

A 'Penalty Explosion' Emerges in Football

By Leonard Koppett

NEW YORK, Oct. 31 (NYT)—...he "penalty explosion" in the ...ational Football League, remark...d upon during the last four ...eeks by coaches, players and ...pectators, is real all right.

For the first three weeks of this ...season, penalty yardage for the ...ague as a whole stayed at just ...bout the same level it had been ...st year. Then it jumped 27 per ...nt in a week. It has tapered ...ff in the ensuing three weeks, ...t not much. If the level of ...e last four weeks were main...ined for the rest of the season, ...enalty yardage would wind up ...t a 25-year high.

Last year, the average was ...l yards penalized per team per ...ame. It was somewhat lower ...e three preceding years, and ...mewhat higher the three years ...fore that, but the fluctuation ...as been between a high of 59.9 ...rds in 1970 (the first season ...the merged league) to a low ...47 in 1974.

Playing Style

During the first three weeks ...play this year, the averages ...ere 52.3, 53.0 and 55.5. But on ...e weekend of Oct. 3, the average ...mped to 70.3. The three weeks ...nce have been 62.8, 67.9 and 60.45.

Since such figures cover 14 ...mes each weekend, involving all ...ams, questions of playing style ...breaks of the game cancel out.

But since football is a game in which every move is rehearsed for many hours, with a larger ratio of practice-to-game time than any other team sport, it is also hard to believe that suddenly, in the middle of a schedule, lots of players started playing in a different way.

The Chicago Bears, for instance, were penalized 65 yards in their first game, 13 in their second and 30 in their third. In the next three, they drew 147, 90 and 98. The Baltimore Colts were penalized 120 yards altogether in their first three games and 230 in the next three. Similarly, San Diego's total jumped from 129 to 213, and Seattle's from 80 to 273.

Big Fluctuations

Not all teams have had such sudden increases, of course, but the fluctuations have been remarkable. Denver was penalized 10 yards one week and 132 the next; the St. Louis Cardinals had 139 yards one week and 15 the next. In the first 42 games played, there were nine instances of a team being penalized 90 yards or more; in the next 42 games, there were 18.

Such across-the-board variations cannot be ascribed to a particular set of coaches, teams or players. They reflect a change in officiating policy. A few weeks ago, the league office instructed its officials to "call it closer." Such instructions, in midseason of a game built on habit-drilled techniques, make an important change in the nature of play.

Also, penalty statistics by themselves understate the effect on the game, because they do not show penalties declined or the yards lost on the nullified plays.

In Collegiate Football

Neighbors of Texas, Oklahoma Showing Muscle

From Wire Dispatches

NEW YORK, Oct. 31.—The years of watching their more prestigious neighbors, Oklahoma and Texas, reap the college football harvests appears to be over for Oklahoma State and Texas Tech.

While Oklahoma and Texas have dominated their respective conferences over the last quarter of a century, Oklahoma State and Texas Tech have yet to win their first conference championship during that span.

Texas Tech took a big step toward the Southwest Conference championship yesterday when it came from behind to defeat Texas, 31-28, and Oklahoma State kept in the running for the Big-Eight title by downing Missouri, 20-19, while Oklahoma was losing for the second week in a row, this time to Colorado, 42-31.

Yesterday the Longhorns were done in by a junior quarterback named Rodney Allison.

Allison, who started the year on the bench, guided Tech to a lengthy march for a field goal in the first half and then twice drove the Red Raiders on time-consuming marches in the second half to keep his sixth-ranked club unbeaten and atop the Southwest Conference.

"That's the greatest game I think I ever saw," said Tech coach Steve Sloan. "This year we have guys who would not quit, and I think that was the difference."

The victory gave Texas Tech a 6-0 record and 3-0 in SWC play, while Texas, the pre-season choice to win the conference, dropped to 3-2-1 for the season and 2-1 in the conference.

Oklahoma State's victory over 10th-ranked Missouri was spearheaded by running back Terry Miller, who rushed for 228 yards and three touchdowns. Miller scored on runs of 23, and 10 yards in helping the 15th-ranked Cowboys boost their Big-Eight record to 3-1.

Oklahoma, beaten by Oklahoma State last week, suffered its second straight conference loss at the hands of 16th-ranked Colorado. The 13th-ranked Sooners were finished off by fullback Jim Kelleher, who dove into the end-zone for three TDs. It was Oklahoma's first loss on the road since 1972.

Michigan 45, Minnesota 0

At Ann Arbor, quarterback Rick Leach ran for two touchdowns and passed for two others to lead No. 1-ranked Michigan to a 45-0 Big-Ten rout of Minnesota in their annual Little Brown Jug clash. Leach scored on runs of 28 and 6 yards in the second and third quarters, respectively. The sophomore also threw a 13-yard touchdown pass to fullback Rob Lytle in the second period and hit wingback Jim Smith with a 22-yard TD aerial in the third.

Ohio St. 47, Indiana 7

At Bloomington, fullback Pete Johnson scored two touchdowns following Indiana fumbles and Ray Griffin raced 65 yards with an intercepted pass for another score as the eighth-ranked Buckeyes whipped the Hoosiers, 47-7, in the Big Ten football. Indiana's defense held Ohio State without a first down until late in the second quarter. And the Hoosiers took a 7-6 lead when Scott Arnett connected with George Edgar on a 15-yard touchdown pass on the first play in the second period.

Maryland 24, Kentucky 14

At College Park, Md., fullback Tim Wilson ran for two touchdowns after a 49-yard punt return by Dean Richards ignited the fifth-ranked, unbeaten Terps, who whipped Kentucky, 24-14. Wilson gained 81 yards and Alvin Maddox added 129 on the ground as the Terps, criticized by some for a weak schedule, ran their winning streak to 12, including eight this season.

Georgia 31, Cincinnati 17

At Athens, Georgia quarterback Ray Golf scored a pair or first-half touchdowns but the seventh-ranked Bulldogs had to survive a fourth-quarter scare from aroused Cincinnati in a 31-17 victory over the 20th-ranked Bearcats.

Army 24, Air Force 7

At West Point, Clennie Brundidge, playing despite the death of his brother in an auto crash, caught an 18-yard touchdown pass and Army scored again 66 seconds later following a botched kickoff reception en route to a 24-7 victory over the Air Force Academy.

Nebraska 31, Kansas 3

At Lawrence, Kan., Vince Ferragamo fired two touchdown passes and Nebraska's quick, defense smothered the Kansas offense as the Cornhuskers blasted the Jayhawks, 31-3, and eliminated them from the Big-Eight race. Ferragamo, the Big-Eight's leader in passing and offense, scored Nebraska's first touchdown on a one-yard plunge in the first period and insured the victory with two scoring strikes in the second.

Alabama 34, Miss. St. 17

At Tuscaloosa, Alabama used long touchdown runs by Johnny Davis and Pete Cavan and hogged the ball for most of the third quarter to defeat Southeastern Conference rival Mississippi State, 34-17.

Florida 24, Auburn 19

At Gainesville, Fla., the passing arm of Jimmy Fisher and the running of Willie Wilder gave Florida its sixth straight victory, 24-19, defeating Auburn, for a solid lead in the Southeastern Conference.

Duke 31, Georgia Tech 7

At Durham, quarterback Mike Dunn scored on runs of 10 and 32 yards as Duke took advantage of Georgia Tech's errors to defeat the Yellow Jackets, 31-7.

LSU 45, Miss. 9

At Baton Rouge, Terry Robiskie and Charles Alexander each rushed for more than 100 yards and an alert defense set up five touchdowns with interceptions and fumble recoveries as Louisiana State crushed Mississippi, 45-0.

Stanford 24, Oregon St. 3

At Stanford, defensive end Duncan McColl made two key fumble recoveries and Tony Hill caught two touchdown passes to break a Stanford record set by McColl's father in leading the Cardinals to a 24-3 Pacific-8 victory over Oregon State.

Illinois 31, Wisconsin 25

At Champaign, Ill., tailback Chubby Phillips scored two touchdowns to lead Illinois to a 31-25 homecoming victory over Wisconsin in Big-Ten game.

Thai Recaptures Light-Welter Title From Velasquez

SEGOVIA, Spain, Oct. 31 (UPI).—Sansak Muangsurin of Thailand recaptured the WBC world light-welterweight title, knocking down champion Miguel Velasquez of Spain four times in the second round.

U.S. referee Chick Young stopped the fight Friday night after Velasquez, 38, went down for the fourth time.

The Spaniard, who won the title from the 24-year-old Muangsurin June 30 on a disqualification, could put up no defense to the Thai's furious blows.

Bobick Is Victor

LAS VEGAS, Oct. 31 (UPI).—Duane Bobick, the World Boxing Association's fourth-ranked heavyweight, extended his winning streak to 38 fights yesterday by scoring a convincing but unimpressive 10-round decision over Fred (Young Sanford) Houpe.

Bobick was unable to knock his smaller and lighter opponent down in the fight, but his heavy barrage of punches from short range practically closed the fighter's left eye.

Defeats Fillol of Chile

Dibbs Is Paris Indoor Tennis Titlist

PARIS, Oct 31 (UPI).—Top-seed Eddie Dibbs of the United States defeated Chilean Jaime Fillol today in a three-hour battle to win the $50,000 Paris Indoor Prix Tennis Tournament.

Dibbs, 25, won the match, 5-7, 6-4, 6-4, 7-6, before 3,000 spectators at Pierre de Coubertin Stadium. The tournament counts toward the Grand Prix of the International Tennis Federation.

Dibbs a fmailiar figure on Paris tennis courts, won the Coubertin competition in 1974. He twice reached the semifinals of the French Open championship at Roland Garros Stadium.

The American played a power game with regular booming passes. He systematically countered Fillol's effort to slow the game with high, soft balls.

Dibbs often went to the net. Fillol appeared less sure of himself, and committed many errors.

Dutchman Tom Okker and American Marty Riessen teamed to win the doubles, defeating the U.S. team of Frew McNair and Sherwood Stewart, 6-2, 6-3. McNair suffered stomach pains during the match.

Dibbs said after the match, "I feel very tired. My left thigh is hurting. If I had lost the fourth set, I would have been forced to abandon."

He said he was not sure whether he will be able to play in the London tournament starting Tuesday.

"Still, I am very happy to have won in Paris," he said. "This will allow me to take part in the Masters Tournament in Houston on Nov. 6-12," he said.

Fibak Beats Ramirez

VIENNA, Oct. 31 (UPI).—Playing in top form, Polish tennis star Wojtech Fibak today upset second-seeded Raul Ramirez of Mexico, 6-7, 6-3, 6-4, 2-6, 6-1, to win the $54,000 Grand Prix Indoor Tournament.

Fibak, 24, the No. 5 seed, combined his impressive returns with an excellent game at the net to gain the $10,000 first prize in a 3-hour, 20-minute duel.

"I was luckier than Raul. It is very difficult to play a good friend," Fibak said afterward. He had eliminated third-seeded Arthur Ashe in the quarterfinals.

There was no No. 1 seed in the tournament when top ranking American Jimmy Connors withdrew because of a back injury.

Ramirez broke Fibak's serve in the ninth game of the first set but the Polish player immediately broke back in a love game. At six games all, a tiebreak was set up, which Ramirez won, 7-5.

Fibak clearly dominated in the next two sets but appeared to lose his concentration in the fourth when Ramirez came back to take it 6-2 and make the score two sets all.

The turnaround came at the beginning of the final set when Fibak won three straight games to clinch the match.

The match was marred by several controversial line calls which had both players arguing with the linesmen and with each other.

Borg Over Laver

CHERRY HILL, N.J., Oct. 31 (Reuters).—Bjorn Borg of Sweden defeated Rod Laver of Australia, 6-4, 6-3, here Friday night in a $20,000 challenge match for the benefit of charity.

Borg won the first set despite serving four doublefaults. Laver led as far along as 4-4, 40-30, but then errors cost him the set. Borg won the match with a run of four straight games from 2-3 in the second set.

United Press International.

Jean Pierre Bastiat of France outreaches Australian players during French throw-in.

French Team Humiliates Australian Wallabies in Rugby

PARIS, Oct. 31 (UPI).—France pounded the touring Australian Wallabies yesterday in a humiliating 34-6 defeat in the second Rugby Union test at the Parc des Princes.

After winning the first test, 18-15, at Bordeaux last Sunday, the French turned on some "Champagne rugby" for their 20,000 supporters and took an unstoppable 13-3 halftime lead.

Playing a fast, open game on a damp pitch, they crossed the Australian line six times to chalk up two goals, four tries, a penalty and a drop goal.

Outrun, outtackled, outjumped and generally outplayed, the dispirited Australians could only scrape together two penalties, both kicked by Paul McLean in the 18th and 63d minutes.

Messenger Trot Goes To Windshield Wiper

WESTBURY, N.Y., Oct. 31 (UPI). — Windshield Wiper, who has now beaten the heralded Keystone Ore twice in a row, won the 21st Messenger Stakes last night at Roosevelt Raceway.

The contest for 3-year-old pacers carried a purse of $161,290 and completed the Triple Crown series.

Windshie'd Wiper, guided by Billy Haughton, was in sixth place at the stretch but was close to the 1-2 favorite Keystone Ore. Windshield Wiper pulled ahead of the favorite at the 16th pole and won by a neck in two minutes. Raven Hanover finished another neck behind in third.

Career-Rushing Mark Is Set By Dorsett in Pitt Triumph

PITTSBURGH, Oct. 31 (NYT). —Tony Dorsett reached another collegiate milestone yesterday. But it was the Pittsburgh defense that preserved the Panthers' perfect record in a 23-13 victory over stubborn Syracuse.

Dorsett, sidelined briefly with a jammed elbow in the opening quarter, gained 242 yards in 34 carries and became college football's all-time leading career rusher with 5,448 yards.

But even as the 22-year-old Pitt running back was polishing his Heisman Trophy credentials and preparing to ride the lead elephant in a circus parade here next week, the second-ranked Panthers, who have won eight straight, were almost shot down by a brilliant individual performance from Syracuse's Bill Hurley, a sophomore quarterback, who still is learning the art.

The 19-year-old Hurley carried 23 times for 112 yards and completed 9 of 18 passes for 203 yards and a touchdown. Yet, as Syracuse drove for a potential tying touchdown in the closing minutes, coach Frank Maloney inexplicably shunned Hurley on two crucial plays at the Pitt 11-yard line.

With the Panthers clinging to a 20-13 lead before a stunned Pitt Stadium crowd of 50,099, Syracuse twice tried James Sessler, a 223-pound running back, on third and fourth down, needing less than a yard.

Each time, however, the Panther interior, led by Al Romano, the 225-pound senior middle guard, stopped the thrusts.

Two plays later, Dorsett took Pitt out of danger with successive runs of 28 and 33 yards. The Panthers finished the drive with a game-clinching, 29-yard field goal by Carson Long, his third of the game, 24 seconds from the finish.

Nicklaus Gains Australian Golf Title a 5th Time

SYDNEY, Oct. 31 (UPI).—Defending champion Jack Nicklaus won the Australian Open golf tournament today for the fifth time since 1964 by four strokes over Curtis Strange at the Australian Golf Club.

Nicklaus carded a one-under-par final round for a total of 286 to win the $40,000 first prize in the tournament.

Strange finished with a round of 73 after dueling with Britain's Maurice Bembridge for the runner-up check of $21,375. Bembridge carded a par round of 72 to finish third with a total of 292.

Nicklaus, who began the final round with a two-stroke lead, quickly showed he was the player to beat with three birdies after the first four holes.

He said later, "Once I made the birdie putt at the 9th to turn in 32 (four under par), I played just to win the tournament. I didn't try to do anything too fancy... I played a conservative back nine."

Observer

Bad News in the Cellar

By Russell Baker

NEW YORK—The campaign existed only on television. I could go to the cellar and light the box and, lo, the campaign would be right there. "Look," I would say to the cat, who always goes to the cellar with me when I descend for a stiff bout of television, "Look, there is a man with immensely telegenic teeth in a northern snowstorm, and I'll bet he is running for president on our very own television box."

Baker

He was, of course. The cat knew it, and it bored her. All television politics bores her. She lives only for football, as the campaign lives only for television.

This is why, back in January, I began keeping an eye on the campaign. Ah, those primaries! Night after night, down there in the cellar, and all those hundreds and hundreds of telegenic teeth getting on and off airplanes. But only on television!

When I pushed the button, they ceased to exist, those teeth. I would ascend to the upper world, race outside. The real world! Life! Life! I would be in contact with life out there. Real people with real dogs committing nuisances on the real sidewalks. But not a single jaw of telegenic teeth anywhere in sight.

Carter, Reagan, Ford, Udall, Bayh. Had I uttered any of those great teethogenic names in the real world, I should probably have been placed under observation for possible television fatigue.

As the year wore on—wore on? Rotted away is more like it—I began sneaky reconnaissance sorties out of the cellar. By that time, both conventions had been held on television, and both parties had nominated the teeth of their choice. Surely, I thought, now the thing will have to make the leap from television to reality.

But no! When I closed the switch on Walter, John and Harry, the campaign vanished as rapidly as acid indigestion in the grip of the latest stomach-acid neutralizer. In the real world, not a single billboard, not a bumper sticker, not a campaign button, not even a chintzy window poster proclaiming the excellence of these teeth as opposed to those teeth.

One day I saw a lot of policemen on York Avenue. They said they thought the President was planning to drive by.

I wondered if he would be a little 10-inch president slightly out of focus with a chameleon complexion capable of unnerving changes from green to orange around the cheekbones. I waited and waited, and after a while, noting that nobody else except the cops was waiting, I hurried back to the cellar where, in no time at all, I was able to see the President driving down York Avenue. He was only 10 inches tall and was completely green.

* * *

Good citizenship—not to mention reasonable paranoia—seemed to me to demand more aggressive measures. And so, after a long futile search for the campaign out in the real world, I tried to telephone it.

"Campaign headquarters," said the voice at the end of the line.

"I want to speak to the campaign," I said.

"The campaign's out,' said the voice.

This was reassuring. "Out where?" I asked, thinking I might rush out in time to catch it and have a word with it.

"It's not exactly 'out,'" said the voice, "so much as it's 'on.' It's out being on television, if you get the nuance."

That was when Ford, Carter, Mondale, Dole and those League of Women Voters people all began lurking right inside the tube, just daring you to turn the thing on so they could go on and on for hours inside the box. It made you want to break down and cry.

I turned off the campaign and went up to the real world. It was very dead out there. And all up the block, blue lights glowing inside windowed cells, everybody was locked in watching the campaign. Little 10-inch men doing tiny little media things inside little boxes.

John Dean: Something New, Something Old

By Sally Quinn

WASHINGTON (WP).—He does, indeed, give an appearance of being friendly and very sincere. John Mitchell, Jeb Magruder, John Ehrlichman, Bob Haldeman and Richard Nixon himself thought John Dean was friendly and sincere. He dressed the way they dressed, looked, talked and acted the way they did.

Imagine the dismay, then, when quiet, inconspicuous, proper John Dean suddenly became the pariah of Washington, the "well-poisoner," Nixon's despised "heartbreak kid." Rarely has anyone so provoked the emotions of political Washington, inspired so many outpourings of venom than the clean-up, young Republican lawyer, all-American John Wesley Dean 3d, a man with a long memory.

Now he dresses, acts, talks, looks like, well, a lot of reporters—casual, tieless. Now he has written a book about his Watergate experiences. Now he is writing a novel. Now he is covering the Republican convention, exposing Earl Butz, pointing a finger at Gerald Ford about efforts to block an early Watergate investigation. Now he is traveling around the country promoting his book, being interviewed by other reporters—his new "colleagues."

Clearly, it is in his best interests to fit in, to have them like him, to have them believe him, to impress them.

There is only one catch. The more one talks to John Dean the more it becomes clear that nothing he has ever done could have been "blind."

Untouchable

Those who have met John Dean or who remember him during the Watergate hearings, droning on in his dry monotone, often come away with the same impression: that he is cold, unemotional, detached. Possibly, it is this feeling that he cannot be touched by the same things others are that inspires such animosity toward him, even now.

He insists it doesn't bother him that people think he is cold. "That's me. That's who I am."

He won't admit to any bitterness about anyone else involved in Watergate. "It would be fruitless. It would be hurtful to myself... it's a lot of baggage to carry hate around."

He says he never talked to his second wife, Maureen, initially about his Watergate problems. "I didn't tell her what was going on. I'd come home and climb into the Scotch bottle where I lived."

He insists that he has no great ego, that he has no desire to be famous, to be recognized. "I've had offers for movies," he says with a laugh. "I'm carrying one around now in an envelope." Is he tempted? "No. Just curious. I've no temptation to do that. I'd rather spend the time at a typewriter. I don't like being a well-known person. I really miss anonymity."

This doesn't seem to square with "Blind Ambition," with wanting to go to the top, be successful. Fame goes with success.

"Would you recognize the head of General Motors?" he asks.

He says he is not ideological. "I'm registered as an independent. I've never been driven by ideology. What I'm interested in is when there's a problem, what's the best solution." He says he could as easily have worked for a Democrat.

He says that he is an Episcopalian and that he believes in God. But "I'm one who doesn't talk publicly about my religious beliefs. It's so easy to get misconstrued, misinterpreted, misreported."

When asked what his biggest indulgence is, he will say: "Probably work, sitting at my typewriter."

Associated Press.

John and Maureen Dean during Watergate hearings.

He rarely gets angry, but he doesn't like it when people say he is a liar. "I would have no conceivable motive for lying. But it doesn't trouble me. I know I'm not... It's important for me to maintain my *credibility*. It is the one thing I decided I had to hang on to. It's still important to me to be a truthful man."

Morally? he is asked.

"In every concept of the word. Of course, I think I'm a moral person." He shows just a tiny bit of emotion. "I'm not out beating children and wives, stealing from banks and poor people. I try to lead a moral life. But the people I met in prison, the Mafiosi, all thought they were moral men, too—that going to prison was just a business risk.

"I've always been told I was oversensitive to other people's concerns," he'll say. "Yes, it is important to me to think of other people's feelings. That's why I feel bad about the Earl Butz thing. But I was working as a reporter. And he said it in front of others. Had he said it to me alone, I probably wouldn't have reported it."

He talks about how worried he was about his wife during Watergate when he wasn't confiding in her. "I thought maybe Mo was suicidal," he says. "I realized I had to tell her more. But then I realized it was just a woman's trick. And I was not the first man who had been taken in by it."

"When we were courting," he says, "she locked herself in the bathroom and threatened to slit her wrists." He laughs. "Mo is anything but suicidal."

He says that learning to talk to her, "opening my mind, was a tremendous relief."

There are those who see Maureen Dean as a pretty but not wildly intelligent woman and who wonder how someone as clever as John Dean could be married to her.

"Mo is my equal in her own way," he says. "She just has different intellectual interests. I feel very happy with her now. She often comments on it. She's a very happy, warm, effervescent person, we're in love and we're the best of friends. When we first met I wasn't generally as loose as I am today. I've blown a lot of stuff out of my system."

PEOPLE: *Paris Cabaret Pays For Noise Abatement*

The owner of the Crazy Horse Saloon in Paris has been ordered by a judge to pay 10,000 francs ($2,000) in damages to neighbors who complained of the noise. Retired Col. Jean Hercisse, 65, and his wife, a therapist, originally sued for 250,000 francs. They said they had conducted tests which showed that the Crazy Horse produced 120 decibels at full blast, or more than a Concorde supersonic jetliner on takeoff. The judge finally ruled that the nightclub's owner, Alain Bernardin, should pay the cost of complete soundproofing for the Hercisses' apartment and that came to 10,000 francs.

* * *

A sound specialist who has been taping statements by President Ford and others for commercials in the President's campaign has been dismissed after it was discovered that he was also working on a film, "Philosophy of the Bedroom," involving nudity. Michael Scott Goldbaum of New York last conferred with Ford in Philadelphia on Wednesday, according to Philip Angel, executive vice-president of Campaign '76, the media arm of the Ford campaign, who said Goldbaum "will certainly not be doing the last two in the series." Goldbaum has not commented, but his assistant, Margaret Hunnewell, denied that the movie Goldbaum was working on was pornographic.

"That is not the intent. Mr. Gol baum is well known as an exc lent sound man throughout t industry; he specializes in soun

Angel also said that Goldbau was "an excellent sound m there's no denying that. have used him extensively on fi crews for political campaigns."

"We didn't know about other involvement," he said. " are a bit shocked and tal aback by it."

* * *

Actress Elizabeth Taylor warmly greeted by her fat former government official J Warner and his daughter M on Saturday when she retur to the United States after w ing on a film in Vienna. Th has been speculation that Taylor and Warner would m wed, but the couple refused disclose their plans. Wa would be Miss Taylor's sixth husband.

* * *

Barbara Raskind, whose for husband entered women's pro sional tennis as Renee Richa after a sex-change operation, filed suit for more than $7,00 back alimony and child supp Mrs. Raskind was divorced fr from Dr. Richard Raskind, ophthalmologist. Her Manhat Supreme Court suit said Richards expects to realize $80 from a book she is writing.

Li Hsien-nien

hina Premier Named n Posters in Shanghai

By Fox Butterfield

NG KONG, Nov. 1 (NYT).—ll posters put up in Shang- oday said that Li Hsien- 69, a veteran party bureau- has been named China's Premier, diplomatic sources ted.

posters also asserted that Chien-ying, the elderly de- inister, has been nomina- chairman of the National 's Congress, China's equi- t of head of state.

re was no other informa- confirm the posters' the Chinese news agency nt that Mr. Li had met ion from Afghanistan his capacity as deputy A spokesman for the oreign Ministry, asked mments, had been plied he would "take the question.

, who was born into a peasant family, rose through ks of the party and army being a guerrilla to army mander, then provincial ad- trator and later minister of e and deputy premier.

was one of the late Premier Chou En-lai's closest colleagues regarded as China's most ented administrator. Unlike Chinese leaders, he has widely abroad and has perience in dealing with gn leaders and diplomats in ng.

ce Hua Kuo-feng was d Chairman three weeks ago, Mr. Li has seemed to assume the usual duties of the Premier, hosting a visit by Prime Minister Michael Somare of Papua-New Guinea and meeting new ambassadors and other foreign visitors.

Mr. Yeh is the second-ranking member of the party after Mr. Hua, and the only surviving vice-chairman of the party. He is believed to have been seriously ill earlier this year. If the wall posters are correct, it would mean a promotion to a nominally higher but less demanding post from his current job as minister of defense.

There have been several indications in the last three weeks that Mr. Li, the third-ranking member of the party hierarchy and the official in general charge of China's economy, may be acting as premier. China's official Premier is Mr. Hua.

Atop Tiananmen Gate

At a mammoth rally in Peking last week to acclaim Mr. Hua's promotion to chairman, Mr. Hua appeared atop the Tiananmen Gate flanked by Mr. Li and Mr. Yeh. The three men are believed to hold similar pragmatic views about China's economy and the need to govern the country in a more orderly, conventional manner than was favored by Mao Tse-tung.

Other wall posters appearing in Shanghai and Canton in the last

Rhodesia Negotiators Meet Today To Discuss an Independence Date

By John F. Burns

GENEVA, Nov. 1 (NYT).—Prime Minister Ian Smith and African nationalist leaders at the Geneva conference on Rhodesia will meet tomorrow to discuss the idea of fixing a date for the independence of the territory under majority rule. Ivor Richard, chairman of the conference, announced tonight.

He made the announcement as sources in the nationalist camp disclosed that two African leaders, Joshua Nkomo and Robert Mugabe, had proposed next September as the date for formal independence from Britain. The two men, leaders of the "patriotic front" formed for the talks, met with Mr. Richard this morning.

The two allies' proposal of independence 10 months from now seemed to surprise Mr. Smith. "I haven't given that one any thought. That's a new one to me," the Rhodesian leader told newsmen outside the Palais des Nations, where he held a 90-minute meeting this evening with Mr. Richard.

Mr. Smith, his manner and tone suggesting growing irritation at the absence of any substantive progress in the talks, confirmed that he will leave the conference and fly home to Rhodesia, probably on Wednesday. Until he returns, his delegation will be headed by Foreign Minister P.K. van der Byl.

Exploratory Talks

The issue of an independence date will be taken up at an informal meeting of the delegation heads tomorrow afternoon. It will be the first time that the main participants have met together since the conference recessed on Friday, after two sessions, to permit exploratory talks between Mr. Richard and each of the parties.

Although Mr. Richard, who is Britain's ambassador to the UN, took care to say that he was not sure that tomorrow's meeting would proceed to the point of considering a specific independence date, or even a formula for reaching agreement on a date, it was apparent that he had seized on the issue as being the only one on which there is any prospect of agreement at this stage.

In the 11 days since Mr. Richard began his discussions with the delegates, there has been no sign of compromise on any of the issues that divide the Smith government and the nationalists. In recent days, both sides have begun to grumble about the slow pace.

Mr. Richard, acknowledging that there are serious difficulties in the path of an agreement, has attempted to avert a deadlock by deferring consideration of key issues, such as the powers that whites would hold during the period leading to majority rule. Instead, he has probed the positions of the groups for issues that present some hope of early accommodation.

Apparently, an independence date is the most promising of

(Continued on Page 2, Col. 4)

Heavy Fighting Is Reported

Mozambique Says Rhodesia Invades With Major Force

GENEVA, Nov. 1 (Reuters).—Rhodesian forces are engaged in heavy fighting inside Mozambique, the Mozambican news agency reported from Maputo today.

It said that the "invaders" struck in the border provinces of Gaza and Tete with aircraft, tanks, artillery, infantry and cavalry in the biggest attack yet on Mozambique.

The agency said that the raids began early yesterday and were being repulsed by Mozambican forces. But it added: "Fierce fighting is still going on."

In Salisbury, Rhodesia, it had been disclosed that government troops were crossing into Mozambique in "hot pursuit" and that guerrillas were fleeing there after attacks that have doubled Rhodesian civilian casualties in the last month.

Official figures showed that 34 civilians, all but 10 of them Africans, were killed last month.

Tonight, Rhodesia rejected reports that its forces had invaded the country. A Rhodesian government spokesman said, "The reports emanating from Maputo and elsewhere are highly imaginative," he added.

To Press War

In Geneva, nationalist leader Robert Mugabe today served notice that the guerrillas would press on with their escalating war against the Rhodesian government.

A government spokesman in Salisbury linked the increase in guerrilla activity to the Geneva conference on Rhodesia. But the commander of government forces in the front-line town of Umtali said that an upsurge had been expected to accompany the start of the rains, which provide better cover for the guerrillas.

According to official figures, government forces killed 144 guerrillas last month for the loss of 13 soldiers—eight white and five black.

But the deaths of the 10 white civilians in the same month are likely to have the greatest impact on Rhodesia's minority white community.

Troop Concentration

Government forces reported that more than 100 heavily armed Mozambican troops were concentrated a few hundred yards across the border at Umtali. They said last night that a mortar and rocket attack might be imminent.

But the border area around Umtali was reported very quiet today, although there was a heavy rocket attack on a tea estate to the north last night. A packing shed was damaged, without casualties.

A military spokesman said that the increased military presence across the border might be a decoy or only saber rattling. "We usually find that if you have a saber rattling exercise on the border, it is connected with a terrorist incursion somewhere else," he said.

The Gallup Poll Now Favors Ford

NEW YORK, Nov. 1 (AP).—The final Gallup poll, released last night and based on interviews with voters late last week, showed President Ford with 47 per cent, Jimmy Carter with 46, others with 3 per cent, and 4 per cent still undecided.

The 1-per-cent difference, however, is smaller than the poll's margin of error and has little statistical significance. The Gallup results show that the race is about even, although the 1-per-cent lead for Mr. Ford marks the first time since late March that he has not trailed Mr. Carter.

Pollster Louis Harris said: "What happens Monday night, when each candidate has blocked out a half-hour of prime time on each network, will probably make the difference."

His latest poll, conducted Friday *through yesterday, showed Mr. Carter* still holding a 46-45 lead over Mr. Ford. But Mr. Harris said the result "clearly indicates a contest too close to call and an election outcome that could go either way. In fact, either man might win the popular vote and lose the Electoral College vote."

Ford, Carter Conclude Race Too Close to Call

NEW YORK, Nov. 1 (IHT).—President Ford and Jimmy Carter were winding up their campaigns tonight barely 100 miles apart in the President's home state of Michigan. And if the poll-takers and pundits are right, the candidates will reach Election Day tomorrow nearly in a dead heat.

Too close to call is the forecast coming from most quarters in the hours before Americans go to the polls in the presidential election.

In his final day of campaigning for the office he now holds through appointment, the Republican President was in Ohio and planned to go on to Michigan for a closing rally in his home base, Grand Rapids.

His Democratic challenger campaigned in California and then planned to wind up his two-year quest for the presidency with a rally in Flint, Mich., before flying to his Georgia home.

The Michigan stop was inserted in Mr. Carter's schedule at the last minute, an indication that the candidate believes he still has a chance to carry Mr. Ford's state, with its 21 electoral votes.

Lead in Electoral Votes

A 50-state electoral vote survey by The New York Times showed states with 223 electoral votes solid for or leaning to Mr. Carter, states with 198 electoral votes solid for or leaning to Mr. Ford, and states with 118 electoral votes rated even.

With 270 electoral votes required for a majority, the outcome could be decided by this final day of stumping, tonight's television appeals and the relative success of the two nominees in getting their backers to the polls.

Mr. Ford and Mr. Carter have purchased time on each of the three major television networks tonight for final appeals to the electorate.

Final polls showed crosscurrents at work in the electorate, with Mr. Ford surging in Texas and New Jersey and falling back in Michigan and Ohio. But the overall movement was toward the President, who began the campaign with very slim prospects.

Politicians reported unusual volatility in the electorate, with many voters undecided and many more unenthusiastic in their preferences. In a number of states, including Michigan and Colorado, the number of undecided voters appeared to be increasing, a highly unusual development that *suggested* the possibility of surprise results.

The New York Times survey cited six even states—Connecticut, Iowa, Mississippi, New Mexico, Oklahoma and South Dakota, which have 39 electoral votes among them. Assuming roughly an even split, Mr. Carter would have 241 votes, 29 short of a majority, and Mr. Ford would have 218, 52 short of a majority, if the "solid" and "leaning to" states followed projections.

In that situation, The Times said, each man would need to win two of the three big states considered too close to call—Pennsylvania, with 27 electoral votes; Illinois, with 26, and Texas, also with 26—unless Mr. Carter picked up a small state that he is not now expected to take.

So close is the presidential contest, The Times said, that it could conceivably be decided by the independent candidacy of former Democratic Sen. Eugene McCarthy of Minnesota, who is on the ballot in six of the eight even states. Late polls in Iowa, Illinois and several other states suggest he could make the difference even if he pulled only 3 or 4 per cent of the total votes.

President Ford moved through the last day of the campaign repeating his standard themes of "lower taxes, a balanced budget, lower federal spending, beating inflation and peace and liberty for the U.S.A."

At an airport rally at Akron, Ohio, he asked a crowd estimated at 11,000 "to confirm me not only with your prayers but also with your ballots"—a line which has become the closing refrain of his drive.

'Victory Party'

He was winding up a nonstop stretch drive that has kept him on the road for the last 11 days. He will fly to Grand Rapids late today and will vote there early tomorrow, then return to Washington for what White House Press Secretary Ron Nessen describes as his "victory party."

In a statement taped for broadcast in Ohio, Mr. Ford talked of "my vision of America—a vision of limited government and unlimited opportunity.

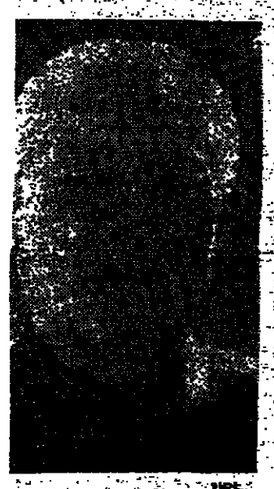
"The government can't do everything," he said. "If it tries to do too much, it ends up doing nothing well. If it assumes too much power and control, we will have sown the seeds of our own destruction as a free people."

Mr. Ford also said, "America has had its heart broken too many times when grand promises went unfulfilled. That is why it is so important that those who would lead this country be honest enough to promise only what they can deliver, to admit that some problems can't be solved by waving a magic wand or creating still another government program or even by changing administrations."

Mr. Carter began his final swing through California last night with an outdoor rally telecast to four Western states.

"Every vote counts," Mr. Carter declared to the thousands of cheering persons crammed into San Francisco's Ghirardelli Square and those watching on television.

"I don't want to lose," he told the rally. "I don't intend to lose."



He reminded his audience, as he has done several times in the last week, of the close presidential elections in 1960 and 1968. With a few thousand votes difference in 1960, he said, "we could have had Richard Nixon eight years earlier."

Mr. Carter was introduced by

(Continued on Page 2, Col. 7)

Special Edition Tomorrow For Elections

The normal distribution of the International Herald Tribune will be augmented Wednesday in more than 20 cities in Western Europe by a special U.S. elections edition. This edition, which will carry the words "Election Edition" in the upper left-hand corner of Page 1, will contain more up-to-date results of the elections than the regular editions. It will be available a few hour after regular editions of the IHT are put on sale. This special service will be available in Paris, Nice, Cannes, Monaco, London, Brussels, Mons, Antwerp, Luxembourg, Amsterdam, Rotterdam, The Hague, Frankfurt, Berlin, Hamburg, Cologne, Munich, Stuttgart, Mannheim, Madrid, Barcelona and Malaga.

med to Enforce Plan

rab Peace-Keeping Troops o Arrive in Lebanon Soon

BEIRUT, Nov. 1 (NYT).—Has- Sabry al-Kholy, the special y of the Arab League, an- nced today that the Arab e-keeping troops for Lebanon begin to arrive here within next 48 hours.

said at a news conference that the forces will be equip- with enough armor and fire- r to enforce the peace plan med by the Arab summit con- ce in Cairo a week ago.

r. Kholy, who had held talks Cairo and Damascus before ning to Beirut yesterday, that the following states will ribute the troops: Syria, Saudi ia, the Sudan, Libya, the United Arab Emirates and North and South Yemen.

He did not disclose the specific contribution by each state, but Syria is expected to provide what its information minister, Ahmed Iskandar, had called the "backbone" of the force.

Advance Party

A leading newspaper, the daily An Nahar, said that an advance party of the Arab forces was expected to arrive in Damascus by air tonight on its way to Lebanon.

The paper said that the troops were being rushed in reply to an urgent request made by Lebanese President Elias Sarkis yesterday to Arab League Secretary-General Mahmoud Riad.

The failure by Gen. Mohammed Hassan Ghoneim, the Egyptian commander of the Arab force sent here four months ago, to bring representatives of the rival factions to meet yesterday has increased tension and led to more serious violations of the cease-fire that went into effect 10 days ago.

Fighting last night and this morning on the line separating this city's Christian and Moslem districts brought traffic there to a halt. Rival gunmen used mortar and machine-gun fire, while Christian forces brought light tanks to their side of the line.

7 Bodies Found

At least seven bodies have been recovered in that area in the last 24 hours, according to informed press sources.

The leftist-controlled Radio Beirut spoke of rising tension along the border area with Israel in southern Lebanon. It said that the combined leftist and Palestinian forces in the region have been placed in a state of alert to counter what the radio described as Israeli-supported attacks by rightist Christian forces. The leftist press said that the Israelis have helped the rightists move more troops and weapons into the Christian border village of el-Qlaia.

Voice of Lebanon, the radio

S., U.K., Paris ppose Curbs on ess at Parley

AIROBI, Nov. 1 (Reuters).—United States, Britain and ce today issued strong state- ts in support of press freedom ae Unesco general conference, ickly rejecting a Soviet- ired draft declaration in favor government control of the s.

e draft, one of 77 items on agenda of the five-week con- nce of Unesco—the United ons Educational, Scientific Cultural Organization—says "states are responsible for activities in the international re of all mass media under r jurisdiction."

arlier today, the Soviet Union ered an indirect defeat on the e, when the conference reject- n amendment from the Soviet gate that would have forced lic debate on questions such press freedom and Israel's rwed application for member- of Unesco's European group. he amendment stated that if pecial 25-nation negotiating up failed to reach a consensus hin two or three days on any e it should be referred back the general conference. His posal was defeated by 70 votes 6, with 36 abstentions.

Backed World War II Ace

Bonn Air Force's No. 2, 3 Men Fired for Defense of Nazi Pilot

BONN, Nov. 1 (UPI).—Defense Minister Georg Leber today fired the two operational heads of the West German Air Force for defending the Nazis' most decorated pilot, whose dive-bombers devastated Rotterdam and Warsaw and who, since the war, has been associated with neo-Nazi parties.

Mr. Leber told a news conference it no longer is possible for an air force serving a democratic state to keep Lt. Gen. Walter Krupinski and Maj. Gen. Karl Heinz Franke on duty.

They are the two highest-ranking officers in the air force after its commander, Lt. Gen. Gerhard Limburg, who has the title of general-inspector.

The two generals defended the appearance of Col. Hans Ulrich Rudel, Hitler's favorite pilot, at an "old-timers' traditional rally" at an air force base. He spoke to officers and gave autographs.

They said Mr. Rudel had as much right to speak up as West German members of parliament who had been Communists and spent World War II in the Soviet Union.

In this connection they mentioned Herbert Wehner, the parliamentary floor leader of the ruling Social Democratic party. He used to be a Communist.

"The Bundeswehr (armed forces) is part of the Atlantic alliance," Mr. Leber told the news conference. "The esteem that it has in the alliance and outside it is of great importance for the reputation of the Federal Republic of Germany. The good reputation that the Bundeswehr enjoys is necessary to our country. It must therefore be watched over vigilantly."

Mr. Leber said he had removed the two generals from their posts and would ask President Walter Scheel to retire them.

Mr. Rudel was the most decorated serviceman in the German armed forces in World War II. He commanded the Stuka dive-bombers.

After the war he was active in the Socialist Reich party, which was banned as neo-Nazi, and in other parties considered neo-Nazi.

"Rudel was a good and successful soldier," Mr. Leber said. "But after 1945 he made remarks that showed he cannot be considered an example for any member of the present armed forces."

Lt. Gen. Walter Krupinski.

U.K. Bookmaker Now Makes Ford Favorite to Win

LONDON, Nov. 1 (AP).—Last-minute election bets have poured in favoring President Ford to retain the presidency, Ladbroke's, one of Britain's top bookmakers, said today.

Ladbroke's said that Mr. Ford went from odds against, through even money and then to favorite "in a few hours."

"We took in £80,000 ($128,000) today on Ford to win and not a penny on Jimmy Carter," said Ron Pollard, Ladbroke's director.

Mr. Pollard said: "Support for Ford is spiraling. I have never known such a turnaround in 12 years of taking political bets."

Today, Ladbroke's made Mr. Ford favorite at 4 to 5, meaning a bet of 5 can win 4. Mr. Carter was at even money, meaning a bettor would win the same amount as he staked if Mr. Carter is elected.

William Hill, another big firm, said that they made Mr. Ford even money today after taking in £25,000 and "nothing on Carter."

Reassuring European Allies

U.S. to Give New F-16 Fighter Capability as Nuclear Carrier

By John W. Finney

WASHINGTON, Nov. 1 (NYT).—The Defense Department has decided to give the new F-16 fighter a nuclear capability, partly to reassure the European allies that the United States will have a continuing ability to wage a tactical nuclear war in Europe.

Officials of both the Defense and State Departments acknowledge that there was considerable concern among the European allies about the future nuclear war fighting capability of the United States as it shifts to a new generation of fighters to replace the F-4 fighter-bomber.

For nearly 15 years the F-4 has been the workhorse of the Air Force as both a fighter and a bomber, and in Europe it has been the principal vehicle for tactical nuclear weapons.

The F-4 is being replaced by more specialized planes that will not have its nuclear weapons capability, such as the F-15, which is designed as an air-superiority fighter; the F-16, which started off as a highly maneuverable, relatively low-cost dogfighter, and the A-10, which is designed for close support of ground troops.

'Quick Reaction'

The Defense Department announced last week that the first wing of 72 F-15 fighters would go to Europe next spring, displacing F-4 fighter-bombers at the Bitburg air base in the northwestern part of West Germany. In the past Bitburg has been one of the bases where the F-4s have been on "quick reaction *alert," ready to deliver atomic* bombs on a few minutes' notice.

It was no coincidence, officials said, that at the same time the Defense Department announced it was sending a second wing of F-111s—a tactical bomber more versatile than the F-4 for delivering atomic weapons—to Britain.

The purpose, officials explained, was to reassure the European allies—as well as give a signal to the Soviet Union—that even though the F-4s were being replaced, the United States was not reducing its ability to deliver atomic weapons into Eastern Europe and the western part of the Soviet Union.

Over the next five or so years, however, the F-4 will be retired *from active service, leaving a* potential gap in the inventory of aircraft for delivering nuclear weapons.

To fill the gap, officials said, the Defense Department has decided to make some changes in

(Continued on Page 2, Col. 8)

Wyszynski to Stay As Polish Primate

VATICAN CITY, Nov. 1 (UPI).—Pope Paul decided that Stefan Cardinal Wyszynski will stay on as primate of Poland's 30 million Catholics despite his advancing age, the cardinal's office said today.

The Pope's decision followed reports that both the Vatican and Poland's Communist government wanted Cardinal Wyszynski to remain in his post to avoid the lengthy process of agreeing on a successor. The cardinal, who has led Poland's Catholics for the last 28 years, submitted his resignation to the Pope Aug. 3 in accordance with Vatican recommendations that bishops offer to retire when they reach the age of 75.

Slow March to Sacrifice

Italians Feel No 'Sting' in Austerity

By Alvin Shuster

ROME, Nov. 1 (NYT).—For weeks, the government of Christian Democrats has been preaching the need for sacrifice, for wage controls, for higher prices, for less privilege and tax evasion and for a host of other measures. But despite the exhortations, there has been little sacrifice.

"What austerity?" asked Dario Armelini, the owner of a store near the Pantheon in central Rome. "No one is paying attention. Just look at all the cars going by. Italians continue to spend, to eat imported steaks, just like before. They refuse to feel the sting."

The "sting" is what the austerity effort is generally called in Italy, and so far it is about as painful as that of a butterfly. Some are beginning to worry, however, because many prices are up or going up and foreign creditors, such as the International Monetary Fund, are demanding more steps, including meaningful curbs on wage increases.

Hardly a day goes by without a brief strike somewhere. Some employees are receiving only part of their pay this month because their employers have run out of money.

There are moans about the recent increase of 25 per cent in the price of gasoline, but there are few signs that the Italians are driving less. Electricity, telephone, postal and food costs are rising, to be followed later by higher charges for train travel, medicine and buses. In all, the government hopes to raise about $5 billion a year from the new measures.

The Italians generally, however, are more worried about what is likely to come, because it does look like a real crisis this time. For the present, they are staying ahead of inflation, now running just under 20 per cent, because most of their salaries are going up at a faster rate.

Most experts, including those at the IMF, which is considering a Rome request for a $1-billion loan, are convinced that Italy will have to find some significant method of limiting wage increases. They are rising faster here than in any other country in Western Europe, providing one of the most difficult problems for the government of Christian Democrats, led by Premier Giulio Andreotti.

Cautious Move

He has moved cautiously to limit the rises by proposing curbs on cost-of-living increases for all those earning more than $7,200 a year, a minority of wage earners here.

At first the unions talked of cooperating on limiting higher wages but backed away on curbs on the lower paid. They agree on the need for sacrifice, but they want to see the burdens spread evenly.

As it is, only salaried wage earners are paying their fair share of taxes, because of withholding. The self-employed, including doctors, lawyers and store owners, usually get away with paying very little.

Persuading people to give up anything is proving a problem.

When the government suggested the other day, for example, that perhaps those who work for the Ministry of Transport should pay their way on the trains, the employees demonstrated by falling in front of the tracks and paralyzing all traffic into Rome station.

Other privileges for civil servants have also been a topic of conversation. Electricity workers get cheaper rates, telephone workers, free installation and cut-rate calls, and bank employees higher interest on their deposits and lower interest on their loans.

At the Ministry of Finance, some employees spend their mornings coping with tax evaders and then go to work for extra income in the afternoon by helping the tax evaders fight their cases.

It has all resulted in a rather slow march toward sacrifice, with much conferring between the Christian Democrats and the Communists, who in turn are trying to deal with the trade unions.

At some point, Italy may well have the much-proclaimed austerity program, but not yet.

WAVING—President Gerald Ford walking through large crowd at Nassau Coliseum in Hempstead, N.Y. on Sunday. He told the audience "we're going to win."

Hoxha Hints at De-Emphasis Of Chinese Aid for Albanians

VIENNA, Nov. 1 (AP).—Albania's strongman Enver Hoxha, 67, today played down the importance of "internationalist solidarity and aid" from friendly countries, indicating a de-emphasis of ideological support and material assistance from China.

The tiny Adriatic country has until now defied Soviet supremacy over Communist parties in Europe and Soviet political rapprochement with the West, and has been regarded as Peking's only ally in Europe.

In a keynote speech opening the seventh congress of the Albanian Communist party, Mr. Hoxha, who is first secretary of the party's Central Committee, made it clear that Albania would categorically refuse any economic aid from Western and Soviet-bloc countries. Excerpts from the speech were carried by the official Albanian news agency ATA.

Before the party congress, Western observers had speculated that the close ties between the parties and governments in Tirana and Peking had suffered a setback in the wake of a power struggle won by the moderates who rallied around the new Chinese party Chairman, Hua Kuo-feng.

It was believed that Mr. Hoxha and his lieutenants, including aging Premier Mehmet Shehu, had banked on the radicals of the "Shanghai group," led by the widow of former Chairman Mao Tse-tung.

As in 1971, the Chinese failed to send a delegation to the Albanian party congress. Also conspicuously absent was a delegation from the Romanian Communist party, whose relations with Tirana leaders have been "normal" compared with those of other parties in Eastern Europe.

Before the meeting opened, Mao was given a one-minute silent tribute. Before it, the Chinese were referred to as "the fraternal people, the dear friends of the Albanian people."

But in the first part of his lengthy speech discussing party activities over the last five years and the new draft constitution to be adopted soon, Mr. Hoxha refrained from praise of the Chinese leaders currently in power.

Hua Sends Pledge

HONG KONG, Nov. 1 (Reuters).—Mr. Hua has pledged to strengthen his country's ties with Albania in a message to Mr. Hoxha, the Chinese news agency reported today.

Observers here have reported an apparent strain in relations between the two countries since the death of Mao.

China Premier Named on Shanghai Posters

(Continued from Page 1)

few days have reported the formation of a special high-level committee to investigate the alleged "crimes" of Mao's widow, Chiang Ching, and three other senior leftists. According to one poster, the committee is headed by Mr. Yeh and also includes Chen Hsi-lien, the commander of the Peking military region, and Wang Tung-hsing, a Politburo member who was head of Mao's bodyguards.

It is common Chinese Communist practice to set up an investigation committee after a major party leader or leaders are accused of transgressions. The four leftists were arrested Oct. 6 and have been charged with attempting to usurp power.

Whether the report about the new appointments for Mr. Li and Mr. Yeh are correct or not, China's new authorities seem to be taking a much more conservative view of leadership than Mao did.

In an important dispatch yesterday, the party paper reprinted an editorial from the army paper, which asserted that China should be led by the most senior leaders. In the Cultural Revolution, Mao had introduced a system of more rapid promotion for younger cadres, called the "three-in-one combination" of old, middle-aged and young party workers.

But the army paper said, "Political parties, as a general rule, are directed by more or less stable groups composed of the most authoritative, influential and experienced members. The army paper made no mention of the "three-in-one combination" program.

Mao's more rapid promotion scheme for younger officials has long been a divisive issue. Many senior party bureaucrats and army commanders, some of whom were purged in the Cultural Revolution, resented the sudden elevation of Wang Hung-wen, one of the four arrested leftists. Mao himself made Mr. Wang, who is about 40 years old, the third-ranking member of the party and apparently also named him a vice-chairman of the powerful party Military Commission, though he had no known military experience.

Analysts here considered the editorial a significant statement. The party paper has very rarely reprinted editorials from the army paper since the Cultural Revolution, when the army was in a powerful position over the country's affairs.

Death Toll Put at 133 In New Guinea Quake

JAKARTA, Nov. 1 (Reuters).—The death toll from a major earthquake that struck western New Guinea Friday rose today to 133, a provincial government official said.

A severe earthquake today shook New Britain Island. A spokesman for the geophysical observatory in the Papua-New Guinea capital of Port Moresby said it was similar in force to the one Friday in western New Guinea.

Spanish Energy Curbs

MADRID, Nov. 1 (Reuters).—Electricity rates went up and speed limits came down in Spain today to conserve energy.

4 Latvian Strikers Sent to Camps

MOSCOW, Nov. 1 (AP).—Four Latvian dock workers have been sent to labor camps following a strike at the port of Riga to protest meat shortages, according to dissidents here. Two strikers were reported to have received sentences of three years, the others terms of two years.

The four men were arrested in May for their role in what has become known as the "fish-day strike." They were tried in August by the Latvian Supreme Court on charges of "slanderous fabrications besmirching the Soviet state and the social system," the dissidents said.

At least one "fish day" each week has been introduced in Soviet restaurants, apparently because of meat shortages resulting from last year's crop shortages. No meat is served on those days.

Rhodesia Independence Date Eyed

(Continued from Page 1)

these. Although Mr. Smith continues to insist that he is not prepared to back away from the arrangements for the transitional period that he drew up with Secretary of State Henry Kissinger, he has hinted that he is flexible on the length of the transitional phase.

The Kissinger proposals provide for majority rule within two years, a formulation allowing flexibility. The proposals, accepted by Mr. Smith after a meeting with Mr. Kissinger in Pretoria six weeks ago, envisage a biracial interim government with substantial powers for whites, including control of the army and police.

The nationalists have rejected the Kissinger plan, insisting that the conference start from scratch in devising the structure of an interim government. However, they have accepted the idea of a transitional phase. Views on the length of the transition vary, but even Mr. Mugabe, considered the most militant figure, has conceded that a 12-month handover period might be necessary.

Mr. Richard was guarded in his assessment of the prospects for tomorrow's meeting. "I can give you no idea what's going to emerge from these discussions," he said. "I've just come to the conclusion now that it's worthwhile the various participants getting together around the table to see what we can hammer out."

It is believed that Mr. Smith may favor less than two years for the transitional period on the assumption that a relatively early independence date will increase pressure on the nationalists to agree on the arrangements for transferring power. The government's calculation may be that the Africans, sooner than miss the independence date, will compromise on issues relating to the transitional phase and the independence constitution.

Mr. Smith did not elaborate on the issue this evening, but his remarks suggested, if anything, a hardening of his position toward the talks. Confirming that he was leaving "because I haven't got anything to do," he added: "I would have thought that by now we would be getting to grips with the problem, and talking about the agreement, but as you know, we're still talking around it."

The Rhodesian leader will fly home aboard the South African Airways plane that brought him here. He said he would be attending to "more important problems in Rhodesia," including those brought about by the United Nations' trade sanctions. He did not say when he would return, but expressed the hope that "by the time I get back we'll have stopped talking around the problem."

Blacks' 3d Strike In South Africa Is Said to Fizzle

JOHANNESBURG, Nov. 1 (AP).—The third black strike in two months against the South African government's racial policies began today, but there appeared to be far less participation in it than in the previous ones.

Only scattered absenteeism was reported in Johannesburg. Railway officials said the trains that bring in about 220,000 commuters from Soweto, the big black ghetto south of the city, were full. A bus company spokesman reported a "very slight drop" in passenger loads from Soweto.

Police in Cape Town said that its nonwhite population was working and the city was peaceful.

Although the militant Soweto Students' Representative Council called for a nationwide, weeklong strike, many Soweto blacks said during the weekend that they thought the job boycott would fail. Some noted that many student leaders have been arrested and others have been driven into hiding. Many blacks said they might lose their jobs if they struck.

A gang of blacks attacked a municipal bus in Soweto, seriously injuring the black driver, and at least one suspected assailant was arrested, police said. No other violence was reported today.

Arab Peace-Keeping Troops To Arrive in Lebanon Soon

(Continued from Page 1)

station of the Phalange party, Lebanon's largest Christian group, said that a whole brigade of Palestinian guerrillas has occupied the Christian village of Kfair on the slopes of Mount Hermon in the Arkoub.

Mr. Kholy said that the Arab peace-keeping force will be stationed wherever the confrontation lines may exist, but not in southern Lebanon.

Press quarters noted that this meant the force will avoid any confrontation with Israel and that its mission will be strictly within the Lebanese framework and outside that of the Arab-Israeli conflict.

He said that Arab commanders have been working with military aides of President Sarkis on details of implementing the peace plan and that their recommendations will be submitted to Mr. Sarkis tomorrow for approval.

Under Arab summit conference resolutions, Mr. Sarkis has complete powers in controlling the Arab force, the Arab League envoy declared.

Mr. Kholy indicated that the force would not involve itself in internal Lebanese politics, a matter to be left entirely to Lebanese political leaders.

U.S. Maintaining Its Nomination of Envoy to Moscow

WASHINGTON, Nov. 1 (UPI).—The State Department said today that it has no intention of withdrawing the name of Malcolm Toon as U.S. ambassador to Moscow, despite apparent Soviet opposition.

Spokesman Robert Funseth confirmed that the United States had submitted Mr. Toon's name "several weeks ago" and that there has been no response from the Soviet side.

Mr. Funseth said, "We consider their lack of reply an unusual procedure and we don't intend to withdraw his name."

It is customary for all countries to seek the concurrence of a host country for important changes in embassy personnel. State Department officials said strong objections to a proposed ambassador are usually enough to cause a country to withdraw a name, since a diplomat's effectiveness depends on his ability to work with the host government.

Mr. Toon, 60, at present U.S. ambassador to Israel, is a career Foreign Service officer who had previously served as ambassador to Czechoslovakia and Yugoslavia.

Greece and Vatican To Sign a Concordat

ATHENS, Nov. 1 (UPI).—Greece and the Vatican will sign a concordat establishing diplomatic relations for the first time, a senior official of the Church of Greece said today.

He said that differences between the government and the leadership of the Church of Greece have been ironed out and that the arrival of an apostolic nuncio is expected to take place before the end of the year.

Iran Warns U.S. Over Reciprocity On Police Curbs

TEHRAN, Nov. 1 (UPI).—Iran reacted sharply today to Secretary of State Henry Kissinger's promise to halt Iranian government surveillance of its citizens in the United States.

"Whatever attitude they [U.S. officials] adopt toward our officials will be reciprocated by us toward their officials," a spokesman for the Foreign Ministry said.

The question arose following a TV interview with Shah Mohammed Reza Pahlevi. Referring to Iranian students in the United States, the Shah said Iran's secret police "are checking up on anybody who becomes affiliated with circles hostile to my country."

The Shah said he believed the surveillance was being carried out with the knowledge and consent of the U.S. government. In Hartford, Conn., Mr. Kissinger said, "If it is true it will be stopped."

A U.S. Embassy spokesman here said "I cannot imagine how Iran can reciprocate since we don't have any U.S. officials here keeping tabs on American students attending Iranian institutions."

Yablonski Killer Gets 3 Life Terms

WASHINGTON, Pa., Nov. 1 (AP).—Aubran Wayne Martin, convicted of murder five years ago in the assassination of United Mine Workers rebel Joseph Yablonski, was sentenced today to three consecutive life terms.

Martin, 28, was the last of nine defendants to be sentenced in the 1969 deaths of Mr. Yablonski and his wife and daughter. They were shot while sleeping in their Clarksville, Pa., home, three weeks after Mr. Yablonski lost a bitter union election to W.A. Boyle, who is serving a life term for his murder conviction in the case.

"It is my request that this defendant never be made eligible for parole or furlough," Washington County Judge Charles Sweet said in sentencing Martin.

President and Carter Conclu Race Held Too Close to Cal

(Continued from Page 1)

Gov. Edmund Brown Jr., who portrayed the Democratic presidential candidate as a choice "of the future, of possibility, of openness." He said another Ford administration would "recycle the last eight years into the status quo."

Carter Press Secretary Jody Powell said after being told of a Gallup poll result: "I think we'll try to relax and enjoy the position of being Mr. Gallup's underdog for 24 hours." He contended that the Gallup poll, showing Mr. Ford leading by 1 per cent, was incorrectly drawn.

Mr. Carter was forced several times to respond to events back home in Plains, Ga., where a black preacher and activist from Albany, Ga., the Rev. Clennon King, was denied membership in Mr. Carter's Plains Baptist Church.

The church deacons, voting in Mr. Carter's absence, refused to open the church when Mr. King showed up for services, accompanied by reporters that he had alerted.

Disagreement Noted

Mr. Carter said today he disagrees with the deacons, but that he would not quit the church.

"I can't resign from the human race because there's discrimination," he said. "I can't resign from America because there's discrimination. I can't resign from my church because there's discrimination."

"This is not my church. It's God's church," he added.

He said he thought the attempt to integrate the Plains Baptist Church was "partially, at least, politically motivated." But he said he did not have enough details of the incident to say firmly what brough it about.

The Democratic vice-presidential candidate, Sen. Walter Mondale, said in Philadelphia today that those predicting a low voter turnout "are in for the biggest surprise of their lives."

Sen. Mondale arrived in Philadelphia on the second stop in a final seven-city blitz that began in New York City. His final day of campaigning was to culminate in an appearance with Mr. Carter in Flint.

Arriving in Philadelphia, Sen. Mondale was greeted by Mayor Frank Rizzo and Pennsylvania Gov. Milton Shapp, who are involved in a bitter political dispute over an unsuccessful effort to recall Mayor Rizzo. When Mr. Carter campaigned in Philadelphia last week, Mr. Rizzo and Gov. Shapp refused to appear on the same platform.

Dole in Midwest

Sen. Robert Dole was ending his 44-state campaign by stumping in the Midwest farming states, where 75 days earlier he had begun his drive as President Ford's running mate.

The Republican vice-presidential nominee agreed with opinions that the election is "up for grabs," but he told a Peoria, Ill., airport gathering late last night that he was convinced "we will ... Pressed for details, he st doubted any accurate pre could be made.

The weather is expected sunny over most of the c on Election Day, a possible for Mr. Carter.

Pollsters and pundits ha that a normal-to-low t would favor President Fo large turnout, which mi helped by good weather, favor Mr. Carter because the majority party.

Voters tomorrow will choose 33 senators and 435 members, as well as 14 go and thousands of state leg and local officials.

The Republicans are gi chance of overturning Dem majorities in the Hous Senate. Thus, if Mr. Carte the Democrats will be b control of the two branches of the federal g ment for the first time si Nixon captured the White for the Republicans in 19

Washington Post, Neutral Since '52, Endorses Carter

NEW YORK, Nov. 1 (UPI).—Jimmy Carter picked up the endorsement of The Washington Post yesterday, and President Ford, still the clear favorite of most U.S. newspapers, won the backing of the San Francisco Examiner.

A survey by Editor & Publisher, a trade magazine, showed newspapers prefer Mr. Ford by a 3-1 margin over Mr. Carter. But the survey also noted that this was consistent with other years.

The only Democrat to gain the majority of newspaper endorsements in the last 44 years was Lyndon Johnson in 1964.

The Post broke a silence of more than two decades with the support for Mr. Carter. But the newspaper acknowledged its recommendation was "not much of an endorsement." A "reasonable and respectable case" can be made to elect Mr. Ford, The Post said, but "a marginally stronger case can be made" for Mr. Carter. Dwight Eisenhower in 1952 was the last candidate endorsed by The Post. The New York Times has also endorsed Mr. Carter.

Pravda Derides Election 'Hawks'

MOSCOW, Nov. 1 (UPI).—Attacks on the Soviet Union and its Communist allies have continued right to the end of the U.S. presidential race as American "hawks" scramble for votes, the party's daily newspaper, Pravda, said yesterday.

"The manufacture of all sorts of lies of an anti-Soviet and anti-Communist nature continued to the very last days of the election campaign," the newspaper said.

"The hawks of the U.S.A. do not stop at anything in their hunt for votes, regardless of how negative such events in the election marathon can be to the international atmosphere," Pravda added. "But Washington will have to reckon with the actual balance of power in the world and this balance dictates the need of sober thinking."

F-16s Will C Nuclear Ro

News Analysis

Media and Candidates Blame Each Other for Dull Campaign

By Joseph Lelyveld

WASHINGTON, Nov. 1 (NYT). — In a tough and caustically worded summing up of the presidential race on the CBS Evening News the other evening, television commentator Roger Mudd placed the blame for a "rapid and egoistic" campaign squarely on the candidates.

Jimmy Carter, he declared, condemned" the campaign to an useless status" by making trust nd integrity his main themes. esident Ford then met his allenger on that battleground th the result, the CBS reporter ntended, that most voters have feeling as the campaign finally aws to a close that they have en "vaguely cheated."

Whatever most voters feel, the ise of having been cheated, or aving been made to endure a pressing and banal campaign, manifest now in a spate of ress commentaries similar to r. Mudd's. In one sense, it is surprising conclusion. Political urnalists are usually addicted politics as a game and from eir standpoint at least, it is hard put 1976 down as dull.

Rise From Obscurity

After all, this year saw the rise rom obscurity of the first candiate from the Deep South with a hance to win the presidency in nore than a century. It saw an ncumbent President come closer o losing his party's nomination han any other occupant of the White House since Chester Arthur; then, having won it, nally to a point at which an upset comparable in magnitude to Harry Truman's in 1948 seems to e well within the realm of possiility on the eve of the election.

Everyone knows that U.S. olitical campaigns have rarely, f ever, been conducted at the evel of Socratic dialogue, that hey have traditionally been neither ideological nor pragmatic. f the race is still a cliff-hanger, hy is it almost never described s exciting? What explains the ervasive sense of disappointment oiced by the commentators?

A number of politicians and academic students of politics tend o answer these questions by aying that the press is looking n the wrong direction. To dis-over the source of the disappointment and malaise, they suggest, the press might start by ooking into a mirror.

Mr. Carter, in his now-celebrated Playboy magazine interview, pointed to the press section of his airplane in order to assign responsibility for the dearth of serious discussion. "The national news media have absolutely no interest in issues at all," he complained. "There's nobody in the back of this plane who would ask an issue question unless he thought he could trick me into some crazy statement."

Journalists find this an exasperating example of special pleading by the candidates. "Jimmy Carter has really been saying only four or five things all year," John Chancellor of NBC remarked the other day. But in the academic community, the candidate's complaint is not lightly dismissed.

Premium on Pithy

The candidates, it is argued, have to adapt themselves to the structure of the communications system. The electronic era, so the argument goes, puts a premium on pithy 25-second answers and, as a result, there is a built-in tendency to downplay substantive political differences.

Thomas Patterson of Syracuse University, co-author of a study of the television presentation of the 1972 campaign, argues that the press this year has paid more attention to the tactical adjustments candidates make in their campaign themes than to the basic themes themselves.

"The candidates are always cast as manipulative," he said. "What people see and read about from day to day are all of these minor tactical moves. The effect is to make the candidates look very much alike, to make people think, 'These two aren't very different. They'd do the same thing. Where's the choice?' "

Political journalists retort that they merely cover what is there, that candidates really are manipulative. But Michael Robinson of Catholic University here contends that "the candidates are more captured by the media than the media are captured by the candidates."

Hounded for Specifics

The campaign has been "overmediated," he asserts. Candidates are hounded by the press for "specifics" but at the same time they know, he went on, that anything they say is likely to be dismissed as politically motivated, or worse, inconsistent. Under this constant media pressure and scrutiny, Mr. Robinson concludes, the candidates are "scared to say anything."

"Myth busting is part of your game," declared James David Barber of Duke University, who cited the "bizarre blowing up of crazy little things", such as Mr. Carter's "ethnic purity" statement last spring or his comments on "lust" in Playboy, as one of the more puzzling features of the campaign.

It is a view that was regularly heard this fall from voters too. Protests over bias in the press have been fewer this year than in any recent presidential election. But there has been a certain amount of impatience with the attention paid to the blunders of the candidates, a sense that the press was carping and magnifying trivia.

"I just think the media should lay off a little," said Barbara Nordeen, a Carter supporter in a Seattle suburb. "The media always pick up one or two things. I wonder what would happen if the media stayed out of it?"

But how much disappointment in the campaign is there really? In the final New York Times-CBS poll, voters were asked if they found this campaign more interesting than that of 1972. Sixty-seven per cent said they did. Warren Miller of the University of Michigan's Center for Political Studies said that his survey data indicate that interest in this election is higher than it was four years ago.

Jaded Commentators

These findings may seem surprising, but the disenchantment that can be traced in the electorate seems to go deeper than the disenchantment that is now being voiced by commentators who may be jaded and weary after the year-long campaign. The commentators are merely disappointed in this year's candidates. The voters are worried and sometimes downright cynical, but it is the functioning of the system itself that seems to be on their minds, not the campaign.

Mr. Miller notes that cynics as well as optimists vote. So perhaps the question of whether it was the "media" or the candidates that "trivialized" this campaign distracts attention from the real story, which may be that the first election after the end of the Vietnam war and the Watergate affair is proving to be a real contest and a successful political exercise.

For all the supposed failures of the press, the Times-CBS poll indicated that voters generally have a clear sense of the differences on issues between the candidates. Maybe the debates served their purpose, after all, although they too have been put down as disappointing.

"I think there will be a lot of rational voting going on out there," commented Walter Dean Burnham of the Massachusetts Institute of Technology. "By and large, people do acquire political information rather more freely and use it better than the conventional wisdom would have you think."

United Press International.

REACHING—Democratic candidate Jimmy Carter (lower left) is swamped by well-wishers as he shakes hands after addressing large San Francisco rally on Sunday.

Under Pressures of the Race

Carter Admits to a Loss of Candor

By James T. Wooten

ST. LOUIS, Nov. 1 (NYT).— Nearly two years after it began, Jimmy Carter looked back on a grueling presidential campaign that he said had taken from him much of the candor that was a hallmark of his early success.

"I'm less open now, I know," he said last week aboard his chartered plane. "I don't like it, but I realize it's true. It's just—it's just that I feel so much more vulnerable now than when I started.

"It doesn't imply dishonesty," he added quickly. "It just means that the more successful you are in national politics, the more importance is ascribed to what you say—and the more caution you must use."

That seemed a significant concession from a candidate who had stressed frankness as an essential element of his campaign. The 52-year-old Democratic nominee said it was the only substantive change wrought in him by his 98-week run for the White House.

Long, Studied Pauses

He spoke quietly, choosing his words carefully and punctuating his sentences with long, studied pauses as though even a candid discussion of the loss of candor posed a problem in itself.

"It's unfortunate," he concluded. "I regret it, but under the circumstances, maybe it was inevitable."

He was remembering, no doubt, the storms that had spasmodically mired his campaign in a succession of apologies, retractions, regrets and explanations—from his advocacy of "ethnic purity" in urban neighborhoods to his earthy discussion of sex and lust in an interview with Playboy magazine.

He was surprised, he said, by the furor those incidents and others had stirred, just as he was surprised by the "quick success of our primary campaign" and the "relative ease with which we won the nomination."

But the biggest surprise of the campaign, he said, was the public's response to his religious views.

"I never would have thought they would have been the cause of so much concern," the Southern Baptist said, shaking his head. "So many analysts, so many stories, so many questions, so many expressions of doubt and skepticism—and occasionally ridicule. It really amazed me, and sometimes it hurt a little."

But that lesson is not among those he likes to tell his audiences that he has learned from the months and miles that lay behind him in his pursuit of the White House—and, characteristically, as he discussed his campaign in his office-like quarters aboard the plane, he turned to what he considered to be more pleasant recollections.

He began his campaign, he said, believing that "the country had been severely wounded by what had happened to it in the past few years—the Watergate thing, the war, and all the rest of it." So, he continued, he focused his comments on those scars, using them as rhetorical pegs, building his speeches on them from day to day.

"But I'll tell you the most important thing I learned from all this," he said. "I found out that although I was absolutely right about the hurt that was there—it didn't take a genius to see that—there was something more. The people, it seemed to me, were saying they wanted to take one more chance on the politicians and the government.

"I found out that they didn't want to quit even though it was awfully hard for them to understand how all of that could have happened to them and to the country, and that became a very important part of my campaign. I'll say quite frankly, it was often a source of strength to me when things weren't looking so good.

'Want to Vote'

"That's why I'm not ready to believe that the voting is going to be as light as the polls seem to be saying. I know what it sounds like to say this, but I really do believe the American people want to participate, want to vote, and I really do believe they will."

Mr. Carter said that he viewed his campaign as an invaluable "learning process."

He said he had substantially expanded his knowledge about how the government works "or doesn't work" from his travels and his conversations with "thousands and thousands—literally thousands" of Americans. "I remember once an elderly man in Iowa—I think it was Iowa—who asked me a question about Social Security," he said. "I just didn't know the answer. It wasn't a question about what we ought to do about senior citizens or the whole system or anything like that. It was just a simple question about how Social Security would work under some given circumstance.

"I had to tell him I didn't know—but then the first thing I did was find out. And I wrote him a note explaining it. That's what I mean about an education."

Preparation for Debates

Similarly, he said, he found his preparations for the three debates with President Ford to be valuable and enlightening.

"I had to be ready for any question, you understand. I didn't want to be embarrassed . . . So I filled myself—just stuffed myself—with facts and names and policies and history. If somebody had asked me a question about the Kurds, I could have answered it. Or if they had asked me about Eritrea, I could have told them something about that, too."

But not long ago when a friend asked him if he would do it again, Mr. Carter thought of his long quest and shook his head. "No, no way!" he said.

U.S. to Aid Probe Of Jetliner Crash

BRIDGETOWN, Barbados, Nov. 1 (AP).—The United States has officially accepted an invitation from the Barbados government to participate in an investigation of a Cuban jetliner crash in which 73 persons died.

A government spokesman said the acceptance did not reach the Foreign Ministry until late Thursday, after the commission had begun deliberations in a Bridgetown courthouse.

Because of the late arrival, U.S. representatives Martyn Clarke of the National Transportation Safety Board and Warren Stephens of the Douglas Aircraft Corp. were at the opening session only as observers.

Colorado Question Would Put All Tax Increases to Voters

By William Endicott

DENVER, Nov. 1. — A ballot question that is perhaps the ultimate in tax protests will confront Colorado voters when they go to the polls tomorrow.

Largely because of it, the voter apathy reported elsewhere in the United States is notably absent here. Officials are predicting a turnout of more than 75 per cent.

The measure would require "registered voter approval of all state and local executive or legislative acts which result in new or increased taxes."

What that means is that there could be no tax increase of any kind at any level of government in Colorado without an election.

A key phrase—and the one that is causing the most alarm in city halls, county courthouses and the state capitol—is "registered voter approval."

For a tax of any kind—even parking meter fees—to be raised, it would take not only a majority of those voting but a majority of all the registered voters "within the jurisdictional boundaries of the tax authority."

62,040 Petitions

If, for instance, there were 10,000 voters in a sewer service district that wanted to raise its fee, more than 5,000 affirmative votes would be needed for the increase to pass.

The proposal won a spot on the ballot through the efforts of an ultraconservative taxpayer group called Stop Tax Increases, headed by Denver electrical engineer Thomas Morroni, which circulated petitions to get the required signatures of 62,040 registered voters.

"Our group stands behind that wording because we sincerely believe voter apathy has reached its current levels because no matter who is elected, voter input into how their tax dollars are spent is nonexistent," he said.

Leading the chorus of opposition are local and state officials, including Gov. Richard Lamm, and a coalition of business and labor groups, plus local newspapers and the League of Women Voters.

The league has called the measure "one of the most deceptive and irresponsible amendments ever to appear on a Colorado ballot."

According to newspaper and television polls, the people like the proposed tax measure. It is, they say, favored by more than 60 per cent.

Opponents are planning a last-ditch media blitz in an effort to defeat it, acknowledging that if it does pass it would be virtually impossible to win approval in Colorado of any kind of tax proposal.

Massachusetts Owners Stick To Their Guns

BOSTON, Nov. 1 (AP).—A statewide "domestic disarmament race," a chance for people to surrender their guns with no questions asked, had by today produced a grand total of one rusty revolver.

Promoters of the turn-in drive were becoming convinced that gun owners will probably not give up their weapons unless they are forced to.

The event was meant to publicize a statewide referendum tomorrow on a proposal to bar the ownership of handguns for everyone except police and museums.

The three-day drive began yesterday and will continue through tomorrow.

Labor Plans Its Biggest Drive to Get Out the Vote for Carter

By A.H. Raskin

NEW YORK, Nov. 1 (NYT).— Organized labor has distributed more than 80 million pieces of literature aimed at getting Jimmy Carter into the White House. Its political apparatus has outspent every other interest group. But labor's supreme effort is being reserved for these final hours of the most comprehensive drive in its history to get unionists and their families to the polls.

At a windup meeting in his Washington office last week, George Meany, president of the American Federation of Labor and Congress of Industrial Organizations, urged heads of major union affiliates to have their shop stewards and local officers communicate with every union member on the importance of voting.

The individual appeals are to be made before and after work and during lunch periods at the job site, according to Alexander Barkan, director of the AFL-CIO Committee on Political Education.

'Worried About Apathy'

"The big thing we were worried about from the start of the campaign was apathy," Mr. Barkan said. "We never saw much evidence of pro-Ford sentiment among our people. But now we are convinced that Carter, though not in any dramatic fashion, has the momentum going with him."

As evidence that the Ford election drive has made no dent in the united front of official labor hostility, Mr. Barkan reported that the President's aides had sought to arrange a private meeting with West Coast labor leaders while Mr. Ford was in Oregon last week. The only unionist to show up, he said, was an official of the International Brotherhood of Teamsters, expelled from the AFL-CIO for racket domination in 1957.

"Normally our people at the regional and local level would be flattered at an invitation to meet with the President, no matter what our position on the election," Mr. Barkan said. "But this time they sensed so little support for Ford among their rank and file that they decided it would be better to stay away."

'Substantial Improvement'

Sol Chaikin, president of the International Ladies' Garment Workers' Union, who directed labor's biggest campaign rally, the massing of tens of thousands of workers in New York City's garment center last Wednesday, reported "a substantial improvement" in Mr. Carter's ability to communicate with labor during the campaign.

"I noticed in traveling with him to several Northeast and Southern states that until mid-September, Carter was not coming across clear and sharp in his meetings with union people," Mr. Chaikin said. "But a month or so ago he really began to register."

Similar sentiments were expressed by the heads of a dozen other large unions, several of whom had backed Richard Nixon in 1972. However, few voiced great personal enthusiasm for Mr. Carter. Most of their emphasis was on the importance from labor's viewpoint of defeating President Ford.

UAW in Michigan

The final pre-election issues of union newspapers were largely turned into campaign leaflets. The United Auto Workers, which is concentrating most of its last-minute activity on trying to keep Michigan from sliding into the Ford column, is telling its members that a Carter victory would "return America to the people."

"What we win at the bargaining table, we can lose in Washington," is a principal auto-union theme. To drive home its point, the union cited federal figures to illustrate what happened to bread prices in several years of Republican rule—a climb from 26.2 cents a loaf in 1968 to 46.7 cents last year.

The United Mine Workers declares that "it's time for miners to oust Gerald Ford." The back cover of the union's journal reinforces that admonition with a photograph of a funeral in a mining town. The caption: "Vote as if your life depended on it. Because it does."

A Crisis of Confidence

Allegations Against Koreans Put Strains on Ties With U.S.

By Don Oberdorfer

WASHINGTON, Nov. 1 (WP).—Continuing allegations of South Korean efforts to influence members of Congress and executive branch officials through cash, gifts and campaign contributions are placing new strains on already troubled political relations between the two countries.

If the allegations are capped by indictments and trials—as many expect—the result is likely to be a crisis of confidence affecting one of the world's most dangerous trouble spots.

Senior U.S. diplomats believe there is little they can do at this stage about the Justice Department investigation or newspaper revelations of corrupt relations between Koreans and well-placed Americans. They make no secret of their apprehension, however, that U.S. alliances and the world strategic balance could be gravely affected by the outcome.

More so than any other place in the world, the interests of the United States, the Soviet Union, China and Japan converge at the Korean peninsula.

The 38th Parallel

Backed by 42,000 U.S. troops, U.S. warplanes and atomic weapons, and by the economic interest of nearby Japan, heavily armed South Korea faces, across the 38th parallel, a heavily armed North Korea, which is backed by its neighbors and sponsors, China and the Soviet Union.

After the collapse of Indochina and the U.S. withdrawal from Thailand, South Korea remains the last U.S. military foothold on the Asian mainland. And with major historical and tangible investments at stake and the memories of 33,000 U.S. war dead in the Korean conflict, the United States has reacted fiercely to any hint of military challenge.

Former Secretary of Defense James Schlesinger, backed by President Ford and other high officials, responded to rumbles of trouble in May of last year by saying that the United States would consider using tactical atomic weapons in case of a North Korean ground attack.

When two U.S. Army officers were killed in August by North Korean troops in a Demilitarized Zone incident, the United States deployed a naval task force from the Pacific, F-4 jet fighters from Okinawa, B-52s from Guam and F-111 warplanes from Idaho in a show of force with nuclear implications.

Less stark or dramatic as a military threat but as important in the long run has been the long, slow, steady deterioration of the once-close political ties between the United States and South Korea.

This has been brought about by the increasingly repressive rule of South Korean President Park Chung Hee and the growing reaction to that on the part of the U.S. press, church groups, Congress and the public at large.

As the history of the Vietnam war demonstrates, it is no longer sufficient for an expensive foreign military commitment to have the backing of the White House, Pentagon and State Department. Without the support of Congress and the public, any U.S. alliance is in peril, and without the acquiescence of Congress and the public such foreign policy commitments are not viable.

Embassy Officers

In Washington today, nearly every major embassy employs officers assigned to practice their diplomacy on Capitol Hill rather than at the State Department. Many embassies employ public relations experts or paid consultants to polish their nation's image—and powder the blemishes—for presentation to the U.S. press and public.

The realization of the growing rule of Congress and the public—and the perception that South Korea's position with these groups was steadily eroding—may well have been the motivating factor behind the South Korean campaign now being investigated.

From the Korean point of view, influence-buying follows the lines of familiar practice over many years by Americans and Japanese seeking influence in Seoul. Last year, Gulf Oil chairman Bob Dorsey testified to secretly paying $4 million to the political party of President Park.

Even before the corruption allegations emerged, South Korea was in political trouble here. In a show of displeasure, Congress last year cut military sales credits for Seoul, which could be restored only on the certification by President Ford that human rights conditions were improving. Mr. Ford never so acted.

An attempt to continue the limit on the same issue was defeated in the House in June, 241 to 159, after a major fight. In April, 119 members of both houses signed a letter to Mr. Ford expressing concern about U.S. support for Mr. Park's repressive rule. Last week, 153 members of Congress signed a letter to Mr. Park, protesting the sentencing of prominent dissidents to prison terms.

In the presidential campaign, Democratic candidate Jimmy Carter has charged that South Korea "openly violates human rights." Mr. Ford revealed in a televised debate that he personally had told Mr. Park that "the United States does not condone the kind of repressive measures he has taken."

Mr. Carter has called for the withdrawal of U.S. ground troops from South Korea over a period of four to five years, and immediate withdrawal of U.S. nuclear weapons there.

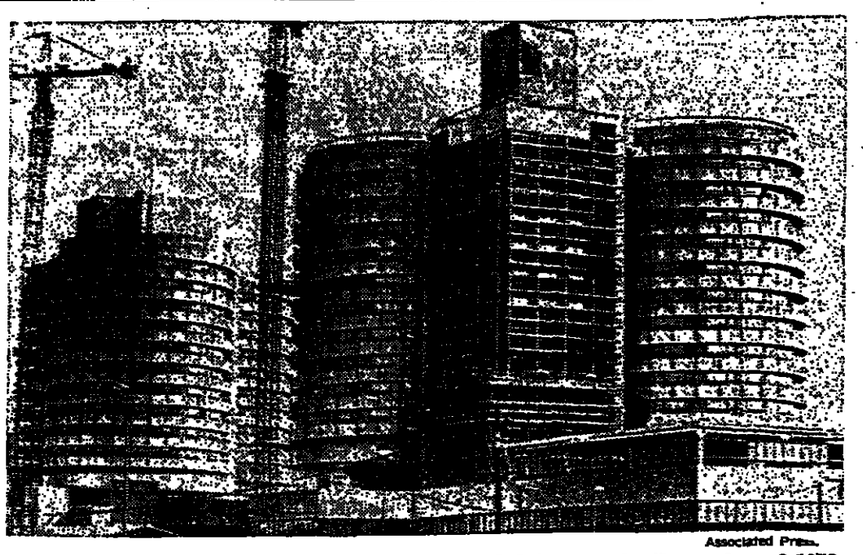
Senior officials in the Ford administration say that they would consider reductions in the U.S. troop strength in Korea from 42,000 to perhaps 20,000 or so, but that withdrawal of all troops could be dangerous. These officials see nothing to be gained from withdrawing the nuclear warheads.

Schools Reopen In Thailand With Police on Guard

BANGKOK, Nov. 1 (UPI).—Thailand's schools, guarded by police with orders to open fire on anti-government demonstrators, opened without incident today for the first time since the Oct. 6 military coup d'état.

Interior Minister Samak Sunthornvej told newsmen: "We have authorized the police and army to shoot immediately" in the event of student demonstrators. "We are under martial law," he said.

Initial reports from provincial centers said troops and police also stood guard at schools outside Bangkok. There were no reports of protests.



Thammasat University, scene of bloody fighting between students and police hours before the military take-over, remained closed. Officials have said repairs are necessary to buildings damaged by police gunfire.

Because of the military take-over, school courses have been changed to bar the teaching of all courses on politics, including democratic theory.

Soviet Court Gives Death to Collaborator

MOSCOW, Nov. 1 (UPI).—A military tribunal today sentenced a Soviet citizen, A.I. Sukhachev, to death by firing squad after hearing evidence that he killed up to 30 persons a day while working for the Nazis in World War II, Tass said. The audience in the courtroom cheered the sentence.

The official press agency said Sukhachev had been chief of two Gestapo prisons, at Rosiavl and Bobruysk, during the German occupation of parts of Soviet territory.

Associated Press.

WORLD'S MOST MODERN HOSPITAL—Scheduled to open in the spring of 1978, the Muenster, West Germany, complex will provide 1,200 beds. Each circular tower will have twelve rooms to a floor The cost will be 700 million marks ($292 million).

Guerrilla Leaders at Rites

IRA Buries Maire Drumm in Ulster

BELFAST, Nov. 1 (Reuters).—The Provisional IRA today buried one of its heroines. The largest military-style Republican funeral ever seen in the British-run province was attended by guerrilla leaders from both sides of the Irish border.

Thousands of Republicans, some dressed in IRA uniforms, blocked the main road to West Belfast's Milltown Cemetery, where guerrillas killed by British forces are buried, for the funeral procession of Mrs. Maire Drumm, 56. She was murdered last week in a Catholic hospital where she was a patient.

An IRA party fired a volley over her coffin after a funeral oration.

Mrs. Drumm, dedicated to driving the British out of Northern Ireland, was called "grandma venom" by British troops for her speeches and support of a reunited Ireland.

Protestants Blamed

Republicans and police blamed extremist Protestant paramilitary gunmen for the point-blank killing of Mrs. Drumm, who retired because of ill health last month as vice-president of Provisional Sinn Fein, the legal political arm of the IRA.

More than a thousand mourners, including her daughter, released on compassionate parole from an eight-year jail sentence for carrying a gun, thronged a Catholic church in the IRA stronghold of Andersonstown, where she lived, for the requiem mass.

Thousands more joined the funeral procession along the Republican Falls Road from which soldiers and police were noticeably absent.

Lament Played

All stores and businesses in the area were closed as the hearse bearing her coffin, covered by the Irish tricolor, entered the cemetery flanked by youths and girls wearing the black berets of the IRA.

Pipers playing a lament led groups of wreath-bearers carrying several hundred floral tributes from IRA battalions, including one inscribed from the Republican movement in Australia, and another from supporters in West Berlin.

An army helicopter hovered over the procession and circled the cemetery. Observers said prominent IRA leaders, such as Seamus Twomey, reputed IRA chief of staff, and the former Belfast brigade commander, Joe Cahill, as well as the president of Provisional Sinn Fein, Rory O'Brady, had come to the funeral but were keeping under cover.

Mrs. Drumm's husband, Jimmy, has served 13 years in prison for IRA activities and a son was interned for three years.

After the funeral, a crowd of several hundred stoned the nearby Andersonstown army and police barracks.

Stoph Reaffirms Links to Kremlin

BERLIN, Nov. 1 (Reuters).—East Germany is "forever and irrevocably" allied to the Soviet Union, Premier Willi Stoph told parliament here today.

Presenting his 30-man Cabinet and his government program, Mr. Stoph said, "The deepening and broadening of the close friendship with the Soviet Union will continue to be at the center of the Ministerial Council's foreign policy."

Mr. Stoph was head of state until Friday when parliament elected him Premier and party chief Erich Honecker head of state.

Four European Socialists Urge Unity in the Portuguese Party

LISBON, Nov. 1 (UPI).—Four West European Socialist leaders threw their weight behind the minority government of Premier Mario Soares today and emphasized the importance of outside aid for Portugal's nascent democracy.

"It is now that Europe has the historic task of not leaving Portugal alone; Europe needs Portugal," West Germany's Willy Brandt told Portuguese Socialists. "I can confirm that our friends in the West German government will continue to support you."

France's François Mitterrand urged the Socialists here to translate their words into action while Austria's Bruno Kreisky declared that "We Socialists do not fight against a dictatorship to give in to another."

Sweden's Olof Palme emphasized the need for Socialist solidarity throughout Europe.

The four leaders spoke on the final day of the Socialist party's national congress staged by Mr. Soares to garner support for his moderate wing against threats from the party's Marxist faction led by Agriculture Minister Antonio Lopes Cardoso.

The arrival and speeches of the European Socialist leaders appeared to have turned a retreat by Mr. Cardoso's supporters into a full rout.

Motions passed in the congress and the composition of party committees formed showed a distinct bias for Mr. Soares's leadership. The motions approving Mr. Soares's policies passed unanimously, with only a few abstentions, while every committee approved by the 1,200 delegates gave the moderates a 2-to-1 edge over the Marxists.

Mr. Soares's hand was further strengthened when four technocrats in his Cabinet announced a decision to join the party.

Throughout the three-day congress, the Premier and his supporters stressed the need for total Socialist support for the government's policies, saying that dissension might lead to its ouster.

The four European leaders led a list of more than 150 Socialist observers from 55 nations, including groups from three of Portugal's former African colonies.

Trains Again Link North, South Vietnam

SINGAPORE, Nov. 1 (Reuters).—Hanoi radio today reported the resumption of railway traffic between what were formerly North and South Vietnam.

The radio said that Saturday the first train to cross the old 17th-parallel dividing line between the two parts of Vietnam left the district of Tien An, just inside northern Vietnam, for Danang, once the biggest U.S. base in Southern Vietnam.

Trans-Alaska Pipeline Cut to Save Men Inside

ISABEL CAMP, Alaska, Nov. 1 (Reuters).—Two cuts were made in the trans-Alaska oil pipeline to rescue two workers lost inside the frozen pipe for several hours.

The two men, Jim Goff and Bob Gibson, were welding inside the pipeline last week when the machine on which they traveled lost power and radio contact.

Danish Age of Consent

COPENHAGEN, Nov. 1 (Reuters).—The age of consent for Danes was lowered from 20 to 18 today.

Buses in Madrid Due to Stay Out Till 8 Are Free

MADRID, Nov. 1 (UPI).—Madrid bus workers decided today to continue their five-day-old strike until police release eight of their colleagues arrested as alleged leaders of the walkout.

In a meeting in a suburban park, thousands of strikers also demanded that 33 bus workers fired as alleged agitators be reinstated in their jobs. They also want the municipal bus company to recognize their elected representatives—all of them members of outlawed Socialist or Communist labor unions—as the only bargaining body.

The company has said that it can only negotiate with the legal representatives of labor, a bargaining committee picked under the Franco-era trade union system.

Soldiers and police continued to drive the buses.

The 7,000 striking drivers, conductors and mechanics walked out after the breakdown of negotiations on demands for a pay increase, fringe benefits and labor union freedom.

$1.2 Million Stolen From Italian Bank

MONZA, Italy, Nov. 1 (AP).—Thieves cut their way into the underground vault of a bank in this Milan suburb and made off with possibly as much as one billion lire ($1.2 million) in cash and valuables, police reported today.

The thieves brought sandwiches with them but jimmied open a vending machine in the bank to get hot coffee. Investigators said that the theft occurred last night at a branch of the Banca Commerciale di Monza, but was discovered this morning.

Japan Prices Rise

TOKYO, Oct. 31 (AP-DJ).—Japanese consumer prices in September rose 2.7 per cent from August and 9.7 per cent from the like year-earlier month, with the consumer price index at 111.7 (1975 equals 100), the prime minister's statistics office said in a final report.

News Analysis

Bonn Troubled by a Feeling Of Isolation in West Europe

By Michael Getler

BONN, Nov. 1 (WP).—Twice in recent weeks, West Germany's leaders have received unsettling reminders of what many people here consider to be the country's most troubling problem: the steadily growing gap—economically, militarily and even ideologically—between West Germany and the rest of Western Europe.

Since the end of World War II, Bonn has sought to link West German policy to a united Europe, in which West Germany's head would not stick up as obviously as it did during its troubled prewar and wartime past.

To an increasing extent, however, the West Germans now seem to look toward the United States as the only place where they see both relative stability and compatibility.

The reminders of their being "different" came first from the French, who officially notified Bonn earlier this month that by the end of next year France would withdraw 10,000 troops from its 60,000-man West German garrison.

Latest Troubles

Then came the latest round of troubles for the British pound and Prime Minister James Callaghan's suggestion in a television interview that unless his country's severe financial strains are relieved, Britain might be forced to review its continuing support of the 55,000-man Army of the Rhine.

Officially, the Bonn government is taking both moves calmly. The French withdrawal does not hurt much militarily, and the British suggestion is taken much more as a pressure tactic for getting more financial aid rather than a serious threat to reduce forces on NATO's front line with Eastern Europe.

Mark's Power

Since January, the powerful deutsche mark was increased in value by 9 per cent over the dollar, 21 per cent over the French franc and 38 per cent over the British pound and Italian lira. It has also just been revalued upward within a group of smaller European currencies.

Normally, this kind of dramatic increase would be expected to make West German goods much more expensive in other countries and thus reduce Bonn's booming export business.

The latest statistics, however, show a sharp increase in West German exports last month over the previous month and over the same month a year ago.

Some economists argue the mark is still undervalued.

In this view, West Germany's impressive record of holding down inflation to 4 per cent, the lowest rate in five years, still gives West German products a competitive edge in countries like France, where the inflation rate is more than double, and in Britain and Italy, where inflation runs at least three times the West German rate.

Productivity Myth

The idea that West German workers are more productive than their British or Italian counterparts is viewed here as a myth. Rather, many West German officials and executives view the problem in both those countries as one of inefficient management and government.

Thus, on both sides of the politicial aisle, there is a sense of foreboding about Britain's economic and political future that in turn increases a sense of isolation that seems to be creeping into the West German consciousness.

To the south, Italy has a powerful Communist minority. To the west, the French government faces a growing challenge from a Socialist-Communist common front.

Yet, West Germany is growing more conservative.

The left-liberal coalition government of Chancellor Helmut Schmidt retained power in national elections here Oct. 3 but it did so by only eight seats—the narrowest majority in postwar history. Had Mr. Schmidt himself not been on the conservative side of his Social Democratic party, there is little doubt that his coalition would have lost.

Fighting Force

Militarily, Bonn's armed forces of 495,000 are the largest and, aside from the Americans, the best equipped conventional fighting force in Western Europe.

Reductions in other allied Western European forces, made unilaterally and outside any joint East-West troop-cut talks with the Soviet-led Warsaw Pact, would undoubtedly lead to pressures, perhaps from the United States, for the West Germans to increase their forces.

Bonn clearly does not want to do that.

Any cuts here would hurt, the West Germans are convinced. They could no doubt make it easier for other smaller nations, such as the Netherlands, faced with tough financial burdens, to decide on unilateral troop cuts.

As in other fields, it would make the West German contribution all the more obvious.

Brezhnev Will Visit Tito in Yugoslavia

BELGRADE, Nov. 1 (Reuters).—Soviet Communist party chief Leonid Brezhnev will visit Yugoslavia this month at the invitation of President Tito, the official news agency Tanjug said today.

Diplomatic sources said that Mr. Brezhnev was expected to arrive Nov. 16 and stay several days, meeting Marshal Tito at a country house at Belje, in the north.

U.K. Fireflies Confused on Sex Symbols

LONDON, Nov. 1 (Reute—Britain's urban lighting night is playing havoc w the sex life of glowworms naturalist warns.

Anthony Wooton, profe the country's foremost gl worm expert, said the fem fireflies are dying out beca the males are mistaking glow of electric bulbs as mating signal of their fem companions.

He said that the male exhausts his energies by sig ing the wrong kind of li Mr. Wooton is the only m in the country known to be glowworms in captivity.

Two Indian Papers Criticize Delay in National Elections

NEW DELHI, Nov. 1 (UPI).—Two Indian newspapers today criticized the government's decision to postpone parliamentary elections for at least one more year.

The Indian Express and the Patriot were the only newspapers circulated in New Delhi to comment editorially on the announcement, made Saturday.

The Express said the move "will be widely regretted," and Patriot called Law Minister I Gokhale's explanation to Pa ment of the necessity for delay "a clumsy job."

Prime Minister Indira Gan government declared a nation state of emergency in June, and under emergency rule poned parliamentary election last March for a year.

The new postponement keep the current Parliament ting for at least seven year stead of the normal five. Gokhale did not say that would be elections in 1978 he said they would not be before then.

Government's Rights

"No one can question the of the government to deal threats to law and order whatever quarter they may co the Express, India's largest culation paper, said in its e rial.

"But after 16 months of a gency, the question is whe the time has not come to re most of the democratic lib that have remained suspe and whose continued suspe is affecting the country's national image."

The Patriot, whose views coincide with those of the Moscow Communist party India, said elections are n to hold accountable the repr tatives of the people.

The party has announce opposition to the govern action.

Many observers expect the ernment will also postpone tions scheduled next year i of India's 22 states.

Paper Wins in Court

NEW DELHI, Nov. 1 (Reut —The Indian Express today ed a temporary court order venting the Delhi municip from selling off its property recovery of alleged property arrears.

The newspaper alleged in c today that the municipality's tion was intended to "over and terrorize" it.

UN Protests Iran's Role in Defector Case

GENEVA, Nov. 1 (NYT).—The Office of the UN High Commissioner for Refugees today protested Iran's recent return to the Soviet Union of a pilot, Lt. Valentin Zasimov, who defected and sought political asylum in the United States.

The protest note was delivered to Iran's diplomatic mission here. In the note, the commissioner, Prince Sadruddin Aga Khan, said he "deeply regretted" that in the Zasimov case the Iranian government had been unable to comply with the 1951 Convention on the Status of Refugees.

Iran is a party to the convention, which was drafted by a conference called by the UN. The convention stipulates:

"No contracting state shall expel or return a refugee threatened on account of his race, religion, nationality, membership in a particular social group or political opinion."

Lt. Zasimov was alone on an internal mail flight when he defected six weeks ago by crossing into Iran and landing his single-engine plane at the northwestern town of Ahar.

Plea Is Rejected

Tehran announced Oct. 23 that it was denying his request for asylum and was returning the defector to the Soviet Union because of a 1973 Soviet-Iranian treaty against hijacking.

But experts here on refugee matters reject the Iranian argument. They say that Lt. Zasimov's diversion of his plane to seek refuge was not a hijacking as defined by international conventions and that no lives were endangered.

The experts doubt that Iran was obligated to return the defecting pilot under the bilateral agreement with Moscow. In any event, they say, the UN convention takes precedence over any bilateral accord.

The experts say Lt. Zasimov might have been tried by Iran for the theft of the plane but he should not have been returned to the Soviet Union.

The lodging of a formal protest with a government for its treatment of refugees represents strong action on the part of the high commissioner's office. The last protest was made two years ago, when the Argentine government was rebuked for returning two Chilean refugees and a Uruguayan exile to the home countries that they had fled.

Two Hanoi Aides Arrive in France

PARIS, Nov. 1 (AP).—Two senior North Vietnamese officials arrived today on the first such official visit to France since their country in 1954 won an eight-year war for independence from the French.

Nguyen Co Thach, deputy minister of foreign affairs, was accompanied by Mai Van Bo, who has long been Hanoi's semi-official representative here. Their stated purpose is to hold five days of talks on normalising relations, the possibility of French investment in their country and compensation for nationalised French firms.

North Vietnam has denied a French news agency report from Hanoi that the two officials will open the planned negotiations with the United States over U.S. demands for information on servicemen missing in action and Hanoi's claims for war reparations.

C.D. Chamberli 82, Dead; Pilot Flew the Atlanti

SHELTON, Conn., Nov. 1 (—Clarence D. Chamberlin, 82, first U.S. pilot to fly a passe across the Atlantic, died yester after a long illness.

Mr. Chamberlin made his fli from Long Island, N.Y., to G many two weeks after Cha Lindbergh's pioneering solo fli to Paris in 1927.

On April 14 of that year, Chamberlin and flying compan Bert Acosta set an aviation durance record, keeping th Wright-Bellanca monoplane a for 51 hours 11 minutes 20 seco over Long Island.

On June 4, Mr. Chamberlin out for Europe in the same sing engine plane, carrying Char Levine, a New York businessm During the 43-hour journey, Chamberlin was at the contr of his plane, the Miss Columb for all but a few minutes. was aiming for Berlin, but h ran out 100 miles short of goal and he landed in Eisleb The 3,911-mile flight set a worl nonstop distance record. June 7, he continued on to Berl

Mr. Chamberlin, who had be a lieutenant in the Army A Service during World War I, w in the real estate business in lat years but continued to work designs for flying boats and ai craft engines. He was induct into the Aviation Hall of Fam last year.

The Man Who Wants To Leave 'Footprints' On the Moon

By Judith Martin

WASHINGTON (WP)—It was definitely not that the Ex-story Moon-Probe Lunacycle ed servicing. "Maud," as the s of the Air and Space eum's art gallery is known, is perfectly well.

It is guaranteed to work for- or until next week, which- comes first," said the in- or, Rowland Emett.

he technological wonder was ming as no real piece of e equipment has. "Moon is," is what Emett calls the . Prof. Leo Capricorn, H.O, ps the pedals. Oxygen" is ped to him and to the cat back—an animal which is a pet, but a scientific in- ment; cats always "land" on feet, and this one is drop- to indicate which way up gravity"—at the rate of "two pfuls per professor to one pful per puss."

n extra pair of shoes goes nically up and down. This necessary, Emett explained, measuring "one small step one giant step," and also leaving the obligatory foot- on the moon—you absolute- must leave a footprint, you w."

and Mrs. Emett, who live Brighton, England, in Wild se Cottage, were paying a al call to the museum the r day. Emett, a former ar- nist for Punch who went e-dimensional with his satir- l drawings of machines, is resented in several U.S. muse- s.

Museums have been clamoring them," he said. "Did you r hear a museum clamor?"

he Featherstone Kite Open- rk Basket-Weave Gentleman's

Rowland Emett with his Lunacycle, driven by "Prof. Leo Capricorn, H.O," at the Air and Space Museum in Washington, D. C.

WP.

Flying Machine Mark II is in Cleveland now; the veteran car of the future, which has Chippendale wind screens, is in Chicago; the Forget-Me-Not elephant computer is in Philadelphia, and six trains, including the Far Tottering and Oyster Creek Railway, are in Ontario, Canada.

"I'm so glad they've all found good homes where they get a saucer of milk every day," he said.

Mrs. Emett confirmed that they are also glad to have them out of the house, although parts of the house tend to go with them. "That's my beautiful lamp shade," she said, pointing to the top of the Lunacycle. "There's my jelly mold."

"Every time I finish one, the house has to be done over," he said.

Emett was asked why he switched from cartooning, and he said, "Money." He was asked what he gets for each machine, and he said, "Headaches."

The Lunacycle has attracted great attention from tourists at the Air and Space Museum. Most of them want to know which mission it was on. "I tell them, 'Apollo 18,'" said museum director Michael Collins.

Perhaps Emett's most famous work is the machinery he did for the film "Chitty-Chitty Bang-Bang," but he expects to paper the world with a new wall-covering to be sold so that his designs may be applied directly on the house. "No rumpus room across the States will be safe."

There are also plans for an Emett Kit, consisting of "plastic goodies and a small electric motor, which a child can clip together to make an Emett, or up to four machines of his own." sort of an offbeat model airplane kit.

What is he working on now? "Why, I'm working on a holiday."

Although he was a friend of the late Rube Goldberg's, Emett claims to be alone in his field. "He did chain reactions: mine are parodies of real machines."

But why don't other people satirize technology like that? "I expect they don't have the heart to."

ON THE ARTS AGENDA

The fifth Festival de Lille, ida runs through Dec. 7 in French city, includes per- mances by the Virtuosi di ma on Nov. 4 and 5 and the colo Teatro Musicale of Rome, h works by Cimarosa, Monte- di and Pergolesi, on Nov. 3 d 6; the Dave Brubeck Quar- on Nov. 8; the Alban Berg artet of Vienna on Nov. 13 d 14; the Ensemble Vocal et strumental of Lausanne, under chel Corboz, with Monteverdi d Bach programs, Nov. 20 and and concerts by the Lille lharmonic, with Jean-Claude sadesis conducting a contem- porary program, and the Philharmonica Hungarica under Reinhard Peters. The closing concert will be devoted to works for percussion, featuring Sylvio Gualda.

* * *

Igor Stravinsky's autograph manuscript of the full score of "Agon," commissioned by the New York City Ballet and first performed in concert and stage performances in 1957, will be sold Nov. 8 by Sotheby Parke Bernet in London. Sotheby's says it is estimating a price of £40,000-£50,000 for the 98-page manuscript.

'Pimple-Faced Kids'—Can Anyone Help?

By Richard Flaste

NEW YORK (NYT)—Acne is a malevolent disease that can scar—both physically and emotionally—the waning years of childhood. Yet it is often trivialized. Adults manage to screen off the pain of their own teen-age years, so that the self-disdain that was rampant then emerges now only as a certain repugnance associated with the word, acne, and occasional scornful references to "pimple-faced kids." But to be of any assistance to children with acne, a parent has to be both understanding of how disturbing the disease can be and it's also helpful to be aware of new thinking that debunks a lot of the old myths about such things as diet and face-washing.

Talking about how emotionally painful acne often is, Dr. Arnold Rachman, a psychologist who works with teen-agers, described it as "a dramatic symptom of the body identity crisis that adolescents go through—they're in a container that seems to be out of whack."

He said parents could aid youngsters having a hard time of it by sharing with them in conversation what has already been shared with them genetically—acne is believed to have a hereditary link—and talk about those uncomfortable memories.

Another move he supports is taking the child to a dermatologist. Dr. Rachman asserts that taking a child for treatment will at least show the child that the parents are working on his side.

Doctors

Moreover, it appears that dermatologists truly can be helpful, using treatments that were either unknown or rare in the teen-age years of today's parents. Dermatologists say that they can reduce the disease in most cases to a level that leaves a teen-ager unembarrassed to do the things that are important to him, such as going to parties.

But acne remains incurable. It is initiated by increased glandular activity that produces oils that become trapped when the pores are clogged by dead cells combining with the oil beneath the skin. Bacteria act upon the oil and release an irritant that causes the inflammation.

Dermatologists attempt to keep "the fires burning low," as Dr. Albert Kligman, professor of dermatology at the University of Pennsylvania, put it, by using antibacterial agents that seep beneath the skin or Vitamin A acid, which prevents the formation of blocked pores. In more serious instances, they administer antibiotics orally (antibiotics that can be used on the surface of the skin have not yet been approved by the Food and Drug Administration). And in the worst cases, some doctors will attempt to peel the skin mechanically to unplug the pores.

What they will not do, in most cases, is advise that the teen-ager relinquish chocolate, French fries or anything else that's greasy or sweet.

No Evidence

It's not that they're especially in favor of teen-agers devouring fats and sugar. And if a youngster comes to Dr. Nancy Esterly, director of pediatric dermatology at Michael Reese Hospital in Chicago, determined never to drink another cola, that's fine with her.

But, she said, "I don't think it's fair to prohibit children from eating what they want to without solid evidence that it does the damage, and so far there's no evidence that shows such things as chocolate bars cause acne."

Nor, according to the dermatologists, do emotional problems—except that a youngster who is tense about his face may press it and pick at it all the time, which could spread the irritation.

Dirt does not cause acne either. It does not even cause blackheads to be black; that seems to be more a reaction to exposure to the air than anything else.

Continuous washing—more than the recommended two times a day—can, in fact, do more harm than good since it irritates the already assaulted face.

Harmful Creams

Greasy preparations, the dermatologists say, such as some cosmetics and cleansing creams, can be harmful in that they would accelerate the plugging of the pores.

Most of the skin experts see nothing wrong with the judicious use of over-the-counter acne products. Dr. Alan Shalita, head of the division of dermatology at Downstate Medical Center, said that "Clearisil and the like have a place. They provide cover and do speed up the drying of lesions that are present; they do heal."

What can be a problem, however, is the overuse of these medications—yet another way to irritate the skin.

The zealousness with which teen-agers tend to attack their faces, as if attempting to defeat the acne by brute force, is one of the things that disturbs Dr. Kligman most.

He said that sometimes a doctor's first attempt at treatment is to just leave the battered face alone for a while—call a truce.

Then proceed gently. "I tell the youngsters," he said, "that you've got to caress your face."

Chicago Museum Trustees Accused

CHICAGO, Nov. 1 (AP).—The Illinois attorney general says the trustees of a medieval art museum have violated its charter, squandered its collection and siphoned off funds in the form of high salaries.

Attorney General William Scott said at a news conference that he is suing to prevent the trustees from auctioning off a rare collection of antique musical instruments.

The George F. Harding Museum, which houses a $25-million collection of art, medieval armor as well as the instruments, was established as a tax-exempt corporation by George F. Harding jr., a local real-estate magnate who died in 1939. Its charter stipulated that it must remain open to the public.

Since the collection was moved in 1965, Mr. Scott charged, it has been viewed by only a handful of persons who must first get appointments. Mr. Scott contends that the arrangement violates terms of the charter.

Mr. Scott said he received a petition signed by 108 members of the Chicago Symphony Orchestra complaining that the trustees intend to auction off the instrument collection at the New York firm of Sotheby Parke Bernet. He said the trustees recently auctioned off a Delacroix painting for $135,000.

ENTERTAINMENT IN NEW YORK

NEW YORK, Nov. 1 (IHT).—This is how critics for The New York Times rate new films and stage productions:

Films

"Solaris," a Russian science-fiction film directed by Andrei Tarkovsky, "is a parable about the nature of mankind," according to Richard Eder. There is a "general visual poverty" about this film, but that "is irrelevant, what matters is the conversations." Set in some future time, Solaris is a planet that appears to be a vast sea, but may be a superior consciousness, a great brain. On a space station near the planet scientists have been mentally shattered by some strange force; the problem is whether to destroy Solaris. The version allowed out of the Soviet Union is half its original four hours, and despite "a slow rhythm, difficult dialogue and a certain didacticism," Mr. Tarkovsky has created "an extraordinary film of great metaphors. Like his Solarian sea, he has made ideas walk, breathe and move us."

"The Marquise of O...." Eric Rohmer's German-language version of Heinrich von Kleist's 19th-century short story, "is a dazzling testament to the civilizing effects of several different arts," Vincent Canby says, "witty, joyous and so beautiful to look at that it must seem initially suspect." It's the story of a widow in an Italian town who is saved by a Russian officer from a brutal rape by Russian soldiers. But she becomes pregnant; it seems that the officer, after saving her, drugged her and took advantage of her. In the end, the Marquise consents to marry the officer. One of the reasons the film is so successful "is that Rohmer shares with Kleist an appreciation of the most benign sort of irony." The German actors "perform with the kind of grace I associate with stylish Restoration comedy," Canby says. "One of the things that makes this film much more than simply likable is an awareness that their feelings are earnestly sincere."

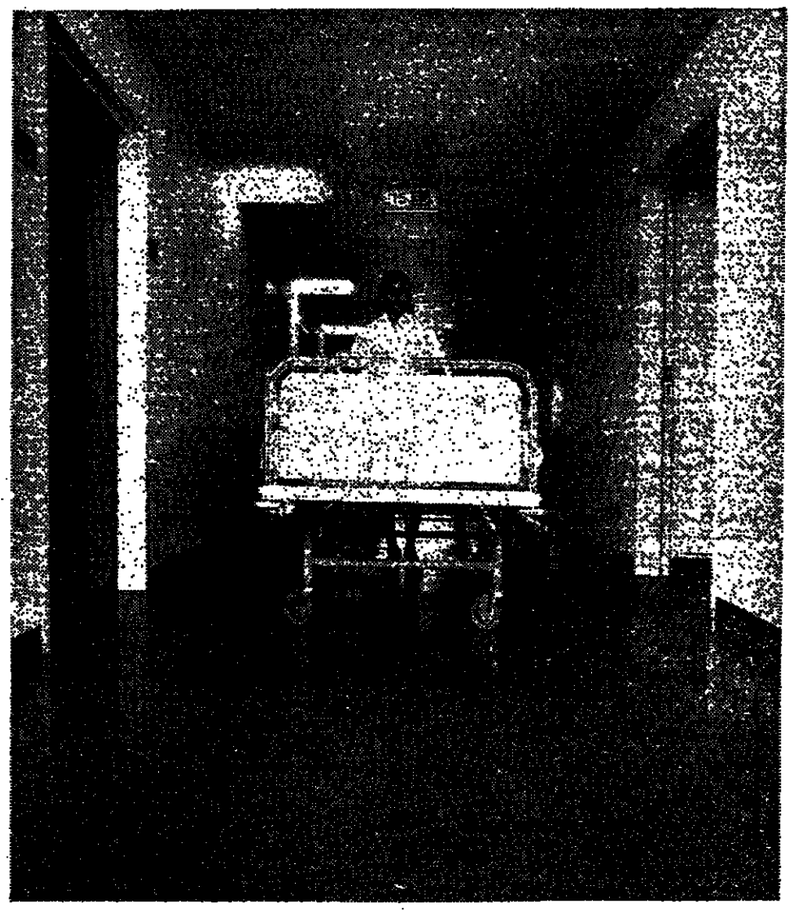
Plays

"The Innocents" is a revival of William Archibald's "rather clumsy" adaptation of Henry James's "The Turn of the Screw." Clive Barnes points out that in the novella you never see the ghosts that haunt the two children; but here, in the play, they are very real, and "seem obtuse and clubfooted." The staging by Harold Pinter "makes the most of the magic and suspense. It is very cleverly done." Claire Bloom, as the governess, "looks and sounds perfect." Even the two children, Michael MacKay and Sarah Jessica Parker, "are no less successful." But for Canby, "when you have talents of the nature of Miss Bloom and Pinter, to revive a pedestrian play adaptation of a great novel seems to savor something of folly."

Newport Jazz in Paris

PARIS, Nov. 1 (IHT).—The Newport Jazz Festival, currently on a European tour, will be in Paris for five days, starting Nov. 3, with McCoy Tyner at the Théâtre des Champs-Elysées at 8:30 p.m.; Nov. 4, Gil Evans at the Maison de la Radio, Salle 104, at 6:30 and 9:30 p.m.; Nov. 5, Betty Carter and the Bill Evans trio, again in Salle 104, at 8:30 p.m.; Nov. 6, Sonny Rollins at the Théâtre des Champs-Elysées at 9 p.m.; and Nov. 7, Muddy Waters at the Maison de la Radio at 6 and 9 p.m.

Tourists in Spain



MADRID, Nov. 1 (AP).—The Information and Tourism Ministry has announced that 3,080,326 tourists visited Spain in September or 5.4 per cent fewer than in the same month of 1975. The number of visitors in the January-September period this year amounted to 25,139,669 or a drop of 4.2 per cent.

++ research success fights heart infarction ++

KW 1349 d

Heart diseases are international.
Cardiovascular diseases are in fact spreading alarmingly. Today they kill almost 60% of all people. That doesn't have to be. For now we are gaining ground in the fight. Research has focussed on the heart. At Bayer's, too.

Bayer research scored a success.
For more than a decade scientists of all faculties working in the Bayer laboratories tackled the task of successfully supporting the diseased heart. Thousands of compounds were studied, tested, rejected or developed further. Until one preparation was at last approved and released. A new chance — a new hope for many heart patients.

Once again Bayer can help physicians and their patients in all parts of the world. A disease menacing millions of people loses a little of its frightening aspect. But many unsolved problems remain in the medical field. Research goes on. In this work we join hands with doctors all over the globe. For better aid to the sick. With Bayer pharmaceuticals.

Bayer is active in almost all countries of the world in the fields of chemicals, dyestuffs, engineering materials, man-made fibres, pharmaceuticals and crop protection products. Bayer Germany: An enterprise with 169,000 co-workers and 6,000 different sales products.

Bayer thinks of tomorrow — today

The Nuclear Issues

Of all the issues the next U.S. president will face, none are more critical than those in the nuclear field, civilian and military, for they can mean life or death for the nation—and for all civilization. The policies Jimmy Carter and President Ford promise in this area diverge sharply at a number of points.

On halting the nuclear arms race with the Soviet Union, while assuring an adequate defense, both candidates have committed themselves to "essential equivalents" with the Soviet Union and rapid conclusion of the SALT-2 negotiations, which have been 90 per cent completed by Secretary of State Henry A. Kissinger on the basis of the Ford-Brezhnev Vladivostok agreement.

It is on the longer-range perspective in strategic arms—which might be touched on in the SALT-2 treaty, but is more likely to be addressed seriously in SALT-3, that Jimmy Carter has differed sharply with the administration on a fundamental issue and has made a major new proposal.

The administration programs to develop bigger, highly accurate intercontinental ballistic missiles often are minimized as "bargaining chips" for the SALT talks. But, as experience shows, they are less likely to be bargained away than to become imbedded in the force structures of both sides. We support Mr. Carter's proposal to seek agreement with the Soviet Union on "a quick freeze" on qualitative improvements in strategic weapons and on such quantitative elements as numbers of atomic missiles and warheads and total throw-weight.

A freeze or, at least, a slowdown in quantitative and qualitative improvements in strategic weapons is the essential first step toward significant reductions in the high limit put on the arms race in the Vladivostok agreement. If the huge and expensive buildup on both sides permitted under the Vladivostok ceilings is complete, it will be infinitely more difficult to negotiate reductions.

The dangers of "vertical" proliferation of nuclear weapons in the mounting Soviet-U.S. forces is exceeded only by the risks of "horizontal" proliferation, now that 28 or more countries have or are building nuclear power reactors, which also can produce the explosive for atomic bombs. Plutonium, a man-made element that builds up in spent reactor fuel rods, may one day be re-used as commercial nuclear fuel. But, for the moment, its only real use is for bombs that can be made so easily that almost any government, guerrilla force, terrorist group and even the Mafia could do so, once the far more difficult step of separating the plutonium from highly radioactive reactor wastes has been accomplished in a nuclear reprocessing plant.

Mr. Carter has put forward a comprehensive plan to get the proliferation problem under control and avoid a premature "plutonium economy" that would put Third World countries alone in possession of enough nuclear explosives annually to make 3,000 bombs a year in the 1980s.

President Ford's most critical anti-proliferation decisions are to seek a worldwide, three-year moratorium on the export of plutonium reprocessing technology and—far more important—to defer commercial plutonium reprocessing in the United States pending further "evaluation."

The administration's new anti-proliferation strategy states that the avoidance of proliferation henceforth "must take precedence over economic and energy benefits." It tells the world that "reprocessing should not proceed unless there is sound reason to conclude that the world community can effectively overcome the associated risks of proliferation"—something many experts consider a virtually insoluble problem.

* * *

There are two other important Carter proposals—ignored by Mr. Ford—that we support. One is to seek a five-year Soviet-U.S. moratorium on all nuclear explosions, including so-called peaceful devices, pending negotiation of a worldwide comprehensive test ban treaty. The other proposal is to increase non-nuclear priorities for U.S. energy research and development funds, two-thirds of which now are committed to nuclear power, with emphasis on speeding a commercial breeder reactor by the 1990s that would use plutonium as a fuel and cover the globe with plutonium stockpiles. Mr. Ford proposes to leave the swollen breeder budget intact.

Finally, we favor Mr. Carter's pledge to make more vigorous and effective summit-level approaches to the leaders of West Germany and France to defer their sales to Brazil and Pakistan of small, uneconomic plutonium reprocessing plants, the first ever sold by any supplier nation, which can have only one purpose: to make bombs . . .

FROM THE NEW YORK TIMES.

Irish Imbroglio

The presidency of Ireland is principally a ceremonial post; its occupant has no more political power than Britain's Queen. But one of his functions could be a vital safeguard in a democratic system: before signing into law a bill passed by parliament, he can ask the Supreme Court to rule on its constitutionality.

President Cearbhall O Dalaigh, nominated by all parties after the death of Erskine B. Childers in 1974, and thus installed without a popular election, recently requested the court's judgment on two emergency bills aimed at curbing Irish Republican Army terrorism. It was a logical move by O Dalaigh, himself a former chief justice, for the bills would greatly expand police powers, extending the period in which suspected terrorists could be held without charge from 48 hours to seven days.

The court validated the bills but warned that if enforced loosely they could make serious "inroads into personal liberty." Outraged over the delay caused by O Dalaigh's referral, Defense Minister Patrick Donegan called the President a "thundering disgrace." Later he sought to apologize, but O Dalaigh refused to receive him and then resigned to protect, as he put it, "the dignity and independence" of the presidency, plunging the republic into a rare constitutional crisis.

This episode could hardly have come at a worse time for Prime Minister Liam Cosgrave's Fine Gael-Labor coalition. Ireland confronts an economic dilemma of proportions that even a government report has called "intolerable": escalating unemployment, soaring inflation, a huge balance-of-payments deficit. Cosgrave has also been under heavy pressure from London to crack down harder on IRA terrorism to ease Britain's task in Northern Ireland—pressure that was intensified after the assassination in July of the British ambassador to Dublin.

O Dalaigh formerly belonged to the opposition Fianna Fail, still Ireland's biggest single party, which fought the anti-terrorist bills in parliament and is now demanding new elections. Instead, the government has announced only an election for a new president for Nov. 24. The government's dilemma is the familiar one for a democracy in these times of trying to cope with ruthless terrorists while staying inside the Constitution.

It is doubtful if the delay caused by O Dalaigh's appeal to the Supreme Court seriously handicapped the fight against IRA terror. But now the combination of Donegan's rashness and O Dalaigh's stubbornness has plunged Ireland into a political crisis that threatens the life of the government.

THE NEW YORK TIMES.

International Opinion

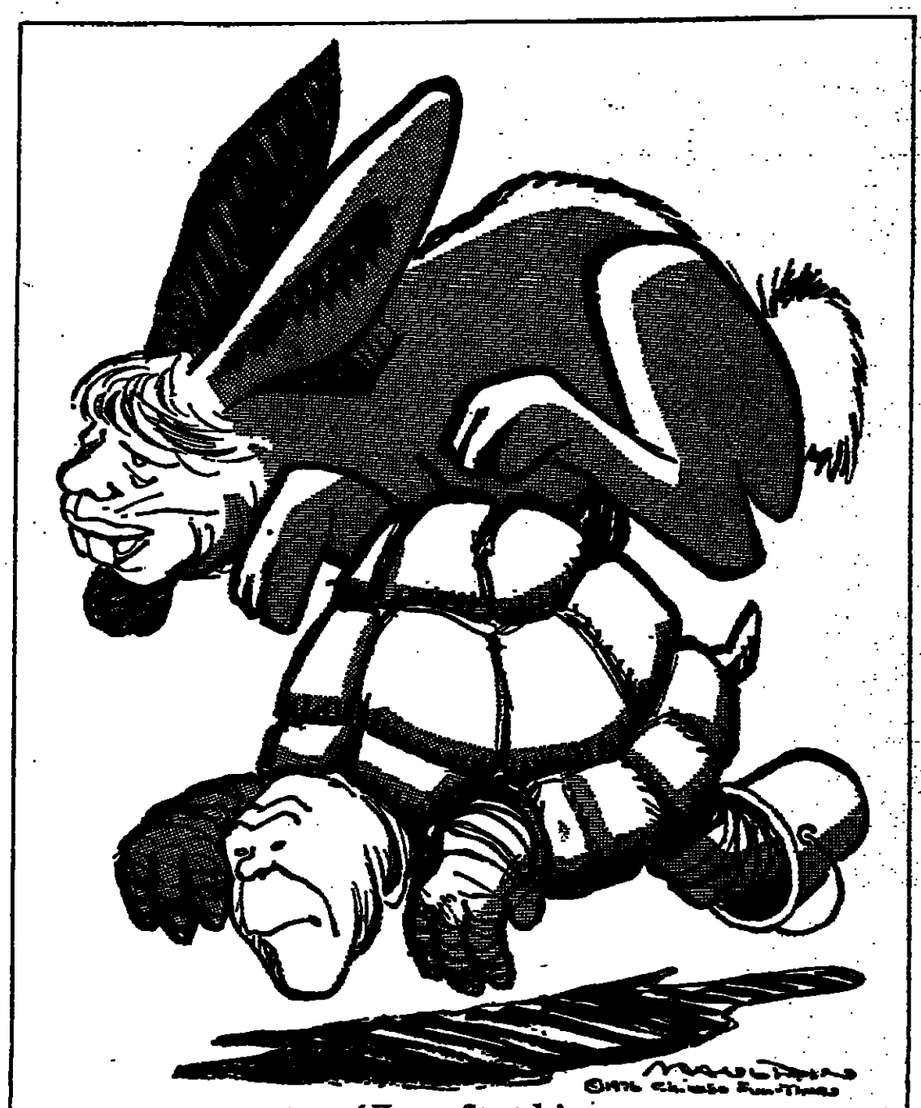
'Swinging' Britain

The political scene in London is beginning to look like a carnival in a madhouse. Inflation and the decay of the pound are accelerating, so the government threatens its associates in the EEC and NATO, from whom it none the less hopes for aid. A top trades union official states it is time the EEC bought Britain out of trouble. After all, he says, that was supposed to be an advantage of joining Europe. He, like almost everyone else in the country, completely overlooks the fact that the community is now subsidizing around a third of the cost of British food imports. The Ministry of Labor publishes triumphant figures proving that there have been fewer strikes this year than for a long time past. But it omits to add that in spite of this the country is producing less than it did during the three-day week in 1974. And now the executive of the Labor party has spoken out against public-spending cuts, one member even going so far as to say he saw no reason why more money should not be printed if the government was short. Things have gone so far that a responsible newspaper describes it as progress that Mr. Callaghan managed to get through a 50-minute TV interview without once using the expression "foreign speculators."

—From the Neue Zuercher Zeitung (Zurich).

In the International Edition

Seventy-Five Years Ago



November 2, 1901

NEW YORK.—Regarding the controversy over President Roosevelt's recent dinner guest, the Philadelphia Inquirer had this to say yesterday in its editorial: 'Our Southern friends need not send Mr. Booker T. Washington to the Legislature or to Congress or make him Governor if they do not wish to do so, but if the President wishes to shake him by the hand we do not see whose business it is except the President's."

Fifty Years Ago

November 2, 1926

NEW YORK.—"England is America-mad. The English girl imitates the dress of the American girl, no longer that of the French girl. The ambitious English boy plans to go to America. The English press froths with discussion of America. The English can't sleep with thinking about America. They envy our wealth, our resources, our youth, our spirit and our prestige." So said author Theodore Dreiser on his return from Europe yesterday.

'Home Stretch.'

After Faisal, Saudis Flex Muscles

By Eric Pace

JIDDAH, Saudi Arabia.—King Khaled of Saudi Arabia crossed the Red Sea to Egypt last week to watch earlier Saudi diplomacy result in a display of apparent Arab amity at the Cairo conference on Lebanon. King Khaled's deputy, Crown Prince Fahd, stayed in the remote desert capital, Riyadh, running the kingdom's administrative machinery, which takes in roughly $30 billion a year in oil revenues. The Saudi telecommunications minister, Alawi Darwish Kayyal, caused a stir off in Montreux, Switzerland, by predicting that a "moderate" oil price rise was in the offing.

The farflung activities of the Saudi regime last week demonstrated how the kingdom has changed in recent years: In foreign affairs, Saudi interventions have become sometimes more pronounced; within the royal family, power has become more decentralized; and at home and abroad, the country's growing oil wealth has helped enhance the clout of Saudi technocrats, although it has also heightened stresses in Saudi society.

Saudi Arabia was already changing during the reign of its previous monarch, King Faisal, who used its wealth to extend its influence beyond its borders. But King Faisal's assassination at the hand of a young kinsman in March, 1975, has proven something of a watershed.

Escape the Shadow

Some informed Arabs say that it is partly a desire to escape the shadow of the revered King Faisal that has led the regime of King Khaled, his brother, to take such bold steps as summoning the Palestinian leader, Yassir Arafat, and flying him out of Lebanon to attend the Arab meeting in Riyadh last month. The gathering, convoked by Saudi Arabia and Kuwait, produced a rapprochement between Egypt and Syria and a plan for ending the Lebanese civil war. That plan won nearly unanimous approval at the larger meeting of representatives of Arab League member nations, including 14 heads of state, in Cairo last week.

The Khaled regime's activism was further underscored at Cairo by a reported Saudi commitment to be among the chief financial backers of the enlarged inter-Arab peace force that is to police Lebanon. And King Khaled, whose government has been trying to promote good feelings around the volatile Arabian Peninsula, also used the occasion for discussions with President Salem Rubaya of radical Southern Yemen.

In King Faisal's day the monarch was the unquestioned pivot around which the Saudi state revolved. But under King Khaled, a milder man, the day-to-day running of the kingdom has been overseen by the 55-year-old Prince Fahd, another brother. Nevertheless, King Khaled's admirers report that the monarch has gathered confidence and at some recent gatherings he has consulted advisers less often than he did earlier in his reign. By some accounts he has come to feel more comfortable in his formal role as the ultimate arbiter in the realm.

But the day-to-day affairs of the kingdom remain largely in the hands of Prince Fahd, a shrewd and experienced administrator with a keen sense of the interests of the extensive Saudi royal family.

The internal workings of the royal family are largely secret, but here in the Saudi commercial capital and in Riyadh, it is widely said that the inner core of decision-makers includes a handful of other princes, who, like the King and Crown Prince, are sons of the founder of the modern Saudi state, the late King Ibn Saud. Among these decision-makers are Prince Abdullah, the commander of the Saudi Arabian National Guard and third-ranking member of the government after the King and the Crown Prince; and Prince Sultan, the minister of defense. In addition, the foreign minister, a Princeton-educated son of King Faisal, Prince Saud, has a key position, as does the suave oil minister, Sheikh Zaki Yamani, who is the archetypal Saudi technocrat.

As the development and modernization of Saudi Arabia has proceeded, fueled by the country's oil wealth, Saudi technocrats such as Mr. Kayyal have come increasingly into prominence. They are generally more accessible to foreigners than the ranking members of the royal family, and their utterances on sensitive issues draw attention abroad. So it was with statements made by Mr. Kayyal at a press conference last week in Montreux, which was the scene of a symposium designed to further business cooperation between Arabs and Europeans.

Mr. Kayyal declared that Saudi Arabia would continue to behave as a "responsible member of the international community" at the Organization of Petroleum Exporting Countries ministerial conference which is to be held in the Arabian emirate of Qatar next month, and is expected to fix a new, higher world base price for crude oil.

Not that Saudi Arabia needs more money. Though the kingdom's government expenditures are budgeted at $30 billion a year, it has been spending considerably less. Yet pressure for a substantial oil price rise is expected to come at Qatar from Iran and from other producers, and Saudi officials said that their government would have to give weight to others' views.

The officials, and members of the foreign business community, reported that the Saudi leadership remains worried about the jolt that a substantial oil price increase would give to the economies of Western industrial nations, notably Britain and Italy, whose economic problems are particularly pronounced. But these informants claimed that Saudi arguments for restraint in order to protect oil-consuming nations are partly undercut by recent talk and measures in the United States against the Arab boycott of Israel.

Saudi officials insist, however, that the kingdom will adhere to Arab boycott measures, the blacklisting of firms in the United States and elsewhere that do business with Israel, even if that means cutting back on trade with the United States.

Saudi officials and the Saudi press remain vociferous in their denunciations of Israel, and it is widely expected here that King Khaled's regime would embargo oil shipments to the United States if Washington were to make some major gesture of support for Israel in the event of another Middle East war.

Amid Its Gloom

North Sea Oil Gives U.K. Gleam of Hope

By Robert B. Semple Jr.

LONDON—In his efforts to mend Britain's economic and political wounds, Prime Minister James Callaghan did not invoke the civil servant's favorite poultice, North Sea Oil. Perhaps the range and magnitude of his difficulties—poor balance of payments, renewed inflation, a vulnerable currency, unemployment, disarray in his own party—have made even the promised riches of the North Sea seem insignificant. Perhaps, too, he was merely being honest: Oil will not solve many of Britain's basic weaknesses as a trading nation; nor, in the short term, will it do the one thing Mr. Callaghan would like to accomplish, which is to erase Britain's image as a nation which simply cannot sustain a reasonable standard of living and a generous program of social benefits without begging abroad.

But the oil is there, flowing in increasing quantities. And there are people in the upper reaches of government and business here who believe that while it will not solve Britain's difficulties, it will at least ease them. They are right. The oil should get Britain out of debt, sooner or later. But how right they are depends on two things. One is whether the relationship between the British government and the major oil producers can be maintained. That relationship, remarkably friendly so far, has now reached a delicate stage. The second is whether Britain will have to use all or most of the oil money to pay off debts it is accumulating now, or whether the money can be turned to other, more productive purposes.

Complex Effects

That the oil is in fact coming from Jurassic sandstone deposits 10,000 and more feet below the bottom of the sea is in itself welcome news: Expectation has become reality. According to three different estimates, operations this year alone should produce some 20 million tons of oil, which will mean $2 billion to Britain's balance of payments accounts and is roughly equivalent to about a fifth of the United Kingdom's annual consumption. These figures should double next year, and by 1980, Britain—assuming of course, that it gets its hands on all the oil—could be wholly self-sufficient.

What do all these fancy figures mean to the average British consumer? In a direct sense, not much. Indirectly, more. Britain's persistent balance of payments deficits, aggravated now by the higher cost of imports due to the depressed value of the pound, exercise a real if hidden drag on the ordinary wage earner. The deficits mean that Britain must borrow, and borrowing costs money that might otherwise be used for business investment (meaning jobs) and the "social wage," the public programs for schools and housing that are so much a part of Britain's welfare state.

Help the People

The balance of payments is also watched closely by holders of sterling, and when they sell sterling (as they have been in increasing quantities), the pound goes down, costs to consumers and businesses of imported goods go up, and inflation, the government's main target for 15 months, resumes.

To the extent that the oil can help the balance of payments (either by cutting dependency on imports, and even, in time, making Britain a net exporter) oil will also help people. But can oil also produce enough extra income to build schools for the engineers Britain needs, to modernize factories in other sectors of the economy, help labor relations, improve productivity?

The answer on this point is gloomier. Britain's debt to overseas lenders is about $12 billion and it is now asking for a $3.9-billion loan from the International Monetary Fund and talking about even grander, long-term aspirations in the capital markets of the world. Given the most favorable projections, the surpluses achieved in oil revenues ($2 billion next year, rising to perhaps $10 billion by 1980) are already heavily engaged to lenders. There is plenty of gas in the North Sea, and when the effects of that are added to oil, things look better. But there is still not a great deal left to play around with. Britain assumes that the government can use the money exclusively to get off the creditors it already has.

Wants More

Even these projections assume a continuing willingness by major oil companies to risk large sums of money on further exploration and development. Will they do so? That question is very much on the minds of officials here. Up to now, the companies have agreed to many government demands, in no small part because the Department of Energy has scrupulously involved the companies in the negotiating process. At present, for example, the Treasury, through a series of interrelated royalty and taxation mechanisms, takes about 70 cent of company profits, and most of these companies are British (such as British Petroleum), American or Continental. These factors could mean much to the British treasury, and the companies have already screamed.

Now, however, Anthony Wedgwood Benn, minister of industry, wants more: 51 percent state participation, not only in new commercial fields but in existing fields. What this means in practice is that Britain, perhaps to guard against a future energy crisis or a domestic increase in the price of Arab oil, wants guaranteed access to well over half of anything produced in the North Sea. It also wants participation in company policy on boards and committees.

Since these conditions would apply not only to new fields but to existing fields, the basis on which were granted some years ago under quite different circumstances, some companies are wondering whether Mr. Benn has not changed the rules of the game. Others with complex financing and distribution systems outside Britain are not overjoyed by the idea of selling half their oil to one country in one year, even at market prices. And others do not like the idea of the British government looking over their shoulders. But Mr. Benn has made it clear that future awards of new leases will depend in part on a company's willingness to renegotiate old ones. And in the end, with individual concessions here and there, is likely that he will get his way.

The International Herald Tribune welcomes letters from readers. Short letters have a better chance of being published. All letters are subject to condensation for space reasons. Anonymous letters will not be considered for publication. Writers may request that their letters be signed or signed with initials but preference will be given to those fully signed and bearing the writer's complete address.

Letters

Arabs, Israelis

Michael Adams (IHT, Oct. 5) makes several significant omissions. He fails to say that he is Director of Information for the Council for the Advancement of Arab-British Understanding (CAABU), a leading pro-Arab propaganda organization. CAABU and Michael Adams have campaigned actively for the Palestinians but since the Syrians entered Lebanon his views and those of his organization have not been conspicuous in the letter columns of the British press—a silence reflecting, perhaps, the prevailing Arab attitude toward the Palestinians rather than Mr. Adams's own feelings.

He also overlooks the offer to the Palestinians of a state of their own in 1948. Finally, he ignores official Palestinian policy—a state in the whole area of Palestine in secular democratic anarchy with the Jews, a joke given macabre reality by the mutual slaughter of Christian and Moslem in Lebanon.

The Palestinians' refusal of a state alongside Israel in 1948 has led to the denial of Israeli sovereignty by the Arabs; the attempted destruction of Israel several times; the cynical perpetuation of refugee camps as a long term propaganda campaign; the growth of Palestinian terrorism, hardly a criterion of moral justification; and with Israel seemingly secure in the foreseeable future, the ditching of the Palestinians by the Arab states now that they no longer serve a purpose.

Neither Israel nor the Palestinians necessarily have relevance always to the national interests of Arab states as Jordan in September 1970 and Syria in 1976 have shown. On both occasions the Arab world did nothing. Even though the Israelis, in each case, are beneficiaries.

For the record, I am a Jew, a Zionist and pro-Israel.

Dr. ABRAHAM MARCUS.
London.

Re Michael Adams's letter on the Palestinians (IHT), Oct. 5), I wonder whether he knows that an "Israeli Council for Peace with the Palestinians" functions in Israel. It is not an official body. Its members belong to all trends of life, politicians from right, center and left, members of the Knesset, intellectuals, members of the professions, economists, etc. None represents but himself and the council is not affiliated to any political party.

In our manifest we declared that the Palestinian Arabs exist as a people and are entitled to the elementary right of self-determination, to their own state, independent or federated with Jordan where the majority of the population is Palestinian. We do believe that a Palestinian state can coexist and develop alongside a sovereign, independent, secure and guaranteed Israel.

Wars will solve none of the problems facing Arabs and Jews in the Middle East. With the overflowing military arsenals of the confronting parties, the means of atomic warfare, eventually penetrating everywhere, the real risk is that the entire Middle East may be obliterated, nay that a Third World conflagration may destroy all human achievements. Mr. Adams is wrong in seeing doom only for Israel.

It is our purpose to influence Israelis and our government, Zionist leaders and friends and foes everywhere that peace is the only solution. Our council wishes to talk directly to any Palestinian representatives, including the PLO, provided they recognize the independence of Israel and approve Resolutions 224 and 338 of the UN. But surely Mr. Adams knows that it takes two to make a bargain . . .

Mr. Adams, well known for his interest in Arab and Middle Eastern affairs, surely is aware that the majority of the Jews in Israel are not merely immigrants, but Jewish refugees from Arab countries. This has created a de facto exchange of populations—almost to a decimal—within the area: Arabs leaving Palestine, Jews leaving Arab countries which they resided for millennia. In my book in Hebrew published recently: "Life Is With the Palestinians," I stressed by implication that the alternative to Salaam—Shalom, Peace—can, under prevailing conditions, be Samson's Biblical determination to "die with the Philistines," forbid.

ELIE ELIACHAR,
Honorary President,
Israeli Council for
Peace With Palestinians.
Jerusalem.

Mr. Adams may have inside information for CAABU. If so, it would have been inadvertently omitted.

PARIS, TUESDAY, NOVEMBER 2, 1976

loom on World Economy Spreads

Clyde H. Farnsworth

...ris, Nov. 1 (NYT).—In the ...ss and financial centers of ... an air of gloom is spread...er prospects for the world ...my and its capacity to tackle ...mounting problems of debt ...gement, sluggish growth and unemployment.

...highly publicized difficulties ...tain and Italy have diverted ...tion from the fact that at ... a third of the industrialized ...ries are in some serious ...ial trouble. As one analyst ..., "we're reaching the point ...tical drag, without even tak...g the impact of new oil increases."

...nce, Denmark, Ireland, Fin..., Belgium, Australia and New ...nd are among the other ...ries in the Organization for ...mic Cooperation and De...ment where yellow signals ...shing.

...poor nations of the devel...world are in even worse ..., struggling under a moun...

'Everyone Can See The Dangers Ahead, But Nobody Knows How to Avoid Them.'

...tain of $135 billion of debts, still ...unable in some cases to feed themselves.

...With the United States pre...occupied by the election campaign and all countries seemingly ever more jealous of national sovereignty, analysts say the international leadership that is needed to deal with the problems is lacking.

Danger Warning

A European banker warned that the world economy could be headed into a dangerous situation unless a new U.S. administration grasped the gravity of the situation. "Everyone can see the dangers ahead," another expert said, "but nobody knows how to avoid them."

In the rich-poor dialogue still droning on in Paris after 10 months, aiming to engineer a new distribution of the world's wealth, a delegate from India summed up what is becoming a growing feeling of debtor nations, both rich and poor:

"We simply don't see any way of paying the money back."

Of the Third World's total debt, some $50 billion is held by private banks in the West. The rest represents the concessionary aid of Western governments and donor institutions such as the World Bank.

The debt burden of some countries has reached unusual heights. Egypt owes one and one-half times its annual gross national product, for example. Zaire has borrowed three-quarters of its annual GNP.

More than half the official debt of the Third World is owed by India, Bangladesh, Pakistan and Egypt. More than half the private debt of the Third World is owed by Brazil, Mexico, South Korea and Taiwan.

Britain's sterling liabilities illustrate the problems of a so-called rich country. The official and privately owned funds that foreigners have deposited in London banks are nearly twice the national reserves.

Everyone Lives on Credit

The increasing debt of rich and poor nations shows that virtually everyone is living on credit. In the last five years more new reserves have been added to the world banking system than at any other time in history.

The credits—created out of nowhere, Europeans say—may have been a major factor behind the world inflation. They financed higher living standards that could not be paid for out of production. They made it relatively easy for oil-importing nations, both rich and poor, to pay for higher priced oil.

Some bankers, businessmen and government officials in Europe are worried that the whole system may crack, particularly if several debtors defaulted simultaneously. But the likeliest prospect in the view of analysts here, is that governments will continue to patch things up in any crisis by simply printing more money.

"We must be prepared for slower growth and for more redistribution among, and within, countries," says Prof. Jan Tinbergen, the Nobel Prize-winning economist from the Netherlands.

"This implies a simplification of life styles for the richest groups everywhere and perhaps for the whole population of industrial countries," he adds.

Growth Slowing

Growth is slowing as one country after the other decrees deflationary measures to try to check price increases. The OECD has just revised downward its growth projections for member countries from about 5 per cent in the second half of this year to 3.5 per cent, on an annualized basis.

The current-account deficit for the group this year was revised upward, on the other hand, from $20 billion to $25 billion. For developing countries that are not oil producers the deficit this year is expected to run near $32 billion, compared with $27 billion in 1975.

But as the growth slackens, analysts warn, the inflationary pressure from the creation of world credit could well continue.

At the same time, governments have to spend money to maintain unemployment compensation and other social benefits. Significantly more money may have to be spent if the jobless figures rise, as is now expected.

So what many analysts expect later in the decade is the rather unattractive combination of more unsatisfied people looking for work, prices still higher than they are today and social tensions that will make political life everywhere more difficult.

Shah Says Iran's Oil Price Must Be Raised 15 Per Cent

BONN, Nov. 1 (Reuters).—The Shah of Iran said in an interview published yesterday that the price of his country's il must be raised by at least 15 per cent.

He told the newspaper Welt am Sonntag that Iran was orced to increase the price "because our purchasing power as dropped by nearly 40 per cent since we raised oil prices ... n 1974.

"But of course we cannot raise the price of oil that much," e added.

Asked by a Welt am Sonntag reporter in Tehran whether his meant an increase of 15 per cent, Shah Reza Pahlevi said a minimum of 15 per cent."

"It is a minimum which is only just acceptable for us. ven with that we will still have lost 25 per cent of our purhasing power."

He said imported inflation was causing Iran great problems for in some cases it is as high as 500 to 600 per cent. We annot change that. The world economy is in a lamentable ituation."

But he said oil price increases accounted only for about 5 per cent of Europe's inflation. He did not make clear hether he was referring to annual inflation, or inflation nce 1974.

Asked about oil-producing countries' proposals to link the rice of oil directly with inflation in the industrialized countries, e said, "Why do you (Western industrialized states) fear price ndexing? If we had it already you would have started fighting our inflation earlier."

apan Businessman Warns EC May Set Import Curbs

OKYO, Nov. 1 (Reuters).—...iwo Doko, president of the ...nese federation of economic ...isations (Keidanren), warn... today that the Common ...ket might unilaterally impose ...rt restrictions on Japanese ...s.

...e told reporters on his return ... Europe as head of a ...anese mission that this pos...ity exists unless Japan takes ...sures by Nov. 29, when the ... is scheduled to hold a sum... meeting.

...r. Doko said the trade im...nce in favor of Japan has ... developing from an eco...ic issue into a political and ...tional one because of in...loyment in West European ...tries.

...r. Doko said the mission made ...romise in Europe that Japan ...ld impose voluntary export ...rols.

... said, the most criticized ...s concerning Japanese ex... are the shipbuilding, steel, ...tronics, ballbearing and auto...ile sectors.

Report to Premier

...r. Doko said he will report ...rime Minister Takeo Miki, ...well as the industries con...ed, about the climate of opin... in Western Europe.

...e Common Market is ex...ed to take counter-measures ...n Japan adopts some steps, ...rdless of whether self-re...nt of exports is good or bad, Doko said.

... added that during the two... tour of Britain, West Ger..., Sweden and France, the ...e of the yen and the coun... recent economic stimulant ...sures did not feature as ...r problems.

...eanwhile, the Japan Foreign ...le Council, organized by 14 ...r trading houses, said today ...ld revised its estimate of the ...n's customs clearance trade ...nce in fiscal 1976 to a surplus ...00 million from a deficit of ...illion predicted last Decem...

...e council said exports in ...l 1976 ending March 31 next ... will total $67.5 billion, up from $57 billion in fiscal 1975, and imports $67.4 billion, up from $56.23 billion.

The council's original estimates were $64 billion for exports and $66 billion for imports.

Import Curbs

The council said Japan's exports rose 23.5 per cent in the first half of fiscal 1976, but the rate of increase will slow in the second half chiefly because of overseas moves to curb imports of Japanese goods.

It said imports in the first half rose only 14 per cent because of a slower-than-expected recovery in the domestic economy.

Japan will have a large trade surplus this year with Western Europe and the United States, the council said.

Japan's exports to the United States in fiscal 1976 will rise 32.3 per cent, to $15.81 billion from $11.95 billion in fiscal 1975, while imports will rise 16.4 per cent to $13.95 billion from $11.21 billion.

Exports to Western Europe will rise 29.2 per cent from last year's $84.4 billion and imports 16.5 per cent from $43.7 billion in 1975.

U.S. Tax Law Seen Harming Business Abroad

NEW YORK, Nov. 1 (AP-DJ).—Recent revisions in U.S. tax laws affecting U.S. citizens working in other countries will reduce the number of foreign jobs given Americans and may even reduce the country's foreign business activity, the Wall Street Journal says in an editorial.

The revisions affect the amount of income exempt from taxation when working in foreign countries, and the treatment of these deductions. The changes lower the amount exempt from taxation to $15,000 from $20,000 for the first three years and $25,000 thereafter. In addition, the excluded income must be considered in determining the proper tax bracket for the first time.

The Wall Street Journal says these changes will have an "enormous damaging impact on the competitiveness of U.S. business abroad," making it necessary to pay an employee as much as $100,000 to equal a U.S. salary of $40,000 for example, if that worker is sent to Japan.

Instead of increasing revenue by these measures, the journal claims, the competitiveness of U.S. companies bidding on overseas business will be reduced by the high costs of sending U.S. labor abroad, which will lower the foreign earnings by American concerns. It says the changes will also lower the amount of savings brought back to the United States by returning workers, money which is taxed as investment income.

U.S. Assets Rise To $18.95 Billion

WASHINGTON, Nov. 1 (AP-DJ).—U.S. reserve assets rose $359 million in September to $18.95 billion, the Treasury reported today.

The overall increase reflected a $193-million rise from August to $1.04 billion in U.S. holdings of convertible foreign currencies, a $134-million rise to $3.95 billion in the nation's ability to draw currencies automatically from the International Monetary Fund and a $32-million rise to $2.86 billion in U.S. holdings of IMF special drawing rights.

Italy's Trade Deficit Widens in September

ROME, Nov. 1 (AP-DJ).—Italy's trade deficit widened to 512 billion lire ($590 million) in September from 416 billion lire a year earlier, according to provisional figures reported Saturday by the government statistics office.

Exports totaled 2,713 billion lire free on board, up 37.8 per cent from a year earlier. Imports were reported as 3,225 billion lire, including cost of insurance and freight, up 35.2 per cent.

As Institutions Grow Wary

The 'Little Man' Returns to Wall St.

NEW YORK, Nov. 1 (AP-DJ).—The growing presence of private investors in equities markets could be highly important for the stock market, Barron's Financial Weekly says.

Burned by the fall in stocks during the recent recession, institutional investors, the dominant force of the past, have turned away from equities. Their net acquisition of corporate equities fell sharply during the bear market and has remained under their pre-bear-market totals.

But taking up the slack, non-institutional investors have recently been reversing their past trends and on balance have redeemed mutual fund shares while being net buyers of other securities, John Schulz, author of the article and vice-president of Brean Murray & Co., says.

The sentiment among non-institutional investors during the past two or three years has become less negative than in the past, and in some cases even decidedly positive. This shift could be important because the household sector has been piling up financial assets at a record rate—about $85 billion during the first half of 1976. And approximately $67.5 billion of that went into demand and time deposits and credit-market instruments.

All that sidelined liquidity could be fuel for an extended bull market.

By contrast, private, nonbank financial institutions have been taking an increasingly dim view of common stocks. Equity investors in this category include mutual savings banks, life insurance companies, private pension funds, state and local retirement funds and mutual funds.

In the institutions' heyday of 1971, those investors collectively used over 40 per cent of their new-cash inflow to buy common shares. In the bear-market years of 1973 and 1974, the ratios were only 26 and 14 per cent, respectively. In 1975, when the market once more was on the upbeat, the ratio was barely 14 per cent, while in the first half of this year it recovered to only about 20 per cent.

Institutional investors, in other words, have grown much more gun-shy about equities than the private sector, in part because of damage done to portfolio values by the bear market and in part because of the relatively high returns available from fixed-income investments during the past two and a half years.

The 1973-74 stock prices collapse not only caused institutional portfolio managers to underperform the market by a big margin, but also caused severe disenchantment with common stocks among their clients, mainly corporation pension and state and local retirement funds.

Moreover, enactment of pension laws in 1975 subjected many institutional money managers to new, potentially very stringent standards of prudence. Not surprisingly, they responded by putting a lot more of their net new-cash inflows into credit market instruments than into common stocks.

Billions of dollars are involved. According to Federal Reserve statistics, "net acquisition of financial assets" by institutions which typically invest in corporate equities totaled $60.5 billion in 1975 and an estimated $33.1 billion in the first half of 1976.

Net stock purchases during these periods amounted to $8.5 billion and $6.6 billion respectively (the 14 per cent and 20 per cent of added financial assets noted earlier). At the end of 1975, these institutions' total stockholdings were worth at market about $195 billion. Allowing for subsequent price changes and purchases, the mid-1976 value probably topped $200 billion.

Money Growth, Public Spending Seen Cut

Tax Boost May Follow IMF Loan to U.K.

LONDON, Nov. 1 (Reuters).—International Monetary Fund conditions for a further loan to Britain will probably lead to a £1-billion rise in indirect taxation in the spring 1977 budget, or earlier, stockbrokers Phillips & Drew say in their November economic forecast.

The IMF will probably require money supply (M-3) growth for 1977-78 to be cut to 10 per cent, which would imply a cut in the public sector borrowing requirement to £8.2 billion.

Given the political difficulties of implementing further spending cuts, this reduction is more likely to be effected through higher taxation, the report says.

Recent British monetary measures and probable conditions attached to the IMF credit facilities have led Phillips & Drew to revise substantially their economic forecasts.

Real gross domestic product is expected to rise by an annual 2.5 per cent in the 18 months to the end of 1977, against the government's 4.5-per-cent estimate in July, with no significant fall in unemployment.

With the growth in export volume in the Organization for Economic Cooperation and Development countries expected to fall by 2 per cent to 9 per cent in 1977, export-led growth cannot be relied on, the report says.

Higher Prices Seen

Following the recent slide in sterling, retail prices are expected to rise by 13 per cent in the year to the end of 1977, rather than the government's last announced target of 7 per cent, and real disposable incomes are expected to fall by 3.5 per cent in the year to August, 1977.

Overall fixed investment will probably decline by 2.5 per cent in real terms next year and stockbuilding, hit by high interest rates, is expected to run at £400 million at 1970 prices, as against the £570 million forecast in October.

The recent rise in the minimum lending rate to 15 per cent and calls for a further 2-per-cent special deposits demonstrate the government's commitment to a tighter monetary policy, and further restrictive measures can be expected, it says.

These could include further calls for special deposits, reimposition of controls over banks' eligible liabilities, direct ceilings on bank lending, a selective import deposit scheme and tighter hire purchase controls.

Simon Comment

Meanwhile, in Washington, Treasury Secretary William Simon said there have been no formal discussions between the United States and West Germany on the possibility of providing additional financial aid to Britain.

"I have not been a party to any such discussions," Mr. Simon told Reuters.

He was commenting on a report in the London Sunday Times that the United States and Germany are discussing a plan to provide considerable extra funds for Britain in addition to the $3.9-billion loan for which Britain has applied to the International Monetary Fund.

"There are all sorts of conversations and analyses going on all the time," Mr. Simon said, "but it would be way premature to say that actual discussions have taken place.

"If you're talking about formal negotiations you're talking about me talking to (German Finance Minister Hans) Apel and that hasn't happened."

Asked whether he thought the IMF loan will be enough for Britain's needs, Mr. Simon replied that he could not answer that until the analysis of Britain's situation is completed.

But he added, "We hope so."

Price Worry Less in U.S.

NEW YORK, Nov. 1 (AP).—Concern over double-digit inflation among top U.S. executives has lessened considerably in the past year, a new survey says, but the executives said they were still cautious in their business policies.

Fortune magazine, in its November issue, said 200 executives answering their poll also were more confident that the U.S. economy would rebound and stay prosperous over the next few years.

The survey, taken twice a year and released Sunday, said 25 per cent of the executives believed double-digit inflation is still a problem, down from 62 per cent a year ago. Inflation has been running at about a 5 to 6-per-cent annual rate.

The cautious stance the executives took appeared to be in line with recent observations on the pause in capital spending.

Fortune said 44 per cent of the executives say they are cautious about running their businesses, while 32 per cent say they are taking an aggressive stance. The magazine said executives were more cautious this year than last but did not give 1975 figures.

Such caution has caused considerable consternation recently among capital goods industries such as steel. Executives, mindful of the last recession, are often unwilling to expand factories and buy new machinery without assurance the economy will come out of its current lull.

Among major companies citing drops in earnings due to the capital spending lag have been top-ranked steelmaker United States Steel Corp., while such giant firms as E. I. du Pont de Nemours & Co. have planned a slowdown in spending for 1977.

While Fortune said some executives were worried over a slowdown next year or in 1978, 67 per cent felt the United States would regain and maintain prosperity in the next "couple of years." In 1975, 42 per cent believed the economy was on the upswing.

In Bonn, a Finance Ministry spokesman said he knows of no discussions between West Germany and the United States on providing further financial aid to Britain.

Contacted by telephone, spokesman Hartmut Rudloff said, "Apart from talks within the IMF, I know of no other discussions on giving an extra loan to Britain."

Belgian Urges Aid

At The Hague, Belgian Premier Leo Tindemans urged the Common Market to participate in an international rescue operation for sterling, EEC officials said.

The officials said Mr. Tindemans told a weekend meeting of community foreign ministers here that the Common Market has a duty to help Britain out of its current economic crisis.

Mr. Tindemans said the EEC should play an active role in preparing a solution for Britain's difficulties, even if the community alone could not handle the situation and the rescue operation had to be mounted in a wider international context.

Several of the ministers, who were discussing the Tindemans report on the future of the EEC, reacted favorably to his suggestion, the officials said.

A mission from the IMF is due to arrive in London this week to begin consultations for the loan to Britain of $3.9 billion.

N.Y. Prices Advance In Nervous Trading

NEW YORK, Nov. 1 (IHT).—New York Stock Exchange prices moved slightly higher today as many traders appeared to put off making fresh investment decisions ahead of the presidential election tomorrow.

Both candidates have scheduled last minute television appearances tonight in an effort to capture additional votes that could spell the difference between victory and defeat at the polls tomorrow.

The Dow Jones industrial average was up 1.16 at 966.09. Volume totaled 18.39 million shares, compared with 17 million on Friday. Advancing issues outpaced decliners by about 825 to about 575.

For the most part, brokers said dealings reflected some late short covering and nervous trading in anticipation of the election. All commodity and stock exchanges will be closed tomorrow.

Boeing, a standout performer, rose 1 5/8 to 42 5/8. It predicted "substantially higher" sales for the fourth quarter.

General Mills, another bright spot, gained 1 1/2 to 32 1/4.

But Monsanto fell 1 3/8 to 81 1/2, Du Pont 1 1/4 to 128, and Eli Lilly 7/8 to 53 7/8.

Analysts said in published reports that some chemical and pharmaceutical companies were experiencing price pressures in some product lines.

Natomas sagged 1 1/2 to 30 1/8. A company official said there was an unconfirmed report that an industry analyst lowered his 1977 earnings forecast for the company.

General American Oil of Texas, however, climbed 3 1/4 to 50 3/4. It raised its dividend.

Steels and motors scored fractional gains.

Prices on the American Stock Exchange pushed higher, with the Amex index up 0.05 to 99.03.

Bic Pen, which reported higher earnings, gained 1/4 to 10 7/8.

Wheat futures advanced 3 cents a bushel on the Chicago Board of Trade, but other major commodities were irregular at the close.

Wheat futures traded under previous closes through most of the session, then rallied under new commission house buying and short covering.

GM Raises Payout To $5.55 a Share

DETROIT, Nov. 1 (Reuters).—General Motors Corp. said today its board declared a year-end dividend of $3 a share on the common stock, payable Dec. 10 to holders of record Nov. 10.

The company said this declaration brings to $5.55 a share the amount of dividends paid in 1976, exceeding the previous $5.25 a share paid in 1973 and 1965.

GM did not pay a year-end dividend last year, but only a 60-cent-a-share fourth-quarter payment.

Eurodollar Borrowings

WASHINGTON, Nov. 1 (Reuters).—Liabilities of U.S. banks to their foreign branches rose $1.66 billion to $5.46 billion in the week ending Oct. 20, the Federal Reserve Board reported. This was $3.32 billion higher than the level of Eurodollar borrowings in the week ended Oct. 22, 1975.

Bank to Cut Prime Rate

NEW YORK, Nov. 1 (Reuters).—Chemical Bank said it will cut its prime rate to 6 1/2 per cent from 6 3/4 per cent, effective Wednesday.

Home Outlays Rise in U.S.

WASHINGTON, Nov. 1 (Reuters).—U.S. construction spending rose 1 per cent to a seasonally adjusted annual rate of $149.4 billion in September from an upward revised $148.1 billion in August, the Commerce Department said.

The department originally reported construction spending at $146.4 billion in August. In September, 1975, construction spending was running at an annual rate of $136.3 billion.

During the first nine months of 1976, construction spending totaled $106.9 billion, compared with $96.4 billion during the same period in 1975.

The Commerce Department said spending on private construction rose to $111.7 billion in September from $110.3 billion in August, with spending on residential buildings increasing to $62 billion from $60.1 billion.

Spending on new housing units rose to $48.5 billion in September from $46.6 billion in August, with one-unit spending increasing to $41 billion from $39.4 billion, while spending on structures with two or more units also rose slightly to $7.5 billion from $7.2 billion.

However, spending on nonresidential buildings fell to $25.7 billion in September from $26.6 billion in August, while public construction spending was little changed overall at $37.6 billion in September compared with $37.8 billion in August.

The Commerce Department said new construction spending in 1967 dollars also showed a 1-per-cent increase in September at $73.6 billion at a seasonally adjusted annual rate, compared with $73.1 billion in August.

Markets Closed

All markets and banks were closed Monday in Belgium, France and Italy for the All Saints holiday. The holiday continues through Tuesday in France. All stocks and commodity exchanges and banks throughout the U.S. are closed Tuesday for Election Day.

In the third quarter...

improved earnings reflect continuing worldwide demand for Allis-Chalmers equipment.

Results for the nine-month period ended September 30:

	1973	1974	1975	1976
Net Income (millions)	$ 12.0	$ 17.7	$ 21.6	$ 46.9
Earnings per Common Share	$ 0.96	$ 1.41	$ 1.71	$ 3.61
Sales (millions)	$855.7	$901.1	$1,067.1	$1,150.7

The third quarter of 1976 was the 19th consecutive quarter in which earnings improved, in comparison with the same quarter of previous year.

The world needs more of what Allis-Chalmers makes.

ALLIS-CHALMERS

Serving the vital areas of food...water...energy...minerals.

ENEL (THE ITALIAN NATIONAL ELECTRICITY AUTHORITY)

ELECTRICITY SERVICE

ENEL (Ente Nazionale per l'Energia Elettrica), the Italian national electricity authority, was established pursuant to Law No. 1643 of 6 December 1962. By end-1975 more than 8 million new consumers had been connected to the ENEL distribution networks since the beginning of 1963: during that period ENEL met an increase of 147% in demand by direct consumers. At 31 December 1975, therefore, the number of consumers supplied by ENEL amounted to more than 22.7 million and electricity invoiced during 1975 to direct consumers to more than 93 billion kWh. In the performance of its institutional functions ENEL has encountered many and varied, and sometimes extremely serious, difficulties.

For example, the construction of new generating plants has for many years been delayed, if not prevented, by persistent opposition on environmental grounds, which has resulted in a progressive diminution of reserve margins, the availability of which is indispensable for ensuring continuity of service. Despite these circumstances, by means of efficient coordination of production and transmission, ENEL has succeeded in providing coverage of power requirements with a degree of continuity of service no lower than that achieved in the other more industrially-advanced countries.

INVESTMENT

In 1975 ENEL investment expenditure amounted to 1,012 billion lire, accounting for 13.3% of total Italian industrial investment. Overall investment by ENEL between 1963 and 1975 totalled more than 7,020 billion lire, of which almost 3,050 billion was for extending and raising the capacity of distribution networks: this latter figure indicated the magnitude of ENEL's commitment to meet the mounting needs of an ever-increasing number of consumers, also in very small and remote villages.

FINANCING REQUIREMENT AND REVENUES

Between 1963 and 1975 ENEL had to meet a financing requirement of almost 10,800 billion lire, for new plant investment, for the settlement of indemnities to enterprises that had been nationalized, for the redemption of loan bonds at maturity, etc.; whereas, until July 1974, electricity tariffs remained frozen at the 1959 levels, while the cost of materials, of money, of labour was rising continuously, often steeply. However, apart from the introduction of a 44% thermal surcharge, in relation to the higher cost of fuel oil (which rose fourfold after the outbreak of the oil crisis), the tariff increase obtained in the summer of 1974 was, on average, only 22%, while already by end-1973 wholesale prices had risen by 85% since 1959. And the past two years have seen a further escalation of the cost of goods and services, accompanied by considerable increases in labour costs, attributable principally to the increments based on the mounting cost-of-living index: factors which have obviously resulted in a further deterioration of the disequilibrium between ENEL's operating costs and revenues.

The causes underlying the present situation range beyond the now general awareness that the context in which ENEL is managed is heavily conditioned by factors and situations extraneous to routine operating factors and situations that are, in turn, significantly influenced by the evolution of the Italian economy. From the viewpoint of financial results, the situation has been aggravated by the fact that the ENEL establishing legislation made no provision for an endowment fund or for easing of the borrowing burden for the payment of indemnities to the nationalized enterprises: the French and British undertakings, which over the years have obtained substantial tariff increases, enjoyed both these facilities; but, in ENEL's case, the amount of indemnity payable was larger and the terms and conditions of payment much more severe. It was only in 1973 that ENEL was granted an endowment fund, and then only in the amount of 250 billion lire, to be disbursed in five annual installments of 50 billion. At end-April 1976 the endowment fund was increased by 2,000 billion lire (disbursable over the period 1976-1980), in the context of the provisions of the National Energy Programme approved by CIPE (Interministerial Committee for Economic Planning) at end-1975.

As a consequence of the factors outlined above, the ENEL Accounts for financial year 1975 closed with a loss of approximately 542 billion lire, after provision for a depreciation appropriation amounting to 343 billion lire.

OPERATING COST ECONOMIES AND HIGHER PRODUCTIVITY

ENEL has at all times devoted maximum effort to achieve all the economies enabled by the scale of operations and by the unification of management and has pursued the technical and economic rationalization of all its activities, with the object of raising productivity and of reducing operating costs, compatible with a high standard of reliability and quality of service.

The principal related measures include:

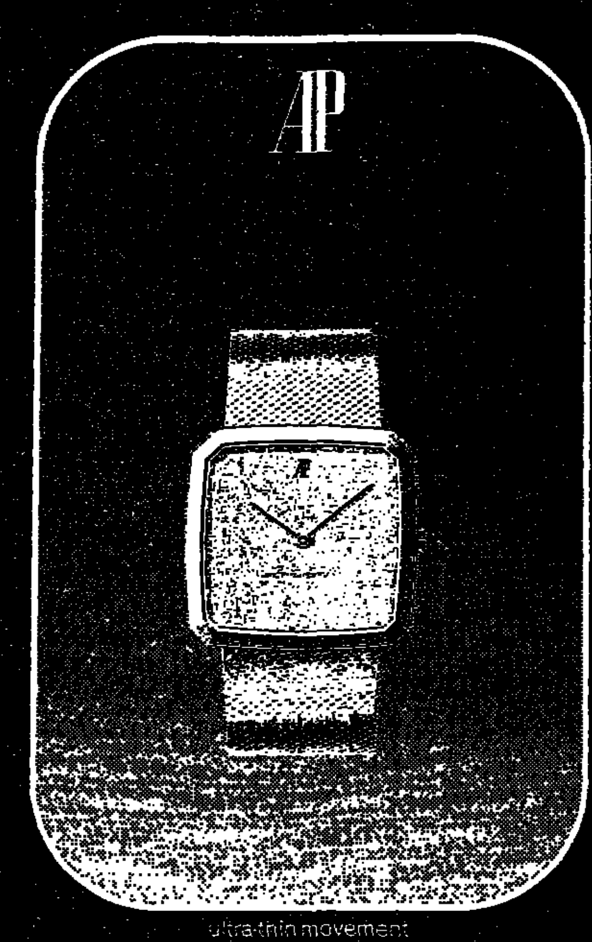
- □ Coordination, at national level, of the operation of generating plants and centralized management of the primary transmission system (technico-economic dispatching).
- □ Installation of standardized large-capacity thermal power units, at lower unit capital costs, with a high degree of efficiency.
- □ Containment of the financial requirement for investment, at parity of capacity demanded by consumers, with the development of pumped-storage plants, for which the unit capital cost is roughly half that of nuclear plants.
- □ Extensive automation and remote-control of generating plants and sub-stations.
- □ Widespread utilization of computerized systems for management, planning and plant-design activities.

The more significant results obtained from these measures are:

- □ Reduction of the financing requirement, by more than 1,000 billion lire, for pumped-storage plants already completed or under construction.
- □ Reduction by 10% of the specific consumption of conventional fuels, with a saving of approximately 150 billion lire in 1974 and 1975 alone.
- □ Reduction by 29% of the mean power path on the primary transmission system.
- □ Reduction by 20% of transmission and distribution losses.
- □ Higher productivity: expressed in terms of generating plant capacity per employee (excluding personnel of former contract service firms), productivity rose from 174 kW prior to nationalization of the electricity industry to approximately 330 kW at end-1975.

PLANT INVESTMENT PROGRAMME

ENEL's executive programme for the construction of new generating plant covers the period up to and including 1983. The programme, already at an advanced stage of development, consists as follows:



Type of plant	GROSS MAXIMUM CAPACITY (MW)
Hydroelectric	5,227
Geothermal	15
Conventional thermal	14,415
Nuclear	5,850
Total	25,507

Taking also into account investment in new generating plant that will be planned, and for which construction will commence. in the next few years and which will be commissioned after 1983, as well as investment for development of the transmission system and distribution networks, ENEL investment for the period 1976-1980 inclusive is estimated at more than 11,000 billion lire.

Presented by ENEL

Sales figures are unofficial.
Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.
a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. f—Declared or paid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.
x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.
cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.
vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.
Year's high and low range does not include changes in latest day's trading.
Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

Selected Over-the-Counter Stocks

Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or paid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

INTERNATIONAL EXECUTIVE OPPORTUNITIES

Qualified Electrical Engineer

Capable of supervising large field construction projects. Required by important installation, construction and engineering French Group, Paris area.

Candidates must have at least 10 years experience in refinery and pipeline installations.

Must be fluent in English and willing to travel to Middle East countries.

Qualified Instrument Engineer

Capable of supervising large field construction projects. Required by important installation, construction and engineering French Group, Paris area.

Candidates must have at least 10 years experience in electronic and pneumatic instrumentation as well as telemetering systems, for refinery and pipeline installation.

Must be fluent in English and willing to travel to Middle East countries.

Please write to: Box D-5,532, Herald Tribune, Paris.

DIAMOND SHAMROCK TECHNOLOGIES S.A.,
an international electrochemical technology company based in GENEVA, Switzerland, requires

PATENT SPECIALIST

Candidate should be skilled and interested in the presentation of high technology patent specifications in the field of electrochemistry and able to assume a variety of important assignments in the worldwide corporate program of the company.

In addition to English, other Languages such as German, French and/or Italian would be helpful.

Must be Swiss or in possession of a valid work permit.

SEND C.V. to:
Directeur Legal and Patents,
Diamond Shamrock Technologies, S.A.,
3 Place Isaac-Mercier,
1201 Genève, Suisse.

EXECUTIVES AVAILABLE

ARABIC-SPEAKING FINANCE DIRECTOR

Native Arabic-speaker, Chartered Accountant (London), 37, nine years with American multinationals currently as Finance Director, considerable experience in U.K., Italy and French-speaking territories seeks challenging well-remunerated new post.

Write: Box D-5,534, Herald, Paris.

ADMINISTRATOR ARCHITECT/PLANNER

20 years experience coordinating design and construction of complex international projects. Responsible for establishing and managing companies in N.Y. and Paris. French and U.S. professional licenses, dual-citizenship, multilingual.

Box D-5,536, Herald Tribune, Paris.

PURCHASING MANAGER

16 years experience with American multinational companies in widely used consumer products (confectionery, food, hygiene), pharmaceuticals, ethical & hospital products. Fluent: English, French, Spanish, Arabic. Seeks position in France, Belgium, Spain or Greece.

Write for C.V.:
Box D-5,538, Herald Tribune, Paris.

CONSULTANT

Harvard MBA, White House staff, McKinsey & Co., 10 years in Europe, specialist in marketing, consumer/commodity trends and Middle East, seeks assignment.

Reply: 29 The Chine, London N10 3PX.

The "International Executive Opportunities"
TUESDAY, THURSDAY & SATURDAY

To place an advertisement, contact our office in your country (listed in classified advertisements on back page) or Mr. Ferrero, 21 Rue de Berri, 75380 Paris Cedex 08. Tel.: 225-28-90. Telex: 280509.

MARKETING MANAGER

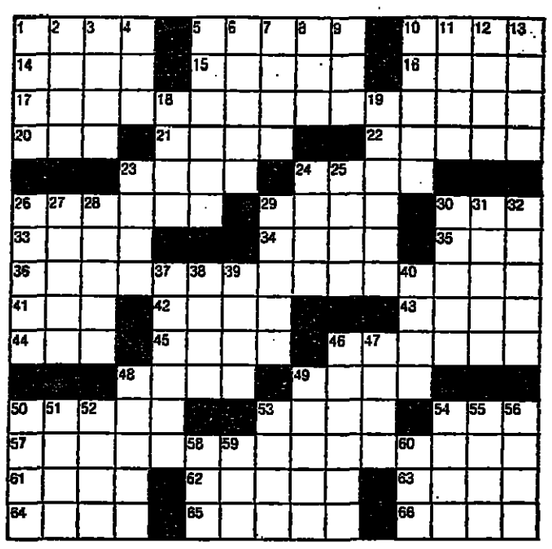
Base salary and substantial incentive compensation plan which provides an annual income of $30,000 to $60,000.

Requires extensive background in all of the following:
- Engineering Systems Sales;
- Technical Publication Sales;
- Micro Publishing Sales;
- Sales Administration.

Successful candidate will have bilingual capabilities specifically English and German and willingness to relocate to West Germany. Also the successful candidate will have the ability to conduct business discussion with Executive and Technical management of prospective customers. A background in computing and photo composition is needed.

Box D5,538, Herald, Paris.

You can afford to talk to ...rope's most affluent and influential audience.



An advertising campaign ... the International Herald Tribune ...sts less than in any other international medium.

Ask for Europe's only international daily newspaper on your next flight.

International Herald Tribune

Ask for it every day. Everywhere you go.

BOOKS

RAISE THE TITANIC

By Clive Cussler. Viking. 314 pp. $8.95.

THE SEVENTH POWER

By James Mills. Dutton/Henry Robbins. 236 pp.

Reviewed by Christopher Lehmann-Haupt

WHAT if there were a compelling reason to salvage the Titanic from the ocean floor where it sank in 1912? What if a bunch of crazy kids were to build a homemade nuclear bomb? These are the questions toyed with by two apocalyptic thrillers that ought at least to serve to pass a boring day or a sleepless night. In "Raise the Titanic!" Clive Cussler premises that something extremely valuable was stored in a vault of the ship when it went down—specifically, the world's only known supply of an element called byzanium, which is the key to the United States's ultrasecret Sicilian Project. (Don't think Mafia; think chess.)

The questions remain: Can the Titanic be found? Can it actually be raised? Will the Russians get wind of the scheme? Will they interfere? Will the co-designer of the project, Gene Seagram, win back his estranged and liberated wife or go gah-gah under the strain of the responsibility of it all? Will the byzanium really be in that vault once the ship is raised, and if not, what then? And Mr. Cussler—who seems to have a fondness and expertise for sea adventures, judging from the titles of his previous books, "Iceberg" and "The Mediterranean Caper"—does a good enough job of stringing out the answers to these questions to lull us into a state of adolescent fantasizing and keep us reading avidly.

We must be lulled into a preadult stupor, otherwise we'd never put up with some of the dialogue that Mr. Cusler has recorded in absent-minded moments. "This chasm between us has only opened in the last two years," says the liberated Dana Seagram to her husband, while trying to persuade him to give up the Sicilian Project for the sake of their marriage. "No," replies Gene firmly. "I created this project from nothing. My gray matter was its sperm. I must see it through to completion."

But if Mr. Cussler is bad at people and talk, he is good at ships and gadgets and storms. And he makes the most of his Titanic fantasy, infusing his pages with the lore of the liner's past and milking to the utmost the possibilities of floating the ship once again. Indeed, the moment that it does burst to the surface is even quite breathtaking.

Probably the strongest element of suspense in James Mills's "The Seventh Power" develops over whether the author can create an interesting scenario to illustrate the physicist Theodore B. Taylor's frightening message, presented by John McPhe book "The Curve of Energy," that since theoretically possible fo anyone to construct a device, one of these d one is going to do it.

Plausibility is no pr Mr. Mills, whose p previous books are pre nonfiction work "The Needle Park" and "Report to the Comm All it takes to bring City to the edge of a mixed-up young woma Alex, who happens to b at math and physics bourgeois classmate of Princeton with messia tions to alter the wo distribution and a Ha tough who knows wh nium can be heisted. I at all, we are fairly ed . . . and rooting for and the FBI men and a tive from the Atom Commission to save th slums from a fate w Hiroshima.

But since all of u much less time than 9 read 236 pages imagin scenarios to illustrate some Taylor proposi does Mr. Mills win out f of his own particular Very curiously, he does scribing in terms as a graphic as I have e across almost exactly goes about mixing ur sion bomb in the comfo own kitchen. (As on characters observes to she dons a pair of red checked barbecue glov move a crucible from "You look [like] some nuclear Julia Child.")

How is one to react instructions, especially ing the cry of outrage up when The New Yo of Books diagramed t concocting a mere Mol tail? One might we that Mr. Mills is tem or some madman by the word in so blatant To which Mr. Mills w ably reply that, like Theodore Taylor himsel wanted to dramatize h is to make a bomb so world would take the t seriously. (Besides, as out in his concluding technical information scriptions, including the employed by the cha construct nuclear weap been extracted from u material readily availa general public.")

But the sad fact is— it's the happy fact— take Mr. Mills's threat until it materializes in Like emphysema from automobile fatality from and other statistical pr a homemade bomb w a threat until it happe That's why "The Seven —so named because today six nuclear arms- nations in the world—l ing only for the length it takes to read it. On after we've finished it, gotten it. Come to th I can't even recall now wanted to raise the Tita

Christopher Lehmann-Haupt is a book reviewer for The New York Times.

BRIDGE — By Alan T.

The world's best players are clever in choosing the right moment to abandon the normal major-suit game in favor of the abnormal no-trump game.

The deal shown in the diagram is an example of this choice. As it turns out, three no-trump is quickly defeated by a heart lead, but four spades is quite tricky. Two of the bids made en route to four spades are questionable. North's two-club rebid suggested a more unbalanced hand, and two spades was certainly preferable.

A direct raise in a minor suit normally promises four-card support, so South was a club short when he raised three clubs. However, none of the possible alternatives was clearly superior.

One might expect South to lose a spade, a heart and a club to make four spades, but he ran into a smart defense from West and East.

The opening lead was the spade five, putting the defense ahead immediately since the declarer could be prevented from ruffing a heart in the dummy. South won with the queen and led a club to the jack in dummy. If East had won this, the declarer would eventually have scored 10 tricks, but East ducked, leaving the declarer under the impression that the king was on his left.

It seemed likely to South that the diamond king was on his right, so he made the expert play of a low diamond from dummy. This was the wrong play as it turned out, but it was hard to tell. If East had held the king and played it, the declarer would have had three diamond tricks available to him.

As it was, West won the diamond jack with the king and made another key play by leading a heart. South did the could by allowing East but East now shifted trumps and West played and another. The cont still in the balance bet position was this:

NORTH
♠ —
♡ 5
♢ AQ8
♣ A96

WEST
♠ —
♡ Q983
♢ 53
♣ 10

SOUTH
♠ Q8
♡ A4
♢ 7
♣ Q7

The defenders had give a hard time, and altho was still a road to 10 trick not find it. He shou cashed the club ace, led heart ace and cashed his trumps. This would have ed East in the minor suit

NORTH (D)
♠ K32
♡ J5
♢ AQ64
♣ AJ96

WEST
♠ A95
♡ Q9863
♢ K53
♣ 105

EAST
♠ —
♡ K10
♢ J10
♣ K8

SOUTH
♠ Q7874

Cowboys Beat Redskins, Raiders Top Broncos

Washington acks Big Play

y William N. Wallace

ASHINGTON, Nov. 1 (NYT). nition Cowboys and Redskins football fan and his immeassociation would be a battle gore and drama with either Kilmer or Roger Staubach ng some kind of late uprising either side. But such hisies did not come to pass yesy because the methodical s team was too much for ington. The Cowboys won, and it was a dismal affair in 5 neither Staubach nor er were in at the finish. ubach, the Cowboy quarterwas watching from the nes as Danny White, his unudy, ran the offense through last half of a quiet fourth ter.

orge Allen, the Redskins' h, had replaced Kilmer with Theismann as the last period n because, as Allen said later, weren't moving the ball."

e didn't make one big play," said, and his Redskin teams or die with the big play. "Oh Allen added, "Eddie Brown's return was a big play but me too late." A 59-yard re- by Brown set up the lone ington score, a seven-yard down pass from Theismann by Jefferson with 48 seconds to play.

Tried Blitzing

e cerebral skills of the rival hes, Allen and Tom Landry, on display. Allen, who has donation for constructing deses, decided to try blitzing the oy shotgun passing formawhich places Staubach seven s behind the line of scrimge. It worked in the early soas Staubach sent his backs as receivers and the outside ackers, Chris Hanburger and Dusek, poured in on him.

anbach was sacked three s in the first half and that eretical with the Cowboys. quarterbacks had been drop- only 13 times in seven pre- s games.

United Press International.

Redskins' John Riggins gains five yards before Cowboys' Charlie Waters makes tackle.

The Dallas offense was stymied by the first sacking, a 12-yard loss, and Landry next countered with a surprise of little meaning for the Redskins. Efrem Herrera, his field-goal kicker, faked a 52-yard attempt and punted instead, out of bounds on the Washington 12.

Then came a play that cost Washington a score. Harvey Martin, the Dallas defensive end who loves to attack quarterbacks, dropped Bill Kilmer for a 9-yard loss back to the Redskin 5. So Mike Bragg's punt from deep in his end zone carried only to the Washington 38.

Sitting Pretty

Butch Johnson, a Dallas rookie, returned that punt to the 20 and the Cowboys were sitting pretty. They scored five plays later when Doug Dennison drove over right tackle for three yards.

There was no scoring in the second period, but the Cowboys came out in the third quarter and drove 68 yards for their second touchdown to lead, 14-0. Staubach scored from the 1.

The Cowboys added 3 points to their lead on a 34-yard field goal by Herrera later in the third quarter. A Redskin turnover was responsible for the opportunity as Mike Thomas and Kilmer messed up a handoff and Thomas fumbled at his 20.

Another Washington turnover set up a second field goal by Herrera, one of 31 yards, making the score 20-0. Mel Renfro, the seasoned Cowboy cornerback, intercepted a pass from Theismann and returned 23 yards to the Washington 12.

Oakland Raises Record to 7-1

By Leonard Koppett

OAKLAND, Calif., Nov. 1 (NYT). —The Oakland Raiders, alternately lucky and awesome, took another stride toward a fifth straight divisional title in the National Football League by beating the Denver Broncos yesterday, 19-6.

In raising their won-lost record to 7-1, the Raiders produced their biggest victory margin of the season, having won previously by margins of 10, 7, 4, 4, 3 and 1 points. They now have a three-game lead over Denver and San Diego, who have 4-4 records, with six games to go.

The lucky part was that the Raiders trailed by only 6-3 at halftime, as Denver's offense moved almost at will throughout the first quarter and had to settle for two field goals instead of two touchdowns because of misfortunes that had nothing to do with Oakland—a too-much-time penalty and two *slips* by untackled ball-carriers.

The awesome part came when the Oakland defense took command in the second half and wound up sacking Steve Ramsey, the Denver quarterback, 10 times. Also eye-opening were a couple of Ken Stabler's long passes to Cliff Branch (for 43 and 52 yards), and a 31-yard touchdown strike on which Fred Biletnikoff made a spectacular catch, breaking a 6-6 tie two minutes into the final period.

The Raiders were also fortunate that they didn't pay a heavier price for passing up two sure field goals. In the last minute of the first half, on third down from the Denver 12, Stabler could have run out of bounds, but elected to try a touchdown pass into a crowded end zone, and was intercepted.

And in the third quarter, with the score 6-6, the Raiders tried for the yardage on fourth and one on the Denver 10, and didn't make it.

Rams 45, Seahawks 6

LOS ANGELES, Nov. 1 (UPI).—James Harris, returning to the starting lineup after a two-game hiatus because of a shoulder injury, fired two first-half touchdown passes as the Los Angeles Rams beat the punchless Seattle Seahawks, 45-6, to regain first place from San Francisco in the NFC West.

Harris, who was injured in a loss to San Francisco on Oct. 11, hit Ron Jessie and Harold Jackson for scores.

Jessie made a leaping 15-yard TD reception at 13:56 of the first quarter to give the Rams a 24-0 lead and Jackson caught a 20-yarder at 12:51 of the second period to put Los Angeles in front 31-3 at halftime.

Improving their record to 6-1-1, the Rams moved past the 49ers, who lost 23-20 in overtime at St. Louis, in their bid to win their fourth straight division title.

Jaworski Exit Hinted

LOS ANGELES, Nov. 1 (UPI). —"I guess I'm not in their plans." Ron Jaworski said with a smile. "Well, maybe they're not in mine."

Jaworski, the Los Angeles Rams' "Polish rifle," talked as he dressed quickly after his club's 45-6 rout of the Seattle Seahawks.

A week after he started and was relieved by rookie Pat Haden at New Orleans, the third-year pro didn't play a down. James Harris started and Haden came in with 7:16 to go.

Jaworski, who was a second-round draft choice of Los Angeles in 1972, is playing out his option this season.

A LONG TRIP—Peter Maravich of New Orleans heads for a fall after being tripped in game with Cleveland.

NBA Lakers Win Without Big Forward

INGLEWOOD, Calif., Nov. 1 (UPI).—Lakers coach Jerry West, who maintained at the start of the season that Los Angeles would have to acquire a big power forward to be competitive, is no longer talking about that need.

The Lakers, somewhat surprisingly, seem to be doing all right with the personnel they have.

Forwards Cazzie Russell and Don Ford paced a third-quarter outburst last night which lifted the Lakers to a 121-101 NBA victory over the Detroit Pistons in their second straight lopsided triumph at home. The victory evened their record at 3-3.

Russell and Ford combined for 19 points in the third period as the Lakers outscored the Pistons, 37-22, to turn a one-point halftime lead into a comfortable 93-77 advantage.

Los Angeles, which won its second in a row at home to square its record at 3-3, shot 57 per cent from the field in that period.

Ford had 11 in the quarter and 19 in the game. Russell netted 8 in the period and led all scorers with 23 points.

Sonics 126, Hawks 112

At Seattle, Bruce Seals scored 21 points, Willie Norwood 20 and Tommy Burleson 16 to lead the Supersonics over Atlanta, 126-112.

Seals scored 19 of his points in the first half as the Supersonics dominated the game from the opening tipoff.

Seattle led by as many as 33 points in the third quarter, but Atlanta narrowed the margin in the final period.

Cavaliers 106, Jazz 92

At Richfield, Ohio, undefeated Cleveland, with seven players scoring in double figures, hit on 11 of its first 12 shots in racing to a 106-93 victory over New Orleans.

After the Jazz, who hit on their first five shots before being shut out from the field for 5 1/2 minutes, took an 11-10 lead in the first period, the Cavs reeled off 15 straight points and opened up a 20-point lead at 52-32 with 3:44 left in the first half.

New Orleans, with Pete Maravich tossing in 14 points, bounced back in the third period and cut the lead to seven points with 6:37 left. The Cavs then reeled off six straight points and breezed to their fifth straight victory.

Bobby Smith led Cleveland with 17 points while Maravich got 27 and Gail Goodrich added 18.

Sunday's Games

Seattle 126, Atlanta 112 (Seals 21, Norwood 20; Hudson 24, Barker 19).
Los Angeles 121, Detroit 101 (Russell 23, Abdul-Jabbar 21; Lanier 18, Ford, Money 14).
Cleveland 106, New Orleans 92 (Smith 17, Snyder 14; Maravich 27, Goodrich 18).

NHL Flyers Are Recovering But Upcoming Trip Is Critical

PHILADELPHIA, Nov. 1 (UPI). —The Philadelphia Flyers have recovered from a shaky start but Bobby Clarke says their upcoming four-game road trip will determine how good they really are.

The Flyers extended their unbeaten streak to eight games last night and moved into a first-place tie with the idle New York Islanders in the National Hockey League Patrick Division by whipping the Minnesota North Stars, 9-1.

Clarke, who contributed two goals and four assists to the rout, was reluctant to say whether the Flyers have reached a peak following a 1-3 start.

"Well, you can't tell that until we get out on the road," said Clarke, last year's Hart Trophy-winner as the NHL's most valuable player. "That will give us a better indication whether we've reached a peak or not."

The Flyers are 6-0-2 in their last eight games and all six of those victories have come on home ice. But in the next 10 days the Flyers travel to Detroit, Cleveland, Buffalo and Chicago before returning home Nov. 11 against Vancouver.

Clarke, on a shorthanded goal, and Reggie Leach scored the first two goals of the contest, but the North Stars threatened to make a game of it when Dean Talafous scored at 8:00 of the first period to pull his team to 2-1.

The Flyers scored four goals in the middle period, three of them in the last four minutes, to run away.

Sabres 4, Bruins 1

At Buffalo, defenseman Jocelyn Guevremont scored his first two goals of the season on long slapshots to give the Sabres a 4-1 victory over Boston.

The loss snapped a four-game Boston winning streak. The Sabres broke to a 2-0 lead on goals set up after penalties to their club ended.

Guevremont opened the scoring with a 40-foot slapshot at 4:11 of the first period, 11 seconds after coming out of the penalty box, and defenseman Lee Fogolin made it 2-0 at 14:45 of the second period on a feed from Bill Hajt, nine seconds after a penalty to Hajt expired.

Black Hawks 5, Capitals 4

At Chicago, Dick Redmond and Grant Mulvey scored two goals apiece to lead Chicago to a 5-4 come-from-behind victory over Washington.

Redmond's game-winner broke a 4-4 tie midway in the third period. Washington jumped to a 3-1 first-period lead on goals by Hartland Monahan, Rick Bragnalo and Guy Charron, with Ivan Boldirev scoring Chicago's only goal on a feed from John Marks.

Mulvey and Charron traded second-period goals before Redmond scored to make it 4-3 Washington going into the final period. Mulvey scored the tying goal early in the final period to set the stage for Redmond's 50-foot blast, which beat Washington goalie Ron Low.

Red Wings 6, Rangers 5

At New York, J.P. LeBlanc scored his second goal of the game with 20 seconds to play to give Detroit and Eddie Giacomin a 6-5 victory over the Rangers.

LeBlanc's 15-foot backhander came 17 seconds after Rod Gilbert had tied the score for New York. The Rangers trailed 5-3 late in the game when Walt Tkaczuk got them back into contention at the 15:40 mark of the third period.

Giacomin, discarded by the Rangers exactly a year ago, came back to haunt former teammates and—except for a stretch of 6:42 in the second period when New York scored his first three goals, and the closing moments of the game—he was in control. The 37-year-old goalie has been in the net for all three Detroit victories this season.

NHL Results

Sunday's Games

Chicago 5, Washington 4 (Mulvey 2, Redmond 2, Boldirev; Charron 2, Bragnalo, Monahan).
Detroit 6, New York Rangers 5 (LeBlanc 2, Bloom, Polonich, Harvey, Maloney; Vickers 2, Hodge, Tkaczuk, Gilbert).
Philadelphia 9, Minnesota 1 (Clarke 2, Holmgren, Leach, Kindrachuk, MacLeish, Lonsberry, Kelly, Barber; Talafous).
Buffalo 4, Boston 1 (Guevremont 2, Fogolin, Savard; Doak).

U.K. Golf Prize Boost

ST. ANDREWS, Scotland, Nov. 1 (AP).—Prize money for next year's British Open golf championship has been increased to £100,000 ($160,000)—an increase of one-third over 1976. The Royal and Ancient Club, announcing prize money for the 1977 Open at Turnberry, Scotland, said the winner will get £20,000.

College Football Roundup

SC's Bell Loses Some Ground to Pitt's Dorsett

y Gordon S. White Jr.

W YORK, Nov. 1 (NYT).— Robinson, Southern Cal- a's rookie head coach, or- Ricky Bell out of the Tro- game with California mid- in the third quarter Satur- The coach did not want to serious injury to the big back, who was running with a e of nagging but not serious ies.

was a difficult decision for oach since his star back is two-man battle with Tony rt of Pittsburgh for the Heisman Trophy as the outing collegiate football play- the nation.

ll received a hip-pointer in pening period against Ore- State a week ago and had to that game. Then he twisted ft ankle on the third play e second half while South- California was beating Cali- a, 20-6.

binson said, "The new in- to Ricky was an ankle n. It was getting sore and as running less than full . Ricky has just had a se- of bad luck."

h 78 yards in 24 carries be- leaving the game, Bell was d to relinquish his national rship in yards gained rush- his season. His rival, Dor- replaced him as the Pitt ck ran for 241 yards against use. Dorsett has 1,313 yards he season while Bell, who ed to third place on the na- l list, has 1,154 yards. An- ferrara of Southern Illinois for 185 yards against Indiana to increase his total to yards.

Increased Total

sett, who set a major-col- career rushing record a ago, became the leading r in college football history day, as he increased his year total to 5,447 yards. He hree games remaining.

Heisman Trophy is decid- the votes of hundreds of sportswriters and broadcasters across the nation.

While Dorsett was adding to his records, Syracuse gave undefeated Pittsburgh a scare or two before the Panthers won, 23-13. The Orange's sophomore quarterback, Bill Hurley, set a Syracuse record for total offense in one game—315 yards. Hurley, a tailback as a freshman last year, carried 23 times on the option for 112 yards and completed 9 of 18 passes for 203 yards. This broke a nine-year-old Syracuse mark of 265 yards set by Rick Cassata, who was quarterback when Larry Csonka played for the Orange.

Michigan No. 1

Pitt, ranked No. 2, probably held on to its spot in the polls, but got no closer to No. 1 as powerful and unbeaten Michigan trounced Minnesota, 45-0. Both the Michigan offense (418 yards against Minnesota) and the defense were superb. But the big question still hangs over Michigan. Have the Wolverines played a really good team yet?

The longest major college winning streak remained intact and grew to 15 victories in a row as Rutgers beat Massachusetts, 24-7. Each of the other four major undefeated and untied teams won Saturday—Colgate beat Boston University, 21-14; Southwestern Louisiana beat Texas, Arlington, 31-24; Maryland beat Kentucky, 24-14, and Texas Tech beat Texas, 31-28.

Texas Tech's triumph may have been its most difficult test on a road to an unbeaten season and the Cotton Bowl, although the Red Raiders still have to play Arkansas on Nov. 27.

Ivy League

Brown resorted to basic football, ran well at just the proper times, to beat Harvard, 16-14, in the struggle for the Ivy League title. Coach Joe Restic of Harvard tried the single wing, the double wing, an unbalanced line for each, and his normal assortment of tricks and multiple offenses. It didn't work and Brown moved within grasp of its first Ivy League championship or share of the same.

Yale beat Cornell by a touchdown to remain in a tie with Brown for the league title as the defending champion, Harvard, fell back to a third-place tie with Dartmouth. Now Brown must get by Dartmouth Saturday to begin to breathe easily. Brown will face Columbia on the final Saturday of the Ivy season, Nov. 13. Yale will play Harvard in the game that day. The Ivy title will be settled that final day, the usual practice of this league.

Some officiating decisions came in for strong reactions at West Point Saturday. Air Force coaches were unhappy that the Falcons were penalized 10 times for 101 yards while Army got only two penalties for 10 yards as the Cadets won, 24-7.

Those Million-Dollar Babies

Baseball to Conduct Bazaar of Expensive Pros

By Red Smith

NEW YORK, Nov. 1 (NYT).—Baseball's first mass venture into the precious gem market will take place Thursday, and it is conceivable that the U.S. electorate will take almost as lively an interest in this historic event as in the decisions made two days earlier.

If a single World Series game can capture more than 75 million watchers, which was just a shade under the total popular vote in the last presidential election, then more than several citizens will pay attention when players like Joe Rudi, Bobby Grich and Don Gullett place their carcasses in a showcase.

Unless private agreements have been reached under the table, no deals for this warm merchandise will be consummated on Thursday. The draft is a preliminary auction in which the 24 clubs now in the majors—not counting those embryos in Seattle and Toronto—divide among themselves the right to negotiate with players who worked out their options in the season just completed and became free agents. It is unprecedented in three important respects.

Costly Livestock

Whereas all previous drafts of free agents dealt with untried talent fresh out of high school or college or off the sandlots, this bazaar offers only established professionals, including some of the most expensive livestock this side of Secretariat's offspring. Instead of one club getting the exclusive right to hire a player, as many as 12 clubs may claim the privilege of making him an offer. Finally, this is the first time the serfs have been free to put themselves on the market and pocket the proceeds.

Something like 25 players are in this category, but the number could change. All free agents have until midnight Sunday to accept terms with the clubs that owned them last season and there is still time for other players to break loose, as Oakland's Nate Colbert did the other day.

When club representatives meet Thursday morning, the names of the free agents will be posted. Starting with the Montreal Expos, who finished at the bottom of the National League, teams will make selections in inverse order of their standing, with the Yankees coming last. Suppose the Expos named Reggie Jackson and the White Sox also chose Jackson and the Braves picked Doyle Alexander. It would go on like that until Jackson, say, had been selected by 12 clubs. His name would be scrubbed from the list and the draft would proceed as long as any club was interested in any player still in the pool.

After the draft, each player may dicker with all the clubs that selected him, plus his old team. A club may claim the right to negotiate with as many players as it wishes but it may sign no more than two unless it lost more than two as free agents. In that event it may hire as many as it lost. If a club could put in a claim for every player in the pool before he had been named 12 times that would be permissible.

Bob Howsam of the Cincinnati Reds has said the champions would take no part in the draft. Charlie Finley hasn't said, but if all his unsigned helots stay unsigned, Oakland would be entitled to replace eight—Rudi, Bert Campaneris, Sal Bando, Gene Tenace, Rollie Fingers, Don Baylor, Willie McCovey and Colbert.

Terms agreed on in July provide that any player signing a contract after Aug. 8 would be governed by the "new form" of contract, meaning he would have to play in the majors six years before he could become a free agent. Colbert, who signed after Aug. 9, already had his six years in. Within the limit of 15 days after the World Series, he filed notice that he wanted free agency. He got it the other day.

Finley's $10-million damage suit against Bowie Kuhn opens in federal court in Chicago soon after the draft. The owner of the A's sued when the baseball commissioner vetoed his sales of Rudi and Fingers to Boston for $1 million each and Vida Blue to the Yankees for $1.5 million.

Damages Possible

If the court rules that Kuhn exceeded his authority, chances are it can only assess damages. It could hardly rule that the players were the property of the Red Sox and Yankees, for even if the deals had gone through, Rudi and Fingers would be free agents now unless they had elected to sign for 1976.

Blue had signed a three-year contract with the A's shortly before the abortive sale. Inasmuch as he had publicly, candidly and emphatically hated Finley's guts for years, it was assumed that he had signed only to facilitate his transfer to the Yankees. In those circumstances, it seemed unfair and unfeeling for Kuhn to turn him back into Finley's clutches for three more years.

It turns out now that Vida loves those clutches. He had done a complete turnabout and decided Oakland was where he wanted to be, and had signed on the promise that he would not be sold or traded. When his sale to the Yankees was announced, he was furious at Finley for lying to him, but he still obeyed Kuhn's order to stay in Oakland.

If Vida's love-hate relationship with Finley seems confusing, well, these are divine passions that the poets have tried for centuries to dissect and catalogue. If the puzzle stumped Edgar Guest, don't look for solutions here.

ping Charges Dutch Soccer ing Probe Call

E HAGUE, Nov. 1 (UPI).— es by a club doctor that g is being widely used in soccer has brought a call government inquiry from members of parliament.

Jan Van Rompu, doctor of AZ67 Honor Division club, the charges following a rough match between his and Roda JC. He said the s of some of the Roda s were consistent with the oms of athletes who had doped.

nitting that he had supplied s with "certain substances past," the doctor called for Royal Netherlands Soccer ation to institute dope s.

e members of the lower of parliament demanded a nment inquiry to clarify the ion since rumors of doping discrediting the sport, they

n Rompu said that many doctors are not involved in loping. Players got drugs trainers, he said.

Art Buchwald

The Work Ethic 1976

WASHINGTON—One of the big issues of the presidential campaign has been unemployment. We've had so many different figures on who is out of work and who isn't that nobody knows what to believe any more. One of the reasons we can't get hard figures on unemployment is that there is a certain segment of the population that isn't sure whether it wants to work or not.

Buchwald

Sometimes this segment is included in the figures and sometimes it isn't.

I discovered this the other day when I was having a drink with my friend Clancy.

Clancy has a 21-year-old son who is unemployed. As Clancy explained it to me, his son Robert is screwing up the unemployment statistics because some days he wants to work and other days he doesn't.

"This morning I went into Robert's room," Clancy said, "and he was sacked out after arriving home at four in the morning. I shook him and asked him if he was going to look for work today. He *said* he *might* in the afternoon. I told him most jobs advertised in the newspapers were taken by afternoon, and that if he was *serious* about wanting a job he had to get up early in the morning to find one. Was I being unreasonable?"

* * *

I told Clancy I didn't think so.

My friend said, "The problem seems to be that Robert isn't certain he wants a job. He claims that most of the jobs being offered are not very interesting and require you to do things you weren't trained to do."

"What is Robert trained to do?"

"Nothing," Clancy said. "He has three years of college and majored in psychology. There are very few jobs open for someone who has three years of psychology. It's not enough psychology for some personnel managers, and it's too much psychology for others."

"Did he say what he would like to do?"

"He isn't sure. He told me he would like *to make a lot of* money so I wouldn't bug him all the time about getting a job. I think he would like to start off as an executive vice-president of a large corporation where he could get stock options and bonuses at the end of the year and have the use of the company airplane on weekends."

"Well, you have to admit he has set his sights high."

"In one way he has, but in another way he says while he wants to make a lot of money, he doesn't want *to be corrupted* by the system. He told me he's not going to 'sell out.'"

"That's admirable," I said. "I admire someone who wants to make a lot of money and doesn't want to 'sell out.' He hasn't told you how he plans to do this, has he?"

"He says in our system it can't be done, so why should he look for a job?"

"That three years of psychology must have had a big impact on him."

"I feel terrible about it," Clancy said, "because I know Robert is being carried on the labor statistics as being one of the 7,800,000 unemployed. It's correct that he isn't working, but if he isn't looking for a job I'm not certain that he isn't flying under false colors. There are so many sincere people trying to find jobs that it seems unfair to have someone like Robert lumped in with them. I guess there are thousands of kids like him who want to start at the top, so it's impossible for the Labor Department to know how many jobs they have to provide to make the economy strong again."

"Maybe Congress could pass a special bill for people like Robert. They *could set aside 300* or *400* executive vice-presidential positions that kids who dropped out of school could apply for," I suggested.

"It would be a solution," Clancy admitted, "providing the government was willing to interview them after 2 o'clock in the afternoon. You can't expect kids like Robert, with their educational backgrounds and upbringing, to start looking for work in the morning."

Moscow Refuses Visa For U.S. Professor

MOSCOW, Nov. 1 (AP).—The Soviet Union has denied a visa to an American political scientist who was to have addressed Soviet officials and journalists here Wednesday on the results of the U.S. election, embassy sources said yesterday.

Prof. Jeane Kirkpatrick of Georgetown University had been scheduled to analyze the election results at the residence of the U.S. ambassador. A number of Soviet institutions had also invited her to address them.

An embassy official said no reason was given for refusing the visa. The official said the embassy would be expressing its "profound disappointment" to the Russians, though not in the form of a formal protest.

Observing the Obscenities

By Alfred Friendly

LONDON (IHT).—Such a multitude of entries for Waverley Root's monumental "Food: An Informal Dictionary" have appeared over so many years in the IHT that I must have missed many of them, including possibly one dealing with garlic. I rather doubt that Mr. Root wrote such an article, however, for he is not only a man of impeccable palate but also a gentleman whose decency would deter him from discussing an obscene subject. Nevertheless, garlic is still used as a food among many barbarian peoples and therefore must have some mention in Mr. Root's great compendium. Someone must write it for him and I have volunteered.

Garlic, *Allium sativum*, is closely related to other species of the same family, as for example *A. abominabilis*, *A. nauseafaciens* and *A. emetikos*, and is, in fact, indistinguishable from them (it is not to be confused, however, with the "garlic" that is a component of garlic bread, garlic salt, etc., which is, of course, pure strychnine (C21 H22 N2 O2). It first appears in literature as one of the prohibited, or *trayf*, items listed in Leviticus, but it is known to have existed since the early Tertiary period. Certain pre-Cambrian basalts show a characteristic pockmarking, where the previously existing stone has corroded to dust and blown away, thus betraying the former presence of the garlic clove.

The French word for garlic, *ail* (pronounced "*Eh!*", a truncation of the expression "Ei Weh!") is onomatopoeic, the cry of a person confronted by someone who has just eaten it. The German name, *Knoblauch*, was deliberately chosen for it by the Brothers Grimm when they were compiling the language, because that is just what garlic tastes like. Margaret Mead reports that the Tobriand Islanders, a notoriously backward people, call it *cilrag*.

The Encyclopaedia Britannica declares that it has "a deciduous spathe and a globose umbel," which is pretty rough language for a publication intended for reading by all the family; but, really, how else could one say it and still tell the truth?

Garlic is the world's most effective contraceptive inasmuch as its consumption deters any approach, sexual or otherwise, to the consumer. The effect lasts several days and unfortunately is renewable. One recalls Catullus's morose twisting of Virgil's "*Omnia vincit amor*" into "*Amorem vincit allium*." Rabelais points out that the only means available to 16th-century parents in Paris for preserving their daughters' virginity until they were 9 or 10 years old was to feed them frogs' legs *provençale* every other day.

The Ancients were well aware of this anaphrodisiac property of garlic. Herodotus tells how Cyrus was unable to overcome a fierce Scythian tribe, the Kressents, until he infiltrated them with agents who persuaded them that garlic would make them invincible in battle; gullible, they swallowed both the stratagem and the garlic. Cyrus just waited around until the tribe died out in one generation. They have been known to history ever since as the Infertile Kressents.

The Greeks—the ancient and at that time civilized Greeks, that is—detested the stuff. Plato's explanation for the disappearance of the continent of Atlantis was that the gods sank it beneath the waves for its inhabitants' sin of being the first to cultivate it (and sycamore trees). In his "Apology," Plato records what must have been one of the earliest "sick jokes" in history: Socrates's judges offered him a choice between *drinking* hemlock and *eating* a dish of eels stewed in garlic.

The only known constructive employment of garlic is that of the N'Gaya, a Bantu tribe in the Drakensberg, who require lepers to wear a sachet of garlic (marinated with cummin, *court bouillon* and *oursin* around their necks. This is a cheaper warning than the conventional tinkling bell and of wider effectiveness.

There is no mention of garlic in Linnaeus's great work of classification, "Genera Plantarum." When asked by a friend to explain the omission, Linnaeus replied with dignity:

"Sir, I am a botanist, not a pornographer."

Sailboating in the Seas of Socialism

By Robert C. Toth

TALLIN, Estonia.—Boating is booming in the Soviet Union, relatively speaking.

More than 3,000 Olympic-class sailboats are in the country, according to the Soviet Sports Committee, and more than *30,000* sailors. In 1953 there were only 11 boats.

The 10-to-1 ratio of sailors to boats tells a good deal about sailing in Socialist seas. Virtually no one owns a sailboat, primarily because of the expense. A 21-foot sloop costs 5,000 rubles ($6,500) homemade, which is three times an engineer's annual salary and four times a doctor's.

Yet sailing itself is cheap, because *most of the boats* are owned by yacht clubs, of which there are 120. Membership costs 3 rubles ($4) a year.

At the Kalev Yacht Club in Tallin, Estonia, where the harbor is being expanded and deepened (at a cost of 19.5 million rubles) for the 1980 Olympic sailing races, the procedure for becoming a member is said to be as follows:

The applicant must take a sailing course given by the club (cost: 2.50 rubles) through the fall and winter, help repair boats during the spring, sail trainers (10-foot square-nosed Optimists) in summer and pass a final exam when the season ends.

As a member, he can crew on one of the club boats—the 22-*foot*, *three-man*, *8,000-ruble* Folksboat is a favorite—and if he perseveres through more courses and apprenticeships, he can one day be qualified as a skipper, according to Peter Leola, the Kalev club's chief trainer.

The club has 1,500 members (100 of them skippers) and 150 boats, he said. It recently placed ads in newspapers and on television to announce a new beginning course, just as it does every year.

"But the popularity of sailing has increased so much that this year for the first time we have to form two classes instead of one," Leola said.

While none of the boats here is individually owned, down near Riga in Latvia, at the Daugava Sports Club, there is a form of de facto ownership. The 300-odd members favor building their own boats, usually the 21-foot sloops. A team of eight to 10 men get together and work for several years under the direction of a master boat *builder* employed by the club.

"The wood and some equipment comes from the club," explained a member, Edic Hodaty, but much of it must be bought by the team. So when the boat is finished, it belongs to the club but is assigned permanently to the team to sail.

If a team member leaves the area, he could sell his share in the boat, "but this seldom if ever has happened," Hodaty said.

While all yacht clubs have ostensibly the same membership requirements (3 rubles a year and two recommendations from current members for admission), there were discernible differences between the Riga and the Tallin clubs. The Riga group tries to limit membership and has more of a clubby feel, in the social sense, with members tending to be well-paid scientists, writers and teachers.

Sailing for Baltic peoples is an old tradition—the annual 1,000-mile Baltic Cup Race, attracting entries from six European nations this year, remains a major event—as well as for Leningraders, whose founder, Peter the Great, organized the first Russian yacht club in 1718. He particularly liked sailing the Neva river between his city and Lake Ladoga.

Except for its long Arctic coast (and even there, there is a yacht club in Archangel), the Soviet Union is a relatively landlocked country, so much sailing is done on rivers, lakes and reservoirs. Moscow, although far from the sea, has seven yacht clubs, more than anywhere else in the country.

On these lakes and rivers, sailboats and motor boats mingle. But in the clubs, they never mix.

Kiev is said to be the center of motorboating, with nine marinas and an estimated 25,000 boats. In all, the Soviet Union reportedly has 1 million small motorboats, although a great many are used primarily by fishermen or hunters.

Here, too, sailing men sneer at the motorboaters. Power boats "seem too much a part of the city with their gas smell and noise and rush," said a Moscow skipper, Yuri Krylov. "Now sailboats are part of nature... part of the romance of the sea. Of course our Klyazma reservoir is not exactly a sea, but..."

PEOPLE: *Ruth Gordon at 80—Voices at the Colonial*

Actress Ruth Gordon celebrated her 80th birthday this weekend by going home—to Quincy, Mass.—in triumph. A ball and a banquet in her honor gave the city fathers the occasion to announce a project: the creation of the Ruth Gordon Center for the Performing Arts. It will be built on land donated by the heirs of another native son: John Adams. Before heading south to her hometown, Miss Gordon and her husband, Garson Kanin, were in Boston ambling across the Common to the Colonial Theater. It was there, she told Mel Gussow of The New York Times, that 65 years ago she heard "my voices. Joan heard hers at Domrémy, mine came through at the corner of Boylston and Tremont, Boston, Mass. My voices said 'Go on stage. Ruth go on stage! Be an actress.'"

Ruth Gordon

The royals: Dutch Crown Princess Beatrix and her husband Prince Claus are in Egypt for a one-week "informal working visit." Norway's King Olav is in London for a two-week private visit.

And meanwhile, Prince Charles, heir to the British throne, says he will leave the Royal Navy Dec. 15. He's been in command of a minesweeper for nine months, an experience which has left him with a strong distaste for rough seas. Now he knows what it's like to be seasick. "I get nightmares just thinking about it."

* * *

Actor Paul Newman, 51, finished first in Sunday's national championships for the Sports Car Club of America's production division. He was driving a TR-6 in the Flowery Branch, Ga., event. "I feel terrific," said Newman. "On a spectrum of 10, this ranks in the high nines. This is one of those things where your ambition is greater than your talent. It's the same way with acting."

Paul Newman

* * *

The faithful got together Sunday in Detroit to see if Harry Houdini would finally keep his promise. He didn't. For 50 years a group of the magician's followers have gathered for a memorial service in the hospital room where he died. Houdini had promised he would try to get some kind of message back from the other world. So far, no luck.

* * *

Lillian Carter told a Cincinnati audience Friday that she couldn't imagine a Miss Lillian-Betty Ford political ticket.

"I just can't see it," said the mother of Democratic presidential candidate Jimmy Carter in answer to a question about how she reacted to a statement by Mrs. Ford, who said such a ticket might be interesting. "She's not a country woman like I am. I fish and she dances. She's dull. She smiles a lot but I've hardly ever heard her say anything worthwhile."

And then—performing a pirouette—Miss Lillian: "I've never met Mrs. Ford. I'm sure if I met her I'd li[ke her] very much."

* * *

When country-Western [singer] Merle Haggard failed to sh[ow] for two weekend performa[nces] in Denver and Salt Lake [City] police started looking for [him]. But Haggard is all right. [He] phoned the next club on h[is itin]erary—Harrah's in Ren[o—and] said he was canceling. "T[he] pressure got a littl[e too] much," said a friend, "and [he de]cided to take off a few day[s." A] spokesman for Harrah's sa[id] Haggard broke the date for [per]sonal reasons."

Near-Record Voter Turnout Is Reported Across the U.S.

Race Still Too Close to Call

WASHINGTON, Nov. 2 (IHT).—Unusually heavy turnouts were reported today as Americans chose between Gerald Ford and Jimmy Carter to lead the nation as president for the next four years.

Generally sunny skies contributed to the balloting in both urban and rural areas. Massachusetts State Secretary Paul Guzzi called the turnout "amazing." Leaders of the NAACP in Indiana predicted a record turnout of black voters in the pivotal state.

Historically, a big vote favors the Democrats, the majority party. If the trend continues through the day, analysts agreed, it could help Mr. Carter in his bid to oust Mr. Ford from the White House.

Long lines were reported in many states, including Massachusetts, New York, Michigan, Texas, Pennsylvania, North Carolina, Texas and Colorado.

The analysts said they expected the election to be one of the closest of the century.

A poll by the Roper organization, however, showed Mr. Carter with 51 per cent and Mr. Ford with 47 per cent. The survey, taken for the Public Broadcasting Service, had a three-point margin of error either way.

The tight race projected yesterday in the Harris poll, which gave Mr. Carter a 48-45 per cent lead over Mr. Ford, was in line with polls announced by other research groups. George Gallup's latest poll found the race too close to call, with Mr. Ford in the lead by 47-46.

Dead Heat

A National Broadcasting Co. poll announced yesterday called the race a dead heat at 41 per cent each with former Sen. Eugene McCarthy at 6 per cent. NBC said that when the interviewees were asked who they supported without Sen. McCarthy being listed, Mr. Carter held a 44-43 per cent edge, while "others" got 1 per cent and undecided 12 per cent.

Mr. Ford and Mr. Carter made last-minute television appeals to the voters last night.

In a campaign marked for the first time by federal government restrictions on spending, and with the bulk of that spending going for television, the candidates poured most of their remaining resources into prerecorded presentations that occupied television screens for three solid hours, with Mr. Ford and Mr. Carter appearing in succession on one network after another.

Both the Carter and Ford TV productions were slick in execution, but they broke no new ground on issues.

While the nominees' images flickered on millions of television sets, they spent election eve in close combat for the 21 electoral votes of pivotal Michigan, where final polls showed the President clinging to a slim lead in his home state.

Mr. Ford, who had earlier made a final bid for support in Akron, Canton and Columbus, Ohio, ended his quest for one of the great come-from-behind victories in U.S. political history outside Detroit and in his home town of Grand Rapids. He returned to the White House today after voting.

Mr. Carter completed his exhausting two-year campaign for the White House at a rally in Flint, Mich., carrying the fight onto his rival's home ground. Earlier, he made one last effort at a rally in Los Angeles to reverse an apparent Ford trend in California. He voted this morning in Plains, Ga.

History will be made whoever wins. If Mr. Carter wins, he would be the first president from the Deep South since Zachary Taylor (1849-1850) and Mr. Ford would be the first incumbent to lose a general election since

Rhodesian Attack Reportedly Kills Several Hundred

By Robin Wright

SALISBURY, Rhodesia, Nov. 2 (WP).—Several hundred guerrillas re killed in Rhodesia's "hot pursuit" attack on at least seven rilla bases in neighboring Mozambique Sunday and yesterday, ress in Salisbury indicated today.

However, the government still has not issued an official statement any aspect of the offensive.

The punitive raid, the most extensive single action in the four-year guerrilla war, is believed to have been carried out by small groups of commandos, predominantly black, who penetrated almost 60 miles inside Mozambique in two areas—northern Tete and southern Gaza provinces. Well-informed sources said today that the Rhodesians had suffered only "light" casualties.

The 36-hour assault began early Sunday with Rhodesian sources confirming this morning that army units were back in Rhodesia. There is no indication yet whether the Rhodesians were backed up by fighter-bombers, tanks and mortars, as the Mozambique news agency alleged yesterday, although it is believed helicopter gunships and armored cars were employed.

However, the Mozambique agency said fighting was still going on today inside Mozambique between Rhodesian and Mozambican troops.

Full details are expected to be released tomorrow when officials fly journalists to the border to produce evidence from the raids.

However, there is a growing belief that the sites named by Mozambique were hit by the Rhodesians, since seven of the eight locations are known to have guerrilla camps. They include five in Tete, all within 35 miles of the border: Changara, Nura, Choco, Chicombizi and Gentu. The five are bases for attacking the northeast Rhodesian area. The three southern sites correspond to Rhodesia's southeast region.

Observers here are still uncertain about the reason for the attack at this delicate juncture, as white government officials led by Prime Minister Ian Smith and African nationalist leaders in Geneva try to negotiate a peaceful settlement of Rhodesia's 11-year-old constitutional crisis.

The only other hot-pursuit offensive into Mozambique, in early August, led to international condemnation, even from South Africa. Rhodesians admitted they killed 340 in an attack on an alleged guerrilla camp in the Hondo Valley, although Mozam-

Date Set or Rhodesia Majority Rule

ith to Fly Home, alks Resume Today

By Bernard Weinraub

ENEVA, Nov. 2 (NYT).—me Minister Ian Smith of odesia and African nationalist aders failed tonight to agree a date for the independence the territory under majority le, but scheduled another meet-for tomorrow.

Mr. Smith, who seemed tense d angry after a 1 hour 45 min-session today, said he planned return home to Salisbury tomorrow and would come back to neva when other participants the talks "come to their senses d get to grips with the problem."

A spokesman for Ivor Richard, itain's ambassador to the ited Nations, said it was announced that Mr. Smith would attend tomorrow afternoon's session before leaving Geneva. e site of the conference set up arrange for a transition to ck majority rule in Rhodesia. rticipants at the conference lude Mr. Smith, four nationalist leaders and Mr. Richard, o is serving as chairman.

Nationalist sources said tonight that the conflict over e for independence in Rhodesia a nation of 6 million blacks and 000 whites centered on African demands that a black majority government take over within a ar. Mr. Smith is insisting on majority rule in two years, according to the sources.

Biracial Regime

Although Mr. Smith and the nationalists agree on the principle of majority rule in Rhodesia, e disagreement centers on how g it would take to form a porary biracial government to ew up a new Rhodesian constiion and arrange an election th a predominantly black voter roll. The nationalists say a ar; Mr. Smith says two years. Even with a possible agreement a fixed date of independence, wever, the fundamental issue a Rhodesian settlement remains unresolved. This issue is a type of interim government at would be acceptable to the rican nationalists and Mr. ith.

What the nationalists especially r is that Mr. Smith and his odesia Front party will seek dominate the interim govment and control the handr process, enabling the white nority to retain power and erage in a new black majority ernment.

The nationalists emphasize t fixing a date of independice is only the first formal step the conference, the outcome which remains unclear. One of most pointed issues remains trol of two Cabinet portfolios w and order, and defense—the interim government. Mr.

Associated Press.
HARKING BACK—President Ford holding a campaign poster from his first—and successful—bid for Congress in 1948. He autographed it yesterday outside Wealthy Street Elementary School in Grand Rapids, Mich., where he and his wife cast their ballots.

Tearfully Praises Parents

Ford Votes in Grand Rapids, Unveils Mural on His Life

GRAND RAPIDS, Mich., Nov. 2 (AP).—President Ford cast his ballot here today and then paid a tearful tribute to his parents before heading back to the White House to await the outcome of the election.

Tears filled Mr. Ford's eyes as he watched the unveiling of an airport mural depicting his life from infant, to Michigan University football player, to congressman and finally to President.

His cheeks flushed and his voice cracking, Mr. Ford praised his mother and father, saying, "I owe everything to them."

"I'm just overwhelmed," he told the crowd at Kent County Airport, "and if I had any good sense I'd sit down."

Earlier, Mr. Ford voted at a local elementary school.

Ford and Wife Vote

He cast his ballot by punching a card in a metal, three-sided booth that lacks curtains to totally conceal a voter exercising his franchise. His wife, Betty, voted in a booth beside him.

Asked if he felt lucky, Mr. Ford said, "Sure do. Don't you think we have good reason?"

On arrival at the White House in a helicopter, the President and Mrs. Ford emerged from the craft arm in arm as a crowd applauded and two local high school bands played "The Victors," the University of Michigan fight song that was Mr. Ford's campaign anthem.

Press Secretary Ron Nessen said the Fords planned to rest until the election returns began coming in later in the day. He said Sen. Bob Dole, the Republican vice-presidential nominee, would join the President at the White House for what Mr. Nessen said is a long-planned victory party.

Televised Appeal

Last night, Mr. Ford made a televised final appeal to voters. It was a half-hour film heavy with patriotic music and scenes that showed him as a family man and chief executive.

The three networks broadcast the paid program, in each case just after Jimmy Carter's strikingly more low-key show was broadcast.

Mr. Ford's program was filled with testimonials from a varied group that included entertainer Pearl Bailey, former Democratic Rep. Edith Green of Oregon,

Special Edition For Elections

The normal distribution of the International Herald Tribune will be augmented today in more than 30 cities in Western Europe by a special U.S. elections edition. This edition, which will carry the words "Election Edition" in the upper left-hand corner of Page 1, will contain more up-to-date results of the elections than the regular editions. It will be available a few hours after regular editions of the IHT are put on sale. This special service will be available in Paris, Nice, Cannes, Monaco, Geneva, Zurich, London, Brussels, Mons, Antwerp, Luxembourg, Amsterdam, Rotterdam, The Hague, Frankfurt, Berlin, Hamburg, Cologne, Munich, Stuttgart, Mannheim, Madrid, Barcelona, Malaga, Oslo and Copenhagen.

Egyptian Aide To See Gromyko In Sofia Visit

SOFIA, Nov. 2 (UPI).—Egyptian Foreign Minister Ismail Fahmi arrived in Bulgaria for a four-day visit today during which he will hold two days of talks with his Soviet counterpart, Andrei Gromyko, the state news agency said.

Mr. Fahmi predicted an improvement in badly strained relations between the Soviet Union and Egypt before he departed from Cairo for talks here with Mr. Gromyko.

Mr. Fahmi is scheduled to stay in Bulgaria until Friday when he will fly to Yugoslavia for three days of talks in Belgrade with his Yugoslav opposite, Milos Minic.

Peter Mladenov, Bulgaria's Foreign minister, greeted Mr. Fahmi and his party at the airport. The stress of Mr. Fahmi's visit, particularly in his talks with Mr. Gromyko, will be on the Middle East situation, the new agency BTA said.

Carter Votes Early in Plains And Stays Home With Family

PLAINS, Ga., Nov. 2 (AP).—Jimmy Carter voted early today and then sequestered himself at home with his family.

The Democratic nominee planned to fly to Atlanta later to watch the election returns at a hotel.

When the results are known, Mr. Carter will make a speech at what supporters hope will be a victory celebration at Atlanta's World Trade Center, and then return to Plains.

The candidate, who ended 22 months on the campaign trail early this morning, got only about three hour's sleep before voting.

He had no comment on reports of heavy voting around the country, which was expected to help his chances. But press director Rex Granum said, "we're pleased, very pleased."

Family at Voting Site

The former Georgia governor, his wife, Rosalynn, son Chip and Chip's wife, Caron, went to their polling place at about 7:10 a.m.

The Carters waited in line until seven persons in front of them voted. Mr. Carter spent about five minutes marking his ballot and when he emerged from the booth, smiled and said: "Thank you all. Let's get our crowd out."

"I'm glad the campaign is over," he told newsmen outside. "It was a good one. I think Sen. Mondale and I adequately presented ourselves to the American people."

While Mr. Carter rested, his tiny hometown, population 683, braced for what was expected to be the largest influx of visitors it has ever seen.

In his taped nation-wide television finale last night, Mr. Carter spoke from behind a desk in his home, answering questions posed

McCarthy Goal Is 5% of Vote As Protest of 2-Party System

LOS ANGELES, Nov. 2 (AP).—In the final appearance of his independent presidential campaign, Eugene McCarthy said yesterday that he was the victim of "the greatest effort in American history to keep one man off the ballot."

When a telephone poll on a local television show gave him 4 per cent of the vote, the former senator from Minnesota, who was not put on the ballot in California, said that write-in votes would provide "a test of California voters' literacy and their determination not to be dominated by the two-party system."

Mr. McCarthy was on the ballot in 29 states. In the 21 others, he was counting on write-in votes, which are often difficult to record on state ballots.

Earlier yesterday, Mr. McCarthy received a standing ovation from about 300 students on the campus of the University of California, Los Angeles. He criticized the policies of Democratic candidate Jimmy Carter, saying that some of President Ford's proposals are better, but he added: "In the long run, I don't think either will work."

He denied that he had entered the campaign to draw votes away from either Mr. Carter or Mr. Ford, and he said he believed that he would detract about the same number of votes from each.

Some Democrats had expressed fears that votes for Mr. McCarthy would come mostly from those who otherwise would have voted for Mr. Carter, and that

Saudi and Sudanese Units on Way

Syrian Troops for Peace Force Reportedly Enter Lebanon

BEIRUT, Nov. 2 (NYT).—Syria has sent reinforcements to Lebanon to join the projected Arab peace-keeping force.

Travelers from near the Syrian frontier reported that about 3,000 soldiers crossed the border into Lebanon last night with their tanks and armored cars already painted the color of the Arab peace forces.

Reports in the Beirut press today said that Saudi and Sudanese troops have already arrived in Syria on their way here.

Other contingents from Yemen, Southern Yemen and Libya will be sent here eventually to be part of the Arab force approved by two Arab summit conferences held last month. The Arab heads of state recommended a force of 30,000 men.

Hassan Sabry al-Kholy, the Arab League special envoy, said at a press conference yesterday that Arab troops were due to arrive within 48 hours.

Mr. Kholy met Lebanese President Elias Sarkis and handed him a detailed plan for the stationing of Arab forces on the confrontation lines.

Beirut was relatively calm today after a night of heavy fighting during which shells fell on residential areas. Incendiary bombs gutted the sixth floor of the Moslem Barbir Hospital, located on the line separating the capital's Christian and Moslem districts.

According to a rightist radio station, artillery duels raged this afternoon in the north of Lebanon, between the Moslem port of Tripoli and the Christian town of Zghorta, in the hills to the east.

The plan submitted by Mr. Kholy was laid down at two days of meetings between Gen. Mohammed Hassan Ghoneim, the Egyptian commander of the initial Arab peace-keeping force sent here four months ago, and military aides of the Lebanese President.

Sources said the Christians have agreed to allow the Arab peace-keeping force to establish observation posts in Christian-held territory.

The reported agreement followed mediation by King Hussein of Jordan, who yesterday sent former Premier Zaid Rifai here to meet Christians. After the meetings, a top Christian leader, Camille Chamoun, said that the rightists have decided to cooperate in the implementation of the Arab peace plan for Lebanon.

Mr. Chamoun, who is known to be a close friend of the Jordanian monarch, had earlier said that Arab troops would not be admitted into Christian districts.

Sources noted that King Hussein's good offices came after Syrian pressure on the rightists failed to produce results. The sources said the Syrians were prepared to break through Christian lines if rightists continued to refuse to allow the observation posts for the Arab force. Syrian troops are to form the backbone of the force.

Syria Says Iraq Closes Its Border

DAMASCUS, Nov. 2 (AP).—Iraq closed its border with Syria today and strengthened military patrols along the frontier, the Damascus radio said.

The radio, monitored here, said "heavy Iraqi patrols" began appearing on the Syrian-Iraqi border this afternoon.

It said Iraqi civilian vehicles were barred from crossing into Syria and Syrian cars were prevented from entering Iraq at the Abu Kamal border post, 175 miles northeast of here.

"This nervous Iraqi behavior is a clear indication that mysterious events are taking place inside Iraq," the radio said. "The nature of these events could not be determined readily."

Informed sources said that Iraq has been threatening to take action to disrupt Syria's military peace-keeping efforts in Lebanon.

South African Editor Faces Jail for Hiding News Source

EAST LONDON, South Africa (NYT).—If Donald Woods, editor of the East London Daily Dispatch, goes to jail soon to serve a six-month sentence for declining to disclose a source of information, he says that he will be glad. And his friends, Alan Paton, the author, says that he wishes he were going with him.

"In the present climate, any white person who goes to jail can do nothing but improve the situation," said Mr. Paton, scowling with mock fierceness over the tops of his glasses at the editor. The 72-year-old author of "Cry, The Beloved Country," came here from his home near Durban, about 400 miles away, to accompany Mr. Woods in a gesture of solidarity to Grahamstown last weeks, where the supreme court heard his appeal and served judgment.

The journalist has scant hope of a reversal of the verdict, but he said over dinner at his house that he did not mind going to jail, and not only because he believes that his stand is striking a blow for freedom of the press. He said:

"It will help black-white feeling. The blacks are going to be running this country one day pretty soon and the whites will be the underdog. It will be good to have some guys who have credibility with them."

"If we only had one sort of jails John Dean went to, it wouldn't be so bad," interjected his wife, Wendy, the mother of five young children. "Five star. Those here are a bit medieval."

Mr. Woods was sentenced last December for refusing to name a witness in an alleged crime. The exceptional fact in the case, which is a focus of interest among South African liberals and journalists, is that the law in question had never been used against an editor.

In September of last year, the editor visited Justice Minister James Kruger and the head of the Bureau of State Security, the equivalent of the Central Intelligence Agency, Gen. Hendrik van den Berg, to plead for the lifting of restrictions on a black community leader. He also raised the question of harassment of blacks by the Special Branch, the security police, citing allegations of criminal conduct by a warrant officer.

Detailing Allegations

On his return here, Mr. Woods was asked by a Special Branch colonel to write a statement detailing the criminal allegations. One concerned a charge by a fellow policeman that in 1964, the warrant officer had smashed the windshield and rear window of Mr. Paton's car, which he had been detailed to follow.

The second charge concerned vandalism and burglary last year at a black community organization's office in Kingwilliamstown near here. At the officer's demand, Mr. Woods swore to the truth of his statement. He wrote later:

"I had no regrets on that score. My sworn statement would help establish whether leading officials in this country would indeed act against one of their own men for a misdemeanor or whether they would turn on me instead for complaining about a member of their staff."

A few weeks after his statement, the editor was ordered to disclose the identity of his informants.

One of them, city councilman Donald Card, stepped forward as a source. The other informant insisted on secrecy.

Blacks Shun School Tests In S. Africa

JOHANNESBURG, Nov. 2 (AP).—Hundreds of young blacks boycotted school examinations today and many of them will have to repeat a school year before they are again qualified to take the tests, which include high school finals.

In Soweto, the large township 10 miles outside Johannesburg, there was virtually a 100-per-cent boycott of the examinations. In Kathlehong township outside Germiston, east of here, students went into the examination room but left after receiving test papers.

Blacks student leaders called for the boycott in memory of more than 350 persons killed over the last four months in riots. The riots began as protests against the compulsory teaching of some school subjects in Afrikaans, the Dutch-based language of the majority of whites in South Africa.

Strike Is Failure

Although their boycott of school examinations was widely effective, the student leaders' call for a weeklong work stoppage by blacks in this area has been less successful. Johannesburg employers reported near-normal turnouts by their black staffs today. There were similar reports yesterday, the first day of the planned stoppage.

Police fired tear gas today to break up a crowd of about 350 blacks clashing over the strike call.

Maj. Gen. Dawid Kriel, police commissioner in charge of nationwide riot control, said that adults in the crowd at Kagiso township outside Krugersdorf, west of here, claimed that youths were trying to keep them from going to work.

One Hospitalized

Buses and other vehicles taking Kagiso blacks to work had to drive through a gauntlet of stone-throwing youths. At least one person was hospitalized after a stone shattered the windshield of a car.

In Alexandra township, north of Johannesburg, a black policeman was injured when his vehicle was stoned.

A mob of 150 students hijacked two vehicles and destroyed examination papers yesterday at two schools in Sibasa township, north of Pretoria.

They used the vehicles to travel between schools. Eight pupils were arrested. The police said no shots were fired and nobody was injured.

Hundreds Are Reported Dead In 36-Hour Rhodesian Attack

(Continued from Page 1)

bique charged that over 600—all Rhodesian refugees—died in the attack.

Mozambique has admitted that the Rhodesian raid coincided with a well-planned escalation in the war by Zimbabwe People's Army forces. Major penetrations and incursions have almost doubled in the last six weeks, which led some observers to claim the action was merely designed to be defensive.

Show of Strength

There is also speculation that the government was attempting to show that the government was not weakened as a result of the agreement to accept majority rule.

Today's Zambia Daily Mail offered a third reason, charging that the "wanton attack" was calculated to wreck the Geneva conference. The military aggression coincided with a new hardening of attitude by Mr. Smith and his South African counterpart, Prime Minister John Vorster, the paper said in an editorial.

However, today's lead editorial in the Rhodesia Herald countered that the assault was motivated by purely military reasons:

"The terrorists must be hammered hard and if that entails raids across the border in hot pursuit, well and good. It is senseless to sit and wait to be attacked. It does no good for the morale of the people and it can only encourage the terrorists. Our hope is that they have dealt the enemy a solid blow."

Whatever the reasons, the result is a new wave of tension. Although Rhodesians are generally pleased about the guerrilla setback, they are concerned about the possible repercussions from guerrillas and their sources of support, black Africa and the Eastern bloc.

Mozambique has already charged that "an invasion force launched a major military assault on an independent, sovereign nation," implying grounds for further support of the guerrillas with its own troops, estimated to number 15,000. There is also fear that the action will provide "an excuse" for new commitments and support from Eastern-bloc nations, especially the Soviet Union, militant African states, and Cuba, whose troops helped decide the civil war in Angola.

British Position

LONDON, Nov. 2 (UPI).—The Foreign Office said today that Britain does not recognize the right of "hot pursuit" by armed forces across international frontiers.

"Our position is that there should be no hot pursuit. We do not recognize the right of hot pursuit across international frontiers, nor is it recognized in international law," a spokesman said.

No Date Set At Geneva

(Continued from Page 1)

Smith insists that the Rhodesian settlement plan, drawn up by Secretary of State Henry Kissinger, specifies that whites retain control of these two posts. The nationalists reject this condition and demand that Africans take over the two key posts.

Following today's meeting at the Palais des Nations, the participants voiced the same conflicting opinions heard in recent days: Mr. Richard remained optimistic while Mr. Smith and several nationalist delegates were generally gloomy.

Robert Mugabe, a militant with close links to the guerrilla forces, said: "We are making progress but Smith is not."

Mr. Smith said he was uncertain when he would return to Geneva. He is leaving a delegation headed by P.K. van der Byl, Rhodesia's foreign minister, a hard liner whose acid public comments about Africans have dismayed even some members of Mr. Smith's party.

Mr. Smith said that "as soon as they are ready to get on and talk about what we have come to talk about, then I will be back."

Lower House Alters India's Constitution

Cuts Courts' Power, Increases Premier's

By William Borders

NEW DELHI, Nov. 2 (NYT).—The Lower House of Parliament today passed a sweeping set of constitutional amendments that were expected to significantly shift the balance of power in the Indian government.

The vote, of 360 to 4, with most of members of the opposition boycotting and some still in jail as political prisoners, was one of the most significant milestones so far along the authoritarian course that Prime Minister Indira Gandhi's government set on 16 months ago, when it suspended civil liberties.

Together with the government's decision, announced last Saturday, to postpone national elections for a second time, the alterations in the constitution give a new aspect of permanence to a state of affairs that had originally been presented as temporary.

"They're codifying the state of emergency, giving force of law to the concentration of power in Mrs. Gandhi's hands," said Asoka Mehta, a leader of the opposition.

"After this, there's nothing much for us," he added.

By adjusting dozens of passages in India's 26-year-old constitution, the bill passed today substantially enhances the power of Parliament and the Prime Minister and diminishes the power of the courts, which have often been a bastion of resistance to the central government's stern new posture.

The following are some of the principal changes:

• Judicial review of constitutional amendments is ended and "there shall be no limitation whatever on the constituent power of Parliament to amend" the constitution.

• Judicial review of ordinary laws is taken away from the lower courts, and the Supreme Court will henceforth be able to declare a law unconstitutional by a two-thirds majority.

• The fundamental rights section of the constitution—roughly the equivalent of the U.S. Bill of Rights—is made specifically subordinate to a section outlining "directive principles" of state action, a program of general economic and social goals.

• Parliament is empowered to enact legislation banning "antinational" activities and associations.

• India's largely ceremonial President is deprived of any political power at all, in a section directing that he "shall act in accordance" with the advice given to him by the Prime Minister and the Cabinet.

• The President, acting at the Prime Minister's direction, is empowered for two years to amend the constitution by executive order in any way that would help effect the omnibus legislation.

"In this bill, we have taken many steps which history will show are vital and necessary for the progress of our country and the prosperity of our people," Law Minister H. R. Gokhale declared in the parliamentary chamber today, just before the vote. "The most important thing we are doing is putting beyond doubt the supremacy of Parliament, in unequivocal terms."

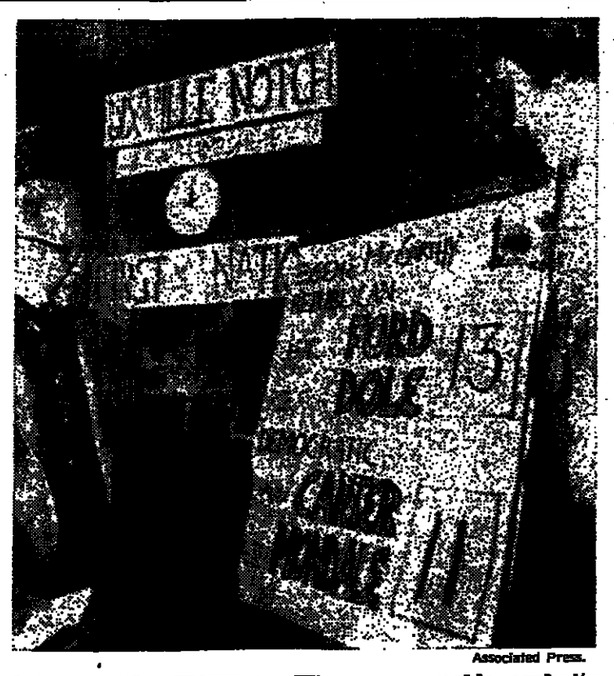
The bill is yet to be passed by the more ceremonial Upper House and by a majority of the state legislatures and to be signed by President Fakhruddin Ali Ahmed. No obstacle was expected anywhere along the line.

Its passage in the Lower House, the chamber with most political significance, was never in doubt, since the Congress party controls more than two-thirds of the seats, even with all members present.

Most of the opposition members have been boycotting Parliament since the bill was introduced early in September, protesting censorship of news accounts of the proceedings and the continued imprisonment of more than two dozen members of Parliament.

The action on the amendments is regarded by both the government and its opponents as momentous and among the most important legislative actions since June of last year, when Mrs. Gandhi declared a state of emergency in the face of what she said was a grave threat of subversion.

The government contends that the constitutional changes are necessary to achieve "socio-economic revolution" and to aiding in the war against poverty, ignorance and disease.



P. G. Mavalankar, an independent member of the opposition from the state of Gujarat, warned his colleagues across the floor that they were "opening the floodgate to regimentation and dictatorship."

Iranian Diplomat Wounded in Paris

PARIS, Nov. 2 (UPI).—Homayoun Keykavoussi, counselor of the Iranian embassy, was shot and seriously wounded and a policeman was wounded in the leg by unidentified assailants today in a residential neighborhood of northwest Paris, the police reported.

Witnesses said Mr. Keykavoussi's assailant escaped on a small motorcycle and the policeman was wounded by a second man as he gave pursuit.

The police said Mr. Keykavoussi was "in very serious condition" at Beaujon Hospital.

Associated Press.

QUADRENNIAL FIXTURE—With the inexorable regularity of presidential elections, Dixville Notch, N.H., is consistently first in with its returns and thereby gets a picture in this newspaper and in many others.

Ford Winner in First Town to Vote

DIXVILLE NOTCH, N.H., Nov. 2 (Reuters).—The 26 voters in this little town near the Canadian border today gave Gerald Ford 13 votes, Jimmy Carter 11 and Eugene McCarthy one in the first results of the presidential election.

The other ballot was declared void because it was not filled out properly.

The town has given a plurality to the loser in every presidential election except 1972, when Richard Nixon beat Sen. George McGovern.

The 29 residents of the town—the voters and three children—gathered at a hotel for a buffet before the poll opened at midnight and closed shortly afterward.

Near-Record Voter Turnout Is Reported Across the U.S.

(Continued from Page 1)

Herbert Hoover in 1932. If Mr. Ford wins he will have rallied from farther behind than any presidential candidate since the advent of modern polling.

The Electoral College vote, which cannot be reckoned from poll figures that measure only the likely popular-vote trend, is the determining one, with 270 votes required for election.

The presence of Mr. McCarthy on the ballot in 29 states could conceivably deprive either major candidate of an electoral majority, but it is considered highly unlikely that he will win any state's electoral votes. Wisconsin, where he won the 1968 Democratic primary, could be his strongest state.

Key States

The focus on the electoral vote makes a string of major industrial states from New York west through Illinois the key ones to watch as the votes are counted, plus a few smaller states rated as toss-ups: Iowa, South Dakota, South Carolina and Mississippi.

The candidates, like other Americans, could only vote and wait. Besides control of the White House, at stake were 33 Senate and all 435 House seats. The Democrats were expected to retain control of both chambers.

Voters in 14 states are choosing governors, and Democrats are almost certain to retain their present hold on executive mansions around the country by a margin of nearly 3 to 1.

There are about 150 million voting-age U.S. citizens, approximately two-thirds of them registered. In the last presidential election, 55 per cent of the potential electorate voted.

With Mr. Carter's once-towering lead in the polls having dwindled to near deadlock, the outcome could hinge on the size of the turnout.

Organized labor staged a massive effort to get its troops to the polls for Mr. Carter and the Democratic ticket, and the Republicans were using a huge telephone bank to contact voters.

Among the major states, larger counties in California showed early voting with a higher-than-expected turnout in some districts. San Francisco officials said voting was "hectic" in the first hours.

Election officials forecast a 75-per-cent turnout of 2 million registered voters in New York City, considered a Democratic stronghold, and early turnouts were moderate to heavy in suburbs and up state. Some forecasts predicted a state wide turnout of 80 per cent.

Michigan, President Ford's home state, expected a record turnout of 3.7 million voters, 72 per cent of those registered.

In Mr. Carter's home state, Georgia, lines were so long in early voting at some Atlanta precincts that would-be voters gave up in disgust after waits of up to 90 minutes and said they would come back later. Voting through the entire South was heavy.

Alfred Hostede, campaign manager for Sen. Hubert Humphrey, said voting in Minnesota was "fantastically high," regarded as a good sign for the state's other senator, Walter Mondale, the Democratic vice-presidential candidate.

Kansas, home state of the Republican vice-presidential candidate Sen. Robert Dole, estimated 80 per cent of the voters would turn out, which would be a record figure.

Ohio had a very heavy early turnout, aided by a massive voter drive by organized labor. An Illinois election official projected that 73.5 per cent of the state's 6 million registered voters would cast their ballots.

AP.

Independent E. McCarthy

McCarthy's Aim Is 5%

(Continued from Page 1)

in states where the Ford-Carter race was close, Mr. McCarthy could tip the balance of victory to Mr. Ford.

Mr. McCarthy told the students that even if votes for him did not have an immediate impact, they could help change the course of history.

"We're hopeful that with your help we will demonstrate something which will have meaning, if not in 1976 then in 1984," he said.

He reiterated that his candidacy's purpose was to win a change in election laws and allow more candidates adequate exposure. He said a vote of at least 5 per cent for him would show that the electorate is unhappy with the system.

Mr. McCarthy said his fight for a line on state ballots had distracted him from discussing other issues, such as a need to fight waste in the economic system, specifically by outlawing the production of oversized automobiles.

A-Bomb Plea

He was loudly cheered when he declared: "We ought to have someone in the race who says we're not going to go on producing nuclear bombs."

At a press conference preceding the UCLA speech, Mr. McCarthy blamed the news media for his inability to reach a substantial portion of voters with his views. He noted that he was denied participation in televised presidential debates, and claimed he was given little coverage by the broadcast networks.

"The press stood by watching all these violations of constitutional freedoms," Mr. McCarthy said.

Dutch-Soviet Flights

MOSCOW, Nov. 2 (Reuters).—The Dutch and Soviet airlines have agreed to continue flights between Moscow and Amsterdam for a further month pending discussions on a revenue-sharing dispute, Western airline sources said yesterday.

44 Members Face No Major Opposition

Democrats Expected to Hold Hous

WASHINGTON, Nov. 2 (AP).—Democrats have a fast start toward keeping decisive control of the House: 44 of them were virtually elected the moment the polls opened today because they have no major opposition.

Only six Republicans had no major opposition.

Democrats control the current Congress 2-1, with 290 seats to the Republicans' 146. The Democrats appeared certain to keep 220 of those seats in today's election and were favored to win another 60 or so.

But Democratic campaign officials concede that Republicans are likely to win back some of the 43 seats they lost in 1974 because of Watergate. The GOP could win up to 15, the Democrats say if the voter turnout is low.

Realistic Bet

Republicans hope for more, but consider 15 their most realistic bet.

Some of the races to watch:

• House Ethics Committee chairman John Flynt's rematch with Republican challenger Newt Gingrich, rated a toss-up in Atlanta.

• Ohio Democrat Thomas Ashley's effort to keep his seat and stay in line to become chairman of the House Merchant, Marine Committee.

• Kansas Democrat Martha Keys' effort to win re-election against allegations that her divorce and remarriage to Indiana Democrat Andrew Jacobs raises questions about her area loyalty. She calls those allegations sexist, saying that no such question is raised against Rep. Jacobs.

• Democrats' efforts to unseat three veteran Michigan Republicans—Reps. Elford Cederberg, Philip Ruppe and Garry Brown. All three are favored to win, but not as easily as before.

Utah Democrat Allan Howe is expected by Democrats and Republicans to lose because of his two convictions of soliciting sex from police decoy-prostitutes.

But allegations of sexual or financial misconduct do not appear to have hurt more than a dozen other House candidates.

Even if the Republican-Democratic lineup stays about the same, today's election will change the House's philosophical tone somewhat by installing a second huge crop of freshmen.

Record Retirements

There will be at least 53 freshmen because of a record number of retirements. Upsets of present congressmen could boost the number of freshmen close to the 92 new members elected in 1974.

If so, close to half the 435 House members next year will have been there for two years or less.

But the House is not likely to gain more women or black members.

Three of the 15 women House members have left and only two are assured of retaking their seats. Two or three more have some chance of winning.

All 17 black House members were favored to win re-election, but no other black House candidates were given much chance.

Thirty-one of the 44 Democrats who face no major opposition are Southerners. Four of the six Republicans who have no major opposition also are Southerners.

Here is a state-by-state list of House candidates with no major opposition:

Alabama—Democratic Reps. Bill Nichols and Walter Flowers and Democratic challenger Ronnie Flippo.

Arkansas—Republican Rep. John Hammerschmidt and Democratic Rep. Ray Thornton.

California—Democratic Rep. Charles Wilson.

Florida—Democratic Reps. Robert Sikes, Don Fuqua, Charles Bennett, Bill Chappell jr. and Paul Rogers.

Georgia—Democratic Reps. Bo Ginn and Dawson Mathis and Democratic challenger Doug Barnard.

Indiana—Democratic Rep. Lee Hamilton.

Kentucky—Democratic Rep. John Breckinridge.

Louisiana—Democratic Reps. Lindy Boggs, Joe Waggonner jr. and Gillis Long.

Maryland—Democratic Rep. Parren Mitchell.

Massachusetts—Democratic Reps. Joseph Early, James Burke and Gerry Studds and Republican Rep. Margaret Heckler.

Minnesota—Democratic Rep. James Oberstar.

Mississippi—Democratic Rep. Jamie Whitten.

New York—Democratic Reps. Joseph Addabbo, James Delaney, Charles Rangel.

North Carolina—Democratic Reps. L.H. Fountain and Richardson Preyer.

Ohio—Democratic challenger Mary Rose Oakar.

Oregon—Democratic Rep. Robert Duncan.

Pennsylvania—Republican Rep. E.G. Shuster.

South Carolina—Democratic Rep. Butler Derrick.

Tennessee—Democratic Reps. Clifford Allen and Ed Jones and Democratic challenger Albert Gore jr.

Texas—Democratic Re Charles Wilson, Jack Brin Omar Burleson, Henry Gonz and Abraham Kazen jr. and publican Rep. Bill Archer.

Virginia—Democratic R David Satterfield 3d and W. Daniel and Republican R. Caldwell Butler and Ken Robinson.

West Virginia—Democratic John Slack.

Wisconsin—Democratic Clement Zablocki.

Helms Resigns Post As U.S. Envoy in Iran

WASHINGTON, Nov. 2 (UPI).—Richard Helms, the former director of the CIA, has resigned as U.S. ambassador to Iran, administration sources said today.

The sources said Mr. Helms decided to quit before a winner was announced in the presidential election in order to make it plain that he wanted to step down no matter who was elected. They said Mr. Helms, 64, decided it was time to leave after more than 30 years of government service.
